## THE UNIVERSAL DECLARATION OF Human Rights

recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of justice and peace in the world,

disregard and contempt for human rights have resulted in barbarous acts which have outraged the conscience of mankind, and

of a world in which belief and freedom have been inspired of it is essential, if peace is to be maintained, that the rights of man should be protected by law.

the peoples of the United Nations have in the Universal Declaration of Human Rights proclaimed the fundamental rights of every individual

All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood.

Everyone is entitled to all the rights and freedoms set forth in this Declaration, without distinction of race, language, religion, political opinion, national origin, property, birth or other status.

determined to promote social progress and better standards of life in larger freedom.

WHEREAS Member States have pledged themselves to achieve, in co-operation with the United Nations, the promotion of universal respect for and observance of human rights and fundamental freedoms;

## DÉCLARATION UNIVERSELLE DES Droits DE L'Homme

que la reconnaissance de la dignité inhérente à tous les membres de la famille humaine et de leurs droits égaux constitue le fondement de la liberté, de la justice et de la paix dans le monde,

considérant que la méconnaissance et le mépris des droits de l'homme ont conduit à des actes de barbarie qui révoltent la conscience de l'humanité et que l'adoption d'un monde où les hommes se libèrent de la terreur,

droits des hommes et des femmes, et qu'il est déclaré à cet effet que la reconnaissance de la dignité inhérente à tous les membres de la famille humaine et de leurs droits égaux constitue le fondement de la liberté, de la justice et de la paix dans le monde,

CONSIDÉRANT que les États Membres se sont engagés à assurer, en coopération avec l'Organisation des Nations Unies, le respect universel et effectif des droits de l'homme et des libertés fondamentales,

CONSIDÉRANT qu'une reconnaissance effective des droits et libertés de l'homme est essentielle à la paix, à la justice et à la liberté dans le monde,

## DECLARACION UNIVERSAL DE Derechos del Hombre

que la libertad, la justicia y la paz en el mundo tienen por base el reconocimiento de la dignidad inherente y de los derechos iguales e inalienables de todos los miembros de la familia humana;

de hombres y mujeres, y se han declarado resueltos a promover el progreso social y a elevar el nivel de vida dentro de un concepto más amplio de la libertad;

la dignidad humana es completa, si y sólo si se garantiza la libertad política, económica, social y cultural.

Todas las personas o todos los pueblos tienen el deber de promover y observar el cumplimiento de los derechos y libertades proclamados en esta Declaración.

## ВСЕОБЩАЯ ДЕКЛАРАЦИЯ ПРАВ ЧЕЛОВЕКА

признавая во всем мире, что только при признании и осуществлении прав человека и свобод можно надеяться на установление справедливости и мира в мире;

признавая во всем мире, что только при признании и осуществлении прав человека и свобод можно надеяться на установление справедливости и мира в мире;

ARTICLE 1. - Toute personne a droit à un traitement égal et à une reconnaissance de sa dignité inhérente. En ce sens, tous les hommes naissent libres et égaux en dignité et en droits. Ils sont doués de raison et de conscience et doivent agir les uns envers les autres dans un esprit de fraternité.

## manpower and labour relations REVIEW

Economics and Research Branch, Department of Labour, Canada

### Current Manpower Situation

EMPLOYMENT INCREASED more moderately during June following the strong gains of the two previous months. Total estimated employment at June 21 was 5,794,000, some 129,000 higher than the previous month but 40,000 lower than June last year. The employment decline from a year ago was confined to males; female employment showed a gain of 2.4 per cent.

Weakness in non-agricultural industry in Ontario and British Columbia was largely responsible for the relatively small gain in June. In Ontario, automobile plants in Windsor and Oakville, nearing the end of the production year, laid off substantial numbers of workers for short periods. These production cutbacks and others in supplying industries partly offset a strong recovery in construction. On the west coast the seasonal upswing was retarded by a combination of industrial disputes, unfavourable weather conditions, and continued weakness in some manufacturing industries.

Manpower requirements during June reduced the level of unemployment, although it was still much higher than it has ever been at this time of year. The number of persons without jobs and seeking work, some 320,000, was 5.2 per cent of the labour force, compared with 2.7 per cent a year earlier.

Strong advances in forestry and construction accounted for 60 per cent of the employment gain in June. Construction employment reached almost 500,000, about 30,000 higher than a year earlier. The recovery in this industry has largely been stimulated by a record-breaking housebuilding program. The year-to-year increase in new housing units started was smaller in June than in the preceding months; the six-month total, however, is 66 per cent higher than the comparable 1957 figure. Activity in non-residential construction, on the other hand, was still lagging behind last year's level.

Forestry employment recovered from an unusually low level in April and May, mainly as a result of hiring for pulpwood cutting in Quebec and the Atlantic provinces. Some 28,000 workers were added to payrolls in June, bringing the industry estimate to 96,000, about 10 per cent lower than a year earlier. Because of continued slackness in pulp and paper production,

|          |                |               |                |                |
|----------|----------------|---------------|----------------|----------------|
| <b>A</b> | <b>Monthly</b> | <b>Labour</b> | <b>Gazette</b> | <b>Feature</b> |
|----------|----------------|---------------|----------------|----------------|

reduced rates of pulp cutting are expected to prevail at least through the summer months.

Manufacturing employment continued to advance at a relatively slow pace with considerable divergence among component industry groups. One of the dominant features was the continued slackness in automobile production, which was down 7 per cent from a year earlier in June and 19 per cent in the first six months.

The upsurge in residential construction has been reflected in production and employment increases in the manufacture of construction materials, plumbing fixtures and heating equipment, but not as yet to any great extent in appliance sales. Producers of heavy electrical apparatus and machinery reported no improvement during the second quarter, with order backlogs still decreasing at mid-year. Steel production, though lower than a year earlier, held up relatively well during the month.

## Labour Force Developments

The sharp reduction in immigration this year has had its expected effect on the growth of the labour force. Except for a temporary upsurge in March and April, the labour force, seasonally adjusted, has shown little change since last fall. The actual figure for June (6,114,000) was only 2 per cent higher than a year earlier, compared with increases close to 4 per cent for most of last year.

Although the increase in the labour force will almost certainly continue to be smaller than it was last year, several factors are exerting a long-term upward pressure on the growth rate. One of the more important of these is the changing age distribution of the population, which is bringing an increasing number of young persons into the labour market. A recent population projection has shown that the size of the 14-19 age group, after remaining virtually unchanged in the previous 20 years, may increase by as much as 52 per cent between 1955 and 1965. The year-to-year increase of this age group reached 5 per cent in 1957, dropping slightly in the first half of 1958.

Since large numbers of experienced workers are still unemployed, opportunities for the young and inexperienced have been relatively scarce this year. The lack of demand has been only partially reflected in the unemployment rate. The participation rate (i.e., the number working and looking for work as a proportion of the population of working age) has also dropped sharply, so much so that the labour force in this age group was smaller in June 1958 than a year earlier. This is only partly the continuation of a long-term trend (the participation rate of the 14-19 age group has been declining steadily

for many years). The size of the drop suggests that there is hidden unemployment in this age group, and that more would be working or seeking work if job opportunities were more plentiful.

## LABOUR FORCE CHARACTERISTICS

Selected Age Groups

(Thousands of persons aged 14 and over)

## Industrial Employment Trends

Almost all of the industries in which employment declined in the last half of 1957 have shown some improvement since the turn of the year. The increase in manufacturing has been small and in mid-June employment was about 4 per cent lower than a year before. Forestry employment has increased more than seasonally in recent months after declining sharply last winter. Construction employment has shown a similar sharp increase; in the two months April to June it rose by 132,000, compared with a rise of 86,000 in the same period last year. This gain more than made up for earlier losses, so that in June construction employment was 7 per cent higher than a year ago.

Employment was maintained during the first half of 1958 at a higher level than last year in all of the distribution and service industries except transportation. Community and public services showed further employment expansion, marking a continuation of the long-term growth pattern that has featured the industry throughout the postwar period. Employment in trade was 2 per cent higher than last year, and utilities, finance and insurance showed modest year-to-year advances. In transportation, employment was about 2 per cent lower during the first half of 1958 than it was last year.

The current slowdown in activity in the transportation industry can be attributed largely to a decline in freight shipments, particularly of rail cargo. As early as February 1957 railway carloadings showed a decline. Since then, the total number of cars loaded with revenue freight has decreased, on a seasonally adjusted basis, by 9 per cent. Reflecting this decline, employment in steam railways, seasonally adjusted, fell by 11 per cent during the same period. Total transportation employment held up fairly well until early in 1958 as a result of conflicting trends in the industry last year.

In truck transportation employment expanded steadily throughout 1957, offsetting losses in steam railways. Water transportation showed an irregular trend throughout the year so that the average level of employment was only slightly lower than in the previous year. In the first half of 1958 employment contractions occurred in all three major sectors of transportation. From January to May an over-all decline of 2.2 per cent, seasonally adjusted, was recorded.

The more rapid decline in rail transportation can be attributed in part to a sharp drop in foreign trade during the period under review. In the last quarter of 1956 and the first quarter of 1957 exports declined markedly as a result of reduced foreign demand for lumber products. Exports of grain increased during the summer of 1957, making up for much of the loss in forestry trade, but since the end of the year exports of a number of bulk products have shown declines, particularly grain and grain products, newsprint, woodpulp and lumber.

A decline in imports has had an even more pronounced effect on activity in the rail transportation industry. After reaching a record high level late in 1956 the volume of imports has declined steadily; a drop of 6 per cent has been recorded since mid-summer of 1957. In 1956 capital goods figured largely in the volume of imports. Since then, imports of capital goods have fallen sharply owing to a slowdown in the rate of plant expansion in Canada.

Employment in truck transportation held up fairly well in the first half of 1958. A moderate employment decline was recorded during

the first quarter but by May there were definite signs of a recovery. While this industry is still small in relation to total transportation employment, it has grown rapidly since the end of the war. In the decade 1947-57 employment in the trucking industry more than doubled. By 1957 it accounted for 8.5 per cent of total employment in the transportation industry, compared with 4.8 per cent 10 years earlier.

(a) Distribution of these figures between male and female workers can be obtained from *Labour Force*, a monthly publication of the Dominion Bureau of Statistics. See also inside back cover April *Labour Gazette*.

(b) See inside back cover April *Labour Gazette*.

(c) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

(d) This unusually large number is due to the Queen's birthday being in the survey week.

# Labour-Management Relations

## The Bargaining Scene

NEGOTIATIONS affecting at least one third of the workers covered by collective agreements in Canada were in progress during the past month. Of the larger agreements, surveyed from month to month in this article, 91 covering 430,000 workers were open. These involved some major bargaining relationships in the steel, automobile, railway, pulp and paper, B.C. logging, meatpacking and other industries. Thirteen settlements were reached in the group of agreements covering 1,000 or more workers. Added to 32 other settlements in this group reached since the beginning of the year, the pattern of wage changes in the first six months of 1958 has been as follows:

*Wages Changes—Agreements Signed in 1958*

| Cents per Hour | Duration of Contract |         |         |       |
|----------------|----------------------|---------|---------|-------|
|                | 1 to 2 years         | 2 years | 3 years | Total |
| 0- 4.9         | 1                    | —       | —       | 1     |
| 5- 9.9         | 8                    | 9       | —       | 17    |
| 10-14.9        | 4                    | 5       | —       | 9     |
| 15-19.9        | 4                    | 4       | 1       | 9     |
| 20-24.9        | 1                    | 2       | —       | 3     |

# Manpower Situation in Local Areas

## ATLANTIC

EMPLOYMENT in the Atlantic region increased seasonally during June. In the week ended June 21, the number of persons with jobs was estimated at 519,000, about 21,000 more than in the previous month but 24,000 fewer than a year earlier. Non-farm activities were entirely responsible for the rise in employment during June. Farm employment declined as usual, since spring seeding was completed in most areas early in the month.

Seasonal rehiring continued during June in construction, transportation, fishing, lumbering and logging. The rise in construction employment was smaller than expected, however, for bad weather caused the postponement of work on a number of large projects. Prospects for construction were considerably brighter than a year ago as a result of a sharp increase in expenditures on roads and highways and a moderate recovery in housebuilding. The considerable improvement in the lumber industry during the month was attributed to increased housebuilding in Canada and the United States. Little change took place in total manufacturing employment; layoffs at the Halifax shipyards and at a steel fabricating plant at Amherst were offset by hirings in other plants.

Since the beginning of the year production and employment in manufacturing have been well below last year's. In May, total manufacturing employment was 7.8 per cent lower than a year before and 6.6 per cent lower than in May 1956. The iron and steel industry showed the most marked year-to-year employment decline (19 per cent). Decreases of 11 per cent and 4 per cent, respectively, were recorded in transportation employment and pulp and paper manufacturing.

Unemployment in the region declined during the month but was still higher than a year earlier. Six of the 21 areas in the region were reclassified during June from the substantial to the moderate surplus category. At July 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 9 (0); in moderate surplus, 12 (9); in balance, 0 (12).

### Local Area Developments

**St. John's** (metropolitan). Remained in Group 1. Total employment continued at a slightly higher level than last year. Unemployment was also higher than a year ago, as activities in some seasonal industries were slow in picking up. While the volume of construction planned for the current year was at least as great as last year, few large projects had been started by the end of June.

→ The areas shown in capital letters are those that have been reclassified during the month; an arrow indicates the group from which they moved. For an explanation of the classification system used, see inside back cover April issue.

The fishing industry was quite active during the month and catches were reported to be better than last year. A cutback in steel production at the Dosco plant in Sydney resulted in reduced mining activity at the Bell Island Iron Ore Mine; there were no layoffs reported in June but the work week was reduced from five to four days.

**New Glasgow** (major industrial). Remained in Group 1. A year ago labour demand and supply were in approximate balance in this area; currently job opportunities are scarce in all occupations. Iron and steel plants contributed to much of the year-to-year employment decline. Two of the three mines in the area operated on a reduced work week throughout the month. There was little improvement in construction as no large projects were undertaken during June.

## QUEBEC

EMPLOYMENT rose seasonally in the Quebec region during the month, as activity in both agriculture and non-agricultural industries continued to increase. At June 21, the number of persons with jobs in the region was estimated at some 1,624,000, about the same as last year, and an increase of 54,000 from last month. The usual influx of young people from school and university caused a considerable rise in the labour force; the increase was almost at last year's record rate. Consequently, the number of persons without jobs and seeking work fell less than seasonally and remained well above the level of a year ago.

Cold and wet weather retarded seeding operations and reduced vegetable crops, but agricultural employment rose during the month almost to the level of a year ago. The number of men at work in the woods rose by some 50,000 from mid-May to mid-June, compared with a rise of some 10,000 in the corresponding period last year. The number working this year, however, was still about 16 per cent lower than last year. Summer pulpwood cutting was well under way although the planned output is down sharply from a year ago. Construction activity rose during the month; in May, housing starts were more than 60 per cent higher than last year. Employment in the service industries increased during the month and remained above last year's level.

While most textile plants in the region continued working on a short-time basis, some improvement occurred in plants in Shawinigan Falls and Trois Rivières. Activity rose in the manufacture of leather products but slackened seasonally in the manufacture of clothing. Employment rose slowly during the month in plants manufacturing iron and steel products, transportation equipment and wood products. At pulp and paper mills, production was stable but still below capacity.

During the month seven of the 24 labour market areas were reclassified, all from the substantial to the moderate labour surplus category. At July 1, the areas were classified as follows (last year's figures in brackets): in substantial surplus, 11 (0); in moderate surplus, 13 (14); in balance, 0 (10).

### Local Area Developments

**Montreal** (metropolitan). Remained in Group 2. Employment remained moderately lower than a year earlier. Housebuilding activity was particularly strong during June (some 69 per cent more housing starts were made in May than a year before) and commercial building was showing signs of a good recovery. Clothing plants also were active, although the season was coming to an end; employment rose in plants manufacturing leather products. Slow improvement continued through the month in iron and steel products plants, though foundries were still laying workers off. There were some new hirings in aircraft plants but an indefinite layoff of some 800 men occurred at the Ville St. Pierre plant of Canadian Car Company. Employment continued rising in the food and beverages industry, in transportation and the services.

**Quebec-Levis** (metropolitan). Reclassified from Group 1 to Group 2. Employment in May was about 2 per cent lower than a year before. Registrations fell by some 20 per cent during June as activity picked up in construction, reflecting a recovery in housing and institutional building; there was a shortage of bricklayers in Levis. In machine shops, garages and in the shipyards, work was brisk during the month. Short time still prevailed at the Montmorency cotton mill; employment in the manufacture of clothing fell seasonally. Employment in the manufacture of wood products rose during the month. At mid-month, some 5,000 men were working on the logging drive in the St. Maurice region, the same number as last year. Hotels and restaurants were hiring seasonally.

**Sherbrooke** (major industrial). Reclassified from Group 1 to Group 2. Employment in May was down 10 per cent from a year earlier as a result of weakness in all three of the area's dominant industries: textiles, iron and steel products, and clothing. Some slight improvement was evident during June. Employment in the manufacture of boots and shoes rose somewhat earlier than usual. Production increased in the manufacture of wood and paper products, and both residential and non-residential construction were active. Short time and layoffs continued, however, at textile plants.

### ONTARIO

EMPLOYMENT in Ontario continued to increase during the month. Persons with jobs at June 21 were estimated at 2,123,000, an increase of 30,000 from the previous month but a drop of 27,000 from a year earlier. Non-agricultural employment accounted for about two thirds of the total increase during the month and showed a small year-to-year gain. Unemployment declined slightly during the month but remained much higher than last year.

Construction accounted, directly and indirectly, for most of the increase in non-agricultural employment. The number of housing units started in the second quarter this year was 33 per cent higher than in the corresponding period a year ago. In the non-residential sector also there was a noticeable increase in labour requirements. Increased construction activity boosted employment in a number of industries, particularly in iron and steel, wood products, construction machinery, and heavy electrical equipment.

The stimulating effect of construction was largely offset by unfavourable developments in the automotive industry. Motor vehicle production in June dropped by about 12 per cent and was 7 per cent below the low level of a year earlier and 30 per cent lower than in June 1956. This resulted in a one-week shutdown of the Chrysler plant at Windsor and a temporary layoff of 2,500 automobile workers from Ford's Oakville plant. The automotive supply industries also reported a considerable curtailment in production during the month. These declines could not fail to affect output and employment in other industries that depend largely on the automotive industry, and appear to have been mainly responsible for the levelling off in iron and steel production during June, and the slight downturn towards the beginning of July. The farm implements industry, another big steel user, continued to reduce production for seasonal reasons. Employment in forestry showed a noticeable seasonal increase but remained about 30 per cent lower than last year.

Five of the 34 labour market areas in the region were reclassified during the month, two from the substantial to the moderate surplus category and three from moderate surplus to balance. At July 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 3 (1); in moderate surplus, 21 (4); in balance, 10 (29).

### Local Area Developments

**Metropolitan Areas** In which classification remained unchanged. *Hamilton* (Group 2)—Employment continued to increase during the month but was about 5 per cent lower than a year earlier.—The improvement in June was due mainly to construction. Reduced demand resulted in small layoffs in the metalworking industries. The farm implements industry reached its seasonal production peak and laid off about 450 workers. *Ottawa-Hull* (Group 3)—The employment situation continued to improve during the month and employment neared last year's level. All industries were busy, with the exception of a wire producing plant, which went on short time, and the pulp and paper industry, which showed a decline in activity. The demand for farm labour continued to exceed local supply and could be met only by farm labourers from the Maritimes. *Toronto* (Group 2)—Employment showed

a small increase during the month, due mainly to increased construction activity, but was somewhat lower than last year. The metalworking industry showed little change, employment increases in fabricated iron and steel being offset by declines in other industries. The wood products industry operated at a high level. There were some shortages of auto mechanics and experienced farm hands. *Windsor* (Group 1)—The area continued in substantial labour surplus despite increased construction activity, with total employment down almost 20 per cent from a year earlier. Decline in automobile production and considerable layoffs from automotive supply plants were mainly responsible for the labour surplus.

**Chatham** (major agricultural). Reclassified from Group 1 to Group 2.

## PRAIRIE

EMPLOYMENT conditions continued to improve in the Prairie region during the month. Persons with jobs at June 21 were estimated at 1,045,000, an increase of some 12,000 from a month earlier and a gain of some 15,000 from a year ago. Unemployment declined less than usual for the month and remained well above the level of last year; it was lower, however, than in any other region in Canada.

Increased activity in non-agricultural industries was entirely responsible for the rise in employment, with construction work predominating. Housing provided much of the employment strength in construction but there were also marked increases in industrial and commercial building. Total manufac-

turing employment increased during the month, notably in plants producing building materials. Weaknesses continued, however, in the iron and steel and transportation equipment industries. Increased passenger and freight traffic resulted in the recall of substantial numbers of workers in the railway running trades, and the greater volume of grain shipments also contributed to the rise in transportation employment.

Farm labour requirements declined during the month following the completion of seeding operations. Crop prospects brightened towards the end of June as a result of heavy rains, though drought conditions persisted in southern Manitoba and southeastern and central Saskatchewan.

Industrial employment showed improvement during the first five months of the year: in May it was less than 1 per cent lower than a year earlier compared with a 2 per cent year-to-year difference in March. Much of the improvement was due to strength in the construction industry. In January 1958 employment in the construction industry was more than 8 per cent lower than a year before; by May it was more than 4 per cent higher. Manufacturing employment, however, was more than 3 per cent lower during the

five-month period this year than last. Transportation employment has also been lower than last year, although the year-to-year difference has been narrowing since March. Labour requirements have continued strong in the service, finance and trade industries.

Twelve of the 20 labour market areas were reclassified during the month, three from the substantial to the moderate surplus category and nine from the moderate surplus to the balanced category. At July 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 1 (0); in moderate surplus, 7 (0); in balance, 12 (20).

### Local Area Developments

**Calgary** (metropolitan). Reclassified from Group 2 to Group 3. Industrial employment rose during the month, largely owing to seasonal gains in construction. Total employment in May was about 1 per cent lower than a year before.

**Winnipeg and Edmonton** (metropolitan). Remained in Group 2. Total industrial employment in these two areas was about the same as last year. In June, construction and manufacturing showed seasonal gains. The rise in construction employment, however, was slow in Winnipeg; in Edmonton lower production of oil affected over-all employment.

**Fort-William-Port Arthur** (major industrial). Reclassified from Group 1 to Group 2. In May total employment was slightly lower than a year ago largely because of substantially lower employment in forestry. Employment rose seasonally in June as a result of increased construction and transportation activity. At the Lakehead, forestry employment rose seasonally, but at mid-month was still more than 20 per cent lower than last year.

**Brandon, Lethbridge, North Battleford, Regina, Red Deer and Saskatoon** (major agricultural). Reclassified from Group 2 to Group 3.

**Yorkton** (major agricultural). Reclassified from Group 1 to Group 2.

### PACIFIC

INDUSTRIAL disputes, unfavourable logging weather, and continued weakness in the demand for some products slowed down the seasonal employment recovery during June. At June 21, persons with jobs were estimated at 483,000, an increase of 12,000 over the previous month but a decrease of 6,000 from a year earlier. This includes a somewhat greater year-to-year loss (13,000) in non-agricultural industries, partly offset by a gain in agriculture.

As a result of the marked rise in housebuilding in Canada and the United States and further improvement in overseas markets, lumber production in the first five months of 1958 has shown a rise of 11 per cent over 1957. For several

reasons, however, logging operations have not shown a similar improvement. Inventories of saw-logs have been fairly high and the requirements of pulp and paper firms have been lower than last year. In addition, the possibility of a strike in the industry has made logging operators reluctant to increase production above the minimum necessary to meet current needs. Enforced closure of operations owing to fire hazards was an additional retarding factor in the last half of the month.

Construction employment in the region is currently down more than one-third from last year. This is in part a reflection of labour-management disputes, the most important involving 1,000 plumbers, pipefitters and steam fitters, and affecting mainly the larger construction projects in the Vancouver area. Activity in housebuilding has been sharply higher than last year, the number of units started in the first half of this year being two-thirds higher than in the same period in 1957.

The picture in the mining and smelting industries showed some improvement. At the beginning of May, the year-to-year employment declines amounted to 19 per cent and 8 per cent, respectively. There were, however, no further layoffs of any size during June and plants in Trail and Kitimat recalled some of the workers previously released.

Production and employment in most manufacturing industries were lower than last year, reflecting, to some extent, reduced requirements of construction and logging. Activity in shipbuilding has declined fairly steadily. One pulp and paper firm shut down during June pending an improvement in the market and others were operating below capacity. On the other hand, employment in lumber and plywood manufacturing, though still lower than last year, has improved steadily.

Moderate or substantial labour surpluses prevailed in all areas of the region. The classification of the 10 labour market areas at July 1 was as follows (last year's figures in brackets): in substantial surplus, 3 (0); in moderate surplus, 7 (2); in balance, 0 (8).

### Local Area Developments

**Vancouver-New Westminster** (metropolitan). Remained in Group 1. Employment in May was about 7 per cent lower than a year earlier with decreases in virtually all industries. The most noticeable curtailment was in construction, brought about by a prolonged dispute in the plumbing and electrical contracting trades. Registrations at NES offices declined only slightly during the month, remaining about double last year's figure.

**Victoria** (major industrial). Remained in Group 2. Unemployment rose during the month, contrary to the usual pattern. Much of this increase was the indirect effect of a seamen's strike, which drastically reduced tourist traffic, causing layoffs at hotels, restaurants and other service establishments. Activity in construction and shipbuilding continued to be slack for this time of year.

**Central Vancouver Island** (minor). Reclassified from Group 2 to Group 1. Fire hazard resulted in a temporary closure of all logging operations.

**Cranbrook, Okanagan Valley, Prince Rupert** (minor). Reclassified from Group 1 to Group 2.

# NOTES OF CURRENT INTEREST

## **Dept. Appoints Specialist In Technical Training**

David Bridge, Director of the Aeronautical, Mechanical and Metallurgical Department of the Ryerson Institute of Technology in Toronto, has been appointed Technical Training Specialist in the Department's Vocational Training Branch. He took over his new post on June 1.

Mr. Bridge's appointment is part of the Department's long-range program to keep abreast of changing developments in the field of skilled and technical manpower. His responsibilities will include the promotion, co-ordination and development of all types of advanced technical training below professional level, with special attention to post-secondary courses in institutes of technology.

He will work in close co-operation with the provincial government agencies concerned with technical training. He will also act as executive secretary of a special committee of the Canadian Vocational Training Advisory Council dealing with the training and certification of technicians.

Born in Kincardine, Ont., Mr. Bridge was graduated in electrical engineering from the University of Toronto in 1930, and holds a Bachelor of Pedagogy degree from the same university. After experience in the electrical manufacturing industry, he became a teacher at Hamilton Technical Institute, later being promoted to head of the mathematics department and subsequently Academic and Vocational Director of the Institute. In 1951, he was appointed Director of Ryerson's Aeronautical, Mechanical and Metallurgical Department.

## **F. S. Hatcher Has Joined Rehabilitation Branch**

Frank S. Hatcher of Vancouver has been appointed to the staff of the Co-ordinator of Civilian Rehabilitation, Department of Labour. He will assist in the promotion of Canada's growing program of rehabilitation for disabled civilians.

Mr. Hatcher has had wide experience in social work and rehabilitation. Born in Calgary in 1920, he served with the Royal Canadian Navy from September 1940 to November 1945. He attended the University of British Columbia, graduating as a

Bachelor of Arts in 1953, Bachelor of Social Work in 1954 and Master of Social Work in 1955.

He has had experience in rehabilitation and social case work with the British Columbia Department of Health and Welfare and until recently was employed as Executive Secretary of the Community Information Service of the Community Chest and Council of Greater Vancouver.

## **Dept. Is Represented at Anti-Discrimination Meet**

The 10th annual meeting of the Conference of Commissions Against Discrimination was held in Denver, Colo., on June 11, 12 and 13. The Department of Labour was represented by B. H. Hardie of the Industrial Relations Branch and E. J. Marten of the Information Branch.

The Conference is made up of the various state commissions against discrimination in the United States, as well as departments of government in Canada that administer laws prohibiting discrimination in employment. In addition to the federal Government, several Canadian provinces are also members of the Conference.

Of special significance to the American delegates this year was the attendance at the Conference of representatives from the new U.S. Commission on Civil Rights which was established under the 1957 Civil Rights Act. The representatives were Gordon Tiffany, Executive Director of the Commission, and Henry M. Shine, Jr., Consultant.

### **Proceedings**

The proceedings at the Conference consisted mainly of panel discussions and workshop sessions under the following main headings:

1. What is the scope of proper government action to assure all people equal opportunities and treatment;
2. What should be the relationships between governmental agencies; and
3. What should be the nature and scope of educational activities aimed at eliminating discrimination.

The State of New Jersey will be the host for the 1959 meeting of the Conference.

## **2nd Meeting, Committee on Technological Change**

A preliminary report outlining the results of a survey made in the household appliance industry to learn what effect technological changes are having on the labour force was heard at the second meeting of the Advisory Committee on Technological Change, held in Ottawa May 23. The first meeting of the Committee was held in November 1957 (L.G., Dec. 1957, p. 1420).

Because of technological change in the industry, the report indicated, total production of the industry during the past 10 years had increased faster than employment, but the increase in production per employee had not changed dramatically.

It was found difficult to measure the impact of technological change in terms of manpower. One reason for this was that the immediate impact might not fall on the employees of the plant in which a change is introduced. Displaced persons in one section are frequently transferred to another, and the movement is reflected only as a decline in hirings, thus shifting the impact to workers outside the plant.

The composition of the working force in firms surveyed in terms of skill and the effects of technological change were discussed on the basis of the relative demands for manpower at each skill level. One broad effect noted was a relative decrease in the demand for manpower on the direct production side and a relative increase in the demand for skilled workers in maintenance, toolroom, engineering and other indirect production work.

### **Skill Level Rising**

This would tend to indicate that the displaced manpower in production is likely to occur in the ranks of semi-skilled or unskilled labour. Not only is there a greater demand for skilled manpower, but the level of skill required is tending to rise. The need for electricians with a knowledge of electronics, and for plumbers with hydraulics knowledge, is increasing. This requirement for more highly skilled workers will affect the kind of training to be provided for tradesmen.

The report noted that it was difficult to ascertain whether displacement of workers in some instances was caused by technological change, or simply as a result of a decline in economic activity. While it would be difficult to compile accurate statistics, a committee member wondered whether it would be possible to get statistics on production and occupational composition over a period of time; this would indicate what had happened as a result of technological change.

That course had been followed successfully in the case of dieselization of the railroads, where it was found that between 1950 and the present, dieselization had increased from 25 per cent to 80 per cent and the number of machinists, apprentices and helpers had dropped from some 8,000 to 5,600, the drop occurring despite a 20-per-cent drop in hours worked. Approximately 70 per cent of the boilermakers and blacksmiths had been displaced. The number of electricians had remained fairly steady.

### **New Occupations**

The Committee heard from another member that in certain areas new occupations have come into being as the result of technological change. An example was the occupation of instrument mechanic, a combination of electrician and pipefitter. Companies were finding it necessary to train workers such as electricians to fill the posts.

The importance of case studies of technical change was emphasized by the chairman of the Committee, who noted that if the effects of the introduction of the diesel engine had been examined five or six years ago, with the full co-operation of Labour and Management, the information gathered might have thrown light on the problems involved and thus assisted both sides in arriving at a resolution long before matters came to a head as they did in the recent dispute involving the railway firemen.

In the matter of new research projects, the Committee was informed that a start has been made in studying the effects of technological changes in the automobile and parts manufacturing industry. To date, studies had been carried out in all plants of one major automobile manufacturer. The next step would be to extend the study to another major manufacturer and to some of the major parts producers.

Work was begun recently on examining collective agreements in this industry to see if provisions could be identified that have a bearing on adjustments that may occur when technological changes take place. The study of collective agreements would also prove useful for discussion purposes when, at a later date, the interview program is extended to union representatives in the industry.

The Committee agreed that it should meet twice each year, with the next gathering to take place this fall or winter.

### **Three More Publications On Canadian Occupations**

Three more publications in the "Canadian Occupations" series have just been released by the Department of Labour.

One is a new occupational monograph, entitled *Careers in Meteorology*. The other two, *Machinist and Machine Operators (Metal)* and *Optometrist*, are revisions of earlier editions. These booklets were prepared by the Labour Department's Economics and Research Branch. There are more than 40 titles available in the series.

The "Canadian Occupations" series covers a wide range of occupations, including many professions. The series was designed to meet a demand for current information on occupations in Canada from parents, youth, vocational guidance counsellors, employment service officers, immigrants, federal and provincial officials and from Commonwealth and foreign governments and organizations.

The monographs are available from the Queen's Printer, Ottawa.

### **Union Head Critical of Compulsory Arbitration**

The lower rates paid to temporary extra gangs, "the growing tendency of the federal Government to require compulsory arbitration in unsettled disputes" and "the tendency in Canada to apply wage increases on a percentage rather than a cents-per-hour basis" were mentioned by President T. C. Carroll of the Brotherhood of Maintenance of Way Employees at the union's 33rd convention in Detroit last month as obstacles to the union's efforts to improve wages and working conditions of its members in Canada.

Another cause for serious concern that was dwelt on by Mr. Carroll was the shrinkage in employment on the railways of the United States. He quoted figures showing that the average number of maintenance of way workers employed on U.S. railways had fallen from a maximum of more than 400,000 in the 1920's to only 154,000 in 1957. In Canada, he said, the drop had been less severe—from a maximum of 50,000 in 1928 to 38,000 in 1956.

"It will be noted, however, that the percentage of maintenance of way employees to total employees on Canadian railways has declined from 26.1 per cent in 1926 to 17 per cent in 1956," he pointed out. "We must be on guard continually to meet the detrimental effects of organizational changes in working methods."

The President declared the intention of the union to force the railways—by a strike if necessary—to negotiate on a demand made on the carriers in the United States and Canada as far back as 1950 for a guarantee of 52 weeks' work a year.

Increased efforts would be made to stop "farming out" by the railways of work that should be done by regular maintenance of way employees, Mr. Carroll said. He also announced that, jointly with other rail unions, his union would seek to improve existing health and welfare plans in the United States and Canada.

President Carroll, who has held office since 1947, told the 800 delegates to the convention that on the advice of his doctors he would not seek re-election.

### **Plan Wintertime Building Now, CCA Head Urges**

Immediate planning of a wintertime construction program that can help reduce the number of Canadians who may become jobless this coming winter was advocated last month by Harold J. Ball, President of the Canadian Construction Association.

Addressing a meeting of the Kitchener-Waterloo Builders' Exchange, Mr. Ball attacked the out-dated prejudice against wintertime construction that still exists in Canada.

There are still too many, in Mr. Ball's opinion, who question the quality of winter construction, and have the idea that it is very expensive—"an attitude that is a hang-over from the horse-and-buggy days". Other reasons advanced are all invalid in this era, he said.

#### **Arrangements Take Time**

"Not many people," said Mr. Ball, "may be interested during warm summer days in thinking about, let alone worrying about, next winter's construction activities. However, if a start isn't made now on promoting construction for the coming winter it will be too late to be effective. It takes time to complete land, design, financing and tendering arrangements.

"For example, it would take from two to three months at least before actual construction begins on a building costing about \$250,000. We know through experience that a building has to be 'closed-in' before extreme weather is upon us, so that work can continue inside throughout the winter.

"If these things are not done now then many construction tradesmen will not be busy working this winter... Every Canadian community will be affected by a seasonal layoff."

## **Delegation of Unemployed Submits Brief to Cabinet**

Federal government action on tariffs, trade and taxation to provide more jobs was urged by a delegation of more than 100 unemployed Ontario and Quebec workers who journeyed to Ottawa from Windsor, Chatham, London, Woodstock, Brantford, Hamilton, Toronto and Montreal to present a brief to federal Cabinet Ministers and Members of Parliament on June 24.

The delegation was led by George Burt, Canadian Director of the UAW and a Vice President of the Canadian Labour Congress. In conjunction with its brief, the delegation left with the Government a pamphlet outlining the UAW program for full employment.

The delegation was received by Acting Labour Minister Ellen Fairclough, Revenue Minister George Nowlan, other Cabinet Ministers and several Members of Parliament.

In its brief, read by George Burt, the delegation proposed that intensified efforts be made to move Canada's wheat surplus in order to boost farm economy and thus provide a wider market for the products of farm implement plants; that the automobile industry be taxed on its profits rather than on its product; that an investigation be made into the volume of small cars entering Canada from Europe, with a view to encouraging their manufacturers to locate plants in Canada; that the importing of automobile parts be curtailed; and that action be taken to assist the Canadian textile industry.

Mrs. Fairclough assured the delegates that she would personally see to it that their representations were brought before the Prime Minister, reminded them that unemployment has been claiming the attention of the Government since it took office, and that "your aim of full employment is precisely the same view as that of the Government".

She also pointed out that the Government had not been entirely inactive in providing jobs in the Windsor-Leamington area, where works projects on bridges, harbours and other items with a value of nearly \$2 million have been started. She also noted that training classes for welders and other tradesmen had been provided. She felt, also, that some of the action to relieve unemployment—although the federal Government was not trying to dodge the issue, a serious one—should come at the provincial level.

Revenue Minister Nowlan told the delegates that the Government is increasing

pressure on Canadian automobile manufacturers to increase the Canadian content of their autos, now standing at about 60 per cent. But he reminded the group that "overhauling of the tariff structure takes time". Speaking on unemployment in the auto industry in Windsor, Mr. Nowlan noted that "Windsor has no monopoly on unemployment. There is more in Detroit."

CLC Executive Vice President William Dodge said the Congress' position was that "We are afraid the whole situation is not being dealt with by the Government with a proper sense of urgency." He added: "I hope we do not have to rely on a war in Algeria or Lebanon to aid the unemployment situation."

Trade Minister Churchill reminded delegates that Canada has provided \$60,000,000 in wheat to Asian countries through the Colombo Plan, and of the hundreds of jobs on ships, trains and trucks that are provided by the movement of that wheat. It takes 1,200 ships alone to move the 40,000,000 bushels involved.

Herb Kelly, Chairman of the Full Employment Committee, Windsor Labour Council, and Vice President of UAW Local 200, remarked that persons in the industry with 17 years service were unemployed, and he could foresee a chaotic situation in Windsor this coming winter unless drastic action is taken now to forestall it.

Charles Brooks, President of UAW Chrysler Local 444, Windsor, suggested that the Government could afford to "pay your 100,000 civil servants a decent living wage so that they can afford to buy the products we make at Windsor".

After hearing the remarks from the floor, Mrs. Fairclough noted that Labour Minister Michael Starr had called a meeting to take place in Ottawa July 14 and 15 to discuss the full range of summer and winter employment. She promised that messages of the delegation would be taken direct to the Cabinet, where means could be evolved to provide immediate help in select communities where the unemployment situation is very bad.

## **QFL and CCCL Present Brief to Quebec Cabinet**

A Royal Commission Enquiry into "the exploitation" of Quebec's natural resources was requested by the Quebec Federation of Labour (CLC) and the Canadian and Catholic Confederation of Labour in a brief submitted jointly to members of the provincial Cabinet.

The brief said in its conclusion: "From a production value in excess of one billion

dollars for three natural resources (forestry, mining, hydro power), the province does not derive forty million dollars". Quebec citizens were not getting "the share those should secure from the natural resources; the more so, since they know in addition that the wages paid in industries operating our natural resources are lower than those paid to the Ontario manpower working in similar industries".

The provincial labour bodies expressed concern over the unemployment situation. According to present figures, the brief said, "it is easy to foresee that unemployment will have affected this year in the province about 270,000 persons... the highest peak ever reached".

Referring to Dominion Bureau of Statistics figures of early April, the brief noted that 262,000 of the 875,000 persons seeking employment in Canada were from the Quebec region alone, an increase of 85,771 over the figures for the same period last year.

The brief in calling for social reform measures said that unemployment came in the last analysis from a "state of mind". This resulted because a large part of "the ruling classes" were unable to adapt their thinking to the modern industrial world.

The planning of economy was necessary, the brief asserted, and said such planning had been absent from the province's economic policies up to that time.

The two Quebec labour bodies requested the immediate holding of a federal-provincial conference on unemployment to collaborate and assure the undertaking of a vast public works program.

The brief called for provincial effort in raising the amount of unemployment insurance allowances and in extending the benefit period. Steps, it said, should also be taken to reduce the 30 weeks of employment required to draw benefits.

The brief asked that the Quebec government, like Ontario, place credits at the disposal of the municipalities who cannot carry out their public works due to a lack of funds.

On a provincial level the labour groups asked that the provincial government promote housing, availing itself of the Central Mortgage and Housing Corporation credits in spite of "the insufficiency and restrictions" comprising this federal law. The brief suggested the setting up of a "housing bureau" and quoted from a previous project submitted to the provincial government:

"In view of the borrowing capacity of the provincial government at a very low rate of interest, it could constitute a real estate credit body which would be supplied

with mortgage funds, through loans, guaranteed by the province."

An increase in the provincial minimum wage requirements was recommended by the brief. This, it said, would add to the purchasing power of many who did not yet benefit from collective working agreements.

The development of processing industries for the province's raw materials was urged in the brief. This should be done "rather than sustaining industries which cannot even feed appropriately the manpower which they employ," it said.

---

### **Shortages Said Likely of Skilled Building Workers**

With a record year for construction in prospect in some centres, eventual shortages of skilled building tradesmen appeared likely, it was shown by monthly summaries of employment conditions issued by regional offices of the National Employment Service. Surpluses of unskilled and semi-skilled workers, however, were reported from many points.

Also in short supply were registered nurses, certified nursing aides, practical nurses, well-qualified office workers, skilled shipyard workers, and experienced pipeline workers.

Foundries and machine shops at a number of places in Quebec recalled many of their workers during May, and in Quebec City there was some shortage of experienced general machinists at the end of the month.

Employment on the railways was reported to have improved considerably in the Prairie region during May. Most of the running trades crews who had been laid off during the winter had been recalled, and there was a good demand for maintenance and extra gang workers.

On the other hand, cotton mills in the Quebec region showed little improvement in employment and work clothing plants in Edmonton laid off a number of workers, although there was still a good demand for experienced power machine operators in the industry.

Layoffs were reported from a Winnipeg transportation equipment firm, a Newfoundland pulp and paper mill, and a Montreal rolling stock manufacturer.

---

The *Canada Handbook, 1958* (English edition) is now available to the public. Published annually by the Dominion Bureau of Statistics, it is the 29th in the handbook series.

Price of *Canada 1958* is \$1 per copy. Orders for it should be addressed to the Queen's Printer, Ottawa.

## **B.C. Labour Urges Action Against Unemployment**

The Government of British Columbia has been asked to declare that an emergency exists in unemployment conditions, and to solicit the federal Government to join in this decree, in the annual brief of the B.C. Federation of Labour (CLC).

Other requests made in the brief urged that:

A conference of labour, business, provincial and municipal administrations be held to make plans "to avoid any repetition of the winter of 1957-58";

More hospital, school and road construction be started immediately, along with a municipal and provincial low-cost housing project;

Flood control projects be undertaken;

Fixation of a 40-hour work week and cancellation of all existing blanket overtime permits be made;

Improvements be made to the Unemployment Insurance Act, and definite plans to deal with destitute unemployed citizens be carried out.

---

## **Montreal Labour Council Condemns "Moonlighting"**

The Montreal Labour Council (CLC) last month advised all its affiliated unions to discourage and condemn "moonlighting"—the practice of holding two jobs at the same time.

The Labour Council considers that the practice is adding to unemployment; and it has decided to seek the co-operation of all Montreal locals in checking it.

The increase in moonlighting is known to have changed the attitude of some union leaders towards the 30-hour week. They have come to the conclusion the shorter work week would only provide a greater incentive to the holding of two jobs at once.

---

## **No Marked Improvement In U.S. Jobless Situation**

For the first time since late April, statistics for the United States unemployment compensation system failed to show a marked improvement in the week June 16-21.

Both insured unemployment and initial claims showed only minor changes for the week—the former up, the latter down. For seven consecutive weeks insured unemployment had shown large declines and in most weeks initial claims had fallen substantially.

In the week ended June 7, unemployment fell 10,000 to 2,817,600. This figure represents joblessness among workers covered by the unemployment compensation system.

Though small, this was the eighth consecutive decline. It left unemployment at 6.7 per cent of the insured work force. In the corresponding week last year insured unemployed was 1,322,400.

---

## **All Must Co-operate in Accident Prevention**

That complete co-operation of all affected elements is necessary to ensure success of an accident prevention program was emphasized by Sir George Barnett, retired Chief Inspector of Factories, United Kingdom Ministry of Labour and National Service, in a talk to officials of the Departments of Labour, National Health and Welfare and others.

Co-operation is necessary from top management in the introduction of accident prevention planning, supervisors, along the line, the foremen, employees and the trade union, Sir George said.

Most accidents involved the personal factor and plans and sincerity of interest by management would be valueless unless everyone in a work place entered enthusiastically into the effort. It was of great importance to have adequate accident statistics to pinpoint causes and indicate remedies. Of equal importance was the development of uniformity in statistics so that comparison could be made which would be mutually helpful. Some day, Sir George said, he hoped to see accident facts compared on an international level.

The accident frequency rate in Europe was based on 100,000 employee hours of exposure instead of 1,000,000 hours, the basis in North America. In 1956 the rate in Great Britain, with 7,850,000 workers under the Factories Act, was 1.72, which on this side of the Atlantic would be 17.20.

Another way of determining the efficiency of prevention work was the index system. Taking 1952 as 100 the British rate was down to 87.1 in 1956.

It was very necessary to see that proper training in safety work habits was given young persons, Sir George said. He had noticed in Britain that accidents suffered by this category were not decreasing as much as among older workers.

The mechanical cause of accidents can be controlled by legislation, Sir George said, but not the human factor—at least, not to the same degree.

Because of the number of accidents to persons in connection with plant lifts, hoists and elevators, a special section had been added a few years ago to the British Factories Act that made it compulsory to install appropriate gates, guards, locks and fencing. The results were spectacular: in 1946 there had been 490 accidents of this type and 26 were fatalities; in 1954, 115 accidents and 5 fatalities.

The British expert did not think, from what he had seen, that Canadian work places were cognizant of the importance of good housekeeping.

---

### **Ont. Rehabilitation Centre Moves into New Buildings**

The Ontario Workmen's Compensation Board Hospital and Rehabilitation Centre on July 1 completed its move from the former RCAF barracks near Malton Airport to a group of 14 new buildings on a 65-acre site in Downsview.

The new \$6,000,000 centre, described as the most functional of its kind on the continent, will accommodate 4,000 seriously injured workmen a year—an average of 500 a day. All patients will live in.

The Centre consists of a hospital and a clinic. The hospital section contains 175 beds, and the clinic dormitories will accommodate 325 patients. The wards usually contain from six to eight beds, compared with 23 beds to a ward in the old crowded quarters at Malton.

The hospital section provides the medical supervision and nursing care, and the physical, occupational and remedial therapy needed to promote recovery as rapidly as possible. When the patient no longer needs nursing he is transferred to the clinic section, where he remains until he has recovered as fully as his case will allow. When recovery is not complete the remaining disability is assessed before the patient leaves.

---

### **National Hospital Scheme In Effect in 5 Provinces**

Canada's National Hospital Insurance Scheme came into effect on Dominion Day, July 1, with five provinces participating.

At first the plan will cover only about 30 per cent of the population: the inhabitants of British Columbia, Alberta, Saskatchewan, Manitoba and Newfoundland. By next January it is expected to come into effect in Ontario, Nova Scotia and New Brunswick.

By the end of 1959 it is possible that the whole population of Canada will be covered by the scheme. When that stage is reached

it is estimated that the annual cost will be \$430,000,000, of which the federal Government will pay \$215,000,000.

The total cost is to be shared equally by the federal Government and the provinces, but the federal Government's share will vary from one province to another, depending on local costs. In Newfoundland it will amount to 68.6 per cent; in Saskatchewan, only 42.2 per cent.

Part of the cost of the plan will be defrayed by premiums paid directly by those covered or by a small charge for hospital care.

By a coincidence, Britain's National Health Service started ten years ago this month. About 97 per cent of the people are using the service, though an individual is free to employ his own doctor and pay him himself if he pleases. The service cost some £600,000,000 in 1956-57, which amounted to 3½ per cent of the national income. The service is said to be efficient and to have proved economical.

---

### **U.S. Wage and Hour Law In Force for 20 Years**

The United States Fair Labor Standards Act, sometimes called the Federal Wage and Hour Law, had been in force 20 years on June 25. It was signed into law in 1938 by the late President Franklin D. Roosevelt.

The law was strongly backed by Labour. It sets forth the statutory minimum wage, overtime requirements and child labour provisions that cover employees engaged in interstate commerce.

Since its passage the FISA has proved its worth as a valuable instrument for protecting the basic standards of wages, hours and working conditions of American workers.

An advanced instrument of social justice when passed, it has been improved since as steady progress in welfare of working men and women has been made.

Today, more than 24,000,000 workers in 900,000 plants, businesses, companies and other establishments are covered by the Act, 9,000,000 more than were covered by the original Act of 1938.

---

The Order of Railway Conductors and Brakemen this month marked its 90th anniversary. The Order, set up on July 6, 1868, began as a fraternal group, the Conductors' Brotherhood. The name, Order of Railway Conductors, was adopted in 1878 and the present name in 1954.

## **Automation Has Failed to Bring Predicted Benefits**

Automation had not brought higher pay and additional jobs as had been foreseen by industry, speakers agreed at a recent Conference on Automation and Technological Change convened by the Industrial Union Department of the AFL-CIO.

Almost 200 delegates representing 42 affiliated unions heard an opening address by IUD Director Al Whitehouse, two case study histories, an address by an economist, and two panel discussions.

Director Whitehouse pointed out that "automation and other major technological change have failed to bring automatically those things promised so blithely. Where are the great numbers of more highly skilled jobs? Where are the jobs for all that were virtually guaranteed to us?"

### **Impact on Wages**

A paper discussing the impact of automation on the wages and working conditions in the relationships between the United Automobile Workers and the Ford Motor Company was presented by Nelson Samp, Assistant Director of the UAW's Ford Department.

Five major manpower problems, Mr. Samp said, were presented to the union by the use of new technological equipment. He listed the problems as: rates and classifications for automated jobs or operations, changing skills, retraining, seniority adjustments, and the effect on highly skilled trades classifications.

His union had found, Mr. Samp stated, that "automation and downgrading, as a result of job dilution, have gone hand-in-hand".

The UAW had met this problem, he said, by negotiating new classification structures and higher wage rates that recognize the responsibility of automation.

Mr. Samp said his union had fought to win apprenticeship training programs giving older seniority workers the chance for training, transfer rights for those whose operation is shifted to other plants, and the maintenance of separate skilled trades classifications.

Arthur Turner, member of the Yale Technology and Industrial Relations Section, in discussing the Samp paper, pointed out that individual incentive rates made no sense in an automated plant and such incentives may someday be based on a plant-wide system that would come close to a profit-sharing plan.

The problems of a worker as a human individual must not be ignored, Mr. Turner cautioned. If this question is not given

attention, he said, the worker will feel he has lost his identity in the automated mass production complex.

A second case history dealing with the efforts of the railway unions to secure job and income security against shutdowns and mergers in their industry was presented by Eli Oliver, Director of the Washington Office of the Labor Bureau of the Middle West.

The composite structure built by the railway unions, Mr. Oliver pointed out, had gone a long way towards protecting workers against the hardships of technological unemployment. The methods used by these unions, he said, "may at least suggest to other American unions methods of dealing with technological change in other industries".

David Lasser, Research Director for the International Union of Electrical Workers, declared, while discussing the Oliver paper, that for the electronic industry, the present economic slump may be the "first automation recession". Since 1953, Mr. Lasser said, the industry had lost 200,000 out of 900,000 jobs and many of these jobs would never again be filled because of proven automation equipment.

Labour must fight for all-inclusive contract security provisions, Mr. Lasser stated, as the best means of handling automation.

Economist Robert R. Nathan, in his address to the Conference, urged government action to improve and extend unemployment compensation and a tax cut for low and middle-income groups.

### **Panel Discussions**

The first panel dealt with papers presented by Elmer Malloy, Director of the Wage Division, United Stelworkers of America, and Joseph Childs, Vice President of the United Rubber, Cork, Linoleum and Plastic Workers of America.

Mr. Malloy discussed the problems of incentives, job evaluation, and job opportunity. The basis for incentives must be changed to equipment utilization without regard to workload, or placed on a uniform percentage bonus for maintaining maximum production loads, he said.

Bert Gottlieb, AFL-CIO industrial engineer, summing up the Malloy and Childs papers, said the emphasis in job evaluation should be placed on responsibility, and that education and job training should not be accepted as a valid part of the evaluation.

The second and final panel was concerned with the unionization problems of the white-collar worker.

One panelist noted that the working force of the white-collar workers and technicians had increased by 55 per cent in the last decade. Another stated that in the chemical industry in 1947 there was one white-collar worker to every four production workers, but by 1980 there would be three white-collar workers to every production worker.

It was suggested that unions must learn to organize white-collar workers and may find it necessary to change their structures to meet their needs.

---

### **U.S. University Publishes Booklet on Automation**

*Automation, Technology's New Face* is the title of a new booklet recently published by the Institute of Industrial Relations of the University of California. The author is Dr. Jack Rogers.

The foreword states that the booklet is designed "to fill the need for a convenient and relatively brief discussion of the technological concepts involved and the implications for Management, Labour, and the economy". The first part of the pamphlet explains briefly the meaning of automation and how it works. The second part tries to assess its social and economic effects.

In a chapter on "Labour's Problems" the author says that the effects of technological change are nothing new to working people, but that although the problems raised by automation are not new "this does not make them any the less problems". He continues, "When we get right down to it, Labour's reaction to automation can best be interpreted as part of an older, larger question: To what extent shall the worker be subordinated to the demands of industrial efficiency?"

"In the past unions have adopted various strategies to preserve jobs against the impact of technological change, reduce personal hardship, and maintain union strength," the pamphlet says. But it asserts that "there is no evidence that union policies with respect to technological change have appreciably influenced its nature or its rate in the long run. Union holding actions have delayed a change here or ameliorated the effects of a change there, but they have not stopped change."

The author points out, however, that unions "are as well able to recognize the need for change and the benefits of increasing productivity as are other groups, and their stated policies today typically are clear on the point."

Regarding the effect of automation on employment, Dr. Rogers says that at the

worst it may result in old jobs being destroyed faster than new ones open up, and some individuals may be unable to find new employment. At the best new jobs may come into being as fast as the old ones disappear, and all displaced workers will find new jobs. But he believes that "the chances are that actual situations will tend to be intermediate, so that with extensive automation some people will never be out of work, some for a short while, and some for a long while; some will get better jobs and some will get poorer jobs."

---

### **Lakehead School Trains Welders for Pipeline**

The Lakehead Vocational Training Welding School, which opened on March 31 with an enrolment of 68 students, finished its first course in May. Sixteen of the students qualified for jobs with a main pipeline company, and the remainder were given cards that entitle them to jobs as station welders or as welders' helpers.

Equipment and instructors for the school were supplied by the pipeline contractors.

---

### **SIU Wins Representation Despite Flag Transfer**

The Seafarers' International Union has won the right to represent crew members of a ship that had been transferred from United States to Liberian registry. The representation election was conducted by the U.S. National Labor Relations Board.

The liner *Florida* operates between Miami and Havana; the crew is predominantly Cuban. The ship had operated for many years under the American flag with American crews represented by the SIU. The transfer to Liberian registry was made three years ago.

On transfer, the American crew was discharged and the Cuban seamen hired at lower wages.

In the Union's petition to the NLRB it pointed out that the vessel was still American-owned, operated regularly out of a United States port, and accepted the jurisdiction of the U.S. Coast Guard and other U.S. maritime agencies.

In its ruling, the NLRB held that the mere fact that a majority of the employees are non-resident aliens does not take the case from under the provisions of the National Labor Relations Act, and that the organization of the vessel's crew, with a view to improving their working conditions, is a matter of concern to American seamen.

## **Total Payments to Aged, Blind, Disabled Increase**

The number of persons receiving old age assistance in Canada increased from 90,127 at December 31, 1957, to 92,484 at March 31, 1958.

The federal Government's contributions under the federal-provincial scheme totalled \$7,736,445.70 for the quarter ended March 31, 1958 compared with \$6,429,962.43 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$128,842,028.81.

Federal expenditure for the fiscal year 1957-58 amounted to \$24,961,383.23, an increase of \$4,562,278.31 over the expenditure of \$20,399,104.92 in 1956-57. The increase was due to amendments to the Act effective July 1, 1957 and November 1, 1957 increasing the maximum assistance from \$40 to \$46 and from \$46 to \$55 a month and the amounts of maximum income allowed.

At March 31, 1958, the average monthly assistance in the provinces ranged from \$50.15 to \$53.99, except for one province where the average was \$45.55.

### **Blind Persons Allowances**

The number of blind persons in Canada receiving allowances under the Blind Persons Act increased from 8,312 at December 31, 1957 to 8,400 at March 31, 1958.

The federal Government's contributions under the federal-provincial scheme totalled \$1,078,192.65 for the quarter ended March 31, 1958, compared with \$917,815.58 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$18,960,969.37.

Federal expenditure for the fiscal year 1957-58 amounted to \$3,575,724.04, an increase of \$616,198.30 over the expenditure of \$2,959,525.74 in 1956-57. The increase was due to amendments to the Act effective July 1, 1957 and November 1, 1957 increasing the maximum allowance from \$40 to \$46 and from \$46 to \$55 a month and the amounts of maximum income allowed.

At March 31, 1958, the average monthly allowance in the provinces ranged from \$53.13 to \$54.45.

### **Disabled Persons**

The number of persons in Canada receiving allowances under the Disabled Persons Act increased from 38,757 at December 31, 1957 to 41,840 at March 31, 1958.

The federal Government's contributions under the federal-provincial scheme totalled \$3,727,185.64 for the quarter ended March 31, 1958 compared with \$2,935,015.39 in the

preceding quarter. Since the inception of the Act, the federal Government has contributed \$24,343,462.32.

Federal expenditures for the fiscal year 1957-58 amounted to \$11,091,664.45, an increase of \$3,924,312.07 over the expenditure of \$7,167,352.38 in 1956-57. The increase was due to amendments to the Act effective July 1, 1957 and November 1, 1957 increasing the maximum allowance from \$40 to \$46 and from \$46 to \$55 a month and the amounts of maximum income allowed, and amendments to the regulations broadening the definition of the expression "totally and permanently disabled".

At March 31, 1958, the average monthly allowance in the provinces ranged from \$52.12 to \$54.78.

### **Old Age Pensions**

A total of 836,768 persons received old age security benefits amounting to \$46,565,375 during May, the Department of National Health and Welfare reports.

Family allowances of \$38,968,352 were paid to 2,423,382 families embracing 5,840,902 children. Average payment for each child was \$6.67; for each family, \$16.08.

## **Some SUB Payments Reduced by Recession**

Supplemental unemployment benefit payments have been reduced by some of the large steel and aluminum companies in the United States. Payments have been reduced to 75 per cent of the regular amount by United States Steel and Alcoa, and reductions have also been made by Republic Steel and a number of smaller companies.

The SUB plans in the steel industry provide for payments to be reduced if the trust fund drops below a certain level, and the recession in the industry has depleted the funds, because of the large amounts paid out to unemployed workers and because of the smaller sums paid into the funds, since payments are based on man-hours worked.

As SUB plans in the U.S. steel industry provide benefits to maintain 65 per cent of take-home pay for 52 weeks, the funds have been further depleted by the fact that a number of workers who have been laid off for prolonged periods have exhausted their state unemployment benefits.

The SUB funds in the automobile industry, on the other hand, have not been subjected to so heavy a drain, since they provide payments for a maximum of only 26 weeks. They are also in better condition than the funds in the steel industry because they have been established longer.

## **Issue Book to Help Older Women Wanting to Work**

To the *Older Worker*, a pamphlet compiled by the Status of Women Study Group of the University Women's Club of Vancouver, B.C., was designed specially to help older women who wish to work.

In a direct and easily readable manner it gives information on training courses available to older women, on the organizations from which advice and financial assistance for training may be obtained and on the attitude the older woman should have towards her job. Occupations in which women over 45 are successfully employed are listed.

## **Home Economists from Canada at U.S. Meeting**

The Ninth International Congress on Home Economics was taking place in College Park, Md., U.S.A., July 28 to August 2. Canadian and U.S. home economists will receive 250 delegates from 29 foreign countries.

A report entitled: "Education in Home Economics Relative to the Social and Economic Conditions of Canada," prepared by Dr. Helen C. Abell, Rural Sociologist in the Economics Division of the Department

of Agriculture for submission to the Congress, will be summarized in the next issue of the *LABOUR GAZETTE*.

## **Deny Skilled Workers' Bid To Separate from UAW**

Skilled workers in United States automobile plants who petitioned for representation by a union other than the United Automobile Workers (L.G., June, p. 617) have had their petitions denied by the U.S. National Labor Relations Board.

The Board ruled that, since the auto companies bargain with the UAW on a company-wide, multi-plant basis, the bargaining units sought were too narrow in scope and were inappropriate for collective bargaining purposes.

A new CLC central labour council has been established and two former TLC councils have been reconstituted as CLC bodies.

The Nelson-Trail and District Labour Council is the new group. The reconstituted councils are the Kapuskasing Labour Council (formerly the Kapuskasing Trades and Labour Council) and the Newcastle-Chatham and District Labour Council (formerly the Miramichi Labour Council).

## **Items of Labour Interest in House of Commons**

**Wednesday, May 21**—*Intent to sell ships of Canadian National (West Indies) Steamships Limited, strikebound since July 4, 1957, announced in Commons by Minister of Transport.*

*Unemployed in Hull, Que., said suffering, because 51.8 per cent of them unable to collect benefits, House is told. Minister of Labour "will look into the situation".*

*Holidays with pay Bill introduced in Commons. The Bill would assure that all employees in Canada under federal labour jurisdiction would receive regular pay for at least eight statutory holidays each year, pay at double time rate if required to work on a statutory holiday, in addition to regular pay.*

**Thursday, May 22**—*Safety in mines comes under provincial jurisdiction, Labour Minister reminds questioner in Commons who wanted to know if a Government inquiry was planned into "the deplorable number of accidents in the mines in the Blind River-Elliott Lake area..."*

*...Number of unemployed persons in Canada drawing insurance benefits as of May 8 was 715,056, Labour Minister tells questioner.*

**Friday, May 23**—*Labour Department official making effort to get parties involved in strike of SIU against CPR steamships on West Coast back into negotiation, Labour Minister informs questioner. Minister of Transport tells another member he has heard no mention of any plans to sell West Coast CPR steamships.*

*To see if farm labour can come under provisions of the Unemployment Insurance Act, an active survey is being made, Labour Minister replies to question.*

**Monday, May 26**—*Résumé of strike involving the Seafarers' International Union and the Canadian Pacific Railway steamships on the West Coast given by the Minister of Labour in reply to a questioner. Concluding his answer, the Minister said: "I understand that over the weekend there have been proposals made for the arbitration of the dispute which under certain conditions have been accepted by the company. We are now awaiting the reaction of the union to the proposal."*

**Tuesday, May 27**—*Employment with CNR comes under the jurisdiction of the company, not the Government, Transport*

Minister replies in answer to question about proposed layoffs at Port Mann, B.C.

*Government making sure that actual hardship is not suffered by residents of the West Coast as a result of the strike of SIU seamen against the CPR Steamships, through being deprived of such necessities as food or medical supplies, Transport Minister tells questioner.*

**Wednesday, May 28**—*New labour legislation unlikely to be introduced at the present session, Labour Minister informs questioner.*

**Friday, May 30**—*Report on U.S. social security system, being prepared by Dr. Robert M. Clark, not yet ready for presentation to Commons, Prime Minister informs questioner.*

**Monday, June 2**—*Automatic disqualification from receipt of unemployment insurance is imposed on any person directly interested in the outcome of a labour dispute, even though they may not necessarily be members of the union involved, Acting Labour Minister Ellen L. Fairclough tells questioner asking about apprentices idled by a strike in Vancouver.*

**Tuesday, June 3**—*Standing committees, including labour relations committee, are appointed.*

*Government is offering a conciliator and any other aid within its power to railways and unions negotiating new contract, Transport Minister informs questioner.*

**Monday, June 9**—*Newfoundland's signing of agreement to participate in the Hospital Insurance and Diagnostic Services Plan, beginning July 1 this year, announced by Minister of National Health and Welfare.*

**Tuesday, June 10**—*No breakdown in negotiations to settle the dispute between the Seafarers' International Union and the Canadian Pacific Railway Company has occurred, Acting Labour Minister tells questioner. The federal mediator inquiring into the matter has merely suspended his probe "for the time being".*

*Layoffs by CNR at some points are known to him, Minister of Transport advises questioner. He reiterates that layoffs are the prerogative of management of the railway, which does not put any man out of work until every means to keep him on the job has been exhausted.*

**Wednesday, June 11**—*Number of active claimants for unemployment insurance benefits at May 31 was 550,959. At April 30, the number of active claimants for benefits was 722,252, Acting Labour Minister informs questioner.*

**Thursday, June 12**—*Employees are not insurable under the Unemployment Insur-*

*ance Act, when they are working in a hospital that is not operated for gain, Acting Labour Minister informs questioner in the Commons, except under an optional arrangement at the request of the institution and with the consent of the Unemployment Insurance Commission.*

**Tuesday, June 17**—*In the Budget speech, Hon. Donald M. Fleming, Minister of Finance, disclosed that Canada's population in 1957 increased by a record 552,000 to a year-end total of 16.9 million. Canadians added \$7.4 billion in plant, equipment and housing to an already large stock of physical capital.*

*The rate of economic growth slowed noticeably during 1957 as the forces which underlay the great surge of 1955 and 1956 spent themselves. For the year as a whole gross national product was \$31.4 billion, 4 per cent higher than in 1956. However, most of the increase was due to higher prices.*

*Although business capital investment ended the year on a weaker note than it had begun on, the reverse was true of housing.*

*More people were at work in each month of 1957 than in the comparable month a year earlier. For 1957 as a whole the number of people with jobs averaged 2.4 per cent higher than in 1956, an increase that compares quite well with the increases in employment during 1955 and 1956.*

*It was a coincidence that this adjustment period should have occurred simultaneously with the largest expansion of the labour force the country has ever known. It increased by 210,000, about double the annual average rate of the preceding five years.*

*With these factors in mind, and with due regard for the resourcefulness of the Canadian people and the determination of this Government "I have no hesitation in budgeting on the basis of a resumption of the rise in incomes and production. Assuming normal crops, stable prices and no untoward external events, I am basing my revenue forecasts on a gross national product of \$32 billion, which is about 2 per cent above the level achieved in 1957."*

*In the field of income tax, the cost of drugs purchased under prescription may be included in the deduction for medical expenses. The period in which refunds of tax may be claimed will in future be four years instead of two, and interest allowed on overpayments of tax will be increased from 2 per cent to 3 per cent.*

*Improvements will be made in various Acts to prevent dumping of goods in Canada and to help textile, rubber footwear and other Canadian products to compete favourably with imports.*

# Laval University's 13th Annual Industrial Relations Conference

Settlement of disputes arising from "conflicts of interest" (those that concern negotiation of working conditions, not interpretation or enforcement of collective agreements) is theme of the two-day meeting

The 13th industrial relations conference under the auspices of Laval University's Department of Industrial Relations, held at Quebec on May 5 and 6, dealt with the settlement of disputes involving conflicting interests\*.

Some 350 delegates—heads of concerns, union leaders and labour officials—considered the problem of the settlement, in a Quebec setting, of "conflicts of interest," defined as disputes that concern not the interpretation or enforcement of the collective agreement but the negotiation of working conditions.

The eight lectures given were followed by discussions in which the delegates took part.

The convention coincided with the 20th anniversary of the founding of Laval's School of Social, Economic and Political Science and with the 15th anniversary of the founding of its Faculty of Social Science and School of Social Service.

## Official Opening

The convention opened under the chairmanship of Msgr. Alphonse Marie Parent, Rector of Laval University.

Msgr. Parent pointed out that disputes which arise in connection with conflicting interests are no longer of a material and technical nature only, but involve psychology and morale as well. Human nature and the supernatural purpose of man do not allow spiritual and moral order to be overlooked in the establishment of work standards.

The Dean of the Faculty of Social Science, Jean Marie Martin, also spoke briefly.

## Rev. Gérard Dion

The Rev. Gérard Dion, Director of the Department of Industrial Relations, defined "conflicts of interest" as disputes which "have to do with questions which have not yet been or cannot be solved by any judicial rule".

\*The texts of the lectures delivered are collected in a volume published by the Laval University Press, Quebec.

These disputes, he added, arise as the result of a difference of opinion in the search after differing interests concerning a common object.

Father Dion stressed the fact that "conflicts of interest" are found not only in labour relations, but to just as great an extent in management's relations with outside elements—whether it be consumers, suppliers or financial institutions.

He pointed out that there are always, between management and labour, divergent legitimate interests capable of degenerating into disputes.

"Since there is no possibility of avoiding conflicts, and no reason for suppressing their manifestation, assuming that we accept democracy," he said, "it remains for us to seek means of lessening the extent of such conflicts, reducing their effect and limiting their harmful results, while at the same time maintaining the incentive they afford to economic and social life."

## Quebec System for Settling Disputes

The first speaker, Jean Réal Cardin, Director of the Industrial Relations Section at the University of Montreal, described the structure of the machinery which aims at settling conflicts of interest and defined the basic principles underlying the Quebec system of settling such disputes.

"Disputes involving rights arise from the application or interpretation of a pre-existing right," Mr. Cardin explained, "whereas a 'conflict of interest' arises when the parties are unable to agree on the contract to be entered into."

Quebec labour legislation makes no distinction, however, between "conflicts of right" and "conflicts of interest". Every dispute—whatever its nature—goes through the same settlement machinery.

The speaker added:

In private services, conciliation and arbitration may afford an opportunity for a strike or lockout—whether the dispute arises during bargaining or on the occasion of a grievance. In public services the same situation cannot possibly lead to the use of economic force by the parties; the award is binding no matter what the nature of the dispute.

Mr. Cardin mentioned certain ideas touching on conflicts of interest and their settlement that govern our labour laws. Among these ideas are the following:

—The principle of union recognition and the institution of compulsory collective bargaining.

—The need to regulate the use of these statutory rights by the parties in order to preserve industrial peace to the greatest possible extent.

—The need, except in public services, to safeguard the freedom of the parties with regard to conflicts of interest, thus leaving recourse to economic weapons as the ultimate means of settling disputes.

—Acknowledgment by the legislator that conflicts of interest in labour relations require a special settlement machinery, based on conciliation in two stages, the second stage being of a more rigid nature and known as arbitration.

—The abandonment of structures of common law which are too rigid and too formal and a better adaptation to the needs of industrial life.

### Dispute Settlement outside Quebec

The second paper, by Gilles Beausoleil of the University of Montreal, made a comparison between various systems throughout the world, especially with regard to union recognition and latitude in the use of State services and conciliation and arbitration machinery.

As Mr. Beausoleil was on a study trip to Europe, his text was read by Jacques St. Laurent of Laval University.

The author classified the various systems of industrial relations in terms of the different economic systems in which they are found. He distinguished the following three systems:

1. Suppression of autonomous trade-unionism.
2. Trade-unionism supervised and controlled by the State.
3. Recognition or tolerance of independent trade-unionism.

Having characterized the systems that fall into the first two classes, he studied the different countries in which the State grants freedom of association. In these countries the State intervenes only in cases of emergency and employers' and workers' organizations play an important part in the evolution of legislation. Besides this, he explained, except for certain specific cases and certain restrictions, the right to strike is not questioned.

"In Australia and New Zealand," according to Mr. Beausoleil, "compulsory arbitration constitutes the universal method of

settling conflicts of interest, and this gives rise to a rapid expansion of the labour movement. In these countries, however, collective bargaining becomes a bit artificial. Trade unionism has also taken on a somewhat bureaucratic and 'lobbyist' aspect."

Mr. Beausoleil made the following distinction between "conciliation in the strict sense of the word" and "conciliation and investigation".

"Conciliation in the strict sense of the word," he said, "may be voluntary or compulsory. Conciliation and investigation, especially as practised in Canada and in Quebec, have characteristics both of arbitration and of conciliation in the strict sense of the word. In the United States, conciliation in the strict sense of the word is practised more than anything else, the action of the conciliation officer being personal and involving no procedural requirements. In certain cases the parties have recourse to voluntary arbitration, which constitutes the limit of outside intervention which employers and unions seem willing to accept."

In England, he pointed out, unions do not have to be certified, but they do have a labour disputes court, whose decisions are binding. This is a case, however, of voluntary arbitration.

"In Canada," Mr. Beausoleil concluded, "the structural elements of the provincial and federal systems are similar. The investigation, recommendations concerning the terms of the collective agreements and suspension of the right to strike during the whole conciliation period constitute the original and common elements of the regulations set-up. In order to take advantage of these regulations, certification is always necessary, and the right to strike, although it is recognized, is sometimes replaced by the arbitration of conflicts of interest, particularly in certain sectors of the public service."

### Ambiguities of Present System

Certain essential ambiguities or points of confusion, inherent in the present system, were brought up by Roger Chartier, Professor in Laval's Department of Industrial Relations.

Mr. Chartier undertook to examine the ambiguities and particularities of the Quebec system of settling conflicts of interest in the private sector.

The present industrial system, the speaker said, is situated in a society which subscribes to the principles of democracy, which gives a very high place to all freedoms, which believes in the value and the autonomy of intermediate groups.

"In this perspective," he said, "the duty of shaping collective bargaining falls unquestionably to the parties in the first place, and not to the State. The State should intervene as little as possible, only in case of absolute necessity, only to facilitate a quick and peaceable settlement without imposing it, and only if such intervention is really effective and socially desirable."

Mr. Chartier protested strongly against heavy-handed intervention on the part of the State "in the name of a rather vague industrial peace".

This persuasive intervention, which is sometimes tempted to go on from the procedural level to that of the subject matter of the agreements, takes place in terms of a valuation which is perhaps falsified and negative of the strike, which should be avoided, it would seem, at any price, even were its positive function in a free society to be disregarded.

For the strike, in spite of the evils which it always brings with it for the parties concerned and sometimes for the public, is a tangible sign of the vitality of that society and of the freedom which prevails in it. And the legal and social bounds which make its manifestation possible constitute the most dynamic and most constructive elements of our social structure.

The speaker specified that one need not necessarily dispute the validity of any State intervention in the settlement of labour disputes, but suggested that State intervention be carried out in such a way as to show greater respect for the freedom of the parties, helping them to find grounds for understanding rather than seeking to avoid a strike at any cost.

Taking as a basis the deepest possible respect on the part of the State for free dealings between the parties, Mr. Chartier suggested the following standards:

- Legislation will impose as few limits as possible on disputes, and thus on subsequent agreements between the parties.

- The procedure will be as short and simple as possible, will not be redundant and will allow for alternatives.

- The various stages of this procedure will form a continuous line, and not a series of stages which systematically ignore one another.

- The chairman of the arbitration court will be perfectly well aware that he represents the parties, whom he is trying to bring to agreement by means of compromise and persuasion, and not the Department of Labour.

- Since in conflicts of interest it is really a question of conciliation and not of arbitration, union and employers' "arbitrators" will not be required to show an impossible

impartiality and to seek for a spurious economic justice whose criteria are, obviously, absent.

- It will be understood that too long a waiting period, instead of cooling off the bellicose ardour of the parties and patiently inviting them to come to an agreement, is an invitation to lazy negotiations, full of friction, which will eventually lead to costly explosions.

- Conciliation, in addition to being a preventive remedy, will also become an informative and educative remedy destined for the negotiators.

## Criticism of Present System

The General President of the Canadian and Catholic Confederation of Labour, Gérard Picard, in his criticism of the present system of settling conflicts of interest, denounced in particular "the exasperating delays" provided by the legislation.

"If you confine yourself to the minimum delays provided by the law," he explained, "you arrive at a total of 172 days; and in practice a still longer period of time elapses."

This state of affairs is apt, in Mr. Picard's opinion, to bring about denials of justice, arouse provocation, and, as a result, give birth to illegality.

The speaker also noted that these delays affect the duration of agreements and the principle of retroactivity as well as the bargaining atmosphere.

In order to improve the situation, Mr. Picard suggested that bargaining should be "serious" from the beginning, and that it should be possible to exercise the right to strike immediately after the direct bargaining between employers and employees.

It would also be desirable, according to the speaker, that the conciliation stage and the arbitration stage should not be compulsory, but optional, and that, in the latter event, arbitration should really be arbitration, and not further conciliation.

Finally, Mr. Picard noted that the conciliation officer should have ability and freedom of action, that he should show impartiality, and that he should have enough judgment to make practical suggestions. He also suggested that the arbitration board, in case of failure, make no recommendations, since that only complicates subsequent negotiations, each party accepting only what pleases it in those recommendations. Mr. Picard also protested against politics entering into the appointment of chairmen of arbitration boards.

## The Case of Public Services

"As the economic and social frontiers between the milieu in which we work and the mass of the public agents become less distinct, the functional distinction between public services and private enterprise loses some of its meaning," said René Mankiewicz, legal adviser to the International Civil Aviation Organization.

The results of this evolution, according to Mr. Mankiewicz, are twofold: the status of the official being profoundly changed, the legal notion of the official has to be revised; then again, the problems peculiar to the public administration come up in a multitude of private or semi-private concerns, so that the concept of public service takes on a new dimension and must be redefined.

Thus there arises the question of the extent and the limits of the validity of the two principles on which all legislation prohibiting strikes in the public service rests: firstly, the rule that strikes are incompatible with public office, and secondly, the principle of the continuity of the public services.

"The first rule," Mr. Mankiewicz explained, "has been breached by certain constitutions and by legislation and jurisprudence which are conscious of the change in the atmosphere of public office.

"However, the second rule still seems to justify, in certain cases, limitations of the right to strike, and even the stopping of a strike, in certain public services and in concerns whose uninterrupted functioning is of vital interest to the common good."

The speaker concluded:

Whatever method may be chosen by the legislator for limiting the right to strike in public services, when the strike would be seriously prejudicial to the common good, then his legislation brings into play the direct influence of the Government over the settlement of collective disputes. Whether the Government is authorized to put an end to an abusive strike, to impose collective bargaining before a strike breaks out or to impose arbitration, government policy will have a direct influence over the progress and result of the negotiations. In certain countries the action taken by the Government with a view to avoiding or stopping a strike is subject to legal control. In any case, however, under a democratic regime, the last word lies with public opinion, which is able to bring pressure to bear on the orientation of Government policy.

## Criticism of System in Public Services

Guy Merrill-Desaulniers of Montreal, a specialist in labour law, examined Quebec legislation for the settlement of conflicts of interest in the public services, stating, among other things, that in his opinion the Act respecting Disputes between Public Services and their Employees is "ultra vires".

The speaker denounced the increasing tendency towards more and more frequent intervention on the part of the State in the spheres of economic and social life, and more particularly in the field of public services.

"It is universally recognized," said Mr. Merrill-Desaulniers, "that the salaried individual cannot protect himself effectively against his employer unless he associates himself with other wage-earners to set up an organization whose mere existence seems to constitute an equality of strength which makes it possible for him to deal with his employer on an equal footing."

The speaker added:

In the framework of labour-management relations, freedom of association has no meaning unless the right to free negotiation of collective agreements is added to it. Experience has shown that the right to collective bargaining can become an illusion unless there is a possibility of having recourse to a strike.

In his opinion, compulsory arbitration with awards binding on the parties does not represent adequate compensation for loss of the right to strike.

Noting that in certain essential services the right to strike can create certain serious difficulties, Mr. Merrill-Desaulniers specified: "The rule in this respect should be that of absolute necessity. And there again there must be compensation by means of a guarantee that arbitration with an enforceable award will bring the union party practically the same advantages as free collective bargaining, with the possibility of a strike, would have afforded it."

Has Quebec legislation exceeded its rights?

Mr. Merrill-Desaulniers replied in the affirmative:

"My opinion is that Section 7 of the Act respecting Disputes between Public Services and their Employees is beyond the powers of provincial legislation, since, in enacting this section, the provincial legislator has encroached upon a domain belonging exclusively to the federal Parliament—that of criminal law.

"In prohibiting strikes in Section 4 and imposing a penalty for them in Section 7, the provincial Parliament has simply created a new crime, to which it has attached a penalty."

## State Intervention in Dispute Settlement

"Outside intervention in the bargaining process should be the exception, requiring justification every time it happens," said Adolf Sturthal, Professor of Industrial Relations at Columbia University and of International Trade Unionism at Roosevelt College.

Speaking at the banquet that closed the two-day convention, he pointed out that if State intervention is frequent it will create a state of waiting for intervention.

"The result will be," he said, "that if one of the parties hopes to derive benefit from outside intervention, it will not enter into normal negotiations."

Mr. Sturnthal added:

A more careful examination shows that very few economic disputes in modern society are of a nature to justify State intervention. Certainly a great many strikes do inconvenience the public, but if it were necessary to have the State intervene every time, we would have done away with the free system of collective agreements.

The speaker also suggested that a strike which inconveniences no one has little chance of success. In his opinion, this is "the price we have to pay for free collective bargaining".

The speaker put forward the following three suggestions:

1. A strike is not necessarily an indication of unhealthiness in industrial relations. There are all kinds of strikes—from the "quickie" to the normal dispute corresponding to a divergence of interests. And if it is true that some of these types of strikes are more questionable than others, we must nevertheless learn to consider the strike as a simple stage in the bargaining process, of which it forms an integral part.

2. The industrial dispute has many forms of expression other than the strike. Anxiety and tension in the individual, absenteeism, delays, slowdowns in production, sabotage and an abnormally high rate of staff turnover are some of the possible forms of expression of the industrial dispute. The advantage seems doubtful if, in order to suppress one of these forms, the others are to be aggravated.

3. The whole experience of modern industrial nations seems to indicate that with the development of collective bargaining systems of greater maturity, the frequency of strikes tends to decrease. But this happens only if collective bargaining can mature, that is if both parties are able to discuss matters without fear of systematic outside intervention.

In closing, Mr. Sturnthal quoted a passage from Matthew Kelly, taken from the Nazi experience in industrial relations:

"Care must be taken to avoid giving assistance to attacks on individual freedom, which we fought so hard against when they were practised under another name. When industrial peace is obtained by means of strict coercion or by elimination of labour's

freedom of association, by State control of wages, hours and conditions of labour in general, and by forced arbitration, the price paid in this way is prohibitive."

## Suggested Remedies

To the final speaker of the two-day session fell the task of outlining suggested remedies to cure the ills of the Quebec system of settlement of collective industrial disputes of interest.

Prof. H. D. Woods, Director, Industrial Relations Centre, McGill University, listed five remedies for present ills, noting that it is important to decide what areas of decision-making are to be transferred to legal instruments such as rights to association and bargaining, what powers are to be vested in labour relations boards, and what assisting role in conciliation should be undertaken by public agencies and by what means this role is to be performed.

Prof. Woods' suggestions are as follows:

1. The framework of bargaining should be secured and stabilized. This means that the certification process must be efficient and certain. Crucial to this is a Labour Relations Board of the highest integrity, completely free from political control or influence, and one in which the general public and the interested parties have complete confidence. Certain powers of the Board may need to be redefined in law, and procedures should be public. The motives for the Board's decisions should be fully published.

2. The private character of the relationship of the private parties needs to be respected, and the assisting state agencies should operate with the objective of encouraging independence on the part of employers and unions, and a greater sense of responsibility for the relationship with a reduced dependence on government third parties. This may require a reconsideration of the conciliation service, and especially of the impact of councils of arbitration on the process of accommodation. Important legislative changes may be indicated which would reduce the importance of councils of arbitration and increase the influence of conciliation officers.

3. The question of the legal prohibition of the strike during conciliation needs to be reconsidered. There is much evidence that it has not produced results consistent with public policy in labour relations. A collective agreement is not a search for truth

but a search for an agreement suitable to the two parties. The present effect of conciliation is to delay negotiations. These delays "heat up" the parties rather than "cool them down".

4. There is a strong case for outlawing the strike and the lockout during the life of an agreement provided this change is

associated with compulsory arbitration of disputes occurring during the contract period.

5. The law regarding unfair labour practices needs to be altered so as to eliminate behaviour of both management and unions which is inconsistent with the spirit of public policy in labour relations.

## Wage Rates for Labourers in Manufacturing, Oct. 1957

Between October 1, 1956 and October 1, 1957, the average hourly rate for male labourers in manufacturing industry increased by 9 cents; in the corresponding period of 1955-1956, the increase was 8 cents

From October 1, 1956 to October 1, 1957, the average hourly wage rate for male labourers increased by 9 cents in the manufacturing industries covered by the annual survey of wage rates conducted by the Economics and Research Branch. This compares with an average increase of 8 cents for the corresponding period in 1955-1956<sup>1</sup>. The 1957 survey covered 42,200 labourers.

Employers were asked to report wage rates for labourers to whom the following definition applies: "workers performing one or a variety of manual duties which may be learned in a short time, requiring little independent judgment and which are too general to be classified otherwise." Both production and non-production or maintenance labourers are surveyed, but such workers under incentive systems as well as female employees are excluded.

Wage rates for labourers are usually the lowest rates for male occupations in a plant, except for hiring and apprentice rates. The labourer's rate is used in many establishments as a basis for setting the higher rates for other plant occupations.

As may be seen from the accompanying table, average wage rates for labourers are highest in British Columbia and Ontario, although no provincial pattern stands out. In some localities of those two provinces, the average wage rate is lower than in some centres in the Maritimes, Quebec or the Prairie Provinces.

Furthermore, within a province, the average rate is often higher in a number of small localities than in the major centres. This is especially true in Ontario

and Quebec, where the average rates in several localities are higher than in the major centres of Toronto and Montreal. The diversification of industry in these two cities tends to reduce the effect of a higher level of wages in one particular industry or establishment on the general average for the city.

On the other hand, in smaller centres where one industry or establishment predominates, the local average is greatly affected by the wage rates paid in that industry or establishment. In Sydney and Welland, for instance, where the primary steel industry is the predominant source of employment for unskilled workers, the relatively high wage rates paid in that industry raise the average local rate for labourers well above that for most other centres of similar size in the provinces of Nova Scotia and Ontario. Another example of high local average rates for labourers is found in Cornwall, Thorold and Trois-Rivières, where pulp and paper mills are the main employers of labourers, at the higher rates prevailing in that industry.

Index Numbers of Average Wage Rates in Manufacturing<sup>2</sup>  
All Occupations Surveyed

| Year       | Labourers | including Labourers |
|------------|-----------|---------------------|
| 1949 ..... | 100.0     | 100.0               |
| 1950 ..... | 108.8     | 106.1               |
| 1951 ..... | 122.7     | 120.3               |
| 1952 ..... | 134.9     | 128.4               |
| 1953 ..... | 141.8     | 134.6               |
| 1954 ..... | 145.7     | 138.5               |
| 1955 ..... | 149.8     | 142.2               |
| 1956 ..... | 158.0     | 149.8               |
| 1957 ..... | 168.4     | 158.6               |

<sup>2</sup>Based on annual surveys of wage rates at October 1.

<sup>1</sup>See Labour Gazette, July 1957, p. 880.

Wage rates for labourers in manufacturing appear to have increased slightly faster than those for other representative occupations in manufacturing, as indicated by the table on page 726.

The chief factor responsible for changes from year to year in the average wage rates is the general revision of actual straight-

time rates being paid in establishments. Factors other than changes in wage rates may influence the averages. The most important of these are: changes in the number of employees in the plants, localities and provinces; modifications in survey coverage and reporting methods; and individual adjustments in rates based on merit or length of service.

# **WAGE RATES FOR MALE LABOURERS IN MANUFACTURING OCTOBER 1, 1956 AND 1957**

NOTE.—The average wage rates for Canada and for the provinces are derived from many cities in addition to those shown in the table.

| Locality                      | 1956                      | 1957                     |                                           |

# Royal Commission on Coasting Trade

**Rejects proposals to restrict Canadian coasting trade to vessels built and registered in Canada, or even to vessels registered in Canada, and to restrict Canada-U.S. trade to vessels registered in either country**

Proposals to restrict the Canadian coasting trade to vessels built and registered in Canada, or even to vessels registered in Canada, are firmly rejected by the Royal Commission on Coasting Trade as detrimental to the public interest, in the Commission's recently published report.

The Commission also recommends against the restriction of the "transborder" trade—between Canadian and United States ports—to ships registered in one or other of the countries concerned. The report expressed the opinion that "the continued exclusion of outside competition in all the inland services would materially lessen the advantages to be derived from the (St. Lawrence) Seaway".

The Royal Commission, appointed March 1, 1955, was directed to inquire into "all questions within the jurisdiction of Parliament, including questions . . . arising out of the transportation by water, or by land and water, of goods and passengers from one place in Canada to another place in Canada, including the Great Lakes". One of the matters for inquiry particularly mentioned in the terms of reference was "the probable effects of the development of the St. Lawrence Seaway upon the coasting trade of Canada, including the Great Lakes".

The Commission received altogether 173 briefs. "These included representations from shipping and shipbuilding interests (including suppliers of materials and components), provincial governments, municipal authorities, chambers of commerce and boards of trade, trade associations, labour organizations, major Canadian railways, representatives of the agricultural, mining, fishery, pulp and paper, and other industries dependent to a great or less extent upon water transportation, as well as a wide variety of other interests."

The first part of the Commission's report is largely devoted to a review of the history and economics of the Canadian coasting trade, and of Canadian and United Kingdom legislation affecting it. The report then goes on to consider the prospects for Canadian-registered shipping in the coasting trade, the proposed restrictions on that trade, and the history and present position of the Canadian ship-building and ship repairing industry.

## Prospects for Canadian Ships

"Under existing legislation the Canadian coasting trade is open to vessels on the registries of all Commonwealth countries on the same terms as to vessels on Canadian registry," the report points out. Participation by non-Commonwealth vessels ordinarily is of comparatively small proportions.

In discussing the prospects for Canadian-registered shipping in coasting trade, the Commission says that "on the East Coast and on the Gulf and River St. Lawrence, in the absence of a change in the present law, it is probable that Commonwealth and Canadian vessels would continue to divide the field . . . On the Pacific Coast the use of other Commonwealth vessels is of negligible importance and is likely to remain so."

On the Great Lakes 85 to 90 per cent of the package freight business consists of goods moving from point to point in Canada. The main Canadian operators do not fear the loss of this business to ocean competitors, the Commission says, and it agrees that they have no reason to do so.

But "the greatest concern expressed was with respect to the future of Canadian registered lakers in competition for inland bulk cargoes, including the inland movement of grain destined for export. The trades at stake are both coasting and international. The fears appear justified," the report says.

Under present tax structures, a specialized ocean-going bulk carrier on U.K. registry may have an advantage not only over a Canadian registered laker built in Canada but also over one built in the United Kingdom or otherwise acquired at comparable costs.

## Proposed Restriction to Canadian Ships

On the proposal to restrict the coasting trade to Canadian vessels the Commission says that the Canadian ship operators themselves are divided. The Commission's main conclusions on this question were:

—On the eastern coasts and the Gulf of St. Lawrence, the restriction "could not fail to cause a substantial increase in transportation costs" for a large volume of commodities carried in the coasting trade, with similar effects in some international services. "Applied to the coasting movement

of coal it would cause collapse of the Cape Breton coal industry unless offset by a substantial increase in coal subventions..."

—On the Great Lakes and St. Lawrence River, the restrictions would mean "moderately greater water transportation charges". It would probably cause most Canadian export grain to be shipped directly overseas from the Lakehead, causing a substantial loss of coasting trade. "This loss would impair the competitive position of Canadian operators in the transborder trade. It would not afford any substantial advantage in shipping service."

—On the Pacific Coast the restriction would afford little or no practical benefit to Canadian operators generally or to the public, and hence would lack justification.

The increase in transportation costs and lessening of services that would result from restricting the Canadian coasting trade to vessels registered in Canada would be intensified if it were further required that the vessels must be built in Canada, the report says. It adds that it "would also increase the cost of transporting most of the other coasting cargoes now carried in Canadian-registered vessels".

On the other hand, Canadian shipyards would derive benefit from the added restriction. The Commission puts at \$8,960,000 the value of the average year's orders for ship construction that would be received by Canadian shipyards as a result of the proposed restriction.

The net value of production in Canadian shipbuilding during the 10 years from 1946 to 1955 averaged \$62,655,000 a year; the Commission points out that orders averaging \$8,960,000 a year would be "of comparatively minor assistance in maintaining a shipbuilding industry".

The Commission said it could not express an opinion on the contention that restricting trade to Canadian-built vessels would be justified on grounds of national defence. If this were so, however, it thought "a policy of direct subsidization of ship construction would be the least costly and the most effective way of achieving the desired result."

### Other Submissions

In other submissions the Commission was urged to recommend "that legislation be

enacted to regulate the internal government of trade unions, to revise collective bargaining procedures, to apply the federal Industrial Relations and Disputes Investigation Act to the shipbuilding industry, to impose compulsory minimum wage and maximum working hours in small coasting vessels and to require a labour representative to be appointed to the Canadian Maritime Commission," the report says.

The Commission declared that general questions of policy in labour legislation in matters not peculiar to the coasting trade should be dealt with as such and not as a by-product of an investigation directed at another target.

As to shipyards, they are presently subject to provincial labour relations legislation... Apart from legal constitutional questions that might arise there appears to be no sufficient reason why the general pattern should be departed from in the case of shipyards any more than other local undertakings.

The Commission could not agree that minimum wage and maximum working hours should be imposed on all smaller vessels operating in the coasting trade. "These vessels are frequently operated by family groups under informal employment arrangements in which the persons on board are more in the nature of members of a syndicate. Further, many of these vessels also engage in fishing under profit-sharing and other similar schemes of remuneration which this type of regulation would entirely disrupt. The proposed recommendation would put many of these smaller vessels now rendering useful service, particularly in Newfoundland and St. Lawrence waters, out of business."

Nor could the Commission agree that a labour representative on the Canadian Maritime Commission was essential. "Boards set up to function on general policy in wide fields cannot have representatives of every interest that may be affected by their operations. The functions of the Canadian Maritime Commission extend over all shipping problems. Only a small proportion of these require consideration of labour problems." The Canadian Maritime Commission is itself advised by numerous advisory committees which include an advisory labour panel, the report added.

# 87th Annual General Meeting of Canadian Manufacturers' Association

Wage-productivity-inflation relationships, and union security and the right to work discussed at industrial relations conference that formed part of program of two-day meeting. More than 1,500 delegates present

Two topics currently of great concern to both Labour and Management were discussed at the industrial relations conference at the 87th annual general meeting of the Canadian Manufacturers' Association, held in Montreal June 4 and 5. More than 1,500 delegates attended.

The two subjects were wage-productivity-inflation relationships and union security and the "right to work".

The industrial relations conference was one of seven making up the meeting's program. The others were: a plenary conference on management and one on education, and conferences on trade and tariff, transportation, marketing, and public relations.

The Prime Minister, Rt. Hon. John Diefenbaker, gave the annual dinner address. Gen. Alfred M. Gruenther, President, American National Red Cross and former Supreme Allied Commander in Europe, was the dinner speaker the first day.

In the election of officers for 1958-59, Ian F. McRae, Chairman of the Board, Canadian General Electric Company Limited, was named President, succeeding Harold V. Lush. J. Ross Belton, Director, Gutta Percha & Rubber Limited, was re-elected Treasurer for a fifth time.

## President's Address

"The best solution for our perennial (trade) woes would be an adequate tariff to protect our Canadian economy and our Canadian wage standards from the devastating effects of cheap labour and mass-produced imports," said H. V. Lush in his presidential address.

"If Canada's manufacturing industry is to continue to furnish employment for one out of every four gainfully employed persons, as it does today, it must be permitted to operate in a business climate of fair competitive conditions," he added.

He pointed out that manufacturing is Canada's biggest employer of labour, that Canadian wage rates are three times those of the United Kingdom and Western Europe and eight to twelve times those of Asia, and that United States manufacturers can produce more cheaply than Canadians

can because they are geared to a domestic market containing ten times as many persons as Canada's.

He went on to say that any policy of adequate tariffs should be supported by Canadians' purchasing of the products of their own factories instead of imported products. "In other words," he urged, "Buy Canadian!"

Advising the delegates not to base their appeal on patriotism and sentiment, he urged them to show Canadian consumers that buying Canadian-made goods would bring prosperity to their own families, and not just to some family in the next block.

"We have got to satisfy the Canadian woman in particular that, unless she buys the goods made by Canadians, other Canadian wives will not have the money with which to buy the goods made by her husband." Where will Canadian women get money to spend if Canadian men are out of work, he asked, and how can Canadian men remain employed if the goods they make are not sold?

He warned the manufacturers that the quality of their goods must be first-rate and the price reasonable—things for which they were responsible—if they hoped to persuade customers to buy. Canadian craftsmen are as good as those anywhere and Canadian technicians and techniques the equal of any in the world, he pointed out.

Neither manufacturers nor Labour can afford not to make the "Buy Canadian" symbol synonymous with value for money, he warned. He believed that many Canadians who depend on the manufacturing industry know now that "only disaster can come from forcing wage increases unjustified by productivity improvement, increases that inevitably mean higher prices, consumer resistance and rising unemployment. Labour's desire for a square deal—with which I have every sympathy—must take full account of the cost factor."

Mr. Lush said he saw the CMA's "Buy Canadian" drive as a bridge that could unite Labour and Management across Canada and that could be the means of

introducing a new era of industrial peace based on mutual understanding and trust.

To the obvious comment that Canada's exports would suffer if we didn't buy from other countries, the CMA President pointed out that in the "Buy Canadian" campaign the Association was arguing only that when two comparable products—one domestic and one imported—are displayed for sale, "the shopper is acting in his own best interest by choosing the Canadian product".

Our very survival as a nation, he declared, depends on our willingness to do four things: invest in the development of our own industries, process more of our own raw materials, enforce a realistic tariff policy, and consume our own manufactured products.

Mr. Lush then dealt briefly with the present trade offensive by Russia. He warned that Russia's invasion of the markets of the world has strong political overtones, has been stepped up at a time when North American economic consolidation makes its effects more significant, and has already begun to "pinch our toes".

Let us by all means trade with the Russians where such trade is a sensible, business-like, fair proposition. In fact, let us encourage such healthy trade with every means at our disposal. But let none of us be kidded into welcoming their economic offensive with open arms where its ultimate aim is, to say the least, the embarrassment of members of our own family.

He concluded by explaining that he had refrained from any reference to "this period of economic consolidation through which we are passing" because he believed the delegates knew that "no boom in a free market economy can go rocketing on with never a pause for breath".

There is no cause for fear, he said. "Canada's march will continue . . . This is no time for moaning; it is a time for preparation, of readying ourselves for an even greater wave of expansion than any we have witnessed in the last ten years."

### General Manager's Report

The report of the CMA's General Manager, J. C. Whitelaw, is a review of events and the Association's activities during the preceding 12 months.

Under the heading, "Inflation and Monetary Policy," Mr. Whitelaw points out that despite slackening demand for many commodities and falling world prices for a number of Canada's exports, wages have continued to rise and the consumer price index has kept climbing.

The Association contends that a most serious continuing inflationary pressure in the Canadian economy arises from the use by labour unions of monopolistic power in

continually forcing wage rates, and hence prices, upwards without relation to the demand-supply position of the products concerned or to the increase in the productivity of labour.

On the proper means of controlling inflation, the CMA believes the use of monetary policy is preferable to a widespread system of selective controls. Because the application of monetary controls "bears unequally on different segments of the economy and different geographic regions," the Association has recommended that a new appraisal of Canada's whole financial structure and machinery be made.

On the subject of immigration, the report expresses the belief that the reduced rate of immigration in the first half of this year will be temporary. The CMA continues to emphasize a long-term, liberal immigration policy. "Over the next quarter century Canada will need all the morally, mentally and physically healthy people who will wish to come," the Association declares.

Dealing with taxation, the report records the CMA's recommendation that taxation be reduced, because "if more money is left in the hands of individuals and corporations, it will have a stimulating effect on business generally and, in particular, will make increased Canadian capital available for the much-needed investment" in Canadian industry.

Membership in the CMA at April 30 totalled 6,307, Mr. Whitelaw reported.

### The Prime Minister

Just as he had at the Canadian Labour Congress convention in April (L.G., June, p. 595), Prime Minister Diefenbaker appealed for "restraint" by every group in the community.

"A reasonable degree of stability in prices must go hand in hand with the relatively full utilization of available resources if we are to exploit to the full the tremendous opportunities for further development that lie ahead," he said.

"In times of economic strain we are apt to forget that many of the outstanding business successes have resulted from decisions to seek profits from large volume rather than from high prices," he continued.

"I urge you, therefore, in the interests of your country and of your own, to keep the economy open, competitive and dynamic."

Then he repeated his words to the CLC: "Increased per capita productivity should be the main objective of all Canadian economic activity. The present does not appear to be the time for drastic or over-demanding action by any segments of our

economy. We are not going to meet the unemployment situation if we are priced out of world markets."

The challenges of the years ahead, he explained, are going to require "the joint and common determination on the part of both Labour and Management to increase the efficiency of production to provide, by a formula of common consent, a higher standard of living for the Canadian consumer on the one hand, as well as to assure the maintenance of a competitive position for Canadian products in the markets of the world."

Mr. Diefenbaker had prefaced these remarks with the comment that the continuing rise in consumer prices was a "disquieting feature" of the present situation. Rising prices tend to constitute a major deterrent to spending, he said, adding that "a country that buys and sells as much in world markets as Canada can ill afford to let prices get out of line with those of its competitors".

The Prime Minister began his address by saying that while Canada had achieved political sovereignty we have still to achieve economic sovereignty, which he defined as "that measure of control of our destiny which must be the goal of our planning if we are to match the achievements of nationhood in the political field with an equally decisive achievement in our economic affairs".

While Canadians are now a united people, he continued, there are still economic diversities—differences between regional 'haves' and 'have-nots'; differences between Management and Labour;" and conflicts between special interests: producer and consumer; supplier and manufacturer, importer and exporter, and buyer and seller.

He then appealed to all elements of society to balance special interest with a matching regard to the public interest.

Turning to a review of current economic conditions, which he described as "a period of economic adjustment," the Prime Minister pointed out that the currents affecting Canadian business were predominantly international. The United States is now in the throes of the sharpest economic setback of the postwar period, growth in other major industrial countries has become increasingly hesitant, and declining demand for industrial materials, coming at the culmination of a tremendous build-up of capacity the world over, has resulted in a general weakening in international commodity markets.

The impact of this international market situation upon Canada as a major world supplier of materials has been two-fold. It has adversely affected conditions in mineral and

forest product industries, which together account for nearly two thirds of Canada's exports. It has, in addition, had a dampening effect upon capital expansion, which was previously centred in large measure around the build-up of new capacity in resource-based industries.

He was optimistic, however, that the Canadian economy appeared to be coming through the present period of difficulty with comparatively little dislocation.

The Government had taken the opportunity to use resources that otherwise would have gone into the construction of new plants and equipment for increased house-building, local improvements and other institutional facilities, he said.

He called attention to the fact that most of the decline in outlays for new machinery and equipment had been reflected in lower imports rather than in reduced Canadian production. On the other hand, exports were down only 2 per cent from the same period last year.

Despite Canada's vulnerability to adverse market influences abroad, he continued, over-all production and employment have declined considerably less than in the United States.

The Government has attempted to adapt to Canada the remedies for unemployment that the world's leading economists have prescribed, he said. These he enumerated as: (1) monetary policies designed to stimulate investment and consumption; (2) measures to maintain a high level of personal income, such as higher social welfare payments, tax reductions, cash advances on farm-stored grain, and extension of unemployment insurance benefits; (3) stimulation of housing by lower down payments and income-eligibility requirements under the National Housing Act; (4) provision for larger fiscal payments to provinces; and (5) a major new program of public works.

In addition, he said, the Government's aim was to bring about a greater degree of processing Canada's resources within this country.

"To meet the problem of unemployment, comprehensive action must and will be taken, regardless of deficits in the national budget," the Prime Minister stated.

#### **Gen. Alfred M. Gruenther**

Gen. Alfred M. Gruenther, who was formerly Supreme Allied Commander in Europe, spoke on "Some aspects of the security problem of the free world".

One of the major objectives of NATO, he said, is to prevent war, to have sufficient retaliatory strength that an aggressor will not dare to begin a third world war.

But the problem was not a military one alone, he went on. It is also a political and economic one. "If we are unable to establish contact with the billion and a half people in Asia, we are in real trouble," he said. "If we do not find a way to improve and assist those people we are going to be in real difficulty."

He thought the free world had the solution but it was going to have to widen its horizons.

"If the free enterprise system survives, Communism cannot survive," he declared.

### Election of Officers

Ian F. McRae, Chairman of the Board of Canadian General Electric Company

Limited, Toronto, Ont., was elected President of the Canadian Manufacturers' Association for 1958-59. He succeeds Harold V. Lush, of Toronto.

Other officers elected were: First Vice President, W. H. Evans, President and General Manager, Honeywell Controls Limited; Second Vice President, T. R. McLagan, President, Davie Shipbuilding Limited, and President, Canada Steamship Lines; Treasurer, J. Ross Belton, Director, Gutta Percha & Rubber Limited.

Alan C. Harrop, Manager, Department of Employee Relations, Imperial Oil Company, Ltd., was elected Chairman of the Association's Industrial Relations Committee.

## LABOUR COSTS AND INFLATION

### Dr. Jules Backman

"Canada, like the United States, has been experiencing a wage inflation due to excessive increases in wages and in other labour costs," Dr. Jules Backman, Professor of Economics, New York University, told the industrial relations conference at the CMA annual meeting.

"Between 1947 and 1957," he said, "average hourly earnings in manufacturing industries doubled or showed an annual rise of slightly over 7 per cent. In contrast, output per man-hour for the non-agricultural economy increased only about 2 per cent... These data suggest that a substantial rise in unit labour costs has taken place.

"On the basis of these data, the 10-year rise in unit labour costs was 63.6 per cent, or about 5 per cent per year. During the same period, the retail price index rose 43.8 per cent and the wholesale price index by 39.2 per cent.

"Between 1955 and 1957, average hourly earnings increased by 10.7 per cent or a little more than 5 per cent a year. Since productivity recorded no change in this period, unit labour costs rose by a similar amount. During this period, the consumer price index and wholesale prices rose an average of about 2 per cent a year."

Dr. Backman pointed out that average hourly earnings in manufacturing industries in Canada have risen "spectacularly" from 70.5 cents in 1944 to \$1.60 in 1957. "This increase of almost 90 cents an hour or 12 per cent in a period of approximately 13 years is one of the most sensational increases in your history. However, this period was also one of rising prices. From 1944 to 1957, the consumer price index rose by 63.4 per cent or about half as much as the

rise in hourly earnings. Between 1947 and 1957, real hourly earnings in Canada rose 3.3 per cent per year as compared with a rise of about 2 per cent in output per man-hour. Thus, workers appear to have participated fully and more in the expanding productivity of the Canadian economy during the past decade."

To the arguments that wages have not caused inflation because real wages have risen about in line with output per man-hour, and that it is improper to compare money wages, which are measured in dollars, with productivity, which is measured in physical units, Dr. Backman replied that "higher real wages reflect the combined results of rising productivity and rising prices... To determine the impact of wage increases on prices, it is futile to use changes in real wages.

"The fact is that real wages can rise more than productivity only if workers are able to divert goods and services from other groups to themselves," he declared.

Another point made by Dr. Backman was that despite the rise in retail prices, real wages had risen sharply during the past decade, at a higher rate than national productivity.

He also pointed out that the classical pressures for inflation, namely, unbalanced government budgets and a sharply rising money supply, were not present in Canada and hence "do not explain the rise in prices in the past two years".

Two other explanations are sometimes offered, he went on. These were: (1) excessive price increases by Industry, and (2) excessive increases in labour costs. He then pointed out that profits before taxes had declined from 5.9 per cent of sales in

1950 to 4.2 per cent of sales in 1956. "Canadian Industry failed to increase its prices as much as labour and other costs rose."

That increases in labour costs greater than gains in productivity have an impact on prices is illustrated, he said, by the "service" component of the consumer price index, which has been rising steadily. "Services are predominantly labour costs and this is an area of the economy where productivity gains have been at a minimum."

On the basis of the sparse information available, he said, "it appears that the average annual increase in labour costs has been so much greater than the gains in productivity that unit labour costs have risen markedly. This sharp rise in unit labour costs could not be absorbed without raising prices."

Price rises, Dr. Backman pointed out, "take away from the worker part of the gains which he may have thought he was obtaining as a result of the increases in his money wages".

The level of living is determined by the volume of goods and services available. Merely expanding the number of dollars does not raise the average standard of living. Expanding the number of dollars paid without relationship to what is being produced inevitably reduces the purchasing power of those dollars through the process of rising prices.

One of the tragedies of this attempt to ignore elementary arithmetic has been the adverse pressure experienced by those with fixed incomes. Both in the United States and Canada, these groups have had to bear the full burden of price inflation. Thus, those who have received excessive wage increases have been able to increase their own living standards in part at the expense of the living standards of others.

Dr. Backman concluded by making a projection of Canadian productivity trends based on long-term rather than short-term experience. On the basis of experience since 1926, he foresaw a productivity gain in Canada of about 2 per cent per annum.

### Panel Discussion

Dr. Backman's address was commented on by a panel of four industrialists: M. J. Foley, President, Powell River Company, Limited, Vancouver; Gordon Grundy, President, Studebaker-Packard Ltd., Hamilton, Ont.; T. H. Robinson, Industrial Relations Manager, Canadian International Paper Co., Montreal; and J. B. White, Vice President and General Manager, Aluminum Company of Canada Limited, Montreal.

"There seems to be little question that wages have been the principal reason for inflation. We are in for major economic trouble if this trend continues," said Mr. Foley.

Unions have pursued a course that benefits no one, a course that could lead to economic disaster and to unemployment, he said, primarily because employees have not understood what is happening.

Labour cost statistics should include fringe benefits, because these are as much a part of costs as wages, and virtually all costs are labour costs, Mr. Foley declared.

He then asked Dr. Backman two questions: (1) How should increases in productivity be shared between Labour, investor, Management? (2) Do you see any hope of productivity increases?

Dr. Backman replied that everyone must share in the benefits of increased productivity. "The best way is by cutting prices rather than raising wages. The man who puts up the money must get a good share and management is entitled to a share."

Both Canadian and United States employers have given in too easily, he continued, "because you could get it back from the consumer".

Management is as anxious as Labour to give increases when times are good, Dr. Backman asserted, but "in 1958, on what conceivable basis can you justify wage increases?"

Mr. Grundy said the automobile industry was having trouble marketing at present prices, that productivity in the industry had increased very little, and that any change in the hourly rate of production meant a change in the number of workers.

"The rigid application of seniority cuts efficiency 10 per cent," he said, and the Unemployment Insurance Act "is another built-in rigidity that rules out a varying length of work week. The worker can make more staying home than working three days a week".

Mr. Grundy said union and government measures that aim at maximum security impose a strait-jacket on industry.

"In our industry, prices have been more sticky than wages," said Mr. Robinson. "The industry has been forced to concentrate on more efficient methods of production rather than on raising prices. But unions have just as ambitious plans as in the greatest of boom times."

It is in the failure of the unions to realize that conditions have changed that our greatest danger lies, he concluded.

In answer to a question from the audience, Mr. Foley said conciliation always seems to end up in the union's getting more than it would have got otherwise.

To the question, "How can unions be compelled to accept the responsibility for

increasing productivity in return for higher wages?" Mr. Robinson replied: "Unions are organized for what they can get out of industry, not what they can contribute

to it." But Dr. Backman said: "Your best move is to keep unions neutral. It's Management's responsibility to arrange for increases in productivity."

## UNION SECURITY AND THE RIGHT TO WORK

### Prof. Sylvester Petro

"It is inaccurate to infer that right-to-work laws are confined to unorganized areas or to southern states," said Prof. Sylvester Petro, professor of law at New York University, who spoke on "Right-to-work Laws in the United States".

"It's true that southern states are more preponderantly those with right-to-work laws," he said, "but some wholly industrialized states have them.

Prof. Petro defined a right-to-work law as one "prohibiting denial of employment or encouraging the denial of employment because of membership or non-membership in a labour organization".

Outlining the historical and legal background of right-to-work laws in the United States, he explained that one set of courts (Massachusetts, Indiana, Ohio) took the position that arrangements between unions and employers establishing union membership as a condition of employment amounted to an unlawful labour objective and that, therefore, aggressive economic action by unions in pursuit of that objective might be enjoined. Underlying this view was the principle of voluntary association: being voluntary associations, unions could have the right to exclude anyone they might want but could not compel membership. The same courts, he added, by and large considered it permissible for employers to insist on non-unionism by means of "yellow-dog" contracts, i.e., those making it a condition of employment that the employee would not join a union.

Another set of courts (New York and California) took the position that compulsory unionism arrangements were entirely permissible, if not obtained by force or fraud, and that, therefore, unions might take aggressive economic action in order to obtain or enforce such contracts. The theory here, the speaker explained, was that a compulsory unionism arrangement, like any other consensual arrangement, lay well within the right of the parties.

The courts that took this latter position have shown a tendency to hold that if a union secures a closed shop it must admit

all qualified persons to membership, the maxim being that a union may have either a closed shop or closed membership policies but not both.

"Within the last year," Prof. Petro reported, "the California Supreme Court took the final step and ordered a trade union to admit to membership a man with all qualifications for membership who could not find a job without membership—a rather astounding development."

Statutory developments date from the turn of the century. In 1910 the National Association of Manufacturers, he related, proposed a law forbidding both compulsory-union and anti-union agreements. The first statutes made no attempt to prohibit compulsory unionism; "they were uniformly directed to anti-union (yellow-dog) agreements and they were equally uniformly held unconstitutional by the U.S. Supreme Court."

Beginning with the Railway Labor Act of 1926, labour relations laws forbidding all forms of economic coercion by employers against employees who wished to join unions were enacted. The anti-union contract was considered a form of economic coercion.

"Despite the earlier decisions holding unconstitutional the prohibition of anti-union contracts, it has been generally taken for granted that the Supreme Court would not strike down the more recent labour relations laws on this ground," Prof. Petro said.

The Norris-LaGuardia (anti-injunction) Act of 1932 specifically made the anti-union contract unenforceable, and the Wagner Act made it, in principle, an unfair labour practice. The Taft-Hartley Act of 1947, "which goes almost as far as the NAM proposal of 1910," amended the Wagner Act to make its strictures upon employer coercion equally applicable to trade unions.

As a consequence of Taft-Hartley, most forms of compulsory unionism contracts were specifically prohibited, and the Act went on to provide that state legislatures might prohibit "even those forms of compulsory unionism which the national law permitted".

Describing the growth of right-to-work laws in the United States, the speaker told how Florida, in 1944, became the first state to prohibit every known form of compulsory unionism agreement and Indiana, in 1957, the last to date. Indiana is the most intensively industrialized of all states with such laws, he pointed out.

There are now 18 states with such laws: Alabama, Arizona, Arkansas, Florida, Georgia, Indiana, Iowa, Mississippi, Nebraska, Nevada, North Carolina, North Dakota, South Carolina, South Dakota, Tennessee, Texas, Utah and Virginia.

Four states—Colorado, Hawaii, Kansas and Wisconsin—while not going so far as to prohibit all forms of compulsory unionism, go somewhat farther in that direction than the federal law. While generally in agreement with the national law, they impose stricter precedures upon unions seeking the kind of compulsory unionism permitted by law.

Three states—Massachusetts, Pennsylvania and Puerto Rico—provide, in general, that a union having a compulsory unionism agreement may not unreasonably deny, or expel from, membership.

Six states—Connecticut, Michigan, Minnesota, New York, Oregon and Rhode Island—by specific statute permit all forms of compulsory unionism agreements between employers and unions representing a majority of employees in an appropriate bargaining unit.

Louisiana has repealed its right-to-work law.

Turning to judicial interpretation of right-to-work laws, Prof. Petro reported that courts in most states have taken the position that the laws do prohibit any form of action to obtain or enforce union security. The United States Supreme Court has ruled them constitutional.

Unions have argued that the laws are unconstitutional because they interfere with "freedom of contract" guaranteed by the United States Constitution. The answer to this argument, Prof. Petro said, is: "What about yellow-dog contracts?"

Other arguments are based on the majority rule principle, on the declaration that compulsory unionism is necessary if unions are to be responsible, and on the belief that unions will be destroyed by anti-union employers unless compulsory unionism is permitted, he reported.

The most serious argument against compulsory unionism, Prof. Petro said, is that if employers may not resist compulsory

unionism under the law, the nation will be characterized by industry-wide unions and it will then be impossible for the nation to accept collective bargaining. "Wages will have to be fixed by the government and it will follow that prices will have to be fixed by the government."

### S. M. Gossage

"We do need in Canada legislation to protect the individual from being refused or deprived of employment because of failure to maintain membership in a trades union, provided such failure does not arise from failure to pay normal dues regularly required of all members."

This was the answer of S. M. Gossage, Assistant Vice President, Personnel, Canadian Pacific Railway Company, to the question posed in the title of his address to the conference: "Should Canada Have Some Form of Right-to-Work Legislation?"

In Canada there is no limitation such as exists in the United States under Taft-Hartley, he pointed out, and "in some ways we have a more urgent problem".

Mr. Gossage's conclusion was that "a problem does exist in regard to protecting the rights of the individual that justifies legislative action in the public interest to forbid provisions making an individual's employment or continued employment dependent of membership in a trades union unless failure to maintain membership arises solely from failure to pay or offer to pay the regular, periodic membership dues.

"I think that Management should support and advocate such legislation," he added, "not in the vain hope that thereby its bargaining position in labour matters might be improved but because it is responsible, as are all citizens, for protecting essential democratic rights and fostering the healthy growth or organisms necessary to the sound functioning of our society."

The legislation he was advocating would be similar to the union-shop provision in the Taft-Hartley Act, he explained. Right-to-work laws in the United States go considerably farther than that, he pointed out.

While he didn't believe Industry should sponsor any wider government intervention in union security clauses, he suggested clarification of the legality of clauses such as the Rand Formula that provide for the compulsory check-off of union dues.

In his address, Mr. Gossage discussed the nature of union security provisions, their origin, their effect, and where they may be going.

"Union security provisions concerning check-off of union dues are directed solely to the financial support of the union," he said. The voluntary check-off is a convenience to the union; the compulsory check-off subjects the individual to a tax in favour of the union but does not compel him into any association with the union; maintenance of membership provisions give unions a strong weapon of control over their members; the closed shop and preferential hiring agreements control entry to employment, the primary motive of which control is the elimination of competition, he said.

Where originally union security clauses sought security against the employer, today union security is often sought against other unions rather than the employer, he declared. "Dissidents would have to duplicate dues payments to support an intervening body."

Early closed shop provisions covered skilled tradesmen and were, for employers, a guarantee of a union member's competence in the trade. These early security provisions were small-scale and local, and developed particularly when the worker's attachment was to his craft rather than to any particular employer.

The growth of "mass unionism" resulted in a radical shift of power between Labour and Management. "In this period of strife the objective of the newer unions was to secure the position against counter-attack and to ensure their financial strength against a waning of membership enthusiasm."

The check-off of dues by the employer has become a generally accepted arrangement because the periodic collection of dues was difficult and expensive for unions, and involved problems for management in trying to prevent collections on the shop floor in working time, and because the cost and burden of payroll deduction on a small scale seemed trivial.

The point I draw from this review of the development of union security provisions is that they represent a logical reaction to a need, and to a need that generally speaking was legitimate, granting the acceptance of unions as an inevitable partner in an advanced industrial structure. The provisions developed may not always have been the wisest to reconcile the best interests of all concerned, but to the extent they spring from legitimate needs their mere cancellation may leave the problem unsolved.

Turning to the effects of the different types of union security, Mr. Gossage said check-off provisions undoubtedly help a union gain some financial security but

involve a minimum of restriction on the free choice of the individual.

Once compulsory association with the union (irrevocable check-off) is introduced in any form, the union hierarchy is presented with a weapon of much greater power. If an employee must remain a member in good standing as a condition of continued employment, the union may have the final say in an individual's employment regardless of his value or conduct as an employee.

Loss of membership in the union means loss of employment; and in the case of industries or occupations with widespread organization it may mean loss of the opportunity to earn a living. This places an enormous disciplinary power in the hands of the union.

Even when strictly controlled by safeguards in the union constitution, it must press strongly towards conformity and obedience to the powers-that-be; under the provisions of many union constitutions it may leave the dissident individual completely at the mercy of the controlling group in the union.

On the argument that a union needs the disciplinary power inherent in the union shop to guarantee compliance with the terms of the collective agreement, Mr. Gossage agreed that a secure union may be easier to deal with and more effective in promoting industrial harmony. But the benefits of such security may be bought at too high a cost, he declared.

While there may be sounder means of achieving those benefits, "Management does well to remember that insecurity for unions is generally destructive of a harmonious and effective relationship," he warned the delegates.

On the closed shop, the speaker pointed out that under a closed shop agreement the union hierarchy can bar a man from pursuing his craft for the rest of his working life—"a control over the rights of the individual not matched by any responsibility to outside authority".

On union-controlled hiring halls, Mr. Gossage said the problem was to retain the advantages—the orderly dispatching of labour to casual jobs or short-term projects, and the guarantee of the competency of the workers supplied—without granting unrestricted power to the union.

The alternatives to union-controlled hiring halls seem to be government control of hiring halls as an adjunct to employment offices or active union-management partnership in the operation of the halls; the choice is obvious, he said. "It would seem to be a challenge to employers in industries with a pattern of hiring halls or union control of labour supply to work out arrangements that will effectively associate management with the unions in this function."

The union shop is a declared objective of much of the labour movement, he went on, but if Management has "a philosophy of acceptance of unions, of recognition of a legitimate and useful function to be performed by them, there is hope that the passage of time may blunt the drive for more extreme forms of security and encourage constructive means of organizing the relationships between management, union and employees.

"The struggle for equilibrium (between the three groups) can be confined in more healthy limits if no one of the parties has real fear for its continued existence," he declared.

Mr. Gossage then defined the interests of each of the three parties. Management's obligation to manage the business demands continued co-operation of the working force; therefore Management has had to agree to restrictions of its power by collective agreement. It is the "duty" of Management not to bargain away powers that are essential to the proper conduct of the business. He included among such powers the selection, disciplining and discharge of employees, all of which are affected by the closed shop and union shop.

But, he pointed out, having written compulsory-unionism clauses into its collective agreements, Management cannot now ask for their legislative prohibition. It may be that society must eventually curb unions' power or impose increased responsibility on them, but in the meantime "Management's job is to seek for areas of stable and constructive relationships rather than attempt to confine an opponent in restrictions imposed from without".

The aim of unions is to achieve status, security and power, he continued. By a willingness to grant reasonable security and status, Management may reduce the unions' drive for power.

Too much power is probably as bad in the long run for unions as too little security. An entrenched hierarchy can lose touch with its membership and generate pressures that may eventually rise to explosive pitch. This is particularly so when open opposition and discussion of controversial issues may be stifled by union control of employment. This suggests that the type of power involved in compulsory union membership as a condition of continued employment is not desirable in terms of healthy growth of the union.

Turning to the individual, Mr. Gossage reminded his audience that in most cases the individual is quite happy to have to be a union member or to have to pay dues. The problem of the individual is generally the problem of the rights of the

minority; respect of the rights of a minority is a hallmark of democratic society, he said.

"In my opinion, in a developed industrial society, making the right to employment dependent on acceptability for membership in a union cannot be justified," he declared.

In some situations security for the union may be the best path to a stable relationship with management. This may require compulsory payment of dues from individuals but, Mr. Gossage thought, this compulsion was not a serious invasion of the right of the individual. "In accepting employment in any organization the individual accepts certain restrictions on his free right of choice."

The speaker could see no difference in principle between a worker's being required to contribute to health and welfare protection and his being required to contribute to the support of a bargaining agent. But there is a clear distinction between a compulsion that may affect the individual's livelihood and one that touches only his pocket, he said.

Mr. Gossage then dealt with the question: "Should a union shop be permitted such as exists in the United States under the Taft-Hartley Act, where a man cannot be deprived of employment except for non-payment of dues, or should union security be confined to a compulsory check-off of dues, as in the Rand Formula?"

If Management should feel that union security is constructive in their particular situation, "I would incline myself to a compulsory check-off of dues," he said, "but I can see no compelling reason for legislative interference with bargaining in this particular area."

The only justification for legislative interference with union security provisions lies in the safeguarding of the rights of the individual, he declared. Recent cases have shown that the remedies available at law to an aggrieved party are not adequate to protect him effectively.

It was because this problem exists that Mr. Gossage believed legislation was necessary to forbid provisions making an individual's employment or continued employment dependent on membership in a union.

## Panel Discussion

To conclude the industrial relations conference, a panel composed of three prominent lawyers discussed the papers presented by Prof. Petro and Mr. Gossage.

Prof. Maxwell Cohen, professor of law at McGill University, said the problem mentioned in Mr. Gossage's paper has four

components: (1) the problem of free association and conditions under which such associations may impose rules; (2) the opportunity for free choice by individuals; (3) the problem of maximum mobility of Capital and Labour with stability; and (4) the claims of minorities in group life.

"The presence of union security clauses is part of a larger story of the search by unions for bargaining strength; attacks on union security by some sections of Management are part of a suspicion of the whole union movement," he said.

The question of union security was, in fact, part of the larger question of the arbitrary use of power in our society, he added.

Prof. Cohen described the present position thus: "Unions are much stronger but they continue to be remarkably vulnerable; Management is far more amenable to the needs of unions than they were; and unions themselves are more conscious of the weaknesses of their constitutional mechanisms and of the need to constitutionalize power."

The term "right-to-work" was a misnomer, he concluded, "because it gives the public the impression that what we are talking about is a guarantee of work".

Raymond Caron, QC, of Montreal, declaring that Management had moved from the

defensive to the offensive, suggested that the CMA aim at complete prohibition of all union security clauses except the voluntary check-off.

"I believe Canada and the provinces should enact right-to-work laws prohibiting all forms of union security, including maintenance of membership and the Rand Formula, except the voluntary check-off," he said.

He described a collective bargaining agreement as a "compulsive" agreement because Management is compelled to bargain in good faith with a party in whose selection it has had no part.

R. V. Hicks, QC, of Toronto, thought unions' objections to right-to-work laws indicated their fear that they might not be able to maintain membership without compulsion. He also believed that unions, as employers were, should have to be "legally constituted personalities".

"A trade union is not the employees' *alter ego*; it is their bargaining agent," he said. "A trade union's true role is to represent the employees in collective bargaining; it is not designed to supplant the employee in his relationship with the employer."

"The question is: Are employees losing control of their bargaining agent?"

---

## Conference of Representatives of TUC Unions Catering for Women

Delegates to 28th annual meeting discuss changing pattern of women's employment, participation of women in the trade union movement, equal pay for equal work, and scientific and technical education for girls

The changing pattern of women's employment, participation of women in the trade union movement, equal pay for equal work, and scientific and technical education for girls were the major subjects discussed at the 28th Annual Conference of Representatives of Unions catering for Women Workers, held in London, England, April 25 and 26, 1958.<sup>1</sup>

The 173 women attending the meeting included 144 delegates from 48 affiliated union organizations, 10 delegates from 10 local Women's Advisory Committees,

three fraternal delegates and 16 visitors. Miss B. Anne Godwin, OBE, Chairman of the National Women's Advisory Committee, presided.

(The National Women's Advisory Committee, an advisory body of the TUC dealing specifically with the problems of working women, is composed of seven members of the General Council of the TUC and five representatives nominated by affiliated union organizations and elected at the Annual Conference of Representatives of Unions Catering for Women Workers. Local Advisory Committees are organized in the industrial centres of the country.)

The conference discussed and adopted the Advisory Committee's report for 1957-58 and passed a number of motions dealing

---

<sup>1</sup>Women Workers, Report of the 28th Annual Conference of Representatives of Trade Unions Catering for Women Workers, London, April 25 and 26, 1958. Published by Trades Union Congress, London W.C.1.

with women's wages, educational quality for women, factory rest rooms, and part-time workers, among other subjects.

Women's membership in organizations affiliated to the TUC totalled some 1,401,400 in 1957, an increase of more than 17,000 from 1956.

### Changes in Women's Employment

The remarkable changes in women's employment were stressed by the Chairman in her opening remarks. Not only has the number of women working risen greatly—eight million women were in paid employment in Britain in 1958, compared with six million in 1939—but the increase in the number of married women working has been startling. In 1950 (the first year for which statistics are available), married women in employment numbered 2,850,000; by 1956, the number had risen to 3,720,000, i.e., in that year nearly 50 per cent of all women working in Britain were married.

The economic consequences of employing married women in such large numbers were touched upon. "For years," Miss Godwin stated, "they (married women) have been the only additional source of labour available to meet the expansion of industry and the increase in production. Industry, be it noted, has expanded on women's rates of pay.

"In many homes, a comparatively high standard of living has been secured only on the basis of two incomes going into one house." The fear was expressed that should the present rising unemployment trend continue, the position of married women in industry would be affected and with it the standard of living in many homes.

### Participation of Women in Trade Unions

The vital need for greater participation by women in the trade union movement was emphasized by many delegates. The report of the Advisory Committee outlined a number of events undertaken during the year by local women's committees to interest women in joining the ranks of organized workers. One of these was "Festival of Women" held at Wembley in June 1957.

Because delegates thought that interest alone was not enough and that women should play as large a part as possible in the trade union movement, the conference requested the appropriate body in the TUC, in co-operation with the Women's Advisory Committee, to consider "what measures should be taken to encourage Trades Councils to undertake activities which will attract women to participate".

### Equal Pay for Equal Work

A motion dealing with equal pay expressed alarm at the "continued policy of the employers in refusing to concede the principle of equal pay for equal work or the rate for the job". Although the principle had been accepted for some administrative workers, civil servants, teachers and local government workers, progress in the industrial field was not satisfactory.

One of the reasons advanced for this lack of progress was that women in industry are badly organized. Individual unions should exert strong pressure in their own areas and women should be made aware of how much their unions can do for them, it was recommended.

The low level of women's wages was also discussed and the danger of "cheaper labour" in periods of unemployment was underlined. The conference expressed the opinion that the trade union movement should give special consideration to the need for a co-ordinated policy aimed at raising the whole level of women's wages.

### Educational Equality

Educational equality for women was another of the conference's objectives. In particular, attention was focused on the limited opportunities offered to women to study scientific and technical subjects. This largely stemmed from the shortage of teachers of scientific and technical subjects in girls' secondary schools.

Parents also had a part to play, it was pointed out, not only in encouraging their girls to study scientific subjects but in exerting pressure on girls' schools to provide adequate training in this field.

The conference passed a motion requesting the TUC "to press the Government to take all possible steps to increase the number of qualified women teachers of science and mathematics and to see that all girls' schools are as well equipped as boys' schools for teaching" these subjects. Unless this were done, the delegates felt, the improvement of living standards in this technical and scientific age would be prejudiced.

### Weekend Schools for Women in Unions

The TUC organizes eight weekend schools each year for the purpose of stimulating the interest of women members of affiliated unions in trade unionism and to encourage them to play a more active part within their own organization. The National Women's Advisory Committee regards these schools as among the most successful of its activities.

The schools are intended primarily for women new to the trade union movement but the report of the Advisory Committee shows that about one fifth of the 215 women attending in 1957 had previously attended one or more similar schools. Two weekend schools for advanced students have therefore been approved for 1958. Study in these schools will be more specialized than in the regular ones.

### TUC Summer Schools

In 1957, of the 177 persons attending TUC summer schools, only 24 were women. Forty places are reserved for women each year and the conference expressed concern that the facilities available were not being fully used.

Among the reasons advanced for the small number of women attending these schools were that domestic duties made it difficult for married and often single women to attend classes and that many women suffered from a feeling of diffidence in attending courses with men. The con-

ference passed a motion urging women to take full advantage of the educational facilities offered by the TUC General Council and by their own individual unions.

### Part-Time Workers

About three quarters of a million women were in part-time employment in Britain in 1957, and the rising trend of married women working indicates that this type of work will be more and more sought after. A motion was passed, therefore, "that in view of the number of married women who have to go out to work the conference asks the Women's Advisory Committee to investigate the opportunities for part-time work and the wages and conditions operating in part-time jobs".

Among other subjects dealt with were: the need for day nurseries for children of working mothers, for legislation regulating health, safety and welfare conditions in non-industrial employment, and for the protection of workers in occupations involving exposure to radiation, and the effects of automation on women's employment

## Industrial Fatalities in Canada during First Quarter of 1958

Deaths from industrial accidents\* decreased by 137 from the previous quarter. Of the 212 fatalities in the January-March period, largest number, 48, occurred in construction; 36 occurred in manufacturing

There were 212† industrial fatalities in Canada in the first quarter of 1958, according to the latest reports received by the Department of Labour. This is a decrease of 137 from the previous quarter, in which 349 were recorded, including 38 in a supplementary list.

During the first quarter there were four accidents that resulted in the deaths of three or more persons in each case. On March 5, 11 men were drowned at Laval Des Rapides, Que., when the coffer dam in which they were working collapsed under

the pressure of ice. At Angus, Ont., six civilian employees at a government explosives depot were killed when charges they were handling exploded and demolished a 100-foot-long building. Three fishermen from Port Simpson, B.C., were lost on January 6, when their fishing vessel was wrecked during a storm. On February 28, three men working on a power project on the Peribonca River, Que., were killed when the rock drill they were using struck a dynamite charge.

Grouped by industries (see chart p. 742), the largest number of fatalities, 48, was in construction. This figure includes 22 in highway and bridge construction, 16 in miscellaneous construction and 10 in buildings and structures. In the same period last year, 64 fatalities were recorded in this industry: 27 in buildings and structures, 21 in miscellaneous construction and 16 in highway and bridge construction. During the fourth

\*See Tables H-1 and H-2, page 818.

†The number of industrial fatalities that occurred during the first quarter of 1958 is probably greater than the figure now quoted. Information on accidents which occur but are not reported in time for inclusion in the quarterly articles is recorded in supplementary lists and statistics are amended accordingly. The figures shown include 56 fatalities for which no official reports have been received.

# INDUSTRIAL FATALITIES IN CANADA

First Quarter of 1958

Source: Economics and Research Branch, Department of Labour.

quarter of 1957, 85 fatalities were listed: 39 in buildings and structures, 24 in miscellaneous construction and 22 in highway and bridge construction.

In manufacturing there were 36 fatalities; of these 10 were in wood products, 9 in iron and steel and 7 in the transportation equipment group. For the same period last year, 55 deaths were reported, including 14 in iron and steel, 13 in wood products and 10 in the transportation equipment group. Work injuries during October, November and December 1957, resulted in 50 deaths, of which 10 were in each of the iron and steel and transportation equipment groups, 7 in wood products and 5 in food and beverages.

Mining accidents caused the deaths of 34 persons, 18 occurring in metalliferous mining, 9 in non-metallic mineral mining and 7 in coal mining. During the first three months last year, 43 fatalities were recorded in this industry. These included 24 in metalliferous mining, 13 in non-metallic mining and 6 in coal mining. In the fourth quarter of 1957, 57 deaths were reported: 34 in metalliferous mining, 14 in coal mining and 9 in non-metallic mining.

Accidents in logging resulted in the deaths of 27 persons during the first quarter of 1958, a decrease of 6 from the 33 that occurred during the same period last year. In the fourth quarter of 1957, 32 lives were lost in this industry.

In the service industry, accidents were responsible for the deaths of 22 persons; this is an increase of 3 from the 19 recorded during each of the first and fourth quarters of 1957.

During the quarter, accidents in the transportation industry resulted in the deaths of 20 persons including, 9 in steam railways, 6 in local and highway transportation and 4 in water transportation. For the same period of 1957, 56 deaths were reported, of these, 22 occurred in local and highway transportation, 16 in steam railways and 15 in water transportation. During October, November and December 1957, 57 deaths were recorded, of which 16 were in local and highway transportation, 14 in each of the steam railways and water transportation groups and 8 in air transportation.

The industrial fatalities recorded in these quarterly articles, prepared by the Economics and Research Branch, are those fatal accidents that involved persons gainfully employed and that occurred during the course of, or which arose out of, their employment. These include deaths that resulted from industrial diseases as reported by the Workmen's Compensation Boards.

Statistics on industrial fatalities are compiled from reports received from the various Workmen's Compensation Boards, the Board of Transport Commissioners and certain other official sources. Newspaper reports are used to supplement these data. For those industries not covered by workmen's compensation legislation, newspaper reports are the Department's only source of information. It is possible, therefore, that coverage in such industries as agriculture, fishing and trapping and certain of the service groups is not as complete as in those industries which are covered by compensation legislation. Similarly, a small number of traffic accidents which are in fact industrial may be omitted from the Department's records because of lack of information in press reports.

An analysis of the causes of the 212 fatalities recorded during the quarter (see chart 000) shows that 68 (32 per cent) of the victims had been "struck by tools, machinery, moving vehicles or other objects." Within this group the largest number of deaths, 16, was caused by falling trees or limbs. Nine were caused by automobile or trucks, nine by objects falling or flying in mines or quarries and eight by cranes, derricks, other hoisting or conveying apparatus.

In the classification "collisions, derailments, wrecks, etc.," 39 fatalities were recorded. These include 20 as the result of automobile or truck accidents, 12 tractor or loadmobile accidents and 4 involving watercraft.

"Falls and slips" were responsible for 29 fatalities during the period, 26 of which were the result of falls to different levels.

By province of occurrence, the largest number of fatalities was in Ontario, where there were 75. In British Columbia there were 37 and in Quebec 33.

During the quarter under review there were 93 fatalities in January, 53 in February and 66 in March.

---

A series of four articles based on the Department's recently published *Survey of Married Women Working for Pay in Eight Canadian Cities* has been published in *Asahi Shimbun*, one of the most widely circulated daily newspapers in Tokyo.

Japanese interest in this study stems from the postwar increase in the number of married women workers in that country and the problems they face in fulfilling the dual role of homemaker and worker.

## Successful Rehabilitation—VIII

Eighth in a series of articles on success in rehabilitation achieved through the precise matching of the handicapped person to the job

*This is the eighth in a series of articles illustrating that the particular demands of any job—the unique combination of skill, aptitudes and attitude required in the worker—can often be met by a disabled person not by coincidence but by a precise matching of the person to the job.*

A woman who continued to work as a lining-maker and power sewing machine operator for 12 years despite the crippling effects of a rare ailment finally had to leave that type of work and was seeking other employment.

The disease, which struck her when she was 26 years old, affects the muscles and nerves of the back and spine, causing grotesque curvatures of the spine: she was bent forwards and sideways at about a 60-degree angle and had to support her head by holding it up with her hand. It did not affect the use of her legs, arms or hands, however.

As the cause of the disease is not known, a complete cure is doubtful.

The special placement officer was very much startled when she first saw the woman about 18 months ago when she reported to a National Employment Service office to file a claim because of a temporary layoff. Since her first visit, she has been interviewed on several occasions in the special placement unit and the officer has noted a remarkable progress in her condition. Through therapy treatments, she can now stand up straight, unsupported, for several minutes. Although her walking

position is the same, when seated she can sit up straight and hold her head upright without any support.

In January of this year when she again reported to the SPO, she was mentally depressed. She told the SPO that she could no longer continue as a power sewing machine operator but had to support herself. She was very despondent as she did not know what else she could do.

Her doctor was contacted before rehabilitation was considered. He told us that, as she was the eldest of eight children, during the depression she had to go to work at the age of 15 and therefore was unable to continue her education beyond Grade VIII. He assured us, however, that intellectually she was capable of holding a much more responsible job.

We then called the Dominion Business College and explained the situation to the principal. He kindly offered to give her a trial as a typist trainee for a week, free of charge. This was done, following which he reported that while her learning ability was good and her work showed promise, in his opinion she would not be acceptable to employers "as her handicap seemed to have a depressing effect on the class and might also have the same effect on an office staff, in spite of her good assets such as her pleasant manner, good speaking voice and attractive style of dress". Because of this report, the rehabilitation services were hesitant to refer her for a training course.

On her own initiative, she rented a typewriter and continued practising until she reached a speed of 30-35 words per minute. Her work was accurate and well set up. The NES then decided to train her as a telephone receptionist with typing ability as an asset. She was referred to the Crippled Civilians for training as a switchboard operator. Again, however, the training officer could not give any encouragement as to her employability, although he did say her learning ability was excellent and her pleasant manner and clear diction were definitely suitable to telephone work.

The SPO still felt convinced that the woman was employable and acceptable to employers and made several employer relations visits for this purpose. Eventually the SPO was successful in having a personnel

*Continued on page 764*

When the National Employment Service was established by the Unemployment Insurance Act of 1940, a Handicapped Section of the Special Placements Division was set up to provide special employment assistance to physically disabled workers. It was created for the express purpose of rehabilitating into employment those disabled persons capable of working but who, because of their physical, mental or emotional handicaps, might otherwise remain on the fringe of the employment market. The Section's special placement officers concentrate their efforts on, in the words of the manual of instructions, persons who, on account of injury or disease of a character which is likely to last more than six months, or on account of congenital conditions, are substantially handicapped in obtaining or keeping employment of a kind generally suited to their age, previous experience and qualifications.

# Rehabilitation Demonstration at ILO

Delegates to 42nd International Labour Conference see demonstration of U.S. rehabilitation techniques by patients of Dr. Howard A. Rusk, Director, Institute of Physical Medicine and Rehabilitation, New York

The importance of adapting to national circumstances and national policy the methods used to promote the employment of physically handicapped persons was pointed out by a recommendation adopted by the International Labour Organization in 1955. This is illustrated by the contrast between the policy followed by Great Britain and some other countries, and that favoured by United States authorities.

Dr. Howard A. Rusk, Director of the Institute of Physical Medicine and Rehabilitation, New York University, and President of the World Rehabilitation Fund, writing in the *New York Times* says that in Great Britain and some other countries of Europe the government requires that the physically handicapped shall be given priority for certain kinds of work. Employers must hire a fixed percentage of their employees from special registries of the handicapped.

Typical jobs that are thus reserved are running elevators and looking after parking lots.

Brazil is now considering the establishment of such a compulsory quota system.

In the United States, on the other hand, most authorities on rehabilitation are strongly opposed to such a plan, Dr. Rusk says. They assert that the emphasis should be on ability rather than on disability; and they contend that to guarantee employment for those who suffer physical disability serves as a deterrent to rehabilitation and individual initiative.

They argue that the method provides no incentive to the disabled person to improve himself or to the employer to make the most of disabled workers. Instead of this the American authorities favour the methods laid down by the President's Committee on Employment of the Handicapped.

In this system the underlying idea is that nearly all handicapped persons, even those severely handicapped, can become productive workers if properly rehabilitated, trained and placed in the right kind of jobs. As evidence of the slower but more effective results of this system its exponents contend that physically handicapped workers are suffering less in the

present recession in the United States than in previous periods of the kind.

To show the results that can be obtained by the methods of rehabilitation used in the United States, a special demonstration was given to delegates to the 42nd International Labour Conference in Geneva by Dr. Rusk and two of his former patients.

One of the patients, Paul Francolon, a French jockey and twice winner of the Grand Prix, broke his back in a racing accident in 1946. After spending seven years in bed he came to New York for treatment, and learned to walk with braces and crutches. Since returning to Paris five years ago he has been employed at one job.

The other patient, Steve Kalcandis, a former major in the Greek air force, became paralysed as a result of a flying accident.

The purpose of the demonstration, the idea of which originated with David A. Morse, Director General of the ILO, was to impress upon the delegates the social and economic possibilities of rehabilitation of the physically handicapped.

\* \* \*

A further step towards rehabilitating the handicapped in Canada has been taken with the opening in Toronto of Operation Reliance Limited, according to an article in *Industrial Canada* for May 1958.

The firm has a twofold task—giving employment to handicapped persons and training them to take positions on a competitive basis with persons who are not handicapped. The plant can employ 30 persons at a time.

Management has indicated that Operation Reliance is not looking for charity to carry on its work. It is in the industrial field on a competitive basis and intends to remain so.

At the present time the firm has four contracts to make parts for plastic windshields for motor launches, parts for assembling charcoal broilers, and other items.

The company is patterned after a U.S. firm, Abilities Incorporated, which was started in 1952. Today that company has more than 300 handicapped persons on its payroll. It began with four.

# 65th Annual Meeting of the National Council of Women

"Women in the world of work," one of reports discussed, outlined four topics for study by local councils: equal pay legislation, household workers who "live in," married women working, and vocational training

A report on "Women in the world of work" by the trades and professions committee of the National Council of Women was discussed at the Council's 65th annual meeting, in Vancouver, B.C., June 5 to 11.

In her report, Miss Eleanor Morley, Chairman of the committee, drew attention to the changing pattern of women's employment in Canada. "One of the most striking changes in the composition of Canada's labour force over the last 20 years has been the increasing participation of married women in paid employment," the report stated.

"Education and vocational training have had an important influence on women's employment. Women generally have been quoted as unwilling to take vocational training and education for the professions. It is now an established fact that many women will be in the labour force for most of their adult lives, excepting during child-bearing and child-rearing. Even though their immediate sights may be set on marriage, young women must be encouraged to seek further education and training in a specific profession or occupation."

The report of the trades and professions committee outlined the four broad areas suggested for study by the local councils during the year. These were:

1. Equal pay legislation, with a view to promoting it in provinces where it does not exist and to examining its effectiveness in provinces where it does.

2. Household workers employed on a "living-in" basis. Difficulties in finding persons willing to become household workers. Promoting coverage of these workers by the Unemployment Insurance Act and the Workmen's Compensation Act.

3. Married women working. Examination of the special problems confronting the married woman with a job outside the home.

4. Vocational training facilities. Promoting improvement of facilities for the training of both young and older women in skilled occupations.

Reports from local councils showed that the suggested subjects received attention in many parts of the country.

The Edmonton Local Council reported the introduction of Equal Pay Legislation in Alberta in 1957 "after several years of... concentrated effort on the part of interested women's groups". In Halifax and New Westminster the question of extension of Unemployment Insurance Coverage and Workmen's Compensation Benefits to household workers employed on a "live in" basis was being studied. A panel discussion on the employment of women was reported by the Vancouver Local Council. Various aspects of the question were covered, from "Her first job: How is she equipped for it?" to "The mature woman re-entering employment after a lapse of time." Resolutions were passed in May by the Calgary Local Council requesting the federal Government to re-establish courses it once provided for training and certifying household workers and to greatly expand the vocational training program to accommodate the older person as well as the young person.

The trades and professions committee is one of a number of standing committees of the National Council of Women, whose object is "to unite in a Dominion federation, for the betterment throughout Canada of conditions pertaining to the family and the state, all societies and associations of women interested in philanthropy, religion, education, literature, art or social reform."

Twenty-two nationally organized societies are now affiliated to the Council, which in 1957 had 50 local and seven provincial councils throughout the country.

During the past winter, several local councils co-operated in promoting the Department of Labour's campaign to further winter employment.

## 50 Years Ago This Month

**Nine-hour day established in shops of Canadian Northern Railway but at cost of 2-cent-an-hour pay cut. Railway builders increase activity**

A nine-hour day was established, and some skilled workers agreed to a reduction of 2 cents an hour, under a new schedule of working conditions that went into effect on May 1, 1908, for shop hands of the Canadian Northern Railway in Winnipeg.

Employees of the Ottawa Electric Railway, as a result of an agreement reached before a conciliation board appointed under the Industrial Disputes Investigation Act, received an increase in wages of 1 cent an hour, or 10 cents a day for a standard day's work. The LABOUR GAZETTE for July 1908 reported also that "a substantial benefit accrued to the employees of the second, third and fourth years, in having the whole instead of half the cost of their uniforms provided by the company. Some minor changes in working conditions were also agreed upon."

It was estimated that 24,000 harvesters would be needed to help in gathering the western crop, which promised to be the largest the Prairies had ever had.

"The number of men engaged on railway construction was increased during June, but the supply of labour was equal to the demand. It was estimated that in July about 9,000 men would be employed on the Grand Trunk Pacific railway alone," the LABOUR GAZETTE said. Some 1,000 labourers were reported to be at work on the extension to the Temiskaming and Northern Ontario Railway, grading north and west of the Abitibi River, and about 800 men were grading on the International Railway in New Brunswick.

"It was announced by the government that a railway from Saskatchewan to Hudson Bay, a distance of about 500 miles, and at an estimated cost of \$30,000 per mile, would be built," the GAZETTE reported.

"In connection with the carrying out of civic improvement works in the city of Winnipeg, Man., under fair wages schedules, it was recently proposed that in view of the large number of men of varying efficiency unemployed in the city the candidates offering themselves for work should be graded according to their capacity and paid accordingly," the LABOUR GAZETTE reported. "The proposal to abrogate the fair wages principle was not approved, and the city therefore is employing only the

more able-bodied among those presenting themselves."

It appears that "a slight difficulty" occurred between the management of the Dartmouth ferry in Halifax and the engineers employed by it. In August of the previous year the engineers had agreed to a reduction in pay from \$67 to \$65 a month because their hours were shortened. Since then their work was said to have increased and they asked that the rate of \$67 should be restored, "this being the same pay they received some 14 years ago, with 25 cents per hour for shop work".

This request evidently not being granted, four of the engineers stopped work. "This only left the chief engineer to operate the steamers, and as there was much difficulty in handling traffic, there was a consultation held between the management and the engineers on June 25, when the increase was granted and the engineers resumed work." The LABOUR GAZETTE adds: "The engineers had not immediately left work, as they might have done, but worked several hours so as not to have the line completely stopped. This no doubt greatly expedited the settlement."

The locomotive works and the Angus shops of the CPR in Montreal, which had been running with only a quarter of their staff for six weeks, re-opened in June 1908 as a result of orders for 150 locomotives, and 600 hands were taken on "for both night and day work".

The LABOUR GAZETTE reported that the Halifax city council "at its session on the 26th June unanimously granted \$500 to be expended jointly by the council and the Trades and Labour Council in entertaining the delegates to the Trades and Labour Congress of Canada at the meeting to be held in September."

In Regina a deputation representing the Trades Congress of Canada and the Regina Trades and Labour Council waited on the Government to protest against the proposed employment of convict labour in the construction of the Broad Street bridge. The Government assured the deputation that considering, as the GAZETTE put it, the "numbers of unemployed free men to be had," it did not intend to employ convict labour.

# INTERNATIONAL LABOUR ORGANIZATION

## Minister Addresses 42nd Conference

Declares Canada's most important labour legislation is that which "establishes ground rules for collective bargaining". Claude Jodoin, Worker Delegate, participates in debate on Director-General's report

Canada's most important labour legislation, Hon. Michael Starr, Minister of Labour, informed delegates to the 42nd Session of the International Labour Conference at Geneva, is not that which deals with minimum wages, hours, or even health and safety—important though these matters are.

"It is rather our legislation which encourages and establishes ground rules for collective bargaining. This legislation establishes a procedure for employers to recognize the union representing the majority of their workers and for bargaining in good faith between parties.

"Freedom of association, which has long been a fundamental right of Canadian workers, has thus been strengthened and given flesh and bones and blood. With that sort of approach to labour problems the role of the Government in labour-management relations in Canada, though important, is secondary.

"The Government is prepared to enforce and protect the workers' right of organization where necessary, although any positive action in this respect is seldom called for. It is also ready to protect each party against unfair practices by the other. It offers conciliation services when negotiations break down."

The Government provides information and statistics on various economic trends which the parties can take into consideration when they bargain, he continued, and helps to provide a generally favourable economic climate. "This includes striving to promote and maintain employment, income and investment, sound standards of social security, and various types of safety and protection measures," matters that cannot be adequately dealt with by collective bargaining.

Mr. Starr welcomed the emphasis the ILO is currently putting on its industrial relations program. "The ILO can do useful

work, I believe, in providing means for the exchange of information on methods of industrial relations in various countries," he said.

In Canada, appraisal of the way different methods of industrial relations are working out in practice is continually going on, he said, citing the grant by the Department of funds to the universities for independent research in this field. He also called attention to the current study of Ontario labour relations legislation by a committee of the Legislature.

In the same spirit I have recently invited employer and labour organizations to express their views on our federal legislation. This constructive review of our experience is a vital part of our search for better patterns of industrial relations, and in this spirit also we are very much interested in a new approach the ILO may be making in its expanded industrial relations program.

The rise in Canada's average standard of living has meant that more attention can be paid to groups below the average, the Minister said. "Hence, there has been an upsurge of interest in the older workers, in handicapped workers and in the problems of minority groups."

Legislation is not always the answer in dealing with these matters. "It is next to impossible, for example, to find legislation that goes all the way to providing for women workers' satisfactory wages and equality of opportunity to fill the high-paying occupations."

While commending the ILO's Conventions and Recommendations on these subjects, he warned that exclusive emphasis should not be put on this form of approach.

If we put too much reliance on the setting of legislative standards, whether at the national or international level, we are deceiving ourselves. We must also seek to achieve our aims by study and education, and by the exchange of information based on our varying types of experience.

**Hon. Michael Starr**  
Pledges Continued Support

This is what we are doing in Canada to supplement our legislation on equal pay and fair employment practices, through publications, talks, conferences, panel discussions, films and other devices. And I believe there is a clear role for the ILO, beyond the adoption of international instruments, in promoting discussions as to how the objects of the instruments may be implemented...

Mr. Starr then presented statistics illustrating the rapid pace of Canadian economic expansion during the past 10 years. Population has increased from 12½ million in 1947 to some 17 million, and the labour force has expanded by well over a million workers to six million today. The rapid pace in economic development was reflected in rising incomes and consumption.

"A reduced tempo in economic activity began to appear in 1957, a trend that continued into 1958. Investment and employment both eased off towards the end of 1957," he said. He attributed the reduction in job opportunities to reduced demand for consumer durables and a smaller cut of pulpwood.

By early 1958 total employment fell slightly below year-earlier levels. Although employment levels held up well, unemployment rose substantially.

About half of the unemployment during the past winter was due to customary seasonal layoffs, principally from the agriculture, construction, transportation, logging, lumbering and fishing industries.

The other half developed partly from a weakening demand for labour and partly from a rapid rise in the labour force. This rapid growth in the labour force was due mainly to the 282,000 immigrants, an unusually large number who came to Canada in 1957. I am happy to say, however, that the worst seems to be over and that the situation is improving.

Mr. Starr went on to say that the Government of Canada has taken a number of "vigorous steps" to stimulate employment, mentioning that last year \$300 million was made available for building of homes; there was a reduction in personal income taxes; the period of seasonal benefits for unemployed workers was extended, and this was further extended this year.

While the number of unemployed persons in Canada was 500,000 in the middle of April, the number of persons employed at that time was greater than had been the case a year earlier.

Mr. Starr complimented the ILO for its imaginative search for ways and means of providing direct assistance to countries that are developing their labour standards, and noted that he was impressed a few weeks ago by the speed and competence with which the ILO Office supplied his Department with information on how other countries were dealing with a particular administrative problem in which Canada's Labour Department was interested.

Great admiration for the fundamental objectives and activities of ILO were expressed by Mr. Starr. He pledged the "continued support of the Government and people of Canada for the ILO and the aims and objectives for which it stands".

### **Claude Jodoin**

The "crying need" for internationally conceived capital development projects in less-developed countries, and for economic aid and technical assistance programs in the constant battles against poverty, disease and ignorance, was drawn to the attention of the delegates by Canada's Worker Delegate, Claude Jodoin, President of the Canadian Labour Congress.

"We in Canada are particularly pleased with the activities of the ILO in the newly developed nations of the world and with the realization that the scope and emphasis not only of social policy... but of the whole world picture have changed markedly since the Second World War."

The Canadian labour movement, in association with free labour everywhere, has consistently made its voice heard against colonial oppression and supported national self-determination, and welcomed the achievement of independent status by

some 20 nations containing more than one third of the world's population, Mr. Jodoin declared.

Comparatively few gains have been made in the economic and social fields, he added. "If world peace is to be maintained, the frightful gap between the have and have-not nations of the world must be narrowed and ultimately filled."

The CLC President commended the activities of the ILO in the less-developed countries, the expansion of regional activities, the new emphasis placed on industrial committee meetings and discussions and the part played in these meetings by the industrially less-advanced countries, the growth of the ILO Expanded Program of Technical Assistance and the emphasis placed on the manpower and migration programs.

The ILO contribution to the problem of labour-management relations is of great significance and we are prepared to share our experience in this field with other countries, he said. In view of the wide range of activities we cannot but welcome the renewed interest in management development and workers' education.

Because with all the goodwill in the world, with the most efficient and dedicated staff, with imaginative leadership, the ILO nonetheless cannot afford to develop any fundamental new approaches for the benefit of the new nations and member states of the organizations, he pointed out. "There is a crying need for internationally conceived capital development projects in the less-developed countries and for economic aid and technical assistance programs in the constant battle against poverty, disease and ignorance. This tremendous task must be tackled by the more fortunate member states, working through the United Nations agencies which were created for that specific purpose. And unless this problem is tackled with speed, generosity and imagination the ILO cannot hope to make a substantial contribution in the foreseeable future to the welfare of the people in newly independent nations."

Although Canada has been one of the most generous contributors, per head of population, to the international agencies responsible for rendering technical assistance and technical aid, he said, "we nonetheless feel that we are not doing enough and that a larger portion of our total national income should be channelled into economic aid projects to less-developed nations."

A vastly expanded program of capital development and economic aid is still one of the most pressing and unresolved problems facing mankind, Mr. Jodoin said.

He agreed with the remarks of Director-General Morse in his report to the conference that "the value and prestige of the ILO's work rest in large part upon the traditional research, information and standard-setting activities of the ILO. The new methods and approaches discussed in this report are necessary, and already are of proved value, since they bring the ILO's work to more people in practical ways. These new activities complete the picture, highlight it in new ways, but must never be allowed to obscure the fundamental composition and background provided by traditional work."

Mr. Jodoin said he would prefer to see the Organization take a new look at existing Conventions and Recommendations, adjust some of them to the changed and still changing conditions of the newly developing industrial society, and begin research and discussion on new standards so as to fill the gaps which obviously still exist, rather than halt its search for new standards and its expansion of the International Labour Code, as some have suggested.

The tripartite structure of the ILO lends itself admirably to this work and to the fulfilment of the basic aims and purposes of the Organization. It also gives the ILO an additional advantage over other international organizations in bringing its program closer to the great mass of the people of the world and in associating the workers' and producers' organizations in the formulation of policy and in support for budgetary expansion on the part of member states.

He concluded by assuring the delegates that the ILO "will continue to enjoy the full support of the wage earners of Canada and the organized labour movement of our country".

### Chairman of Governing Body

In his speech at the opening of the Conference, Emilio Calderon Puig, Chairman of the ILO Governing Body, noted that the conference this year was being held at a time when technology, nuclear physics and the exploration of space had taken tremendous strides forward.

"Men in every part of our planet," he said, "are fearfully scanning the horizon to try to find out where these changes are leading us.

"Hitherto, the dismal truth is that their contribution towards peace and the raising of the living standards of the working masses has not equalled their contribution towards the fears and anxieties of our time. We must achieve peace within a just and human international order, or witness the

annihilation of 20th Century civilization and the cultural heritage handed down by our forefathers."

The ILO was a powerful force that could help to promote co-operation in the cause of world peace, he added.

Referring to ideological differences, he said: "Our task is not to perpetuate social inequalities and the barriers which keep countries apart, but rather to combat them with energy and determination—to enhance man's self-respect by enforcing human rights, in short, by helping to foster conditions in which the world can return to common sense and man can devote his energies to the task of peace."

---

## Conference President

Basanta Kumar Das, Pakistan's Minister of Labour and Education, was elected president of the conference. In his address to the delegates he told them that the peoples of Asia, where more than half the world's population dwells, are emerging successfully through their struggle for political independence; they are still fighting their battles against poverty, unemployment, underemployment, inequalities, ignorance and disease.

At press time the Conference was still in session.

## Ireland Tenth to Ratify Forced Labour Convention

Ireland last month ratified the ILO Convention on the Abolition of Forced Labour, the tenth nation to do so since the Convention was adopted at last year's International Labour Conference.

Ratifications by Italy of two Conventions on freedoms have also been registered. The two Conventions are: the Convention on Freedom of Association and Protection of the Right to Organize (No. 87) and the Convention on the Right to Organize and Collective Bargaining (No. 98).

Convention No. 87 has now been ratified by 33 countries, No. 98 by 38 countries.

### Ratifications Now Exceed 1,800

During the last ten years the number of ratifications of ILO Conventions has risen from about 1,000 to more than 1,800.

During this brief period ratifications have increased far in excess, both numerically and proportionately, of those recorded during corresponding periods before the war.

There has also been a shift in the proportion of ratifications received from the dif-

ferent regions: a steadily increasing share of the total is being taken by Africa, Asia and the Middle East, with a corresponding decrease in the percentage (but not in figures) for Europe and the Americas.

ILO Director-General David A. Morse points out that while fewer instruments have been adopted by the International Labour Conference during the last decade than during the first and second decades of ILO's existence, "those which have been developed are, in my view, well adapted to the needs of the world social situation today and have for that reason had a particularly healthy influence on the evolution of social policy in the areas which they treat.

"It is significant that six alone of the more important of the Conventions adopted since June 1947 (the two on freedom of association and the right to organize and collective bargaining, and those on employment service, protection of wages, labour inspection and equal pay) have already received a total of 172 ratifications."

## Freedom-of-Association Survey Seen Promoting Respect for Human Rights

The ILO's world-wide freedom-of-association survey "may open a new stage in international efforts to promote respect for human rights and fundamental freedoms," ILO Director-General David A. Morse told the United Nations Economic and Social Council at its 26th session. The factual

survey which is to include on-the-spot studies in ILO member countries will get underway next year, he said, recalling that the governments of the United States and USSR have asked that survey missions be sent to their countries.

An active, conscientious labour-management job-safety committee can be the most effective tool in combatting industrial accidents, according to Arthur Francis, Accident Prevention Director of the British Columbia Workmen's Compensation Board, and a member of the Joint Forest Products Safety Committee.

At a meeting of the Committee in Vancouver, he said much of the success of this year's Forest Products Safety Week, which started May 12, will depend on the actions of the safety committees and the support of the 60,000 workmen in the forest products industry of B.C.

Sponsored by labour, management and government, the week was opened by the raising of no-accident flags over hundreds of operations. If an accident occurred in an operation the flag was to be lowered. For the past several years there has been an appreciable drop in the number of industrial accidents during Safety Week.

Workmen's Compensation Board accident prevention regulations state that a firm that employs more than 20 workmen must form a joint labour-management safety committee, which must hold regular meetings to discuss and implement safe-working procedures. Reports of these meetings are sent to the Board, where they are carefully checked.

Mr. Francis singled out the employers in the forest products industry as being the most safety-conscious employer group in the province. "Their efforts have helped immeasurably to reduce the accident rate from 119 accidents per million man-hours worked in 1947 to fewer than 50 in 1957.

"Labour unions too, are recognizing that their participation in safety will have a marked effect on accident rates. Many of them have taken steps in this direction," he said.

\* \* \*

In a series of reports on plant safety, Tom McHugh, Safety and Security Officer at Fleet Aircraft Limited, Fort Erie, Ont., outlined some basic ideas of accident prevention through co-operation. He said, in part:

"Safety and its effect on the company's efficiency concerns us all. I cannot urge

too strongly that no opportunity be missed to encourage interest in our accident prevention activities. To reach our objective of an accident-free year, we need everyone to be safety minded. Success in an endeavour to promote safety comes nearer when all understand the objective and display interest.

"It has been proved that 98 per cent of accidents can be prevented, either by the person involved or by supervision, through the attitude towards safety that it builds among the employees. The success of almost completely avoiding accidents to employees is a constant challenge. Not one of us likes to feel we are less efficient than someone else, and in accident prevention work there is no need for anyone to be less efficient than the best.

"A safety program does much more than prevent accidents. It can increase production, improve employee relations and make operations more efficient. But, one thing we must all expect from a safety program is the reduction in the number of accidents."

\* \* \*

Labour-management committees function effectively in many non-manufacturing organizations. Among establishments where such committees are particularly effective are schools, hospitals and similar institutions. A large part of the cost of operation in these establishments is in building maintenance and there are many problems requiring attention. In many cases the active co-operation and advice received from those engaged in this work through labour-management committees have helped management to reduce costs and also improve service.

A typical example of what can be done is shown in the minutes of a meeting of a committee in a Western school system, where no less than 20 different items were discussed. These items included recommendations for changes or improvements in cleaning and maintenance supplies and equipment, reports on equipment, the condition of fixtures, causes of damage, and the problems occasioned in the use of school buildings by outside organizations.

Establishment of Labour-Management Committees is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions, the Service provides various aids in the form of booklets, posters and films.

# INDUSTRIAL RELATIONS AND CONCILIATION

## Certification and Other Proceedings before the Canada Labour Relations Board

The Canada Labour Relations Board met for one day during May. The Board issued eight certificates designating bargaining agents, ordered one representation vote, and rejected two applications for certification. During the month the Board received ten applications for certification, allowed the withdrawal of two applications for certification, and received one application for revocation of certification.

### Applications for Certification Granted

1. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, on behalf of a unit of employees of the Canadian Pacific Railway Company employed in the company's Data Centre at Saint John, N.B. (L.G., Feb., p. 173).

2. Warehousemen and Miscellaneous Drivers' Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of helpers, packers, warehousemen and garage employees of M. Rawlinson Limited, operating in and out of the City of Toronto (L.G., May, p. 493).

3. Brotherhood of Railroad Trainmen, on behalf of a unit of road train conductors employed by The Toronto, Hamilton and Buffalo Railway Company (L.G., May, p. 493).

4. Syndicate of Employees of Station CHRL, on behalf of a unit of employees of Radio Roberval Incorporée, Roberval, Que. (L.G., May, p. 494).

5. International Union of Operating Engineers, Local 796, on behalf of a unit of stationary engineers and their helpers employed by Canadian Arsenals Limited at its Gun Ammunition Division, Lindsay, Ont. (L.G., June, p. 628).

6. Building Service Employees' International Union, Local 204, on behalf of a unit of janitors employed by the Canadian Broadcasting Corporation in Toronto (L.G., June, p. 628).

7. International Longshoremen's and Warehousemen's Union, Local 509, on behalf of a unit of dispatched longshoremen employed by the Tidewater Shipping Company

Limited in the loading and unloading of coastwise vessels in the Vancouver area (L.G., June, p. 628).

8. Local M-128, United Marine Workers' Division of District 50, United Mine Workers of America, on behalf of a unit of deck officers and marine engineers employed aboard vessels owned or operated by the Clarke Steamship Co. Limited and its associated companies: La Compagnie de Transport du Bas St. Laurent Ltée, Magdalen Islands Transportation Company, Limited, North Coast Steamship Co. Ltd., North Pioneer Steamship Co. Ltd., Gulf Ports Steamship Co. Ltd., Terra Nova Steamship Co. Ltd., La Traverse Rivière-du-Loup St. Simeon Limitée, La Compagnie de Navigation Charlevoix-Saguenay Limitée, and Inter Island Steamship Company Limited (L.G., June, p. 628).

### Representation Vote Ordered

Nordair Mechanics Association Inc., applicant, Nordair Ltd., Roberval, Que., respondent, and International Association of Machinists, intervener (L.G., June, p. 628). The Board ordered a vote of the employees affected, with the name of the applicant organization only on the ballot (Returning Officer: C. E. Poirier) (A cross-application by the International Association of Machinists was rejected—see below).

### Applications for Certification Rejected

1. Brotherhood of Railroad Trainmen, applicant, Ontario Northland Railway, respondent, and Order of Railway Conductors and Brakemen, intervener (L.G., May, p. 493). The application was rejected for the reason that it was not supported by a majority of the employees eligible to cast ballots in a representation vote conducted by the Board.

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

2. International Association of Machinists, applicant, Nordair Ltd., Roberval, Que., respondent, and Nordair Mechanics Association Inc., intervener (L.G., June, p. 628). The application was rejected for the reason that it was not supported by a majority of the employees in the bargaining unit deemed appropriate by the Board (A representation vote was ordered in a cross-application filed by the Nordair Mechanics Association Inc.—see above).

### Applications for Certification Received

1. International Association of Machinists, on behalf of a unit of maintenance and ground service personnel employed by TransAir Ltd., Winnipeg (Investigating Officer: J. S. Gunn) (An earlier application affecting this same unit was withdrawn—see below).

2. Warehousemen and Miscellaneous Drivers Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Mac-Cosham Storage and Distributing Company Limited, operating in and out of Kingston, Ont. (Investigating Officer: T. B. McRae).

3. International Association of Machinists, on behalf of a unit of employees of Pacific Western Airlines Ltd., Vancouver (Investigating Officer: D. S. Tysoe).

4. Warehousemen and Miscellaneous Drivers Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Dew Moving and Warehousing Limited, Toronto (Investigating Officer: T. B. McRae).

## Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch also acts as the administrative arm of the Canada Labour Relations Board, in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certifications given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to

the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of two officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; three officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

5. International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, Local 990, on behalf of a unit of employees of Superior Cartage (Lakehead) Limited, Fort William, Ont. (Investigating Officer: J. S. Gunn).

6. Teamsters, Chauffeurs, Warehousemen and Helpers, Local Union No. 880, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Leamington Transport (Western) Limited, operating in and out of terminals in Manitoba and Ontario (Investigating Officer: J. S. Gunn).

7. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, on behalf of a unit of employees of the Canadian Pacific Railway Company employed in its Data Centre at Montreal (Investigating Officer: C. E. Poirier).

8. Canadian Association of Nuclear Energy Technicians and Technologists, Local 1568, CLC, on behalf of a unit of technicians employed by Atomic Energy of Canada Limited, Chalk River, Ont. (Investigating Officer: G. A. Lane).

9. International Union of Operating Engineers, Local 115, on behalf of a unit of construction equipment operators employed by the Poole Construction Co. Ltd., in the Yukon Territory (Investigating Officer: D. S. Tysoe).

10. Oil, Chemical and Atomic Workers International Union on behalf of a unit of employees of Eldorado Mining and Refining Limited, employed in its Port Hope refinery (Investigating Officer: F. J. Ainsborough).

### Applications for Certification Withdrawn

1. International Association of Machinists, applicant, and TransAir Ltd., Winnipeg, respondent (L.G., June, p. 628) (A new application was submitted later in the month—see above).

2. American Federation of Technical Engineers, Local 169, applicant, and Atomic Energy of Canada Limited, Chalk River, Ont., respondent (L.G., June, p. 628).

### Application for Revocation of Certification

W. K. Guttridge, *et al*, applicants, the International Association of Machinists, respondent, and Eastern Air Lines, Inc., respondent. The application was for revocation of the certification issued by the Board October 9, 1956, to the International Association of Machinists in respect of a unit of clerical and traffic personnel employed by Eastern Air Lines, Inc., at Montreal Airport, Montreal Ticket Office, Montreal Reservations and Communications, Uplands Airport, and Ottawa Ticket Office (L.G. 1956, p. 1543).

## Conciliation and Other Proceedings before the Minister of Labour

### Conciliation Officers Appointed

During May, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Construction Contractors of Whitehorse, Yukon Territory, Poole Construction Company Limited, Dawson and Hall Limited, Whitehorse, Y.T., and Local 2499, United Brotherhood of Carpenters and Joiners of America (Conciliation Officer: D. S. Tysoe).

2. Hill the Mover (Canada) Ltd. and General Truck Drivers and Helpers Union, Local 31 (Conciliation Officer: D. S. Tysoe).

3. Canadian National Railways (Niagara, St. Catharines and Toronto Railway—Motormen, Conductors and Bus Operators) and Amalgamated Association of Street Electric Railway and Motor Coach Employees of America, Local 846 (Conciliation Officer: F. J. Ainsborough).

4. Canada Steamship Lines Limited, Montreal, and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Conciliation Officer: R. Trépanier).

5. Canadian National Railways (Atlantic and Central Regions) and Brotherhood of Locomotive Engineers (Conciliation Officers: R. Trépanier and R. Duquette).

6. Robin Hood Flour Mills Limited, Calgary, and United Packinghouse Workers of America, Local 326 (Conciliation Officer: J. S. Gunn).

### Settlements by Conciliation Officers

1. Boyles Bros. Drilling (Alberta) Limited, Yellowknife, and Western District Diamond Drillers' Union, Local 1005, International Union of Mine, Mill and Smelter Workers (Conciliation Officer: D. S. Tysoe) (L.G., June, p. 629).

2. Trans-Canada Air Lines and Canadian Air Line Navigators' Association (Conciliation Officer: R. Trépanier) (L.G., June, p. 630).

### Conciliation Boards Fully Constituted

1. The Board of Conciliation and Investigation established in April to deal with a dispute between The Owen Sound Transportation Company Limited, Owen Sound, and Seafarers' International Union of North America, Canadian District (L.G., June, p. 630) was fully constituted in May with the appointment of Judge W. S. Lane, Picton, as Chairman. Judge Lane was appointed in the absence of a joint recommendation from the other two members Hon. W. E. Harris, QC, Markdale, and Harold Simon, Toronto, who were previously appointed on the nomination of the Company and Union respectively.

2. The Board of Conciliation and Investigation established in April to deal with a dispute between Canadian National Railways (Atlantic, Central and Western Regions, including Newfoundland District) and Brotherhood of Locomotive Firemen and Enginemen (L.G., June, p. 630) was fully constituted in May with the appointment of Hon. Mr. Justice Andre Montpetit, Montreal, as Chairman. Hon. Mr. Justice Montpetit was appointed in the absence of a joint recommendation from the other two members, T. R. Meighen, QC, Montreal, and A. E. Matthews, Parry Sound, who were previously appointed on the nomination of the company and union respectively.

3. The Board of Conciliation and Investigation established in April to deal with a dispute between Canadian National Railways (MV *Bluenose*—Yarmouth-Bar Harbour Ferry Service) and Canadian Brotherhood of Railway Employees and Other Transport Workers (L.G., June, p. 630) was fully constituted in May with the appointment of H. Carl Goldenberg, QC, Montreal, as Chairman. Mr. Goldenberg was appointed in the absence of a joint recommendation from the other two members Prof. Meagher, Halifax, and Clifford Scotton, Montreal, who were previously appointed on the nomination of the company and union respectively.

4. The Board of Conciliation and Investigation established in April to deal with a dispute between Shipping Federation of British Columbia and International Longshoremen's and Warehousemen's Union (Locals 501, 502, 503 and 508) (L.G., June, p. 630) was fully constituted in May with the appointment of F. E. Harrison, Vancouver, as Chairman. Mr. Harrison was

appointed on the joint recommendation from the other two members, C. G. Robson, Vancouver and George Home, Vancouver, who were previously appointed on the nomination of the company and union respectively.

5. The Board of Conciliation and Investigation established in April to deal with a dispute between The Packers Steamship Company Limited and the National Association of Marine Engineers of Canada Inc. (L.G., June, p. 630) was fully constituted in May with the appointment of F. E. Harrison, Vancouver, as Chairman. Mr. Harrison was appointed on the joint recommendation from the other two members, T. R. Watt, Vancouver, and Elwyn Hopkins, Vancouver, who were previously appointed on the nomination of the company and union respectively.

6. The Board of Conciliation and Investigation established in March to deal with a dispute between Association of Lake Carriers (Canada Steamship Lines Limited, N. M. Paterson and Sons Limited, Colonial Steamships Limited, Upper Lakes and St. Lawrence Transportation Company Limited, Mohawk Navigation Company Limited, Hall Corporation of Canada, Beaconsfield Steamships Limited and Sincennes-McNaughton Line Limited, La Verendrye Line Ltd.) and National Association of Marine Engineers of Canada, Inc. (L.G., May, p. 495) was fully constituted in May with the appointment of H. Carl Goldenberg, Montreal, as Chairman. Mr. Goldenberg was appointed in the absence of a joint recommendation from the other two members, Francis Gerity, Toronto, and Colin A. Gravenor, Montreal, who were previously appointed on the nomination of the company and union respectively.

### Board Reports Received during Month

1. Quebec North Shore and Labrador Railway Company, and Lodge 767, International Association of Machinists, Local 96, Brotherhood of Maintenance of Way Employees and Lodge 217, Brotherhood of Railroad Signalmen of America (L.G., March, p. 271). The text of the report is reproduced below.

2. Canadian National Railways (Barge and Ferry Service, Port Mann, B.C.) and National Association of Marine Engineers of Canada, Inc. and Canadian Marine Service Guild, Inc. (L.G., Jan., p. 69). The text of the report is reproduced below.

3. Westward Shipping Limited (MV *Britamerican*) and Seafarers' International

Union of North America, Canadian District (L.G., Feb., p. 175). The text of the report is reproduced below.

### Strike Following Board Procedure

Canadian Pacific Railway Company (British Columbia Coast Steamship Service) and Canadian National Steamship Company Limited and Seafarers' International Union of North America, Canadian District (L.G., April, p. 397). Strike against Canadian Pacific Railway Company (British Columbia Coast Steamship Service) only. Stoppage of work occurred May 16.

### Industrial Inquiry Commission Appointed

During the month the Minister appointed E. G. Taylor, Toronto, as Industrial Inquiry Commission to mediate a dispute between the Canadian Pacific Railway Company (British Columbia Coast Steamship Service) and Seafarers' International Union of North America, Canadian District (see above).

### Strike following Royal Commission Report

Canadian Pacific Railway Company and Brotherhood of Locomotive Firemen and Enginemen (L.G., March, p. 256). Stoppage of work occurred May 11; work resumed May 13.

## Report of Board in Dispute between

**Quebec North Shore and Labrador Railway Company  
and**

**International Association of Machinists, Brotherhood  
of Maintenance of Way Employees, and Brotherhood of  
Railroad Signalmen of America**

The Board set up in this matter on your instructions consisted of Harold Lande, QC, Chairman, Paul S. Smith, QC, nominee of the employer, and Marc Lapointe, nominee of the employees.

Produced with the authorization to set up the Board was a memorandum of reference, signed by the parties' representatives, stating that "the only matter on which the parties are deadlocked concerns the question of rates of pay and working hours for hourly-rated employees covered by these respective collective agreements". The collective agreements referred to are the three separate agreements with the three above-mentioned unions.

The Board, in exercising its functions under Section 32 of the Act, was unable to bring about agreement between the parties in relation to the matters referred to it and therefore proceeded to hear the parties. Four meetings were held for hearing the parties' contentions and any facts they cared to lay before the Board, these hearings being held on March 4, 5, 20 and 28, 1958.

The Board subsequently met privately on April 2, 1958 and April 25, 1958, for two long sessions in an endeavour to reach a unanimous agreement, but without success. In consequence the award made herein is a majority award in which the Chairman and Mr. Paul Smith are in accord. Mr. Marc Lapointe will file a minority opinion.

The evidence at the hearing showed that the employer was a railway and common carrier operating some 360 miles of line out of Seven Islands, Quebec, to the iron mines operated by the Iron Ore Company, and its main freight traffic consists of iron ore. The railway company was built for the purpose of transporting this iron ore. The employees are represented by three separate unions, which have separate collective agreements with the Railway. Due to the exceptionally rugged and rigorous conditions of

During May, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with the dispute between Quebec North Shore and Labrador Railway Company and Local 767, International Association of Machinists and Lodge 96, Brotherhood of Maintenance of Way Employees, and Lodge 217, Brotherhood of Railroad Signalmen of America.

The Board was under the chairmanship of Harold Lande, QC, Montreal, who was appointed by the Minister in the absence of a joint recommendation from the other two members, Paul S. Smith, QC, and Marc Lapointe, both of Montreal, the nominees of the company and unions respectively.

The majority report, which under the provisions of the Industrial Relations and Disputes Investigation Act constitutes the report of the Board, was submitted by the Chairman and Mr. Smith. The minority report was submitted by Mr. Lapointe.

The text of the majority and minority reports are reproduced here.

labour in a pioneer country and the fact that the Railway operates only between seven and eight months a year, a considerably higher scale of wages was necessary to attract workers to this area. Two of the expiring contracts called for a 54-hour week during open season with overtime at time and one half for all work in excess of 40 hours per week. The evidence showed that there has been a good deal of excess overtime. The Company now proposes to

reduce the official work week to 48 hours, with overtime to be paid for all work in excess of 40 hours. The unions foresaw that the take-home pay would now be reduced, since the Railway obviously intended to reduce the total number of hours to be worked. Hence a demand for an increase in wages.

As a result of negotiations the Railway had offered the unions a two-year contract with increases in wages as follows:

|                        | Present Rates | Hourly increase offered<br>11-9-57 | Hourly increase offered<br>11-9-58 |
|------------------------|---------------|------------------------------------|------------------------------------|
| Labourer .....         | 1.55          | — .20c — \$1.75                    | — .10c — \$1.85                    |
| Machine Operator ..... | 1.72          | — .20c — \$1.92                    | — .11c — \$2.03                    |
| Carman .....           | 2.16          | — .20c — \$2.36                    | — .15c — \$2.51                    |
| Mechanic .....         | 2.22          | — .20c — \$2.42                    | — .15c — \$2.57                    |
| Machinist .....        | 2.33          | — .20c — \$2.53                    | — .16c — \$2.69                    |

(The .20c hourly increase applies to all present rates; the 10c-16c increase in the second year on a selective basis, examples as above).

As appears from the foregoing, the increase was to be retroactive with regard to the 20¢ to September 11, 1957, and would, in fact, be greater than it would appear to be, due to the rather unusual overtime provisions in all the agreements, which provided for the payment of overtime at the rate of 1½ times for all hours worked over 40 hours in any one week or in excess of eight hours per day. Thus, for anyone who worked more than forty hours, the increase per hour beyond 40 hours in one week or eight hours in one day at time and a half would be for these overtime hours 30¢ per hour. The same reasoning would apply to the increase in the second year.

The unions based their whole case on the contention that the Railway was proposing to reduce certain hours paid for at overtime rates, which, if these were eliminated, would not give them, in their first year in any event, the same take-home pay that they had been receiving due to the long hours and so-called "excess" overtime that they had been earning. However, this is not the ordinary case of a normal work week being reduced, but is an attempt by the Railway to eliminate some overtime hours which constituted a heavy labour penalty by reason of the time-and-a-half rates of pay in cases where a shorter work week could handle the traffic volume.

On reference to the agreements, which have to be taken separately, the unions' case, which was presented on behalf of all three unions on a uniform basis, becomes very difficult to justify on an over-all basis, in that in one case, i.e., that of the International Association of Machinists, the agreement provided only for a work week of nine hours per day and 45 hours per

week. The proposal of the Railway in the new agreement was to increase this normal work week to forty-eight hours. In this case, therefore, no reduction in the normal work week is contemplated, although it is true that in the busy season the machinists habitually work a longer week. However, in none of the three agreements did the Railway guarantee any maximum work hours per day or per week. This, it appears to the undersigned, is a very important fact to be considered in arriving at a conclusion herein. If less work was available, obviously the employee on hourly rates would earn less money, and the agreements so provided.

As the case was presented at the hearing it was common ground that in the new agreements to be entered into, while certain working hours would be set out as a normal work week, i.e., 48 (with overtime over 40), the same condition would apply as had applied in the previous agreements, that is, that such working hours as were set out would not be construed as a guarantee of work hours per day or per week. If work was available, it appeared probable that overtime beyond the 48 hours would be worked, with a consequent increase in earnings, while, if work was not available, of course less hours would be worked and earnings would be proportionately reduced, which is the ordinary situation in hourly paid employment.

It appeared to the undersigned that the Railway's intention to eliminate, if possible, the penalty of excess overtime hours was a justifiable move in furtherance of economies in the operation of the railway and particularly in view of the present depressed condition of the steel industry in the United States, which is operating at less than half of capacity and which is practically the

only customer for the iron ore which forms almost 100 per cent of the freight traffic handled by this railway. It is obvious that a continuation of this depressed condition could seriously reduce the railway operations.

While it is true that certain special conditions of operation apply to this railway, operating as it does in a relatively unpopulated area and on the rugged frontier, it appeared that this had always been taken

into consideration and rates far above anything else in railway operation in Canada were and are being paid. The large increases offered further increased this disparity.

In this connection, Exhibit C-8, produced by the Railway, showed the following comparisons between the Canadian National Railways, which, of course, have equalized rates with the Canadian Pacific Railway, and the Quebec North Shore and Labrador Railway Company:

**EXAMPLES—COMPARISON OF PRESENT RATES  
MAJOR CANADIAN RAILWAY (CNR) AND QNS & LR**

| Classification<br>(DBS) | CNR            |                                                         | QNS & LR                                                      |                         |
|-------------------------|----------------|---------------------------------------------------------|---------------------------------------------------------------|-------------------------|
|                         | Rate/hr.       | Basic wage<br>per week                                  | Rate/hr.                                                      | Basic wage<br>per week  |
| Machinist .....         | 1.899          | \$75.96                                                 | 2.275                                                         | \$ 91.00                |
| Carman .....            | 1.80           | 72.00                                                   | 2.17                                                          | 86.80                   |
| Sectionman .....        | (highest rate) | 55.44                                                   | 1.602                                                         | 64.08                   |
| Section Foreman .....   | 12.845         | 64.25                                                   |                                                               | 123.00                  |
|                         | (per day)      |                                                         |                                                               | (All services rendered) |
|                         |                | Basic Wage Per Month                                    | Basic Wage Per Month                                          |                         |
| Signal Maintainer ..... |                | \$378.43                                                | \$600.00                                                      |                         |
|                         |                | (Paid for 205½ hrs. per<br>month at 1.843/hr.)          | (For 234 hrs/mon in sum-<br>mer and 195 hrs/mon in<br>winter) |                         |
|                         |                | (All services rendered except<br>if worked on rest day) | (All services rendered)                                       |                         |

It must be noted, however, that these rates are the present rates and will be increased under the Railway's proposal by 20¢ per hour as of last September and a further 10¢ to 16¢ per hour during the second year of the contract, these increases being subject to the effect of overtime as above noted.

The Company in offering a two-year contract with further increases in the second year is also taking the risk that the present business recession might affect it even more adversely during the last year of the contract. Despite the rejection of the Company's offer by employees during negotiations, the Company has left its offer open for acceptance throughout the present conciliation hearing, a procedure which is not usual but indicates the employer's good faith.

In view of the foregoing and the proof offered at the hearing the undersigned consider the rates paid and the increases offered by the employer to be fair and reasonable under the circumstances. It would not be right at this time, with the current business outlook, to penalize the employer by recommending that they pay increases higher than those already offered.

In conclusion, therefore, the undersigned recommend that the Railway's offer of a two-year contract incorporating the suggested working hours and the hourly increases offered by the Railway should

be accepted by the three unions involved in this dispute and agreements signed accordingly.

The whole respectfully submitted.

(Sgd.) HAROLD LANDE,  
Chairman.

(Sgd.) PAUL S. SMITH,  
Member.

### MINORITY REPORT

It is with considerable regret that I could not prevail on the Chairman and company nominee to render a unanimous or majority report in connection with the above dispute.

The terms of reference of the Conciliation Board were restricted to wages and reduction in hours and the retroactivity as well as the terms of the agreement to be recommended to the parties.

The salient facts adduced in evidence were the following:

1. The Company, although operating a railway system, cannot be compared to any other railway since it exists only to haul the iron ore extracted by the parent company Iron Ore. Any attempt to analyse the financial situation and returns of Quebec North Shore, then becomes illusory in terms of comparing with other railways.

2. The work to be performed by employees grouped in the three unions involved offers the characteristic of being,

because of climacteric conditions, very highly seasonal in most cases, lasting only a few months in many instances.

3. The term "work week" in the past, and to a very large extent even today, has not even a remote resemblance to what it means in ordinary collective agreements.

Evidence was adduced that many employees, in 25 weeks, did more hours than other Canadian industrial workers do in 52 weeks.

4. Earnings at first sight appear very high as compared to the Dominion Bureau Statistics for the average Canadian worker.

5. The Company reiterated by written brief and verbal representations that it was planning to reduce the number of hours for almost all employees.

6. The parties came within a matter of 7 cents per hour to settle this dispute amicably.

7. Both parties were agreed on a two-year agreement retroactive to the expiration date of the previous agreement.

8. There was no case made by the Company as against retroactivity of wages.

#### *Company position*

In its brief and argument, the Company represented that it was:

(a) planning to reduce hours;

(b) offering in order to compensate said reduced hours and to maintain the incentive to these employees to offset very difficult and abnormal working conditions, an increase of 20 cents for the current year and a further increase of from 10 to 16 cents for the second year of the proposed agreement;

(c) paying very high wages as compared to other railways and as compared to basic wages of other industrial workers.

#### *Unions' position*

(a) This railway cannot be compared to any other railway since it is not operated basically as a profit-making organization but is part and parcel of the processing of a larger company owning it.

(b) The earnings, although high, are to be explained by the recognized necessity for highly inviting remuneration in order to attract workers in the face of extraordinary hardships.

(c) The planned reduction of hours, if not fully compensated, would reduce the take home pay considerably, thereby turning away a number of workers.

(d) The offer of the Company was just about maintaining some take-home pay as long as the reduction in hours did not go too far.

(e) Since negotiations started, a sharp rise in the cost of living results in a loss of real earnings of 7 cents. (It is to be

noted that since the close of hearings, the said cost of living has jumped to a new high, making the figure of 7 cents obsolete).

#### *Study of evidence*

It appears to this member of the Board that the very fact that the Company did not, as it could have, withdrawn the offer of 20 cents and 10 cents to 16 cents indicates very seriously that it understands the necessity of offering the opportunity of high earnings in order to keep the manpower despite conditions of work capable of turning aside the majority of workers. The Company, fully recognizing that factor, had to make such an interesting offer even before a Board.

As to the contention that the nominal hourly rates are high and that on the basis of the offer and the earnings, the Company is very generous, it is quite debatable.

Many regions in Canada today offer nominal basic rates as high as those shown on the Company schedule of rates of pay, to workers not required to endure the hardships prevalent in the area where Quebec North Shore operates.

The own figures of the Company show that the offer made would normally maintain the take-home pay of the workers affected. The unions do not seem to quarrel too much with the Company on this point.

However, said offer of the Company does not take into account the loss in real earnings consequent to the increase in the cost of living and does not provide for the said increase.

Basically then, we could see that the only area of disagreement was the compensation for the cost-of-living increase, assessed at that time at 7 cents per hour.

#### *Majority decision*

My colleagues, called upon to pass on this evidence, seemed to retain only the following facts from the file: (a) high earnings, (b) the offer of the Company; and outside of the file (c) the business outlook.

I do not believe that the earnings, considering the excellent financial position of Quebec North Shore and especially of Iron Ore, and considering the very long hours put in a relatively short period of possible work in the year, and considering the hardships inherent to a job in that frontier's area, are that high. The very offer of the Company which was not withdrawn is very significant in this connection. It seems that the Company has understood the necessity for high wages much better than my colleagues did.

As to the offer of the Company, I wish to point out that the significance of this offer is to be found in the desire of this Company to reduce overtime work without

endangering the flow of manpower. For that reason, this offer only proves that the Company is desirous to maintain the take-home pay for its own good.

The business outlook, although not pleaded by the Company, is the pivotal point of my colleagues' position. They have completely ignored the value of the unions' contention that there would be a loss in real wages because of the cost of living.

It is rather disconcerting to find out as I did that the majority of this Board, despite the absence of plea by the Company to the effect that business was bad last year or would be this year attached an extreme importance to the business outlook in general.

When unions in the face of excellent business outlook, base part of their claim for increased wages and benefit on the future, they are bluntly told that increases must be geared to the year elapsed since last agreement was signed. Even though the future is rosy, they are not entitled to speculate on that to justify increases. If they turn to the past year and claim, as they could have, that since the past year was very good they should get an increase, they are met by the argument that since incapacity to pay is not alleged, they cannot adduce evidence of financial position or they are told, as in this case, that since the future seems bleak, they must forget about the argument of the prosperous past year. With that type of reasoning, they can never win.

However, the unions' basic demand in this particular instance was even more funda-

mental. In a year when the iron ore industry prospered, they say, we are accepting the Company offer which with reduced hours shall only maintain the same take-home pay, but we point out that this take-home pay shall be devaluated this year and has been for numerous months in the past, because living has cost more due to a sharp increase in the cost of living. Since this Board cannot go *ultra petita*, this claim must be maintained at the 7 cents quoted, forgetting the most recent increase in cost of living. The Chairman of this Board, who in the past seemed to be receptive to at least cost-of-living wage increases, and the company nominee have failed to understand the fundamental justification of this argument and I could certainly not follow them in their reasoning on a very debatable future business outlook which was not even alleged by the Company.

I therefore, Mr. Minister, recommend a two-year agreement from the date of expiration of last agreement with an increase in wages across-the-board of 27 cents per hour in the first year, fully retroactive to compensate for reduction of hours worked and the increase in the cost of living, and 10 cents to 16 cents an hour increases in the second year of agreement as per the company proposal.

Submitted in Montreal, this 12th day of May, 1958.

## Report of Board in Dispute between

Canadian National Railways (Barge and Ferry Service)  
and

National Association of Marine Engineers of Canada, Inc.,  
and Canadian Merchant Service Guild, Inc.

The Board of Conciliation appointed to deal with the above-cited dispute consisted of Mr. R. A. Mahoney, nominee of the company, Mr. E. Hopkins, nominee of the unions, and Mr. F. E. Harrison, Chairman.

The Board held sittings at Vancouver, B.C., with the parties concerned, jointly and separately on November 27, 1957, February 11, 17, April 21, 25 and 30, 1958.

The union representatives were as follows:

*Canadian Merchant Service Guild, Inc.*

Captain E. Meadows Representative

Captain Adams

Mr. E. Petterson

Mr. George Bullock Secretary

During May, the Minister of Labour received the unanimous report of the Board of Conciliation and Investigation which had been appointed to deal with matters in dispute between the National Association of Marine Engineers of Canada, Inc., and the Canadian Merchant Service Guild, Inc., and Canadian National Railways (Barge and Ferry Service, Port Mann, B.C.).

The Board was under the Chairmanship of F. E. Harrison, Vancouver, who was appointed by the Minister in the absence of a joint recommendation from the other two members, R. A. Mahoney and E. Hopkins, both of Vancouver, the nominees of the company and unions respectively.

The text of the unanimous report is reproduced here.

*National Association of Marine Engineers  
of Canada, Inc.*

|                   |                |
|-------------------|----------------|
| Mr. Denis McKeown | Business Agent |
| Mr. F. E. MacLeod | Business Agent |
| Mr. E. Bjarnason  | Statistician.  |

*Canadian National Railways (Barge and  
Ferry Service)* had as their representatives:

|                     |                                                                 |
|---------------------|-----------------------------------------------------------------|
| Mr. H. Abbott       | Assistant Manager Labour<br>Relations                           |
| Captain K. L. Crump | Labour Relations Assis-<br>tant                                 |
| Mr. G. A. MacMillan | Superintendent of Cana-<br>dian National Steam-<br>ships        |
| Mr. L. V. Wilson    | Assistant Superintendent<br>of Canadian National<br>Steamships. |

The principal matters at issue, referred by the unions to the Board, were:

1. Hours of Labour and Weekly Leave
2. Overtime Rates
3. Annual Vacations
4. Statutory Holidays
5. Classification of Vessels
6. Wage Rates.

Altogether there are sixteen (16) deck officers and fourteen (14) engineer officers involved in this dispute.

At the sitting held on February 17 it was suggested by the Board that the representatives of the company and the unions should hold further conference in an effort to reach a mutually satisfactory solution of the matters at issue. That procedure was followed and, as a result, all but the following items were agreed upon:

1. Wages
2. Health and Welfare
3. Working Conditions
4. Termination.

The members of the Board have given careful consideration to the submissions offered by both parties to the dispute and recommend as follows:

*Wages:*

1. Effective September 1, 1957, all basic rates of pay for employees covered by this agreement shall be increased by  $2\frac{1}{2}$  per cent.

2. Effective March 1, 1958, the  $2\frac{1}{2}$ -per-cent increase specified above shall become 5 per cent.

3. Effective October 1, 1958, the 5-per-cent increase specified in the above paragraph shall become the percentage increase negotiated at that time between the B.C. Tow-boat Owners' Association and the unions.

NOTE: In the event that an across-the-board dollar increase is negotiated between the B.C. Tow-boat Owners' Association and the unions, the dollar increase shall be converted to a percentage increase and shall

be the percentage increase referred to in this paragraph. The conversion formula shall be:

$$\frac{\text{the dollar increase} \times 100\%}{414}$$

*Health and Welfare:*

(a) It is recommended that the Health and Welfare Plan as outlined in the supplemental agreement to the Master Agreement of May 16, 1956, between the Non-Operating Unions and Canadian Railways will be provided for each participating employee, subject to acceptance by the Joint Employee Benefit Plan Committee. It is understood that the unions will make the necessary application, to the Committee, for inclusion in the plan.

(b) Until such benefits are available the company will pay in lieu thereof to each employee who would have been a participating employee, the sum of \$4.25 per month, effective March 1, 1958.

(c) Commencing with the month when such benefits become available, the company shall deduct \$4.25 from wages due and payable to each participating employee each month in which compensated service is rendered. The company shall each month contribute an amount equal to the amount so deducted from each participating employee.

(d) The term "participating employee" shall be defined as an employee having completed sixty (60) calendar days of service prior to March 1, 1958. Otherwise, the employee will be covered from the first of the month after completion of sixty (60) calendar days of service.

*Working Conditions:*

That the present agreement, including these recommendations, shall continue in force until the expiry date referred to in the final paragraph of this recommendation.

*Expiry:*

That the agreement between the company and the Canadian Merchant Service Guild, Inc. representing the deck officers of the company's Barge and Ferry Services at Port Mann, B.C. and Okanagan Lake, B.C., and the agreement between the company and the National Association of Marine Engineers of Canada, Inc. representing the engineer officers of the company's Barge and Ferry Service at Port Mann, B.C. and Okanagan Lake, B.C. shall bear the same expiry date as the next agreement negotiated between the B.C. Tow-boat Owners' Association and the Canadian Merchant

Service Guild and the B.C. Tow-boat Owners' Association and the National Association of Marine Engineers.

The members of the Board are appreciative of the co-operation which they have received from representatives of the unions and the company during the hearings. We are confident that the recommendations which we have made will be acceptable to

them and feel certain that an amicable agreement can be concluded upon that basis.

*Member.*

## Report of Board in Dispute between

Westward Shipping Ltd. (MV *Britamerican*)

and

Seafarers' International Union, Canadian District

The Board of Conciliation and Investigation appointed under the provisions of the Industrial Relations and Disputes Investigation Act in the matter of a dispute between Westward Shipping Limited and Seafarers' International Union of North America, Canadian District, was composed of Mr. Owen E. Mason, nominee of the union, Mr. Richard A. Mahoney, nominee of the employer, and Mr. F. E. Harrison, Chairman.

Sittings of the Board were held at Vancouver, B.C., on January 24 and February 4, 1958.

Subsequently, the members of the Board met apart from representatives of the parties on April 18, 22, 23 and 24.

The company was represented by Mr. D. Murray Williams, General Manager, and Mr. Jack Lord, Secretary. The union representatives were Mr. Norman Cunningham, Agent, Messrs. J. David, L. I. Lawson, I. Gibeault and John Clarke, members of the negotiating committee.

The agreement between Westward Shipping Limited and Seafarers' International Union of North America, Canadian District, affecting seventeen (17) unlicensed personnel was effective from September 1, 1955 and expired on September 14, 1957.

At the first meeting of the Board at which the interested parties were represented, Mr. Cunningham, on behalf of the union, requested the acceptance of wage rates as set out in an agreement (Exhibit 1) concluded by the Seafarers' International Union with the British Yukon Navigation Company Limited, dated October 22, 1957.

During further discussions with the representatives of the union and the company, the Board recommended that they should confer between themselves with a view

towards reaching agreement upon the matters at issue. This suggestion was accepted and, as a result, the parties concerned agreed upon all but the following items:

1. Union security and check-off
2. Division of wages of absent crew members
3. Welfare plan
4. Cargo work
5. Wages and overtime rate
6. Termination of agreement.

The Board has given careful consideration to the submissions, both oral and written, made on behalf of both parties to the dispute. It has carefully weighed the evidence and submissions presented and recommends as follows:

### 1. *Union Security and Check-off*

That Section Two (2) of Article One (1) of the agreement between Westward Shipping Limited (MV *Britamerican*) and the

During May, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Seafarers' International Union of North America, Canadian District, and Westward Shipping Ltd. (MV *Britamerican*).

The Board was under the Chairmanship of F. E. Harrison, Vancouver, who was appointed by the Minister on a joint recommendation from the other two members, R. A. Mahoney and Owen E. Mason, both of Vancouver, nominees of the company and union respectively.

The majority report, which under the provisions of the Industrial Relations and Disputes Investigation Act constitutes the report of the Board, was submitted by the Chairman and Mr. Mason. The minority report was submitted by Mr. Mahoney.

The text of the majority and minority reports are reproduced here.

Seafarers' International Union of North America, Canadian District, contained in the contract which expired on September 14, 1957 should be accepted by both parties.

## 2. Division of Wages of Absent Members

When a vessel sails short of the full complement of unlicensed personnel the basic wages and leave of any missing crew members shall be divided among those upon whom the extra duties fall, but no overtime shall be paid except under circumstances in which overtime would normally have been paid had the full complement been carried. The division of the basic wages and leave of any absent crew member shall be made only among the other crew members who, in addition to their regular duties, perform work which would normally have been performed by the absent crew members.

## 3. Cargo Work

That when unlicensed crew members are required to handle drums or package cargo at the ports of Vancouver, Victoria, Port Alberni, Prince Rupert, Nanaimo and Seattle, they shall be paid their regular wage if watch on deck, or time and one half their regular wage if watch below plus whatever sum is necessary to bring these rates up to the prevailing coastwise long-shore rate of pay (i.e., straight time for watch on deck, overtime for watch below). At other ports the rates of pay for the above-mentioned work shall be regular rates of pay for watch on deck and time and one half the regular rate of pay for the watch below.

## 4. Overtime Rate

That the wage for overtime work be computed at the rate of time and one quarter of the basic wage structure.

## 5. Welfare Plan

That the company shall contribute an amount equivalent to twenty cents (20 cents) per man per day worked to the

Welfare Plan of the Seafarers' International Union, such sum to be remitted to the union.

## 6. Wages

(a) That the company should award an increase of sixteen (16) percentum to all unlicensed personnel based upon the wage scale existing on September 14, 1957 and be effective from that date.

(b) That an additional advance of eight (8) percentum be granted to all unlicensed personnel based upon the wage rates in force on September 14, 1957, this increase to be effective from September 14, 1958 and to continue until the expiry of the proposed agreement.

## 7. Termination

That a contract be entered into between Westward Shipping Limited (MV *Brit-american*) dated September 15, 1957 for a period of two (2) years from that date and to expire on September 15, 1959.

Respectfully submitted,

(Sgd.) F. E. HARRISON,  
Chairman.

(Sgd.) OWEN E. MASON,  
Member.

## Minority Report

The undersigned concurs with the recommendations of the other Board members with the exception of the wage increases and the welfare plan. I consider an advance of twelve (12) percentum in wage rates as of September 15, 1957, and a further increase of five (5) percentum (based on the present wage scale) as of September 15, 1958, to be a fair and adequate award.

Regarding welfare—in view of the fact that part of the present wage is used for welfare by joint agreement between the parties, I do not feel that there should be any additional obligation upon the company to contribute to a welfare plan.

Yours faithfully,

(Sgd.) R. A. MAHONEY,  
Member.

## Successful Rehabilitation

(Continued from 744)

officer of a well-known Toronto firm interview her. He had been forewarned of her appearance but when he called the SPO, no mention was made of her handicap at all, except to say that she appeared perfectly normal when seated, and that they were interested in her ability to type and

to relieve on the switchboard. They also suggested training her as an addressograph operator. Generally, they were favourably impressed and hired her to begin work within a few weeks.

Since her placement with this firm, she is doing an outstanding job as a full-time switchboard operator.

## LABOUR LAW

# Changes in 1958 in Canadian Workmen's Compensation Laws

Seven provinces amend workmen's compensation legislation. Greater degree of uniformity now exists in rates of compensation for disability

At the 1958 sessions of the provincial Legislatures, the Workmen's Compensation Acts of Manitoba, Newfoundland, New Brunswick, Nova Scotia, Ontario, Prince Edward Island and Saskatchewan were amended. Two important changes were made with respect to compensation for disability, making for a greater degree of uniformity in the Acts.

In New Brunswick, the rate of compensation for disability was raised from 70 to 75 per cent of earnings. When this amendment goes into force on January 1, 1959, compensation for disability will be paid in all provinces but Nova Scotia on the basis of 75 per cent of average earnings. In Nova Scotia, the rate is 70 per cent.

In Prince Edward Island, the maximum annual earnings on which compensation is based were increased from \$2,700 to \$3,000. With this change, the ceiling on earnings under the Acts now ranges from \$3,000 to \$5,000. In four provinces it is \$3,000; in one \$3,500; in three, \$4,000; and in two (Ontario and Saskatchewan) \$5,000.

### Widows' and Children's Pensions

Widows' and children's pensions were increased in Manitoba, and the increases were made retroactive in effect so that they apply to all beneficiaries receiving compensation on April 10, 1958, when the amendments to the Act became effective. The monthly allowance to a widow or invalid widower was raised from \$50 to \$65, and the payment in respect of a dependent child under 16 years was raised from \$20 to \$25. Both of these changes were recommended as "matters of an urgent character" in the interim report of the Hon. W. F. A. Turgeon, the Commissioner appointed in 1957 to inquire into the Manitoba Act. In addition to the increases recommended by the Commissioner, an increase from \$30 to \$35 in the monthly payment for an orphan child was provided for.

In line with the increases provided for, appropriate changes were made in the section of the Act that places a maximum on the amount of compensation payable in death cases. The section provides, as before, that, exclusive of burial and transportation allowances and the lump sum of \$200 to the widow, compensation may not exceed 75 per cent of the average monthly earnings of the deceased workman, subject to the exception that a widow or invalid widower must now receive \$65 a month, a consort with one child \$90, and a consort with two or more children not less than \$115 a month. The amending Act stipulates, further, with respect to a widow or widower who has three or more children, that the increases in compensation resulting from the amendments will apply, subject to the statutory limitation of 75 per cent of the workman's earnings.

The Legislature provided that the moneys necessary to provide for the increases in pensions were to be paid from the Accident Fund, except with respect to dependants of deceased workmen who were employed by the CNR, the CPR, the provincial Government, the City of Winnipeg, or the corporation of any other municipality, in which case the cost of the increases in pensions was to be borne by the employer.

In New Brunswick, all widows' pensions which were being paid according to lower scales of benefits were raised to the current level of \$50 a month, the cost to be borne by the Consolidated Revenue Fund of the province. Payment of the higher pensions began on June 1, 1958.

This section, prepared by the Legislation Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

In Prince Edward Island, the maximum monthly amount payable to a widow and children was increased from \$130 to \$170, enabling compensation to be paid in respect of a maximum of six children.

The Ontario Legislature authorized an increase from \$200 to \$300 in the allowance for funeral expenses, and the lump sum payment to a widow upon the death of her husband was increased by the same amount, from \$200 to \$300.

### **Rehabilitation**

The Newfoundland Board was empowered to spend up to \$25,000 in a year in providing disabled workmen with necessary academic or vocational training. This amendment was made effective from July 1, 1957. The Board already had authority to spend up to \$15,000 in a year for the rehabilitation of injured workmen.

The New Brunswick Legislature authorized the spending of an increased amount for rehabilitation. The Board may now spend \$50,000 in a year, instead of \$15,000, for this purpose.

### **Medical Aid**

In Ontario, as in other provinces, the Board has authority to supply artificial members and prosthetic appliances to injured workmen and to have them kept in repair or replaced, when necessary. An artificial member or apparatus which is damaged as a result of an accident arising out of and in the course of employment may also be repaired or replaced by the Board. It was provided further, in the 1958 amendments to the Act, that, where a workman is unable to work because of damage to an artificial limb or apparatus, he is entitled to compensation for the time lost from work, as though he had suffered a personal injury by accident.

In Nova Scotia, a provision permitting the continuance of a long-established arrangement in the coal mining industry, whereby deductions were made from wages for medical aid in consideration of the employers' contributions to hospitals and miners' relief societies, was repealed, effective from January 1, 1959. As in several other provinces, the Board is permitted to approve an alternative plan for medical aid to that provided in the Act. The relevant section, as re-enacted, now states that, where medical aid is being provided through an arrangement under which the employer contributes and which the Board approves, the Board may reduce the employer's assessment to the extent of the value, in the Board's opinion, of his contribution under the arrangement.

### **Safety and First Aid Regulations**

The New Brunswick Board was empowered to make safety regulations, subject to the approval of the Lieutenant-Governor in Council, for the industries of construction, demolition and excavation and other related work. The Alberta, British Columbia, Newfoundland and Saskatchewan Boards have power to make safety regulations, and have exercised their powers to a considerable extent. This is particularly true of the British Columbia Board, which is the authority mainly responsible for safety regulation in the province.

As a means of securing compliance with its first aid regulations, which were revised and strengthened in 1957, the Ontario Board was given power to increase the amount of the assessment of an employer who has failed to live up to the requirements of the regulations. Under the same section of the Act, the Board may use this method of penalizing an employer when it considers that sufficient precautions are not taken in his plant to prevent accidents or that working conditions are not safe.

### **Hospitals Covered**

Hospitals operated by a municipality were brought within the collective liability system in Ontario. Previous to this amendment, hospitals other than those which were municipally-operated were required to contribute to the Accident Fund. Henceforth, all hospitals in the province will be compulsorily covered by the Act. Other provinces in which hospitals are within the scope of the Act are Alberta, British Columbia, Newfoundland, New Brunswick and Saskatchewan.

### **Administrative Changes**

In Saskatchewan, the section of the Act providing for the appointment of a Committee of Review at least once every four years to study and report on the Act and its administration was amended to strike out the provision for Workmen's Compensation Board representation on the Committee. The Committee must, as before, be equally representative of employers and organized employees. In 1954, the last occasion on which a committee was set up, a commissioner of the Board acted as chairman.

An amendment in Newfoundland, also of an administrative nature, provided that the secretary, chief medical officer and assistant medical officers of the Board should be appointed by the Lieutenant-Governor in Council (instead of by the Board), and that such officers should hold office during pleasure. Other officers may, as before,

be appointed by the Board, but appointments may only be made to posts which the Board has established with the approval of the Lieutenant-Governor in Council. As before, salaries of officers and employees of the Board are to be fixed by the Board in accordance with a scale approved by the Lieutenant-Governor in Council and are to be paid from the Accident Fund.

### Silicosis

In New Brunswick, an amendment was made to the Act passed in 1955 making special provision for compensation for workmen who contracted silicosis before June 1, 1948, when it was made a compensable industrial disease under the Workmen's Compensation Act. The amendment raised the payment under the Act to a disabled workman (or his widow) from \$40 to \$50 a month, effective from June 1, 1958. Funds for this purpose are provided from the Consolidated Revenue Fund. The Act is administered by the Workmen's Compensation Board.

### Yukon and Northwest Territories

Amendments were also made in 1958 to the Workmen's Compensation Ordinances of the Yukon and Northwest Territories. Under these Ordinances, the employer is liable for payment of compensation and must carry accident insurance to cover his liability or make other arrangements for the protection of his workmen satisfactory to the Commissioner of the Territory. Claims for permanent disability are determined by the Alberta Workmen's Compensation Board, which acts as Referee under both Ordinances.

Benefits are comparable to those provided for in the provincial Acts. Compensation

for disability is based on 75 per cent of the workman's average earnings, subject to maximum annual earnings of \$4,000. A widow receives a lump sum of \$300 and \$75 a month until re-marriage or death. For each dependent child under 16 an allowance of \$25 a month is payable, and an additional amount up to \$10 a month may be paid when a child is an orphan. Injured workmen are entitled to medical aid for as long as necessary during disability.

A further extension of benefits was provided for by the enactment of a provision for occupational re-training of permanently disabled workmen, to be declared in force on a date fixed by the Commissioner of each Territory. Where the Referee considers it desirable that a workman should be given training in an occupation other than the one in which he was injured, he may direct the type of training to be undertaken by the workman and order payment of the costs (including travelling and living allowances, room and board, tuition, books, tools and equipment), up to an amount not exceeding \$5,000, by the employer or insurer.

Provision was also made in both Ordinances for payment of compensation in respect of a child who is over the age of 16 and under 18 at the date of the death of the workman to enable him to attend school to the age of 18. The same change was made in several of the provincial Acts in recent years.

In the Northwest Territories Ordinance the lump sum to be paid to a widow on re-marriage was increased from \$600 to \$1,000. The same increase was provided for in the Yukon Ordinance in 1955.

## Legal Decisions Affecting Labour

Quebec Court of Queen's Bench declares Rand Formula illegal under province's laws. Quebec Superior Court quashes certification order

By a unanimous decision, the Quebec Court of Queen's Bench (in appeal) confirmed the decision of the Superior Court declaring the application of the Rand Formula contrary to the laws of the province.

In the Superior Court, a writ of prohibition against a decision of the Quebec Labour Relations Board granting certification to a Steelworkers local at the Ingersoll-Rand plant at Sherbrooke was confirmed on the ground that the Board had exceeded its jurisdiction.

### Quebec Court of Queen's Bench . . .

. . . unanimously rules that the application of the Rand Formula is illegal under the province's laws

On December 21, 1957, the Quebec Court of Queen's Bench (in appeal) ruled by a unanimous decision that employees who are not members of a trade union cannot be forced by terms of a collective agreement to pay union dues.

The decision of the Court confirmed the ruling of the Superior Court, rendered on September 7, 1956, which declared that

under Quebec law a compulsory check-off clause in a collective agreement was not valid (L.G. 1956, p. 1579).

The circumstances of the case briefly recalled in the reasons for judgment were as follows.

In March 1955 a collective agreement was signed between *Le Syndicat Catholique des employés de Magasins de Québec Inc.* and *La Compagnie Paquet Ltée.* Clause 2.01 of the agreement contained the provision that the employer would retain from the pay of each regular employee a sum equal to the dues fixed by the trade union for its members and would hand over monthly to the trade union the deductions so collected. Some employees protested to the company against the deductions. As the result of this protest the company stopped the transfer to the trade union of the sums retained from the wages of those workers who explicitly opposed the check-off and deposited these sums in a special bank account while waiting for the settlement of the dispute.

The union concerned brought an action against the company and by invoking the collective agreement claimed the sum of about \$3,000 deducted from the wages of the workers who were not union members. When the Superior Court rejected the union's demand, the union appealed the judgment to the Court of Queen's Bench. In appeal the judgment of the Superior Court was confirmed.

Mr. Justice Pratte noted that the defendant company pleaded, *inter alia*, that clause 2.01 of the agreement dealing with the compulsory check-off was illegal and asked the Court to declare this clause nul and void. The trial judge accepted this contention and pronounced the nullity of the said clause. This judgment was appealed by the union.

He also noted that the clause in question is usually called the Rand formula and it is one of the union security provisions. It is commonly justified on the ground that the beneficial effects of a collective agreement are not restricted exclusively to the members of the union which signed the agreement; all the employees partake in the benefits secured by the collective agreement. Since they all profit by such an agreement, then it would be just that all should bring financial help to the trade union which concluded the agreement and had to pay the expenses resulting from negotiating the agreement and supervising its execution.

The union based its appeal on the principle of liberty of collective agreements recognized by Section 21\* of the Profes-

sional Syndicates Act, arguing that as the stipulation in question was not prohibited by any statutory provision it should be held valid.

In his reasons for decision, Mr. Justice Pratte stated that as the dispute was centered on the collective agreement it is in the laws regulating this kind of agreements that the solution of the dispute should be found. Then he traced briefly the evolution of laws in this matter.

Under the common law the conditions of the working contract are established by mutual agreement after being discussed between the employer and the employee.

With the development of commerce and industry it became obvious that this individual relationship was not always fair for the employee, consequently collective relationship was recommended as a proper means to improve the position of the workers.

In 1927 the Legislature added to the Professional Syndicates Act Sections 21 to 26 dealing with collective labour agreements. Section 21 defines a collective labour agreement and says that "any agreement respecting the conditions of labour not prohibited by law" may form the object of a collective labour agreement. Section 22 defines the persons who are bound by such an agreement. Reading these provisions, one can see that under this particular Act the agreement is one that is freely negotiated by the employer, and that the agreement is binding only for the employees who form part of this group that signed the agreement.

In 1944 the Legislature enacted the Labour Relations Act, which established for a collective agreement a different status from the status under the Professional Syndicates Act.

Under the Labour Relations Act, a group of employees composed of an absolute majority of the employees in an establishment does not represent any more only those who belong to this particular group (as was the case before), but such an association represents all the employees, and the collective agreement is no longer

\*Section 21 reads:

The collective labour agreement is a contract respecting labour conditions made between the representatives of a professional syndicate, or of a union, or of a federation of syndicates, on the one hand, and one or more employers, or representatives of a syndicate, union or federation of syndicates of employers, on the other hand. Any agreement respecting the conditions of labour not prohibited by law may form the object of a collective labour agreement.

purely a voluntary act on the part of the employer. As a matter of fact, according to Section 4:

Every employer shall be bound to recognize as the collective representative of his employees the representatives of any association comprising the absolute majority of his said employees, and to negotiate with them, in good faith, a collective labour agreement.

When the negotiating parties cannot agree, any of them may give notice of the dispute to the Labour Relations Board, which notifies the Minister of Labour, who appoints a conciliator (Sections 12 and 13).

If the conciliator fails then the Minister appoints a council of arbitration. Not until 12 days have elapsed after the receipt by the Minister of the report of the arbitration council, are strikes and lockouts permissible, and only then can the employer change the conditions of work of his workers without their consent (Section 24).

It should be noted that if the employer is not obliged to conclude a collective agreement, his freedom to abstain from signing is curtailed by the fact that the Act obliges him to negotiate in good faith and if the negotiations fail he faces the possibility of a strike.

Also it should be noted that the Act recognizes the freedom of the worker to belong to a trade union of his choice, or to abstain from membership, and provides sanctions against the use of intimidation or threats to induce anyone to become, refrain from becoming or cease to be a member of an association (Section 22).

The collective agreement in the dispute at bar was concluded under the provisions of the Labour Relations Act.

As already mentioned, the trade union based its appeal on the principle of freedom of agreements recognized expressly by Section 21 of the Professional Syndicates Act, which in the second paragraph says, "Any agreement respecting the conditions of labour not prohibited by law may form the object of a collective agreement." As clause 2.01 of the agreement stipulating compulsory check-off of union dues from all employees was not prohibited by any statutory provision, then, the union argued, it should be considered valid.

Mr. Justice Pratte pointed to the fact that Section 21 does not say that all agreements not prohibited could be an object of a collective agreement, but only those which concern "conditions of labour". Consequently in order to settle the dispute at bar, it should be decided first whether the agreement in question was in respect of a condition of labour. The fact that the collective agreement in question was concluded under the Labour Relations Act,

which does not contain a provision similar to the last paragraph of Section 21 of the Professional Syndicates Act, does not make much difference because Section 2 (e) of the Labour Relations Act defines a collective agreement as "any arrangement respecting conditions of employment".

Another argument presented by the trade union was that the employer being free to hire whomever he desires, and all the employees covered by the collective agreement being liable to be dismissed without notice (according to the terms of their hiring contract), then nothing stood in the way of the agreement in question; and the company after accepting such an obligation should execute such an agreement, even if the trade union had no power to bind other employees but only its members.

In answering this argument Mr. Justice Pratte pointed out that the agreement of which execution the trade union insists was not concluded in a contract freely concluded under the common law, but in a collective agreement concluded under the system of the Labour Relations Act. Hence, the provisions of this Act which oblige the employer to negotiate a collective agreement and to submit to the prescribed procedure for settling disputes were not enacted to include any undertaking that the union might choose; but these provisions are destined solely to favour the conclusion of an agreement "respecting conditions of employment" (Section 2 (e)).

This being so, the argument based on the principle of freedom of agreements and used by the union does not touch the very heart of the dispute, which is to find out if the engagement undertaken by the company was one of those envisaged by the Labour Relations Act to become the object of a collective agreement. In other words it is necessary to find out whether this engagement is in the category of conditions of work.

The words "conditions of employment" could be given a more or less extensive meaning according to the ideas or interests of those who use these terms. The statute does not contain any express provisions which would otherwise limit the field of a collective agreement, therefore it is necessary to find out what was the intention of the legislator in this respect. Did the legislator want to leave to the parties concerned entire liberty in this matter without other limitations except those provided by prohibitive laws, or was his intention to limit otherwise the field of collective agreement? This should be looked for, considering at the same time what was the aim of the legislator, the intentions

which the law may contain regarding this matter and legal presumptions which the interpreter has to keep in mind. Among those presumptions are the well known ones that the legislator did not want either to grant more rights or more power than is necessary to secure its will, or to modify more than was needful the former situations of law or fact.

The Labour Relations Act was enacted to regulate collective agreements, whose purpose is to provide for the worker a more equitable contract of work than that which he might be able to secure after individual discussion with the employer. All that is required in order that the employee could profit by the advantages offered under the system of collective relationship is that the parties to the collective agreement could make provisions for everything which could constitute an object of relationship between employer and employee, namely mutual obligations of the parties to the contract, the circumstances affecting these obligations and the manner of exercising the rights of the parties concerned.

It is not necessary, in order to achieve the aim contemplated by the legislator, that the employer and the representatives of the employees be able to agree to subordinate the formation of the contract to the fulfilment of a condition which has no relation to the contents of this contract, and aims exclusively at promoting the interest of the trade union at the expense of one party, the workers.

Hence, unless we find a provision in the law which indicates expressly or by implication the intention of permitting a stipulation such as that which is our concern at present, such a stipulation could not become the object of a collective agreement.

Actually, Mr. Justice Pratte continued, not only does the law not contain anything of this kind, but we cannot even find anything which would imply that the legislator contemplated in the collective agreement any arrangement regarding contractual relations for the benefit of a trade union.

The trade union, however, contended that as the collective agreement was meant to cover all the relations between the employer and employee, therefore it is impossible that the legislator intended to limit its coverage by excluding the whole field of action of the bodies formed to conclude the agreement. To support this contention the trade union invoked the case *Re Price Brothers Co. Ltd. v. Letarte* (1953) B.R. 307 (L.G. 1953, p. 895).

This argument Mr. Justice Pratte answered by pointing out that the clause in that dispute did not aim to render the

payment of union dues obligatory for all the employees (as is the position in the case at bar) but only to obligate the employer to retain union dues of employees who gave their consent and only so long as they wanted these deductions to continue. Therefore the *Price Brothers* case did not decide anything which could have any bearing on the solution of the present dispute.

To dispose of the union's contention Mr. Justice Pratte thought it necessary to investigate the role placed by law on the trade union in the formation of the collective agreement.

When we consider, he said, the Professional Syndicates Act or the Labour Relations Act, we notice that the trade union which concludes a collective agreement does not act for itself, but as a representative. In the first case, it represents only its members; in the second, it represents all the employees, its power to act on behalf of those who are not its members being given to it by law. Hence, a body endowed by law with power to act on behalf of others in concluding legal acts cannot use this power for its own personal ends and to the detriment of the interests which it has a mission to represent and to serve. This is based on the principles that the power to represent is granted in the interest of those who are represented and not of those who represent and that the powers granted by law should not be exercised for any other end than that for which these powers were granted.

In the case of a collective agreement, these principles should be applied all the more carefully, because, as the result of Section 4 of the Labour Relations Act, the position of a representative gives certain power of compulsion over the employer. Also it is apparent that the very nature of the role attributed by law to a trade union in the conclusion of the collective agreement (whether such agreement is or is not a contract, on which matter there is no need to make a pronouncement) is opposed to a stipulation of the kind which the union obtained from the company. In order to decide otherwise, it would have to be assumed that the Legislature intended to allow the representative of the employees to use against a certain number of them and for the representative's advantage a powerful weapon, the usage of which was confided to him in the interest of all. And that is not possible in the actual state of the laws of the province.

One could rightly consider, Mr. Justice Pratte added, that in the present state

of affairs it would only be just that all the employees under the collective agreement should have to contribute to the expenses incurred in negotiating such an agreement and securing its execution, and that legislation which does not allow this kind of equity does not meet the needs of the time. But this is the matter for the legislator.

Mr. Justice Pratte concluded his reasons by stating his agreement with the trial judge and declaring the engagement which the union was pressing to have implemented did not bear on the condition of employment, and considering that such an engagement could not be an object of a collective agreement it should be considered as not a valid one. He would reject the union's appeal with costs.

Mr. Justice Casey, while agreeing with Mr. Justice Pratte's conclusions, noted that in seeking the solution of the problem not too much importance should be attached to the almost indiscriminate use in Quebec labour laws of the terms "conditions of employment" and "working conditions". These terms could be distinguished and could have been used so as to make one exclude the other, but no such distinction was made and the subject matter of collective agreements includes conditions of both types. Consequently the terms "working conditions" and "conditions of employment" may be used interchangeably, and if each is given a special meaning, both are included in the subject matter of a collective agreement. In his opinion compulsory payroll deduction clauses, relating as they do to the manner of payment and being for that reason conditions of employment, may be inserted in a collective agreement; and while in certain circumstances such clauses may be open to attack they cannot be struck from a collective agreement on the pretext that they do not qualify as "working conditions".

Therefore in his opinion the problem was not whether the impugned clause is foreign to the subject matter of collective agreements and for that reason null and void, but rather whether in inserting this particular clause the union exceeded the limited authority enjoyed by it as the bargaining agent of the company's employees.

The non-union member employees have no contractual obligation towards the union. Hence, if there exists any obligation on their part to contribute to the union, such an obligation, since it does not find its source in a contract, must find its origin in the law.

Despite the silence of the special Acts it could not be assumed that the Legisla-

ture intended that unions should donate their services to non-member employees. It would be more in conformity with the law that the expenses incurred by the union in the interest of all as a bargaining agent should be borne by all who benefit by these activities. This reasoning may justify the inclusion of some kind of a compulsory contribution clause in the collective agreement. But failing the consent, express or tacit, of the employees, the scope of such clauses must be restricted to the reimbursement of the expenses incurred by the union as a bargaining agent. If the insertion of such a clause in the collective agreement is permissible at all it will be because the non-member employees are obliged by law to contribute to the expenses incurred by the union as their bargaining agent, and on condition that it be in their interest that this method of payment be set up; and, perhaps, subject to the further condition that each employee be not called upon to pay more than his fair share of the total.

Assuming that the obligation to contribute exists and that its discharge by salary deduction is in the interest of the employees, then the question arises whether on its face the disputed clause in the collective agreement in question is limited to the recovery of such expense.

To this question Mr. Justice Casey gave a negative answer. In his opinion the amount of the levy creates the presumption that it went beyond the expenses that might have been recoverable by the union, as justified for the services rendered.

Mr. Justice Casey concluded:

For these reasons and without closing the door to the possibility that in some cases a clause providing for a compulsory contribution by means of a payroll deduction by non-members to union expenses might properly form part of a collective agreement, I would dismiss this appeal.

Mr. Justice Hyde noted that the federal Industrial Relations and Disputes Investigation Act specifically permits union security provisions in collective agreements and the Ontario Labour Relations Act expressly provides for a clause of the Rand formula type.

However, there is no such provision in the Quebec Labour Relations Act. The only case dealing with any type of union security clause which the Quebec Court of Queen's Bench had to consider was *Price Brothers Co. Ltd. v. Letarte* (1953). There is, however, a most important distinction between the disputed clause in that case and the one at bar. The *Price Brothers* case provided for a voluntary

revocable check-off of union dues from the pay of union members only. That particular case dealt with a provision that made payment of union dues by the check-off method optional at all times to the employee. Approval of such a voluntary check-off sanctioned no kind of coercion, but accepted it as a stipulation relating to the manner of payment of wages.

Under the Rand Formula the employee has no option; in order to obtain his employment he must pay the dues of the union whether he is a member or not. If he is not a member of the union, as many were not in the case at bar, the collective agreement is made not by a representative designated by him but by one designated by the Labour Relations Act. There is no express provision in the Act that would authorize the bargaining agent to make the Rand Formula type of arrangement. The union contended that such authority is implied as a "condition of employment" in the definition of "collective agreement" (Section 2 (e)) and invoked the views expressed in *Price Brothers* case to support this contention. However, as already noted, the *Price Brothers* case dealt with a voluntary revocable check-off of union dues, a procedure of evident advantage to the employee. Such a deduction, like other deductions made by many employers with the approval of the employee, for saving bonds, charitable donations, etc., could be considered not as "a condition of employment" but as relating to the manner of payment of the employee's wages.

The disputed clause in the case at bar requires non-union members to pay these dues without any agreement on their part to do so and for the sole benefit of the union.

Whatever justification for the Rand Formula there may be, the fact remains that it amounts to a compulsory payment in the nature of a tax which, in the absence of universal consent, must be based on some statutory authority. Such an authority is not only lacking but it infringes Section 17 of the Professional Syndicates Act (which deals with the right of the *syndicat* to claim the assessment for three months only following the resignation of a member of a *syndicat*). In conclusion, Mr. Justice Hyde would confirm the judgment of the court below and dismiss the appeal with costs.

Mr. Justice Taschereau likewise would dismiss the appeal. The object of a collective agreement is to regulate the relations between the employees and the employer. The disputed clause is concerned with the relations between the union and the

employer. Consequently, in Mr. Justice Taschereau's opinion, Clause 2.01 is not a condition of employment in the sense of the Labour Relations Act.

Chief Justice Galipeault concurred with the opinion of Hyde and Taschereau, J.J.

Mr. Justice Owen noted that the union acts as representative of the employees in negotiating the agreement, but it is not personally a party thereto. The union did not receive from non-member employees any express authority to insert the disputed clause in the collective agreement.

If the proposed deduction from wages was with respect to an established obligation or indebtedness on the part of the employee, the provision for the payment of such established indebtedness by deductions from wages might be considered as merely an incident of payment, dealing with manner of payment which is a matter of relations between the employer and the employee, and, therefore, a "condition of employment" within the meaning of the Labour Relations Act and might have constituted a valid clause in a collective agreement.

However, if the proposed deduction from wages is with respect to a contested or disputed obligation on the part of the employee, then such a deduction from wages is not merely an incident of payment and not a matter of relations between employer and employee, but between the employee and the union. A provision requiring the employer to make such a deduction is not a condition of employment and does not constitute a valid clause in a collective labour agreement.

If the union invokes any obligation on the part of non-member employees towards the union either by contract or by operation of law solely and the employees contest the claim, then the union must establish such obligations (both the liability and the *quantum*) on the part of the employees by legal process before turning to the subsequent step of collection.

In the case at bar the union tried to establish the obligation on the part of the non-member employees by a clause in the collective agreement.

In the circumstances the clause under consideration (2.01), in so far as it provides that non-member employees must pay an amount equal to the union dues, is not dealing with the manner of payment or relations between employer and employee, but is dealing with the creation of an obligation to contribute or relations between employee and the *syndicat*. Such a provision is not a condition of employment and in a collective labour agreement is null.

Mr. Justice Owen would dismiss the appeal with costs.

*Le Syndicat Catholique des employés de Magasins de Québec Inc. v. La Compagnie Paquet Liée* (1958) B.R. No. 4, p. 275.

### Superior Court of Quebec . . .

. . . declares that Quebec Labour Relations Board exceeded jurisdiction in granting certification

On January 18, 1958 the Superior Court of Quebec ruled that the Quebec Labour Relations Board violated the law and exceeded its jurisdiction in certifying a union in that it had arbitrarily excluded certain classes of employees from the unit and moreover it was doubtful whether the union in question represented the majority of employees in the bargaining unit.

The circumstances of the case as related by Mr. Justice Boulanger in his reasons for judgment were as follows.

In 1954, Local 2982 of the United Steelworkers of America applied to the Quebec Labour Relations Board for certification as a bargaining agent for the employees of the Canadian Ingersoll-Rand Company Limited in Sherbrooke. On or about February 2, 1955 this request was rejected, *inter alia*, for the lack of majority and the legal non-existence of the association which asked for certification. When in March 1955 the union asked for reconsideration of this decision the request was also rejected for the same reasons.

In spite of these two unfavourable decisions, the union presented on May 4, 1955 another request for recognition, which was rejected again on July 27, 1955 for, *inter alia*, the following reasons: the union omitted to produce with its application a copy of its constitution and by-laws; the constitution and by-laws which were presented were not those of the union but of the United Steelworkers of America (CIO); the charter which the local obtained from the central body several years ago was subsequently annulled and not replaced at the time of filing the request; granting of a charter by the central body is a necessary condition to identify the local and to allow it to act in accordance with the constitution of the United Steelworkers of America; the local had no right according to the steelworkers constitution to dissolve itself, as it claimed to do on April 20, 1955. Further, the remittance by the local to its members, after the alleged dissolution of April 20, 1955, of monetary contributions collected since the start of the organizational campaign preceding the first request for certification was a violation of the constitution and rules of the central body of the Steelworkers; the contributions which had already served as admission fees to

join the union could not be returned to its members in order to serve the second time for the same purpose.

On October 25, 1955, the local filed the fourth request for certification, which was rejected by the Board as premature and not well founded.

On November 23, 1955, the union applied for the fifth time for certification. The Company contested this request by invoking the reasons for the Board's decision of July 25, 1955. However, this time the Board, with one member dissenting, accepted the application and on February 22, 1956, Local 2982 was granted certification to represent as a bargaining agent all the employees of the said company except superintendents, foremen, assistant-foremen, office employees, lead hands, charwomen, watchmen, pattern makers, apprentices, confidential employees, as well as others who are excluded by the law. The reasons given for the Board's decision were, among others, the following.

The union had the required majority of members in the bargaining unit; before filing its last request the local received from the central office of the Steelworkers recognition as Local 2982, and a notification that a charter to this effect would be sent in the near future. When the Board by its decision of July 27, 1955 declared Local 2982 as non-existent, the organizers of the association to which the Board refused certification could return to those concerned the initiation fees and the first union dues; all membership cards to the United Steelworkers of America were signed before the filing of the application; all members who signed their cards and paid their dues were admitted as members of Local 2982 at the meeting of November 20, 1955.

The Company submitted the following arguments against the Board's decision of February 22, 1956.

The decision of the Board was illegal, arbitrary and nul and constituted an excess of jurisdiction on the part of the Board; the certification was granted to a body which did not possess legal existence and which, according to the Labour Relations Act and the Board's regulations, could not be validly recognized as a bargaining agent of a unit of employees of the company; the certification was illegally granted to a body which did not fulfil the conditions provided by the Act in order to have a right to such a certification; the bargaining unit which the Board created by its decision excluded arbitrarily a body of employees and on the other hand included some employees which should not be there;

the decision of the Board sanctioned illegal and forbidden practices on the part of the non-authorized union organizers, and recognized illegally as members of the union employees who did not personally pay their admission fees and their monthly dues and who did not possess regular membership cards; the union in question did not have any right to a certificate of recognition and the decision of the Board granting certification constitutes an excess of jurisdiction, a denial of justice and is contrary to four previous decisions of the Board which each time refused to the said union such a certificate for the very same reasons. In conclusion the Company asked for a writ of prohibition, which writ was granted on March 14, 1956.

The Board and the union in question contested the action of the Company. They denied the justification in fact and in law of the Company's contentions and claimed that all the matters raised by the Company were within the exclusive power of the Board and that the Board had decided them within the limits of its jurisdiction.

The examination of the case before the Superior Court started in December 1956, but was suspended when the Board appealed to the Court of Queen's Bench the decision of the trial judge denying the Board the privilege to refuse the production in court of documents from the Board's files on the ground of public policy. The Court of Appeal by a unanimous decision confirmed the ruling of the trial judge (L.G., Dec. 1957, p. 1490).

The action before the Superior Court was resumed on November 5, 1957, and ended on December 23, 1957.

In the opinion of Mr. Justice Boulanger, the decision of the Board of February 22, 1956 granting certification to a union could only be contested by a writ of prohibition if the Board exceeded its jurisdiction. In the present state of jurisprudence, he added, it is recognized that the Labour Relations Board is a tribunal, perhaps an administrative tribunal, but nevertheless bound to act judicially and legally.

However, Section 41 (a) of the Labour Relations Act provides that the decision of the Board are not subject either to appeal, or to a revision by prerogative writs, or by a direct action according to Section 50 of the Code of Civil Procedure. The reason for this extraordinary privilege seems to be that the Board has the power to revise or revoke its own decisions.

Like any other tribunal the Board can make mistakes, but at the same time like any other tribunal the Board has to act within the limits of its prerogatives,

powers, competency and jurisdiction as conferred on it by the law. The Board cannot make the law; it exists to apply the law and not to violate the law. The Board does not create rights, it only recognizes the rights within the limits and conditions of law.

The main function of the Board is to determine whether an association which desires to be recognized as a representative of a group of employees has the right to be recognized as such. The Board has to satisfy itself of the representative character of the association and of its right to be certified. The Board issues in favour of a recognized association a certificate specifying the unit which the association has the capacity to represent. The employer has to recognize as collective representatives of his employees, the representatives of an association which embraces the absolute majority of the employees and to negotiate with them *bona fide* a collective labour agreement (the Labour Relations Act, Sections 6, 7, 9).

The Board has then the powers or jurisdiction only to find out whether the requested recognition answers the requirements of the law.

Then Mr. Justice Boulanger proceeded with the analysis of what is the meaning under the law of "association", "employee", "employer". In this connection he quoted from the Labour Relations Act, Section 2 (a), (c) and (d). Also he quoted Section 3 of By-Law No. 1 dealing with the conditions under which an employee may be recognized as a member of an association, which reads as follows:

Section 3: For the purpose of determining the representative character of an association, the conditions by which a person may be deemed member of an association, are as follows:

(a) to be at least sixteen years of age;

(b) to have been regularly admitted as member and to have signed a duly dated admission form;

(c) to have personally paid an entrance or initiation fee of at least one dollar (\$1);

(d) to be personally obliged to pay membership fees, the rate of which is not lower than fifty cents (50c.) per month;

(e) in the case of a new member, to have personally paid the membership fees for one month at least;

(f) in the case of a member who is already initiated, not to be more than three months in arrears in the payment of membership fees;

(g) to regularly hold an employment connected with the normal professional occupations of the employer concerning whom recognition is requested.

(h) the conditions required to establish the representative character of an association must have been complied with on or before the day of filing of the petition for recognition with the Labour Relations Board.

To find out whether or not the Board exceeded its jurisdiction it was enough, in the opinion of the Court, to examine two questions:

1. In recognizing Local 2982 of the U.S.W.A. has the Board recognized and certified an association which was not a *bona fide* group of the employees of the Company and which did not possess any legal existence?

2. In order to say that the local represented the absolute majority of the employees of the Company, did the Board eliminate illegally and without justification from the total count certain employees working under similar conditions and who had the right to be counted?

On February 2, 1955, and on March 25, 1955, the Board rejected the request for certification presented by the union because of lack of absolute majority.

On July 27, 1955, the Board rejected a similar request because of lack of regular and legal existence as a local of the Steelworkers.

On February 22, 1956, the Board (with the dissenting opinion of one member) granted the requested certification, holding that the union existed regularly and legally as Local 2982 of the Steelworkers and represented the majority of the employees of the company.

The Court, after having examined the evidence, was of the opinion that the position of the union had not greatly changed at the time when the last request for certification was filed on October 18, 1955. The union, which considers itself as a local of the Steelworkers, violated nearly all the rules of the constitution of the parent body; it was not admitted and recognized by the parent organization; it did not possess a charter; the adherence cards signed by the employees were in favour of the Steelworkers and not in favour of the local union, and the signatures on some of these cards might have been forged; since 1954, when the local started to be organized, all payments made by the so-called members as initiation fees and monthly dues amounted to \$1.50 per person, and this amount was paid not to the local

union, but to an organizer employed by the Steelworkers; on April 20, 1955, the local claimed to dissolve itself, and instead of remitting to the parent body the funds in his possession, the organizer apparently returned these funds to the members in order that they might use them to pay the admission fee and monthly dues to a new local union, and this so-called new local union presented the last request for recognition, on October 18, 1955, without requiring its members to pay other dues than \$1.50 collected in 1954. These were the main reasons why the Court considered that the union in question did not merit the certification any more on February 22, 1956 than on July 27, 1955.

Nevertheless, the Board had some kind of assurance given by a higher ranking officer that the union would be recognized by the parent organization in spite of all the violations of the constitution of the Steelworkers, under the same number as the previous Local 2982 which ceased to exist a long time ago, and which would be revived, and a charter would be granted if the union could manage to obtain the certification. Considering this assurance, the Board thought it justifiable to consider the union in question as a *de facto* association of the employees, as a local of the Steelworkers in process of being formed and assured of being accepted as such by the parent body, and as a group of employees *in potentia* having a good chance to function normally one day. The Board thought, no doubt, that even if the legality of existence of the union as a local of the Steelworkers could be considered doubtful there was adequate reason to think that the situation would probably soon be put in order.

Before reaching its decision the Board examined all the facts and documents as well as the reports of its investigators and heard the representations of the company and of the union. In doing that the Board acted within the limits of its powers. Even if the Board made a mistake in believing that the union could be recognized as a *bona fide* association of the employees, and as a local or a unit of the Steelworkers legally and regularly constituted, it did not exceed its jurisdiction.

The Court cannot substitute its own appreciation of facts and of the documents for that of the Board.

The union had the right to organize and to represent a certain class of employees. But when the union claims to represent all the hourly-paid workers of the Company, they all in fact should be represented, and the union has no right to

ask the Board, in order that it could be certified as representing the absolute majority of the employees, to exclude from the count certain categories of hourly-paid workers working under the same conditions as the others.

The Board had no right to exclude the apprentices, charwomen, watchmen, and lead hands in necessary calculations to find out whether the union represented the absolute majority of "all the hourly-paid employees" of the company.

The Act describes the meaning of the term "employee" and what are the exceptions. The Board exists to apply the law as it is, and not to violate it; the Board cannot make distinctions and exceptions which the law does not make.

In eliminating certain classes of employees from the total of "all employees hourly-paid" in order that the union might have an absolute majority which otherwise it could not have, the Board violated the law, exceeded its powers and jurisdiction and rendered an invalid decision.

Further, Mr. Justice Boulanger added, that even with the exclusion of certain classes of employees it remains very doubtful that the union represented the majority

of all the hourly-paid employees. The report of the investigators was far from being positive in this matter.

If it was only a matter of an error on the part of the Board in interpreting and appraising the figures the Court would not have the right to intervene. But the law prescribes that the employer is bound to negotiate a collective agreement only with an association representing an absolute majority of the employees. The result is that the Board is bound by the law to certify as a bargaining agent only an association which unquestionably represents the majority of the employees. Therefore if the Board manoeuvres to give a fictitious majority to an association or if the Board certifies that an association comprises the majority of employees which it is applying to represent when this fact is not clearly established, the Board is violating the law, exceeds its jurisdiction and renders a decision which is null. This, in the opinion of the Court, actually happened in the case at bar.

*Canadian Ingersoll-Rand Co. Ltd. v. Commission de Relations Ouvrières de la Province de Québec et autres et United Steel Workers of America, Local 2982, et un autre, (1958) C.S. Nos. 3 & 4 p. 217.*

---

## Recent Regulations, Federal and Provincial

Minimum wage rates for female employees are increased in Nova Scotia  
Annual fair wage schedule issued for Manitoba construction industry

In Nova Scotia, the new general order for women and the revised order for female beauty parlour employees set a weekly minimum of \$21.60 for Halifax and nine other large towns, \$19.20 for 33 other incorporated towns, and of \$14.40 for the remainder of the province. Another new order increased the minimum hourly rate for women employed in the fishing industry from 35 to 45 cents.

The new fair wage schedule issued in Manitoba set higher minimum rates for most construction workers and reduced the work week in a few cases.

Other regulations deal with overtime of federal prevailing rate employees and an exemption under the Saskatchewan Hours of Work Act.

### FEDERAL

#### Financial Administration Act

Regulations under the Financial Administration Act amending the Prevailing Rate Employees General Regulations (L.G., Feb., p. 187), the Ships' Crews Regulations and the Ships' Officers Regulations (L.G., March, p. 278) were gazetted on May 14.

Among other provisions, the amendment to the Prevailing Rate Employees General Regulations provides that effective July 1, 1958, prevailing rate employees will be compensated for each completed 15-minute period of overtime. Since January 1, when the revised regulations went into force, payment has been made for each completed hour of overtime.

The overtime rates are unchanged, however. Time worked in excess of the normal number of working hours or on a first day of rest must be paid for at a rate equal to one and one-half times the rates of normal and extra pay, if any, payable for that work. Double time must be paid for time worked on a second day of rest.

Another new provision states that if a prevailing rate employee works on a holiday he may be credited with a period of compensatory leave equal to one and one-half times the number of hours actually worked. Previously, if an employee worked four hours or less on a holiday, he could be given compensatory leave equal to one twelfth of the number of hours in his standard work week, or four hours, whichever was longer. If he worked more than four hours, the employee could be granted one sixth of the number of hours in his regular work week, or eight hours, whichever was longer.

The amendments to the Ships' Crews and Ships' Officers Regulations provide that, when determining salary rates, the Treasury Board may now require an employee to be given an allowance in lieu of rations and quarters in cases where rations and quarters are not furnished during the time he is actually aboard ship. Previously, the Treasury Board could fix such an allowance only when it was the custom on a particular ship to supply rations and quarters.

## PROVINCIAL

### Manitoba Fair Wage Act

The annual fair wage schedule fixing minimum wages and maximum hours of work at regular rates for certain construction workers in Manitoba was gazetted on April 26, to remain in force from May 1, 1958 until April 30, 1959. Higher rates were approved for most occupations and in few cases the work week was reduced.

As previously, the schedule is in two parts. Part I applies to private construction work costing more than \$100 in the Greater Winnipeg Water District or in any city or town with a population of 2,000 or more or in any other part of the province designated by the Lieutenant-Governor in Council and to public work authorized by the Minister of Public Works for the execution of which a contract has been entered into between the Minister and the employer. Part II applies to public works for highway, road, bridge or drainage construction outside the city of Winnipeg.

Two sets of minimum wage rates covering 26 categories of workers are again set out in Part I. The higher or Zone "A" rates

apply to public and private work in Winnipeg and a 30-mile radius (excluding the town of Selkirk); the lower or Zone "B" rates apply to public work elsewhere in the province and to private work in cities with a population of 2,000 or more (Brandon, Dauphin, Flin Flon, Minnedosa, Neepawa, Portage la Prairie, Selkirk, Steinbach, Swan River and The Pas).

The 26 categories, which are unchanged, include skilled tradesmen, skilled building labourers, general building labourers, truck drivers and watchmen. One category was subdivided, however. Instead of fixing a single rate for base machine rubbers, the new schedule sets a special rate for journeymen, and four other rates which vary according to the worker's experience.

Except in the case of lathers and plasterers, whose minima remain fixed at \$2.25 and \$2.35 an hour, the Zone "A" rates are from 2 to 25 cents an hour higher, the most common increase being 15 cents an hour. On May 1, rates ranged from 95 cents an hour for watchmen to \$2.50 an hour for bricklayers, carpenter-millwrights and stonemasons. Further increases to \$2.50 and \$2.55 and \$2.20 an hour were authorized for ironworkers, licensed electrical journeymen and sheet metal journeymen effective from November 1. Journeymen plumbers and pipefitters were increased to \$2.40 an hour on May 1, with further increases to \$2.55 and \$2.60 effective May 27 and November 1.

Most of the Zone "A" rates are based on a 40-hour week. Work weeks were reduced in two cases, however. Helpers in the plumbing and pipe-fitting industry now work 40 hours a week instead of 48 and the work week of journeymen sheet metal workers has been reduced from 42½ hours to 40. The work week for building labourers remains 48 hours.

The Zone "B" rates, which, as before, are based on a 48-hour week, are from 2 to 40 cents higher for all occupations except that of machine rubber (wet), which remains \$1.20 an hour. The most common increase was 15 cents an hour. Zone "B" rates now range from \$1.20 an hour, the rate for certain machine rubbers, to \$2.20 an hour, the minimum for journeymen electricians, plumbers and pipefitters.

In Part II, where minimum wage rates are set out for 17 occupations, most of them involving the operation of road construction machinery, the rates have been increased by 5, 10 or 15 cents an hour, the most common increase being 10 cents. As a result, minimum rates for work on public roads and bridges now range from 90 cents an hour for watchmen and flagmen to \$1.50 an

hour for dragline, shovel and crane operators. Previously, the range was from 85 cents to \$1.40 an hour. Workers governed by this part are again permitted to work up to 120 hours in a two-week period at straight time rates.

### **Nova Scotia Female Minimum Wage Act**

A new general minimum wage order for female workers and two special orders governing women employed in beauty parlours and in the fishing industry, made by the Nova Scotia Minimum Wage Board on February 12, were gazetted on May 21 to take effect on June 1. A special order dealing with summer employment in hotels, restaurants, lunch stands, etc., situated outside the cities and larger towns has been incorporated into the general order.

The general order, which has now been extended to cover all parts of the province, including employment outside the incorporated towns, which was not previously covered, establishes a minimum weekly rate of \$21.60 for Halifax and nine other cities and towns with populations of 8,000 or more, of \$19.20 in centres with populations of from about 1,000 to 8,000, and of \$14.40 in the rest of the province. Learners' rates are no longer set.

Experienced beauty parlour employees are entitled to the same weekly minimum as women governed by the general order. No minimum is fixed for students in the first three months of training but one third of the full rate must be paid in the next three months and two thirds in the final three-month period.

The order for the fishing industry increased the minimum from 35 to 45 cents an hour, at the same time discontinuing the learners' rates.

A new provision in all three orders provides that split shifts must be confined within 12 hours following commencement of work.

### **General Order**

The new general order has a broader coverage than the former order, which was issued before the Act was extended to persons outside the incorporated cities and towns. It governs all women workers in the province except employees covered by the two special orders and persons employed as farm labourers and domestic servants.

Minimum rates continue to be fixed on a geographical basis, the province again being divided into three zones for wage-rate purposes. The zone boundaries have been re-drawn, however, to conform with the change in coverage.

Zone 1 now comprises the following cities and towns with a population of 8,000 or more: Halifax, Sydney, Glace Bay, Amherst, Dartmouth, New Glasgow, New Waterford, North Sydney, Sydney Mines and Truro.

Zone II again includes the following cities and towns with a population under 8,000: Antigonish, Bridgewater, Inverness, Kentville, Liverpool, Lunenburg, Parrsboro, Pictou, Trenton, Westville, Windsor and Wolfville. It also covers Dominion, Springhill, Stellarton and Yarmouth, which were formerly in Zone 1, and the following centres previously in Zone 3: Annapolis Royal, Berwick, Bridgetown, Canso, Clark's Harbour, Digby, Hantsport, Lockeport, Louisburg, Mahone Bay, Middleton, Mulgrave, Oxford, Port Hawkesbury, Shelburne, and Steviacke.

Zone 3 comprises the rest of the province.

The new weekly minimum, \$21.60 in Zone 1, \$19.20 in Zone 2 and \$14.40 in Zone 3, applies to all workers governed by the order, irrespective of experience. Previously, lower rates were set for persons with less than six months experience in the type of work for which they were hired. In all three zones, the minimum for inexperienced workers was \$2 a week less during the first three months of employment and \$1 less in the next three months.

During the summer season (June 1 to September 30) female employees in hotels, tourist resorts, dine and dance halls, restaurants and lunch stands located within 20 miles of an incorporated town or city must be paid the minimum fixed for women workers in the nearest incorporated town. At other times they will be subject to the Zone 3 rate.

For an experienced worker living in Halifax or in one of the nine other cities in Zone 1, the new minimum represents an increase of \$4.80 a week over the previous minimum rate.

In Dominion, Springhill, Stellarton and Yarmouth, which were formerly in Zone 1 but are now in Zone 2, the minimum of female employees has been raised by \$2.40 a week.

Persons residing in any of the 12 towns in Zone 2 which were unaffected by the re-zoning are now entitled to \$3.40 more a week than formerly.

In the 16 towns previously listed in Zone 3 but now included in Zone 2 minimum wages are \$4.40 a week higher than before.

Learners' rates being no longer provided for, minimum wages of female employees with less than three months experience increased by \$2 a week more than those of

experienced workers and the minima of persons with from three to six months service by \$1 more.

As before, the minimum wage rates are for a maximum of 48 hours per week, or for the normal number of hours worked if less than 48. Work in excess of 48 hours, or of the usual number of hours worked as the case may be, is counted as overtime and must be paid for at the rate of time and one-half the regular rate.

The minimum for part-time workers is to be calculated by dividing the applicable weekly minimum by 48 or by the usual number of hours worked per week in the particular establishment if less than 48. As before, every part-time worker is guaranteed a minimum of four hours pay in any one day.

Where work is done on a piecework basis, no woman worker, regardless of the amount earned according to piecework rates, may receive less than the minimum rate. Previously, this provision applied only to learners in the first three months of employment.

Handicapped, female employees, by which is meant persons who, due to age or a mental or physical handicap, cannot perform the same amount of work as a normal person, may not be paid less than the minimum except with the permission of the Minimum Wage Board. As previously, each case will be dealt with separately, following a written application by the employer.

As before, all time during which a worker is required to wait for work on the employer's premises is to be counted as working time. No deduction from wages for absence from work which brings the wages of an employee below the minimum rate may exceed the value of the time lost, determined according to part-time rates.

Deductions from minimum wages for time not worked because of statutory holidays are again prohibited.

No deductions may be made from minimum wages for the use, purchase or laundering of uniforms or other special wearing apparel where these are required to be worn. If an employee is required to launder her own uniforms or other wearing apparel, she must be compensated at the prevailing laundry rates.

In place of a provision limiting the deductions that could be made from the minimum rate when board and lodging are furnished by an employer, the new order sets out maximum charges. The maximum charge for a week's board is set at \$5 and for a week's lodging \$2. Up to 25 cents may be charged for single meals. These are the

same amounts as were previously fixed as allowable deductions from the minimum rate.

The order again provides that wages must be paid promptly at regular intervals not exceeding one month.

### Beauty Parlours

The occupational coverage of the beauty parlour order is unchanged. As before, it applies to women employed in establishments where hairdressing, permanent waving, manicuring and similar occupations connected with beauty culture are carried on.

Except for the retention of students' rates and a few other minor differences, the provisions of the new order for beauty parlours are the same as those of the general order described above. Wages, as before, are fixed on a zone basis and the zone boundaries, which have been re-drawn, are the same as in the general order.

Operators with more than nine months experience are entitled to the same weekly minimum as women governed by the general order, namely, \$21.60 in Zone 1, \$19.20 in Zone 2 and \$14.40 in Zone 3. This means that, as under the general order, increases in the minimum wage range from \$2.40 to \$4.80 a week, depending on the location.

As indicated earlier, lower minimum rates are again set for "beauty operator students," by which is meant persons receiving instruction and training in hairdressing, permanent waving and similar occupations. In keeping with the trend, however, the learning period has been reduced from 18 months to nine.

As before, in any establishment, the number of female employees being trained as beauty operator students may not exceed 25 per cent of the total working force covered by the Order. However, in beauty parlours where the number of persons subject to the Order is seven or fewer, two female students may be employed.

The revised order does not fix a minimum wage for the first three months of training. For the next three months, it sets a minimum of \$7.20 a week in Zone 1, \$6.40 in Zone 2 and \$4.80 in Zone 3, in each case one-third the rate for experienced employees.

In the last three months of the training period, a beauty operator student must now receive a weekly minimum of \$14.40 in Zone 1, \$12.80 in Zone 2 and \$9.60 in Zone 3, two-thirds the minima of experienced operators.

The previous order fixed a minimum rate from the beginning of the training period, but a student was not eligible for the full rate until the end of 18 months.

The rules with respect to part-time work differ somewhat from those in the general order even though the method of determining rates is the same. One difference is that part-time workers in beauty parlours are not guaranteed a minimum of four hours pay in any one day as is the case in the general order. Another is that the part-time rates apply where any regular employee works only part time during any week, as well as where operators are hired on a part-time basis.

The provisions with respect to overtime, lost time and statutory holidays remain the same as those in the general order. In line with former practice, there is no regulation with regard to waiting time.

Employers who require their operators to wear uniforms must supply them without cost to their employees. If asked to launder their own uniforms, employees must be compensated at prevailing laundry rates.

For the first time, the order for beauty parlours limits the deductions that may be made for board and lodging, fixing the same maximum rates as the general order.

The method of payment is unchanged, the order again providing that wages must be paid weekly. No employee, whether paid on a time, bonus system or any other basis, may receive less than the prescribed minimum wage.

### **Fishing Industry**

The special order for the fishing industry applies to all women employed at washing, preparing, preserving, drying, curing, smoking, packing or adapting any kind of fish for sale, shipment or use.

Although the work week is the same, minimum wages for the fishing industry continue to be fixed on a different basis than in the other orders. Instead of weekly minimum rates varying according to the zone, the order for the fishing industry sets a single hourly rate, 45 cents, which applies throughout the province. The 45 cent-an-hour rate is the same as the rate arrived at by dividing the Zone 1 rate prescribed in the other orders (\$21.60) by 48.

The revised order, following the example of the new general order, has discontinued the learners' rates, which applied to persons with less than three months experience in the industry. As a result, the minimum of such employees has been increased by 12, 14, or 16 cents depending on the length of

service, whereas, as previously noted, the minimum of experienced workers was raised by only 10 cents.

A daily guarantee provision is again included which, unlike that in the general order, is not restricted to part-time workers. It states that no employee may be paid for less than three hours' work, or \$1.35 in any one day.

In line with former practice the fishing industry order does not lay down special provisions for handicapped employees. However, it continues to prohibit employers from paying pieceworkers less than the minimum wage regardless of the amount earned on a piecework basis.

The rules with respect to overtime and waiting time are the same as those in the general order and represent no change for employees in this industry.

The provisions with respect to board and lodging and uniforms have been revised to conform with those in the general order. One result is that women in the fishing industry are now entitled to compensation if required to launder their own uniforms.

For the first time, there is a provision requiring employees in this industry to be paid at regular intervals not exceeding one month.

### **Saskatchewan Hours of Work Act**

The order exempting employees of rural municipalities engaged in road construction or maintenance from the overtime provisions of the Saskatchewan Hours of Work Act, which was revised last November to remove from the coverage of the order persons engaged in the storage, servicing or repair of road maintenance equipment, has now been revised to cover employees who do on-the-job repairs and servicing.

Employees engaged in any occupation in connection with the storage, servicing or repair of road construction or maintenance equipment done in the municipality warehouse or repair shop are expressly excluded from the revised order. Such employees will continue to be governed by O.C. 1837/55, which requires the payment of overtime for all hours worked in excess of 48 in the week.

The new order, which replaces O.C. 2169/57 (L.G., Jan. p. 83) was approved by O.C. 790/58, gazetted on May 16, and effective May 19.

By discontinuing a long-established practice of giving employees turkeys at Thanksgiving and Christmas an employer did not violate an agreement which required that local working conditions be maintained, a United States arbitrator recently decided. The gifts, the arbitrator held, were a gratuity over and above the stipulated compensation of the employees; giving turkeys was not a practice of the kind which became binding under the description "local working conditions".

# UNEMPLOYMENT INSURANCE

## Monthly Report on Operation of the Unemployment Insurance Act

Number of initial and renewal claims for benefit in April was about 15 per cent lower than March figure but 33 per cent higher than total in April 1957, statistics\* show. Claims on live file down 16 per cent

The number of initial and renewal claims for unemployment insurance benefit in April was 217,500, about 15 per cent lower than the March figure of 253,338 but 33 per cent higher than the 163,519 claims filed during April 1957.

These totals approximate the number of new cases of recorded unemployment among insured persons, in that persons without a job who wish to draw benefit are required to file either an initial or a renewal claim. Invariably a certain number of initial claims are taken on behalf of those who exhaust their benefit and wish to be considered for establishment of a subsequent benefit period. Such claims do not constitute new cases.

The number of persons having a claim for Unemployment Insurance Benefit in the "live" file was 722,252 on April 30, a decline of some 137,000 or 16 per cent from the total of 859,639 on March 31. On April 30, 1957 the total was 373,609.

This year's figures include seasonal benefit claimants numbering 226,870 on April 30 and 235,051 on March 31; there were no seasonal benefit claims in the live file on April 30, 1957, the seasonal benefit period having ended on April 20. Claimants for regular benefit thus declined by 20 per cent from March to April.

Seasonal benefit claimants were down by only 4 per cent, however, and they increased in relative importance, from 27 per cent of the total on March 31 to 31 per cent on April 30.

While part of the reduction in the number of regular claimants in April is probably due to a seasonal pickup in activity, particularly construction, some of it is undoubtedly due to the fact that claimants exhausting their regular benefit have payments extended under seasonal benefit,

thus causing a shift in the distribution of the claimants under regular and seasonal benefit. The net decrease in the number of seasonal benefit claimants is accounted for by a reduction in the number of fishing claimants having a claim in the live file on April 30 (12,578) in comparison with 20,137 on March 31. Benefit entitlement for fishing claimants is relatively lower than for non-fishing claimants, coverage having been extended to fishermen only as of April 1, 1957.

Postal claimants comprised 42.4 per cent of total claimants on April 30 compared with 41.9 per cent on March 31. Seasonal claimants on April 30 were 50 per cent postal, as against 39 per cent of regular claimants in this category.

The proportion of males dropped 2.4 percentage points on April 30, when 79 per cent were male, compared with 81.4 per cent on March 31. Last year, 80.6 per cent were male. The male segment of the claimant group is more sensitive to seasonal variations because the more highly seasonal industries such as logging and construction employ mostly males.

Of all the persons having a claim in the live file on April 30, 65 per cent had been continuously on claim nine weeks or more, and close to 25 per cent had been on since early in December. On March 31 these percentages were 62 per cent and 12 per cent, respectively. Because the 1956-57 seasonal benefit period terminated on April 20, 1957, the April 30, 1957 data refer to

In a comparison of current employment statistics with those for a previous period, consideration should be given to relevant factors other than numbers such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation.

regular claimants only and, as a result, the year-to-year pattern of duration on claim is not strictly comparable.

Initial and renewal claims adjudicated during April totalled 237,375, of which 211,452 or 89 per cent were entitled to benefit. Of the 166,514 initial claims handled, 14,056 or 8 per cent were found unable to fulfil the minimum contribution requirements for either regular or seasonal benefit.

The amount paid during April (\$66.7 million) was slightly below the record of \$72.4 million for March, but was 65 per cent above the \$40.4 million paid out in April 1957. The average weekly payment was \$21.59 for April, \$21.48 for March and \$21.13 for April 1957.

### Insurance Registrations

Since this year the annual renewal of insurance books takes place during May, the usual statistics on the number of insurance books and contribution cards issued to employees for the month ending April 30 are not yet available. However, the figures for May, which will be published next month, will include all persons who have been newly insured since April 1.

At April 30 employers registered numbered 303,134, an increase of 1,618 since March 31.

### Enforcement Statistics

During April, 5,225 investigations were conducted by enforcement officers across Canada. Of these, 3,423 were spot checks of postal and counter claims to verify the fulfilment of statutory conditions, and 98 were miscellaneous investigations. The remaining 1,704 were investigations in connection with claimants suspected of making false statements to obtain benefit.

Prosecutions were begun in 115 cases, 8 against employers and 107 against claimants.\* Punitive disqualifications as a result of claimants making false statements or misrepresentations numbered 1066\*.

### Unemployment Insurance Fund

Revenue received in April totalled \$17,-291,877.22 compared with \$21,327,216.42 in March and \$20,407,877.99 in April 1957. Benefits paid in April totalled \$66,653,314.04 compared with \$72,358,172.53 in March and \$40,374,683.94 in April 1957. The balance in the fund on April 30 was \$691,154,698.84; on March 31 it was \$743,516,135.66 and on April 30, 1957, \$854,607,845.71.

---

## Decisions of the Umpire under the Unemployment Insurance Act

### Decision CUB-1510, May 1, 1958

**Summary of the facts:** The claimant, a married man, last worked as a carpenter in C....., Alberta, from May 1956 to October 26, 1956, at a wage of \$2.05 an hour. He made an application for benefit at the local office of the Unemployment Insurance Commission in P....., British Columbia, on November 27, 1956 and requested the dependancy rate in respect of his son Ernest, age 11 years.

In the dependancy certificate, the claimant explained that he was separated from his wife but still contributed to the support of his family who resided with her. The claim was allowed and the claimant received benefit at the dependancy rate for eighteen (18) weeks.

In a routine spot check, the district investigator called on the claimant on April 3, 1957 and on that date obtained a declaration from him to the effect that his wife and ten children had left him about ten years

ago and had not lived with him since; that three of them, including the son in respect of whom he claimed the dependancy rate, were still under 16 years of age and residing with his wife at M....., Alberta; that for most of this period he had supported his family to the extent of contributing \$60 a month; that for the last two years this money had been paid through the Family Court at C..... and that the last payment which he had made was in the amount of \$10 and was paid through the Family Court about November 1, 1956, just before he left C....., and that he thought the Unemployment Insurance Commission was sending his son his share of the benefit.

The insurance officer was of the opinion that the claimant was not wholly or mainly maintaining his alleged dependant because he had not contributed to his support since

---

\*These do not necessarily relate to the investigations conducted during this period.

November 1, 1956, not even to the extent of the difference between the single and dependancy rate of benefit. He, therefore, reduced the claim to the single rate effective November 25, 1956, thereby creating an overpayment. The claimant was notified of this decision on May 3, 1957.

From this decision the claimant, who in the meantime had returned to C....., appealed to a board of referees on May 27, 1957. He pointed out that by court order he was required to pay the sum of \$15 a week for the support of his children, that these maintenance payments, although at present in arrears, would be required to be made by him.

The board of referees heard the case in C....., on July 11, 1957. The claimant and his lawyer were present at the hearing. The board allowed the appeal on the ground that from April 1957 to July 6, 1957, the claimant had paid \$225 to the Family Court, and the portion of this sum which could be applied to the arrears of the maintenance payments exceeded the difference between the single and dependancy rate, namely, \$23 and \$30 a week, respectively, for the eighteen (18) weeks which the claimant had been on benefit. The board expressed the view that qualification for dependancy rate surely depends upon the support given to a dependant or dependants when the claimant is employed but it did not know the statutory duty of the claimant in this respect after he became unemployed.

The Director of Insurance Branch appealed to the Umpire and requested that he decide:—

(a) Whether or not a claimant is entitled to the dependancy rate of benefit if, while on claim, he fails to contribute to the maintenance of the dependant as required by a court order although he may have complied with the court order while working;

(b) Whether or not the resumption of payments toward maintenance of the dependant in compliance with the court order, which may cover the arrears in part, has a retroactive effect on the claimant's entitlement to the dependancy rate of benefit while he was previously in receipt of benefit.

**Conclusions:** Sub-section 3 (a) (iii) of section 47 of the Act reads:—

(3) For the purposes of this section,

(a) a person with a dependant is

(iii) a person who maintains wholly or mainly one or more children under the age of sixteen years...

This provision is in no way ambiguous. The evidence must show that the claimant pays either the whole cost of maintenance or more than half the usual cost thereof, and whether or not a child is being wholly

or mainly maintained by a claimant at the date when a claim for benefit in respect of such child is made, is a question of fact.

Ordinarily, in determining whether a claimant is wholly or mainly maintaining the child claimed for as a dependant, the time to be considered is not the moment when the claim is made, but the time when the claimant was in employment. In the present instance, the evidence shows that the claimant, for a considerable period prior to becoming unemployed, paid \$15 a week for the support of one or more persons. As this amount obviously was sufficient to pay more than half the actual cost of maintenance of at least the person specifically claimed for as a dependant and as such person was a child under the age of 16 years, I consider that the child was a dependant of the claimant at the date when the claim for benefit at the dependancy rate in respect of such child was made.

The evidence shows also that, after becoming unemployed, that is, during the 18 weeks he was on benefit, the claimant ceased to contribute towards the support of the person or persons in respect of whom he used to pay \$15 a week while in employment and that, after resuming employment, he paid on account of arrears, from April 1957 to July 6, 1957, the sum of \$225. This amount is far in excess of the \$7 per week which in this case is the difference between the rate of benefit for a person with a dependant and that for a person without a dependant, and which the insurance officer rightly suggested that the claimant should have paid during the 18 weeks of his unemployment in order to qualify for the dependancy rate while on claim. The said amount of \$225 also indicates his good faith and supports his statement that he thought the Commission was sending his son a share of the benefit.

The Act does not define the word "maintains" and whether or not it covers a weekly, monthly or yearly contribution. The claimant's contributions if calculated on a yearly basis were more than sufficient to qualify him for the dependancy rate of benefit. Technically, it might be said that because of the claimant's failure to make payments during his period of unemployment, he had temporarily ceased to be the main support of his child, but even if this were so, I am inclined to give the claimant the benefit of the doubt in respect of his statement that he believed that something was being remitted to his son even while he remained unemployed.

Moreover, the sufficiency of the amount required to maintain a dependant within the meaning of the Act is a question of fact,

and in this case there is nothing in the record to indicate what would have been the minimum weekly contribution required to be made by the claimant in order to fulfil the requirement of being the main support of the young child who was living with his mother.

For all the above reasons, in this particular case, I am disposed to hold that the claimant was entitled to benefit at the dependance rate as from the effective date of his claim.

The existence of a court order is entirely irrelevant in deciding whether or not a person is a dependant under the Act.

The appeal is disallowed.

#### Decision CUB-1517, May 20, 1958

**Summary of the facts:** On November 25, 1957, the claimant registered for employment as a locomotive fireman and filed an initial application for benefit, stating that he had worked as such from May 27, 1957 to November 18, 1957, when he was laid off because of a shortage of work. He stated also that he had been unemployed since and that he was not on any "board for call". The employer reported that the claimant was laid off because of a reduction of staff.

On November 25, 1957 also, the claimant was instructed (on form UIC-501D) to report to the local office on December 11, 1957 and, as he did not have his insurance book, to take the book to the local office immediately he received it. The insurance book was received on December 31, 1957, the claimant turned it in on January 2, 1958 and filed a renewal claim for benefit. On the following day, the claimant filled in and produced weekly reports (form UIC-489) covering the period November 24, 1957 to December 28, 1957 and explained that the reason he did not report to the local office until January 2, 1958 was that an employee of the local office told him to bring in his book as soon as he received it and that he would not lose any benefit payments.

The claims taker, in a statement dated January 3, 1958, said that the claimant was instructed to report to the local office on December 11, 1957, as his booklet (Form UIC-501D-Direction to Report and Information for Claimants) would prove; that he was also informed that immediately he received his book from the employer to take it to the local office; that he reported on January 3, 1958 and a new claim was taken; that he refused to sign documents, demanding that his original claim of November 25, 1957 be considered valid; that he was distinctly told he would have

to report to the local office on December 11 and that he waited until his insurance book was received, which was beyond the stipulated date.

The insurance officer disqualified the claimant from receipt of benefit from November 24, 1957 to January 1, 1958, for not having made his continuing claim in the prescribed manner as required by section 147 of the Unemployment Insurance Regulations in that he had failed to show good cause for failure to report to the local office as directed by the claim officer to prove availability.

The claimant appealed to a board of referees, before which he appeared on February 6, 1958. The board, by a majority decision, disallowed the appeal on the grounds that it was satisfied the local office had instructed the claimant to report to that office on December 11, but for some reason or other, through a misunderstanding or otherwise, he did not do so until January 2, 1958, which was after he had received his insurance book from the employer (December 31, 1957). The board pointed out that the claimant admitted at the hearing that the date of December 11, 1957, was inserted in his booklet of instructions as the date for his reporting. The dissenting member commented in part: "(The claimant) admits receiving a copy of 501D and that his reporting date was marked therein as December 11, 1957. However, he read page 1 and understood that part of the clause which reads 'unless you are otherwise instructed' to mean that 'December 11' did not apply unless he had received his book by that date. Therefore, he did not report... I believe this to be a complete misunderstanding of instructions of the officer, and under the circumstances this claim should be allowed".

The claimant's Brotherhood appealed to the Umpire, mainly on the ground that he was misinformed by the local office concerning the effect any delay in depositing his insurance book might have on his entitlement to benefit.

In a letter to the local office dated April 9, 1958, the Legislative Representative of the claimant's Lodge of the Brotherhood contended that the claimant had read the instructions in the booklet referred to and noted the inserted reporting date of December 11 but regarded it as a formality as he had been told to come back to the local office when he received his insurance book from the employer; that he believed these instructions superseded the date inserted in

*(Continued on page 790)*

# LABOUR CONDITIONS IN FEDERAL GOVERNMENT CONTRACTS

## Wage Schedules Prepared and Contracts Awarded during May

### Works of Construction, Remodelling, Repair or Demolition

During May the Department of Labour prepared 219 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition. In the same period, a total of 242 contracts in these categories was awarded. Particulars of these contracts appear below.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practice;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

### Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in May for the manufacture of supplies and equipment were as follows:

| Department                          | No. of Contracts | Aggregate Amount |
|-------------------------------------|------------------|------------------|
| Defence Production .....            | 111              | \$164,154.00     |
| Post Office .....                   | 20               | 340,808.87       |
| Public Works .....                  | 1                | 6,250.00         |
| R.C.M.P. ....                       | 14               | 308,992.51       |
| St. Lawrence Seaway Authority ..... | 4                | 274,423.84       |

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour, showing the applicable wage rate for each classification of workmen deemed to be required in the execution of the work. These

wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classifications to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is, however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be had upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no event shall the wages paid be less than those established by the laws of the province in which the work is being performed;

(b) the working hours shall be those fixed by the custom of the trade in the district or if there be no such custom, then fair and reasonable hours;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

## Wage Claims Received and Payments Made during May

During May the sum of \$7,159.40 was collected from 17 contractors for wage arrears due their employees arising out of the failure of the contractors, or their subcontractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contracts. This amount has been or will be distributed to the 187 workers concerned.

## Contracts Containing Fair Wage Schedules Awarded during May

(The labour conditions of the contracts marked (\*) contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of eight per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.)

### Department of Agriculture

*Avonport Marsh N S:* Hennessy & Spicer Ltd, construction of dyke and drainage. *Fort Ellis Marsh N S:* Salmon River Construction Ltd, construction of dyke; McCully & Soy Ltd, construction of drainage. *Grand Pre Marsh N S:* J G Webster Construction Ltd, construction of dyke, Wickwire Portion. *Horton Marsh N S:* Welton Construction Ltd, construction of dyke; Welton Construction Ltd, construction of drainage. *Rhynds Creek Marsh N S:* J G Webster Construction Ltd, construction of dyke; McCully & Soy Ltd, construction of drainage. *Sackville N B:* Modern Construction Ltd, construction of Tantramar River Dam. *St Malo Man:* Simkin's Construction Co Ltd, construction of dam & spillway, Rat River.

### Central Mortgage and Housing Corporation

*Gander Nfld:* Conniston Construction Co, site improvement & planting, CMHC 5/56. *St John's Nfld:* Eastern Woodworkers Ltd, construction of housing units, FP 5/54. *Saint John N B:* M J Buckley, insulation of basements, FP 3/56. *Valcartier Que:* Bedard & Girard Ltd, construction of underground electrical distribution system, DND 8/56. *Camp Borden Ont:* Ontario Power Line Construction Co, installation of electrical distribution system, DND 13/55. *Fort William & Port Arthur Ont:* Froggett & Van der Mout, exterior painting of housing units. *Gloucester Ont:* E L Pranschke, construction of housing units & services, DND 4/58. *Toronto Ont:* Evans Contracting Co Ltd, site improvement & planting, Regent Park South, FP 1/53. *Lloydminster Sask:* George & Ellwood, \*construction of concrete walks & repairs to basements, etc. *North Battleford Sask:* C M Miners Construction Co Ltd, \*construction of concrete walks & repairs to basements, etc. *Saskatoon Sask:* H H Crossman, exterior painting of housing units, VR 6/49; John Bundy Construction, \*construction of concrete walks & repairs to basements, etc. *Edmonton Alta:* Ideal Paving Co Ltd, \*paving rear areas, Highlands Courts. *Kamloops B C:* Helge Harbest Painting Co Ltd, \*exterior painting of housing units.

### Department of Citizenship and Immigration

*James Bay Indian Agency Ont:* Pulsifer Construction Ltd, construction of Indian day school, Moose Factory Island. *Kamloops Indian Agency B C:* Floor-Lay Services Ltd, installation of floor covering, Kamloops IRS. *Kootenay Indian Agency B C:* Gordon Latham Ltd, installation of heating facilities & laundry drier, Kootenay IRS. *Yukon Indian Agency Y T:* Blanchet Bros, painting of Lower Post IRS.

## Defence Construction (1951) Limited

*Summerside P E I*: County Construction Co Ltd, construction of control tower, RCAF Station. *Dartmouth N S*: Fundy Construction Co Ltd, construction of extension to central heating plant, *HMCS Shearwater*. *Greenwood N S*: Canadian Vickers Ltd, supply & installation of steam generating unit. *Halifax N S*: E P Electric Products Co Ltd, supply & installation of regulator controlled oil immersed selenium rectifier. *Sydney N S*: Reg H Steen Ltd, installation of steam distribution system, RCN. *Camp Gagetown N B*: Newton Construction Co Ltd, construction of POL service station. *Bagotville Que*: J O Lambert Inc, construction of control tower, transmitter & receiver bldg, RCAF Station. *Bouchard Que*: Blainville Welding & Supplies Inc, renovation to steam distribution & feedwater treatment. *St Hubert Que*: A N Bail Co Ltd, construction of control tower, RCAF Station; A N Bail Co Ltd, construction of refuelling tender garage. *Ville La Salle Que*: Montsor Ltee, construction of sports field, *HMCS Hochelaga*: Dominion Bridge Co Ltd, replacing timber crane rail columns with structural steel columns & associated shoring, etc. *Barriefield Ont*: Black & McDonald Ltd, rehabilitation of electrical services; Standard Structural Steel Ltd, supply & erection of structural steel for physical training bldg. *Gloucester Ont*: Sirotek Construction Ltd, construction of recreation hall & stores bldg, RCN Station. *Kingston Ont*: M Sullivan & Son Ltd, construction of Naval Reserve Division Bldg; Bedard & Girard Ltd, construction of underground electrical distribution system. *Orillia Ont*: The Ontario Building Cleaning Co Ltd, cleaning, repairing & waterproofing of armouries. *Petawawa Ont*: Evans Contracting Co Ltd, paving, landscaping & fencing; Southern Structural & Reinforcing Steel Inc, supply & erection of structural steel for physical training bldg; Allan Stewart & Basil Broad Construction Co Ltd, extension to utilities, BB area. *Uplands Ont*: Horton Steel Works Ltd, supply & installation of high pressure air storage tanks, NAE; North Shore Construction Co Ltd, construction of roads, parking areas, etc. *Churchill Man*: Carter Construction Co Ltd, addition to garage, HMC Naval Radio Station; Mechron Engineering Products Ltd, supply & installation of diesel electric generator. *Moose Jaw Sask*: Bird Construction Co Ltd, renovations to leantos of hangars. *Calgary Alta*: Bird Construction Co Ltd, construction of RCME workshop bldg, Sarcee Camp; Bennett & White (Alberta) Ltd, construction of tank hangar bldg, Sarcee Camp; Burns & Dutton Concrete & Construction Co Ltd, construction of WO's & sergeants' mess, Currie Barracks. *Penhold Alta*: Burns & Dutton Concrete & Construction Co Ltd, renovations to leantos of hangars, RCAF Station. *Chilliwack B C*: C B Archibald Piping Ltd, installation of steam distribution system, stage 1V; J H McRae Co Ltd, renovation of electrical distribution system; Columbia Bitulithic Ltd, construction of roads, contract No 1, RCSME. *Royal Roads B C*: W R Menzies & Co Ltd, installation of steam & condensate lines from Grant Block to Nixon Block & removal of heating equipment from Grant Block.

### Building and Maintenance

*Summerside P E I*: Boudreau's Sheet Metal Works Ltd, reroofing of leantos of five hangars & drill hall. *Greenwood N S*: Chas W Thompson, application of fertilizer & lime. *Barriefield Ont*: Cardinal Painting & Decorating Co Ltd, interior painting of 106 PMQs. *Camp Borden Ont*: Malach Roofing & Flooring Ltd, residing of 24 bldgs. *Trenton Ont*: H J McFarland Construction Co Ltd, application of slurry seal on roads, RCAF Station. *Weston Ont*: McNeilly Bavington Ltd, exterior painting of various bldgs. *Sea Island B C*: Dawson, Wade & Co Ltd, replacement of sanitary sewer lines, RCAF Station.

### Department of Defence Production

*Charlottetown P E I*: County Construction Co Ltd, installation of heating system in bldg No 3, Brighton Compound. *Summerside P E I*: Curran & Briggs Ltd, laying of concrete floors in garage, RCAF Station. *Halifax N S*: W A Chaddock & Co Ltd, replacement of coil, Bldg S-24, *HMCS Stadacona*; R R Power Ltd, repairs to boundary fence, Gladstone St Bulk Stores. *Sydney N S*: Canada Catering Co Ltd, catering at *HMCS Acadia*. *Campbellton N B*: Hub Electric Reg'd, rewiring of Mowatt Bldg. *St Margarets N B*: M F Esson & Sons Ltd, construction of sports field, RCAF Station. *Longue Pointe Que*: John Davidson & Sons Ltd, interior painting of bldgs, Barrack Area; South Shore Construction Inc, repairs to road, Barrack Area. *Ste Foy Que*: Desire Delisle, reroofing of 13 bldgs, PMQs area. *Ste Therese Que*: Harbour Electric Ltd, replacement of power line poles, Bouchard Military Camp. *Camp Petawawa Ont*: Walter Mansveld, exterior painting of bldgs. *Kingston Ont*: Cardinal Painting & Decorating

Co Ltd, interior painting of bldgs, RMC. *Ottawa Ont*: Rideau Aluminum & Steels Ltd, installation of exhaust system in kitchen, Beaver Barracks. *Rockcliffe Ont*: Metallicrete Floor Co Ltd, resurfacing concrete runway button, RCAF Station; O'Leary's (1956) Ltd, repairs to pavement, RCAF Station. *Trenton Ont*: Refractories Engineering & Supplies Ltd, repairs to boiler, central heating plant, bldg No 27, RCAF Station. *Camp Dundurn Sask*: Edwin Fryer, catering. *Saskatoon Sask*: O Waschuk, replacement of concrete floors in hangars, RCAF Station. *Penhold Alta*: Western Builders Ltd, construction of parachute drying well, RCAF Station. *Comox B C*: Canada Catering Co Ltd, catering at HMCS Quadra. *Esquimalt B C*: Parfitt Construction Co Ltd, repairs to staff house No 2, nurses' residence, HMCS Naden.

### Department of Justice

*Joyceville Ont*: James Kemp Construction Co Ltd, construction of administration bldg No 1; James Kemp Construction Co Ltd, construction of power plant bldg No 12; A Stroud Ltd, installation of steam generating plant & equipment, bldg No 12; James Kemp Construction Co Ltd, construction of automotive & shop bldg No 11; Francis Hankin Co Ltd, construction of radial brick chimney; James Kemp Construction Co Ltd, construction of stores bldg No 9 & maintenance shop No 10; Ball Brothers Ltd, construction of kitchen bldg No 5; Ball Brothers Ltd, construction of laundry & clothing repair bldg No 7 & shop bldg No 8; Ball Brothers Ltd, construction of hospital & chapels bldg No 2 & accommodation bldg No 3.

### National Harbours Board

*Halifax N S*: Blunden Supplies Ltd, construction of canteen & gear room bldg, Ocean Terminals; The Canada Gunite Co Ltd, waterproofing exterior walls of storage units, Grain Elevator. *Quebec Que*: Carter Construction Co Ltd, construction of receiving facilities & marine towers. *Three Rivers Que*: The Foundation Co of Canada Ltd, construction of wharf extension, section No 20.

### Department of Public Works

*Wesleyville Nfld*: R S Chaulk & Sons Ltd, construction of federal bldg. *Charlottetown P E I*: Chappell & Co, laying of underground cables & installation of lights on Railway Wharf. *Fishing Cove P E I*: Morrison & McRae Ltd, extension to breakwater. *Red Head P E I*: Edward MacCallum, construction of retaining wall. *Souris P E I*: County Construction Co Ltd, breakwater repairs. *Summerside P E I*: Curran & Briggs Ltd, improvements to railway wharf. *Wood Islands P E I*: Morrison & McRae Ltd, improvements to ferry terminal. *Englishtown N S*: Kenney Construction Co Ltd, wharf repairs. *Lunenburg (Battery Point) N S*: Acadia Construction Ltd, breakwater reconstruction. *Marie Joseph N S*: Continental Construction Co Ltd, wharf reconstruction. *South Bar (Sydney Harbour) N S*: Municipal Ready-Mix Ltd, construction of groyne. *Baie Ste Anne N B*: Lloyd G Smith, wharf extension. *Burnt Chuhch N B*: J W & J Anderson Ltd, wharf repairs. *Campbellton N B*: Ralph Sharp, construction of causeway approach to Cross Point Bridge. *Fundy National Park N B*: Dexter Construction Co, patching of roads. *Grande Anse N B*: Comeau & Savoie Construction Ltd, breakwater repairs. *Lower Neguac N B*: Fortunat Bernard, wharf extension. *Bagotville Que*: J O Lambert Inc, addition & alterations to federal bldg. *Blackpool Que*: Roger Electric Inc, improvements to outdoor lighting, Citizenship & Immigration Bldg. *Chandler Que*: Les Entreprises Nationales Ltee, wharf repairs. *Etang du Nord Que*: Turbide & Jomphe Enrg, construction of pier. *Montreal Que*: Charney Bros Inc, painting, etc, of federal bldg. *Natashquan Que*: Landry Construction Inc, construction of wharf. *Noyan Que*: Tracy Construction Inc, wharf repairs. *Ste Rose Que*: J Lamontagne Ltee, addition & alterations to federal bldg. *Agin-court Ont*: Fidelity Construction Ltd, construction of post office bldg. *Collingwood Ont*: A E Hawkin Co Ltd, breakwater repairs. *Guelph Ont*: Dunker Construction Ltd, construction of federal bldg. *Hamilton Ont*: Tidey Construction Co Ltd, construction of ramp & replacement of doors, federal bldg. *Hawkesbury Ont*: Dufort & Lavoie, widening of approach to Perley Bridge. *Hollow Lake (Dorset) Ont*: R A Blyth, wharf improvements & extension. *Kingston Ont*: Robert D Mackey Construction Co Ltd, wharf repairs, LaSalle Causeway. *Ottawa Ont*: E G M Cape & Co (1956) Ltd, construction of surveys & mapping bldg, Booth St; Dominion Electric Protection Co, installation of central fire alarm system, etc, Jackson Bldg; Thomas Fuller Construction Co Ltd, construction of sewerage & water distribution system, etc, Riverside Drive; D Bremner Construction Co

Ltd, alterations for installation of knock testing laboratory, St Patrick St; L Beaudoin Construction Co, alterations & repairs to Argyle Bldg. *Parry Sound Ont*: Macklaim Construction Co Ltd, construction of floats. *Port Burwell Ont*: Dean Construction Co Ltd, harbour repairs & improvements. *Port Stanley Ont*: Sir Lindsay Parkinson (Canada) Ltd, harbour repairs & improvements. *Smithfield Ont*: Tatham Co Ltd, construction of food processing laboratory. *Thornbury Ont*: Ruliff Grass Construction Co Ltd, repairs to retaining wall. *Toronto Ont*: Evan S Martin Construction Ltd, supply & installation of partitions in Postal Station "Q". *Beausejour Man*: North American Lumber & Supply Co Ltd, construction of RCMP detachment quarters. *Hamiota Man*: Jaska Construction Ltd, construction of RCMP detachment quarters. *McBeth Point Man*: Sigurdson Fisheries Ltd, construction of breakwater wharf. *Winnipeg Man*: Allen Reynolds, removal of ashes & garbage from various bldgs. *Canora Sask*: C M Miners Construction Co Ltd, construction of RCMP detachment quarters. *Cupar Sask*: Theodore F Fordon, construction of post office bldg. *Edmonton Alta*: C H Whitham Ltd, alterations to first floor, Massey-Harris Bldg. *Vermilion Alta*: K G Myers Construction Ltd, construction of federal bldg. *Fraser River B C*: Gilley Bros Ltd, improvements to Steveston Cannery Channel. *Kootenay National Park B C*: Storms Contracting Co (Pacific) Ltd, bituminous stabilized base course, mile 44-56.2, Banff-Windermere Highway. *Ladysmith B C*: Fraser River Pile Driving Co Ltd, construction of boat harbour. *New Massett B C*: Pacific Piledriving Co Ltd, wharf & shed extension & repairs to structure, etc. *New Westminster B C*: Fraser River Pile Driving Co Ltd, renewal of fender system; C H E Williams Co Ltd, rehabilitation of electrical system for railway bridges. *Port Alberni B C*: Basarab Construction Co Ltd, wharf repairs. *Prince Rupert (Sourdough Bay) B C*: Skeena River Piledriving Co, construction of departmental wharf. *Sydney B C*: E J Hunter & Sons, addition & alterations to federal bldg. *Vancouver B C*: George D McLean & Assocs Ltd, installation of shed cubicles, False Creek Fishing Harbour; Turnbull & Gale Construction Co Ltd, construction of comfort station, False Creek Fishing Harbour. *Cambridge Bay N W T*: Barry Sheet Metal Co Ltd, installation of plumbing & heating services for nursing station. *Yellowknife to Rae N W T*: Mannix Co Ltd, grading & surfacing, mile 20-58, Development Road. *Carmacks Y T*: Dawson & Hall Ltd, construction of Yukon River Bridge. *Tatchum River Y T*: Dawson & Hall Ltd, construction of bridge.

#### Contracts Containing the General Fair Wages Clause

*St John's Nfld*: Canadian National Railway Drydock, docking & repairs to Dredge PWD No 400. *Graham's Pond P E I*: Maritime Dredging Ltd, dredging. *Miminegash, P E I*: Norman N McLean, dredging. *Alder Point N S*: J P Porter Co Ltd, dredging. *Black Point N S*: Mosher & Rawding Ltd, dredging. *Glace Bay N S*: J P Porter Co Ltd, dredging. *Halifax N S*: D A Cummings Ltd, repairs to roof, North End Station. *Weymouth North N S*: J P Porter Co Ltd, dredging. *Bathurst N B*: J P Porter Co Ltd, dredging. *Campbellton N B*: J P Porter Co Ltd, dredging. *Dipper Harbour N B*: Saint John Dredging Co Ltd, dredging. *Harshman's Brook N B*: Roger LeBlanc, dredging. *Moncton N B*: Ambrose Wheeler Ltd, alterations to public bldg. *Saint John (Courtenay Bay) N B*: Standard Dredging Co Ltd, dredging. *Montmorency Que*: Chantier Maritime de St Laurent Ltee, repairs to steel hopper scow No 69 (Plant 130). *St Sulpice Que*: Theode Robidoux Inc, dredging. *Hamilton Ont*: James Kemp Construction, alterations to post office bldg. *Listowel Ont*: E Wall & Perkins Bros, installation of screenline, federal bldg. *New Hamburg Ont*: John B Erb, installation of screenline, Post Office bldg. *North Bay Ont*: J Lefebvre, cleaning of windows, federal bldg. *Ottawa Ont*: Sanco Reg'd, installation of deodorizers in various bldgs; Marcel Jacques, painting at No 6 & 9 Temporary Bldgs; Rene Clerous, repairs to heating system, Food & Drug Laboratory; Ottawa Building Maintenance, redecoration at Motor Bldg; J R Statham Construction Ltd, alterations to Mines Bldg; F Fentiman & Sons, installation of garage doors, RCMP Bldg; J R D'Aoust Reg'd, alterations to No 8 Temporary Bldg; Presley Painting & Decorating, redecoration at No 8 Temporary Bldg; Ottawa Building Maintenance, painting at Experimental Farm; Gaston Lavoie, alterations to "C" Bldg; Rideau Aluminum & Steels Ltd, installation of sinks, Justice Bldg; Trudel & McAdam Ltd, repairs to stairways, Parliament Bldgs; J R Statham Construction Ltd, repairs to roof, Connaught Bldg; Ottawa Plumbing & Heating Ltd, repairs to sprinkler system in various bldgs. *Port McNicol Ont*: Rei Construction Co, installation of screenline, Postal Bldg. *Toronto Ont*: Taylor Bros, alterations to Station "A". *Windsor Ont*: Bluebird Service, cleaning of windows, federal bldg. *Regina Sask*: W H McDiarmid Construction Ltd, repairs to new Post Office Bldg; W H McDiarmid Construction Ltd, repairs to Motherwell Bldg. *Edmonton Alta*: Standard Iron

& Engineering Works Ltd, construction of boom & turntable, etc, for Dredge No 251. *Near Hope B C*: Fraser River Dredging Co Ltd, dredging; Scuffler Dredge Co Ltd, dredging. *Greenwood B C*: Hugh D Johnston, plumbing repairs in public bldg.

### The St. Lawrence Seaway Authority

*Lachine Section Que*: Grant Mills Ltd, construction of superstructure, regulating channel bridge, Cote Ste Catherine Lock; Roy Robertson Excavation & Foundation Co Ltd, extension to sewer outfall, Municipality of Laprairie; Link-Belt Ltd, supply & installation of trash bar screens & power rake, Montreal South Sewage Pumping Station.

### Department of Transport

*Halifax N S*: Ellis-Don Ltd, construction of raytheon AASR site; Purdy Bros Ltd, \*construction of twin screw diesel engined landing barge. *Moncton N B*: Campbells' Electric Reg'd, construction of airport lighting facilities. *Mont-Joli Que*: Adrien Berube, construction of garage. *Kenora Ont*: Bergman & Nelson Ltd, construction of raytheon AASR site. *Malton Ont*: W G Gallagher Construction Ltd, alterations to hangar. *North Bay Ont*: Whelpton Electric Ltd, installation of control cables, AASR Bldg. *St Catharines Ont*: Provincial Engineering Ltd, installation of airport lighting facilities. *Beaverlodge Sask*: Wirtanen Electric Co Ltd, construction of airport lighting facilities. *Regina Sask*: Brown-Plotke Engineering & Construction Ltd, construction of garage at airport. *Calgary Alta*: Wirtanen Electric Co Ltd, construction of airport lighting facilities. *Embarras Alta*: McRae & Assocs Ltd, construction of radio control bldg & related work. *Fort McMurray Alta*: McMurray Construction Co, construction of dwelling & related work. *Grande Prairie Alta*: Annis Construction Co, construction of basement under Bldg No 3 & related work. *Lethbridge Alta*: W Cooper Construction, construction of addition to power house & related work at airport. *McMurray Alta*: Sunley Electric Ltd, construction of airport lighting facilities. *Carmi B C*: Interior Contracting Co, construction of pumphouse & related work. *Comox B C*: Harrison & Longland, construction of powerhouse & transmitter bldg at airport. *Fort St John B C*: General Construction Co Ltd, additional airport development. *Hope B C*: Triangle Construction Co Ltd, construction of garage at airport. *Patricia Bay B C*: Derry Construction Co Ltd, construction of extension to power house & related work at airport. *Prince George B C*: The Jamieson Construction Co Ltd, additional airport development. *Princeton B C*: Betts Electric Ltd, construction of addition to pump house at airport. *Vancouver B C*: Peter Kiewit & Sons Co of Canada Ltd, construction of addition to power house at airport. *Coral Harbour N W T*: Tower Co Ltd, construction of tower bases & anchors. *Fort Smith N W T*: Wirtanen Electric Co Ltd, construction of airport lighting facilities.

---

## Decisions of Umpire

(Continued from page 784)

the booklet in view of that paragraph of the instructions in the booklet which reads: "One of the conditions for the receipt of benefit is that you must report to the above office on the report day and at the time shown above, unless you are otherwise instructed, in which case date and time of reporting will be that specified below"; that consideration should be given to the fact that the claimant had reported promptly upon receiving his insurance book from the employer and that the employer had contributed to the misunderstanding by delaying to forward his insurance book.

The Brotherhood also requested an oral hearing before the Umpire, which was held on May 13, 1958. A Vice President of the

Brotherhood represented the claimant; the Unemployment Insurance Commission was also represented.

**Conclusions:** On the evidence before me, and after listening to the presentations made by the above-mentioned representatives, I readily accept the claimant's explanation that his failure to attend at the local office on December 11, 1957 and thereafter until January 2, 1958, was due to a complete misunderstanding of the instructions given on November 25, 1957.

Therefore, as the evidence shows that the claimant acted in good faith in not attending at the local office during the period under consideration, I find that he must be deemed to have filed his continuing claim in the prescribed manner and I allow the appeal.

# PRICES AND THE COST OF LIVING

## Consumer Price Index, June 1958

The consumer price index (1949=100) remained unchanged at 125.1 between May and June, as food prices were steady on average, and small offsetting movements occurred between the other groups\*.

The food component remained at 122.7, as a cut of 11 cents per pound for fresh tomatoes, and lower prices for potatoes and oranges, were balanced by higher prices for meats, particularly pork, and also eggs, apples and grapefruit.

Most of the advance in the shelter series from 137.9 to 138.3 was attributable to an increase in rents, which frequently occurs in the traditional moving month of May. The rent component advanced 0.4 per cent.

The clothing index declined 0.3 per cent from 110.0 to 109.7 as sale prices were reported for spring coats and men's suits and slacks.

Household operation remained practically unchanged, moving from 120.7 to 120.6 as small scattered decreases proved fractionally more important than increases.

A movement of 0.1 points in other commodities and services from 130.6 to 130.7 followed slight increases in drug and personal care items.

The index one year earlier (June 1957) was 121.6. Group indexes on that date were: food 117.7, shelter 134.8, clothing 108.4, household operation 119.1, and other commodities and services 126.5.

## City Consumer Price Indexes, May 1958

Consumer price indexes (1949=100) declined in six of the ten regional cities between the beginning of April and May 1958, with decreases ranging from 0.1 per cent in Saint John, Toronto and Vancouver to 0.6 per cent in Halifax. The Winnipeg index was unchanged while those for the remaining three regional cities registered increases ranging from 0.2 per cent in Saskatoon-Regina to 0.4 per cent in St. John's†.

Movements in the food indexes were closely related to those for the total indexes: foods were up in all three cities where total indexes increased and down in the seven other regional cities—total indexes were down in six of these seven cities. Other commodities and services indexes increased in nine of the ten regional cities while the shelter, clothing and household operation indexes showed more varied movements.

In foods, lower prices were reported in most regional cities for eggs, potatoes, coffee, sugar, oranges and imported fresh vegetables. Beef prices were up in all cities while most pork cuts were generally higher. In household operation, domestic fuel oil prices were lower in the six eastern cities and Vancouver, with coal prices down in Montreal and Vancouver. Telephone rates were up in St. John's and Edmonton. In other commodities and services, automobile insurance rates were up substantially in most regional cities. Men's haircuts, women's hairdressing and theatre admissions increased in a number of cities while local transportation rates in Edmonton advanced sharply.

Regional consumer price index point changes between April and May were as follows: Halifax -0.8 to 122.7; Montreal -0.4 to 125.2; Ottawa -0.2 to 125.5; Saint John -0.1 to 125.3; Toronto -0.1 to 128.8; Vancouver -0.1 to 125.7; St. John's +0.4 to 112.3‡; Edmonton-Calgary +0.4 to 121.7; Saskatoon-Regina +0.2 to 121.9. Winnipeg remained unchanged at 123.3.

## Wholesale Price Index, May 1958

Canada's general wholesale price index (1935-39=100) rose slightly in May to 228.1 from 227.9 in April, an increase in animal products outweighing declines in the other groups. The index stood at 228.0 in May last year.

Animal products index rose 2.3 per cent to 259.0 and from 253.1 in April, due mainly to higher prices for livestock, meats, poultry and leather. This is the sixth consecutive rise in this index, making an increase of 13 per cent since November last.

Textile products index decreased 1 per cent to 228.1 from 230.5 a month earlier, due to lower prices for both domestic and imported raw wool and raw cotton. Seasonal declines in prices for potatoes, onions and fresh fruits contributed largely to a decline of 0.8 per cent in the vegetable products index to 197.0 from 198.6.

Index of farm product prices at terminal markets (1935-39=100) advanced from 222.7 to 223.1 between April and May. The fractional increase was due to the relatively greater weight attached to a 3-per-cent increase in animal products from 279.9 to 288.3 compared with a 4.7-per-cent decline for field products from 165.5 to 157.8.

\*See Table F-1 at back of book.

†See Table F-2 at back of book.

‡On base June 1951=100.

# CONSUMER PRICE INDEX

Index 1949=100

Index 1949=100

The building material prices indexes (1949=100) were down slightly on balance between April and May. The residential building materials index moved down from 126.9 to 126.8 while the non-residential series remained the same at 150.6.

## U.S. Consumer Price Index, May 1958

The United States consumer price index (1947-49=100) rose 0.1 per cent between mid-April and mid-May to 123.6, another record high. Since March 1956, the index has risen in every month but three, and in two of those it remained unchanged.

The latest rise, the smallest since December, was the result of higher costs for medical service and transportation. Food prices held steady.

The index in mid-April was 123.5 and in mid-May last year, 119.6.

## U.K. Index of Retail Prices, April 1958

The United Kingdom index of retail prices (Jan. 17, 1956=100) climbed almost a full point, from 108.4 to 109.6, between mid-March and mid-April. It was the second consecutive rise since the half-point drop between mid-January and mid-February. In mid-April 1957 it was 104.5.

## STRIKES AND LOCKOUTS

### May 1958

During May, 33 work stoppages were in progress, resulting in an estimated time loss of a little more than 71,000 man-days. This was approximately 50,000 fewer man-days

than the time loss resulting from the 32 stoppages recorded during the preceding month.\*

\*Table G-1 at the back of this issue compares, on a monthly basis, the number of strikes and lockouts in existence during 1958 and 1957. The approximate number of workers involved and the time loss resulting are also compared on a monthly basis and the number of strikes and lockouts beginning during each month is indicated.

Table G-2 deals more specifically with the stoppages involving 100 or more workers in existence during May 1958. The approximate time loss, together with the number of workers involved, is indicated for each stoppage. The major issues and the major terms of settlement, if the stoppage has ended, are also mentioned. Other details include such information as the dates on which the stoppages began and ended and the industries in which they occurred.

This substantial decrease in time loss can be attributed largely to the termination, at the end of April, of a dispute involving 3,000 workers in the construction industry in British Columbia. More than one quarter the total time loss during May was caused by another dispute involving 1,000 construction workers in the same province.

Of the 33 work stoppages during May, 16 involved 100 or more workers; four of the 16 started prior to May and these four stoppages were still in progress at the end of the month. Seven of the 12 larger stoppages which started during May were still in progress at the end of the month.

On an industry basis, the highest time loss—more than 28,000 man-days—was recorded in construction. Approximately three quarters of this time loss was caused by the dispute involving 1,000 workers employed in that industry in British Columbia. Manufacturing had the highest number of work stoppages, and more than one quarter of the time loss recorded in that industry was caused by the work-stoppage involving workers of a clothing firm in Montreal.

Among Canada's provinces British Columbia showed the highest time loss for the month because of the dispute involving construction workers; in fact, this dispute accounted for approximately two thirds of the total time loss in the province. However, the time loss in British Columbia was down by more than one half from April.

In May, as in the preceding month, Ontario had the largest number of work stoppages, but many of these involved fewer than one hundred workers and caused a relatively small time loss.

Work stoppages were also reported from Nova Scotia, Quebec, Alberta and Saskatchewan, and one dispute involved the Canadian Pacific Railways. In this dispute, the Brotherhood of Locomotive Firemen and Enginemen issued a strike call to its members and picket lines were set up at various points across the country. The company reported that its operations had remained largely unaffected and virtually no working time had been lost during the pay period in which the dispute occurred.

## Publications Recently Received in Department of Labour Library

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the *LABOUR GAZETTE*. List No. 119

### Aged

1. MICHIGAN. UNIVERSITY. CONFERENCE ON AGING, 1952. *Housing the Aging*; edited by Wilma Donahue, with a foreword by Everett J. Soop. Ann Arbor, University of Michigan Press, 1954. Pp. 280.

This book "considers the housing needs of healthy, chronically ill, and infirm older people living in urban and rural areas. The question is discussed from the point of view of the private and the public builder, the financier, the social planner, the physician, and of older people themselves. Among the topics included in this book are architectural designs and costs, methods of financing, hygiene and safety standards, social and economic aspects of housing, and living arrangements and needed auxiliary services."

2. MICHIGAN. UNIVERSITY. CONFERENCE ON AGING, 1955. *The New Frontiers of Aging*, edited by Wilma Donahue and Clark Tibbitts. Ann Arbor, University of Michigan Press, 1957. Pp. 209.

Partial Contents: Automation predicts Change: 1. For the Older Worker, by Warner Bloomberg, Jr.; 2. For the Employment of the Aging, by James Stern. Income and Employment: Basic Facts, by Peter O. Steiner. Employment Outlooks for Older Workers, by Seymour L. Wolfbein. Aging and Rural Life, by Walter C. McKain, Jr. The Older Generation and the Family, by Ernest W. Burgess. Personal and Social Adjustment in Retirement, by Gordon F. Streib and Wayne E. Thompson.

### Annual Reports

3. ALBERTA. BOARD OF INDUSTRIAL RELATIONS. *Bulletin on the Board's Activities, January 1st to December 31st, 1957*. Edmonton, 1958. Pp. 98.

4. AUSTRALIA. PUBLIC SERVICE BOARD. *Thirty-third Report on the Public Service of the Commonwealth, 1956-1957*. Canberra, Government Printer, 1957. Pp. 27.

5. BRITISH COLUMBIA. DEPARTMENT OF LABOUR. *Annual Report for the Year ended December 31st, 1957*. Victoria, Queen's Printer, 1958. Pp. 35.

6. BRITISH COLUMBIA. WORKMEN'S COMPENSATION BOARD. *Forty-First Annual Report, Year ended December 31st, 1957*. Victoria, Queen's Printer, 1958. Pp. 42.

7. GREAT BRITAIN. NATIONAL ASSISTANCE BOARD. *Report for the Year ended 31st December, 1956*. London, H.M.S.O., 1957. Pp. 54.

8. INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT. *Twelfth Annual Report, 1956-1957*. Washington, 1957. Pp. 66.

9. MANITOBA. DEPARTMENT OF LABOUR. *Annual Report for the Fiscal Year ending March 31, 1957*. Winnipeg, Queen's Printer, 1958? Pp. 78.

10. MANITOBA. WORKMEN'S COMPENSATION BOARD. *Report for 1957*. Winnipeg, 1958. Pp. 31.

11. NOVA SCOTIA. WORKMEN'S COMPENSATION BOARD. *Report for 1957*. Halifax, Queen's Printer, 1958. Pp. 28.

12. SASKATCHEWAN. WORKMEN'S COMPENSATION BOARD. *Twenty-Eighth Annual Report for the Calendar Year 1957*. Regina, Queen's Printer, 1958. Pp. 24.

13. U.S. PRESIDENT, 1953- (EISENHOWER). *Economic Report of the President transmitted to the Congress, January 20, 1958*. Washington, G.P.O., 1958. Pp. 199.

## Automation

14. BECKER, ESTHER R. *The Office in Transition; meeting the Problems of Automation*, by Esther R. Becker and Eugene F. Murphy. 1st ed. New York, Harper, 1957. Pp. 190.

Partial Contents: The Meaning of Office Automation. Three Approaches to Automation: The Punch Card. The Computers. Integrated Data Processing. Standardizing Work Methods. Designing and controlling Forms. Preparing People for Mechanization. The Future of White Collar Unionization.

15. WALKER, CHARLES RUMFORD. *Toward the Automatic Factory; a Case Study of Men and Machines*. New Haven, Yale University Press, 1957. Pp. 232.

A study of the effect of automation on thirty men in a semi-automatic seamless pipe mill.

## Efficiency, Industrial

16. MORROW, ROBERT LEE. *Motion Economy and Work Measurement*. 2d ed. of Time Study and Motion Economy. New York, Ronald Press Co., 1957. Pp. 468.

Partial Contents: Flow Process Charts and Flow Diagrams. Analysis of Office Methods. Micromotion Study and Equipment. Filming the Operation and Film Analysis. Fatigue in Industry. Training Time Study Personnel. Union-Management Cooperation. Automatic Machine Studies and Work Assignments.

17. PATTON, JOHN A. *Job Evaluation: Text and Cases*, by John A. Patton and C. L. Littlefield. Rev. ed. Homewood, Ill., R. D. Irwin, 1957. Pp. 369.

Partial Contents: The Approach to Job Evaluation-planning, organizing, winning acceptance. Relations with Unions. Job Analysis. Job Descriptions and Job Specifications. Evaluating by the Ranking and Predetermined Grading Methods. Evaluating by the Factor Comparison Method. Evaluating by the Point Rating Method. Criteria for Selection of the Rating Method. The Wage Survey. Job Evaluation Problems and Failures. Job Evaluation Administration. Executive Position Evaluation. Merit Rating.

## Employment Management

18. AMERICAN MANAGEMENT ASSOCIATION. *Controlling Employee Benefit and Pension Costs*. New York, 1957. Pp. 127.

Contents: Pt. 1. The Responsibility for Employee Benefit Programs. Pt. 2. Current Approaches to Inflation-Proof Pensions. Pt. 3. The Problem of Health Insurance Costs. Pt. 4. Trends in Workmen's Compensation. Pt. 5. The Role of the Federal Government.

19. U.S. CIVIL SERVICE COMMISSION. *Training the Supervisor; a Guide on How to set up and conduct a Supervisory Training Program*. Washington, G.P.O., 1956. Pp. 126.

Contents: The Why of Supervisory Training. How to start a Supervisory Training Program. How to determine Supervisory Training Needs. How to build Course Content. Selecting Training Methods. How to administer the Program. How to measure Results. How can the Training Man Best do His Job.

## Industrial Relations

20. HUGH-JONES, EDWARD MAURICE, ED. *Human Relations and Modern Management*. Amsterdam, North-Holland Pub. Co., 1958. Pp. 256.

Partial Contents: Human Relations and Fundamental Principles of Management, by J. L. Meiji. The Factory as a Social System, by W. H. Scott. Human Relations on the Shop Floor, by Robert L. Kahn. Organized Labour and Management; Part 1: The United States, by Edwin Young. Organized Labour and Management; Part 2: The United Kingdom, by N. S. Ross. Human Relations in the Board Room, by E. F. L. Brech. Human Relations, Management and Size, by R. W. Revans. The Function of Management, by E. Wight Bakke.

21. MCGILL UNIVERSITY, MONTREAL. INDUSTRIAL RELATIONS CENTRE. *Industrial Relations and Technological Change. Ninth Annual Conference, September 11 and 12, 1957*. Montreal, 1957? Pp. 87.

Contents: Men and Machines, by William Westley. Concepts of Change in the Labour Market, by George P. Shultz. What Price Technology? By Ralph Presgrave. Technological Change, a Problem for Labour, by Eugene Forsey. Technological Change and the Responsibility of Management, by S. M. Gossage.

## Labour Supply

22. ADAMS, LEONARD PALMER. *Workers and Industrial Change; a Case Study of Labor Mobility*, by Leonard P. Adams and Robert L. Aronson. Ithaca, N.Y., Cornell University, c1957. Pp. 209.

A study and analysis of the experience of workers in Auburn, New York, after the shutdown of the International Harvester local plants, the major employer in the area, in 1950.

23. U.S. BUREAU OF EMPLOYMENT SECURITY. *Area Manpower Guidebook; 174 Metropolitan Labor Market Areas; Industrial Characteristics, Employment Trends, Labor Supply*. Washington, G.P.O., 1958. Pp. 348.

Provides the following information: area boundaries, area labor supply classifications, area population and labor force, employment and unemployment data, wages and wage rates, occupational characteristics, labor turnover, listings of major employers, hours and earnings data and data for American territories and possessions.

## Labouring Classes

24. DERBER, MILTON, ED. *Labor and the New Deal*, edited by Milton Derber and Edwin Young. Madison, University of Wisconsin Press, 1957. Pp. 393.

The ten essays in this book attempt to analyze and interpret certain aspects of labor relations and the labor movement during the years of the New Deal and their implications for the present time.

25. GRUNFELD, CYRIL. *Trade Unions and the Individual*. London, Fabian Society, 1957. Pp. 33.

Outlines "... the nature and implications of post-war developments in the law regarding union-member relations".

26. KELLER, EDWARD A. *The Case for Right-to-work Laws; a Defence of Voluntary Unionism*. Chicago, Heritage Foundation, 1956. Pp. 128.

"'Right-to-work' laws seek to protect the right of the worker to join or not join a union by making illegal, as a condition of employment, membership or nonmembership in a union." The author analyzes the reasons underlying "right-to-work" laws.

27. RADDOCK, MAXWELL C. *Portrait of an American Labor Leader, William L. Hutcheson; Saga of the United Brotherhood of Carpenters and Joiners of America, 1881-1954*. 1st ed. New York, American Institute of Social Science, c1955. Pp. 430.

Mr. Hutcheson was president of the United Brotherhood of Carpenters and Joiners of America from 1915 to 1951. This book is a biography of Mr. Hutcheson as well as a history of the union.

28. SYMONDS, JULIEN. *The General Strike; a Historical Portrait*. London, Cresset Press, 1957. Pp. 259.

The General Strike started at midnight on May 3, 1926 and ended at noon on May

12. This book traces the events leading up to the strike, describes the nine days of the strike and briefly outlines what happened afterwards.

29. U.S. BUREAU OF LABOR STATISTICS. *Brief History of the American Labor Movement*. Rev. ed. Washington, G.P.O., 1957. Pp. 85.

This revised edition covers the past 25 years, particularly developments from 1950 (when the first edition appeared) up to 1957.

## Management

30. ABBOTT, CHARLES CORTEZ. *The Executive Function and its Compensation*. Prepared in the University of Virginia Graduate School of Business Administration, by Charles C. Abbott, J. D. Forbes and Lorin A. Thompson for General Dynamics Corporation. New York? General Dynamics Corporation? 1958. Pp. 55.

Partial Contents: Functions of the Business Executive. The Executive and the Company. Types of Executive Compensation. Implementing Compensation Policy.

31. LAIRD, DONALD ANDERSON. *The Techniques of delegating; How to get Things done Through Others*, by Donald A. Laird and Eleanor C. Laird. 1st ed. New York, McGraw-Hill, 1957. Pp. 195.

"It is the aim of this book to point out ways to get caught up, and stay caught up, by working through others."

32. WHYTE, WILLIAM HOLLINGSWORTH. *The Organization Man*. New York. Simon and Schuster, 1956. Pp. 429.

The author writes about people who work for and belong to The Organization. He points out the conflict between individuality and the group life.

## Wages and Hours

33. TURNER, H. A. *Wage Policy Abroad: and Conclusions for Britain*. London, Fabian Society, 1957. Pp. 36.

This book is concerned with countries where a form of systematic wage regulation has been in operation for some time. The countries studied are the U.S., Holland, Norway, Sweden, Australia, New Zealand, Russia, Yugoslavia, France and Italy.

34. U.S. CONGRESS. HOUSE. COMMITTEE ON EDUCATION AND LABOR. *Amendment to increase the Minimum Wage. Hearings before the Committee on Education and Labor, House of Representatives, Eighty-Fourth Congress, First Session, or Proposed Legislation to increase the Minimum Wage...* Washington, G.P.O., 1955. Pp. 1197.

Hearings held June 1-30, 1955. The Committee examined the matter of raising the minimum wage to \$1.25.

## Miscellaneous

35. ANDERSON, ROGER V. *The Future of Canada's Export Trade*. Ottawa, Queen's Printer, 1957. Pp. 338. A study prepared for the Royal Commission on Canada's Economic Prospects.

Partial Contents: Exports in the Canadian Economy. Determinants of Canada's Exports. The Future of the World Trading Environment. Conclusions: Exports in 1980. The Outlook for Exports by Commodity.

36. HERZBERG, FREDERICK. *Job Attitudes: Review of Research and Opinion*, by Frederick Herzberg, and others, Pittsburgh, Psychological Service of Pittsburgh, 1957. Pp. 279.

Contents: The Prevalence of Job Dissatisfaction. Characteristic of Dissatisfied Workers. Factors related to Job Attitudes. Effects of Job Attitudes. Social Aspects of the Job. Supervision and Job Attitudes. Vocational Selection and Job Attitudes. Mental Health in Industry.

37. INSTITUTE OF PUBLIC ADMINISTRATION OF CANADA. *Proceedings of the Eighth Annual Conference, Victoria, B.C. and University of British Columbia, Vancouver, September 5-8, 1956*. Ed. by Philip T. Clark and F. J. McGilly. Toronto, Distributed for the Institute... by the University of Toronto Press 1957? Pp. 343.

Partial Contents: The Federal-Provincial Health Program, by G. D. W. Cameron. Provincial Hospital Insurance Plans, by M. G. Taylor. Canada's Responsibility in World Wealth, by Brock Chisholm. Staff Organization and Work Procedures, by C. James Gardner. Executive Development, by R. O. MacFarlane. Scope of Government Enterprises, by J. Harvey Perry. Administrative and Constitutional Problems peculiar to Crown Corporations, by Thomas H. McLeod. Utilization of Human Resources, by J. P. Francis. Administrative Research in Government, by William F. Veitch. Dominion Bureau of Statistics, by Herbert Marshall.

38. JOSEPHS, RAY. *How to gain an Extra Hour Every Day*. 1st ed. New York, Dutton, 1955. Pp. 192.

"The purpose of this book has been to show... how many of America's busiest people have learned to save minutes doing the things we all must do in order to gain time to do the things we'd like to do."

39. McWHINNEY, EDWARD. *Judicial Review in the English-Speaking World*. Toronto, University of Toronto Press, 1956. Pp. 201.

A comparative analysis of the constitutions of Great Britain, Canada, Australia, South Africa, India, Ceylon, Pakistan, Ireland and the United States.

40. MILNE, ALASTAIR M. *The Obligation to Carry; an Examination of the Development of the Obligations owed to the Public by British Railways*, by Alastair M. Milne

and Austen Laing. London, Institute of Transport, 1956. Pp. 129.

The obligations of the railways refer to the particular duties which the British railways have assumed in providing transport facilities for passengers and goods. This book explains why the obligations developed as they did and seeks to determine to what extent the performance of these duties remain a responsibility of British railways.

41. MOORE, ROBERT E. *Automation in Business Communication; How to write Reports and Memoranda that communicate your Information, Ideas, or Instructions Successfully and Automatically*. New London, Conn., Vision, inc., 1957. Pp. 146.

42. SUPER, DONALD EDWIN. *The Psychology of Careers; an Introduction to Vocational Development*. 1st ed. New York, Harper, 1957. Pp. 362.

The author examines the factors that determine success and satisfaction in the work which an individual does.

43. UNITED NATIONS. ECONOMIC COMMISSION FOR ASIA AND THE FAR EAST. *Credit Problems of Small Farmers in Asia and the Far East*. Study prepared by the ECAFE/FAO Agriculture Division. Bangkok, 1957. Pp. 33.

44. UNITED NATIONS. SECRETARY-GENERAL, 1953- (HAMMARSDJÖLD). *Legal Status of Married Women (Reports submitted by the Secretary-General)*. New York, Commission on the Status of Women, United Nations, 1958. Pp. 103.

Some of the topics dealt with are nationality, domicile and residence, parental rights and duties, property rights, inheritance rights, general capacity to sue and contract, and right to engage in independent work.

45. UPJOHN INSTITUTE FOR COMMUNITY RESEARCH. *Government and the Unemployed, the Summaries of two Books: McKean, Eugene C., and Harold C. Taylor. Public Works and Employment from the Local Government Point of View, Chicago: Public Administration Service, 1955; Bennett, Samuel V. Unemployment and Relief from the Local Government Point of View. Chicago: Public Administration Service, 1955. Chicago, Public Administration Service, 1958. Pp. 51.*

46. WILENSKY, HAROLD L. *Industrial Society and Social Welfare; the Impact of Industrialization on the Supply and Organization of Social Welfare Services in the United States*, by Harold L. Wilensky and Charles N. Lebeaux. New York, Russell Sage Foundation, 1958. Pp. 401.

Contents: Pt. 1. The Development of Urban-Industrial Society and the Emergence of Social Problems. Pt. 2. Social Problems and the Supply of Welfare Services in the United States. Pt. 3. The Organization of Welfare Services in the United States.

Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage-earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners of the co-operative firms.

## D—National Employment Service Statistics

Tables D-1 to D-5 are based on regular statistical reports from local offices of the National Employment Service. These statistics are compiled from two different reporting forms, UIC 751: statistical report on employment operations by industry, and UIC 757: inventory of registrations and vacancies by occupation. The data on applicants and vacancies in these two reporting forms are not identical.

(a) The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of importance. Information as to a strike involving a small number of employees for a short period of time is frequently not received until some time after its commencement.

(b) Strikes unconcluded at the end of the previous year are included in these totals.

**TABLE G-2.—STRIKES AND LOCKOUTS MAY 1958, INVOLVING 100 OR MORE WORKERS**

(Preliminary, Subject to revision)

### “CANADIAN OCCUPATIONS” SERIES

This Series is prepared by the Economics and Research Branch of the Department of Labour to help young people choose a career, and as an aid to those engaged in vocational guidance work. Each booklet covers an occupation or occupational field, outlining the kind of work done, the preparation and training needed, how to enter the occupation, career opportunities and employment outlook.

All monographs in the “Canadian Occupations” series are priced at 10 cents per copy, with the exception of *Careers in Natural Science and Engineering*, which is 25 cents. A discount of 25 per cent is allowed on quantities of 100 or more of the same title.

Send remittance by cheque or money order, made payable to the Receiver General of Canada, to The Queen’s Printer, Ottawa, Canada.

School guidance counsellors should inquire from their provincial Department of Education for supplies.

#### FILMSTRIPS

\*The Department of Labour, in collaboration with the National Film Board, has prepared a number of occupational filmstrips based on titles in the “Canadian Occupations” series. Titles covered to date are indicated by an asterisk. Monographs 20-35 have been covered in two filmstrips, entitled *Careers in Natural Science* and *Careers in the Engineering Profession*.

Filmstrips are priced at \$1.50 each and may be purchased from the National Film Board, Box 6100, Montreal.

# OTHER PUBLICATIONS OF THE DEPARTMENT OF LABOUR, OTTAWA, OF INTEREST TO GUIDANCE COUNSELLORS

OBTAINABLE FROM THE QUEEN'S PRINTER, OTTAWA, EXCEPT WHERE INDICATED

## **Requirements for Professional Personnel 1956-58, 44 pp., Eng. 35 cents.**

A survey made in 1956 of industry, universities and federal and provincial governments to ascertain their expected requirements for professional workers during the next three years.

## **Skilled and Professional Manpower in Canada 1945-1965, 106 pp., English and French \$2.00**

A report drawn up at the request of the Royal Commission on Canada's Economic Prospects by the Economics and Research Branch. The report gives an estimate of future manpower requirements based on trends established in the period 1945-1956, and on the expected future development of the economy.

## **Apprenticeship in Canada (1953), 83 pp., English and French. 15 cents.**

Historical background of apprenticeship in Canada including an account of the conditions of apprenticeship in trades designated by provinces, in selected private industry, and in the armed forces.

## **The Quebec Answer to the Problem of Ap- prenticeship (1956), 38 pp., English and French. 25 cents.**

## **A Modern Concept of Apprenticeship, Alberta (1957), 31 pp., English and French. 25 cents.**

## **Canadian Vocational Correspondence Courses (1955), 24 pp., English and French. Free.**

A list of 123 correspondence courses, available at nominal cost, in a wide variety of vocational subjects.

## **Women at Work in Canada (1957), 60 pp., English and French. 25 cents.**

Includes statistics of the female labour force by age, marital status and occupation; earnings and legislation concerning women at work.

## **Married Women Working for Pay in Eight Canadian Cities (1957), 80 pp., English and French. 25 cents.**

An analysis of information resulting from a survey of married women working for pay, carried out in the winter of 1955-56.

## **Working and Living Conditions in Canada (Annually), 40 pp., English and French. 10 cents.**

Prepared primarily to give prospective immigrants information about life in Canada.

## **Provincial Labour Standards (Annually), 22 pp., English and French. 25 cents.**

Sets out the standards in effect for compulsory school attendance and minimum age for employment, public holidays, etc.; the requirements of equal pay and fair employment practices laws, minimum wages and maximum hours of work.

## **Training and Recruitment of Skilled Trades- men in Selected Industries in Canada, 1951-1956 (1957), 32 pp., English. 25 cents.**

A statistical report on the extent of training in selected industries. Does not deal with nature of training programs, occupations covered, length of training, etc.

## **"Professional Manpower Bulletin Series"**

## **No. 1—Trends in Professional Manpower Supplies and Requirements (1957), 30 pp., English and French. 25 cents.**

## **Wage Rates and Hours of Labour in Canada (Annually), 275 pp., bilingual. \$1.00.**

Provides statistical information on average wage rates and the predominant range of rates by occupation, industry, region or city as well as index numbers of average wage rates by industry, including a general index for all industries.

## **Labour Organization in Canada (Annually), 120 pp., English and French. 25 cents.**

Presents statistical information on labour organization and incorporates a directory of such organizations, showing membership affiliations, names and addresses of officials and names of official publications.

## **Research Program on the Training of Skilled Manpower, English and French., No. 1— Progress Report, 1957, 25 No. 2—Tech- nological Changes and Skilled Man- power: Electrical and Electronic In- dustry, Heavy Machinery Industry, 23 Free.**

Economics and Research Branch Department of Labour. Free.

## **Seasonal Unemployment in Canada (1954), 51 pp., English and French.**

An analysis of seasonal variations in employment and on methods developed for the reduction of such variations, in 18 seasonal industries in Canada.

Economics and Research Branch Department of Labour. Free.

## **The Labour Gazette (Monthly), English and French. \$2.00 per year (Canada) 25 cents per copy (Canada).**

The official journal of the Department of Labour of Canada contains items and articles of current interest on a wide variety of subjects in the labour field.

Library, Department of Labour, Ottawa.

This Library has the most complete collection in Canada of publications in the field of labour and employment. Books are available on loan, to the general public; students are required to borrow through their school librarian. The Labour Library will supply a bibliography on any specific problem or area of interest in the field of labour.

## manpower and labour relations REVIEW

Economics and Research Branch, Department of Labour, Canada

### Current Manpower Situation

LABOUR requirements increased rather more than seasonally in July. Employment rose by 140,000, bringing the total to 5,934,000 at mid-month. This increase—as in four of the past five months—was better than average. By July the underlying employment trend was between 1 and 2 per cent above its low point in February.

Although total employment was still a little below last year's level, non-farm employment was slightly higher. Since spring the main sources of strength have been construction (chiefly residential, highway and institutional), forestry (which staged a partial recovery from a poor winter and spring) and the steady expansion of the trade, finance and service industries. In manufacturing, employment in July was down 3.5 per cent from a year ago and there has been little evidence of an early recovery. The increase in housing and highway construction has stimulated the manufacture of plumbing fixtures, heating equipment, lumber and other building supplies, but new orders in heavy electrical apparatus, machinery, pipe and structural steel have been slow and layoffs in these firms frequent. Automobile and parts manufacturers closed down in July and it is unlikely that production of new models will start before September.

The total labour supply continued to expand more slowly than last year. Since last fall, in fact, changes in the labour force have been almost entirely seasonal, the basic level remaining virtually unchanged. In July the labour force was only 1.7 per cent, or 108,000, higher than a year ago, the smallest increase in more than three years.

The number of persons without jobs and seeking work declined by 34,000 during July to 286,000. As in previous months, the decline was of male job seekers; the number of females seeking work showed no significant change. The seeking work figure amounted to 4.6 per cent of the labour force, still considerably higher than in the comparable month of any year in the post-war period.

|          |                |               |                |                |
|----------|----------------|---------------|----------------|----------------|
| <b>A</b> | <b>Monthly</b> | <b>Labour</b> | <b>Gazette</b> | <b>Feature</b> |
|----------|----------------|---------------|----------------|----------------|

Unemployment was higher than last year in all regions. The proportion

of job seekers in the labour force varied from 2 per cent in the Prairie provinces and 3.7 per cent in Ontario to more than 6 per cent in British Columbia, Quebec and the Atlantic provinces. At the beginning of August seasonal farm requirements had eliminated labour surpluses in most agricultural areas, but more than half of all metropolitan, major industrial and minor areas were in the labour surplus categories. Five areas—Windsor, Cornwall, Rouyn-Val d'Or, Central Vancouver Island and St. Stephen—were still in the substantial labour surplus category.

Apart from absolute level, the most significant difference between the unemployment of this year and last lay in duration. This year, of the total still seeking work in July, 38 per cent had done so for more than three months, compared with only 25 per cent last year. Twenty-one per cent had been seeking work for

more than six months, compared with 12 per cent last year.

With respect to employment, one of the more significant developments continues to be the difference between the trends of goods-producing and other industries, and the consequences that this has had for male and female employment. Throughout the past year the main strength in the demand for labour has come from the trade, finance and service industries, all of which have a predominantly female work force. This has been reflected in the labour force estimates. Female employment in July was 57,000 or 4.1 per cent higher than a year ago while male employment was down 72,000 or 1.6 per cent.

This change in the distribution of industrial employment and the corresponding shift in sex distribution is not an entirely new development. The industries producing services have been increasing more rapidly than goods-producing industries since the turn of the century, and particularly in the post-war period; the proportion of females in the labour force has shown a corresponding gain. Seldom, however, has the shift been as marked as in the past year.

The increase in job opportunities for female workers has chiefly benefited married women in the middle age groups (20-64). Employment estimates were unchanged from a year earlier for females aged 14-19 and were down moderately for single women. Among males, the recession has affected the young and the old most adversely. These points are illustrated in the following table.

*Percentage Changes in the Number of Persons with Jobs,  
by Sex, Marital Status and Age Group,  
July 1957 to July 1958*

|                | Males | Total | Females<br>Married | Single |
|----------------|-------|-------|--------------------|--------|
| All ages ..... | —1.6  | +4.1  | +10.4              | —2.1   |
| 14-19 .....    | —5.9  | —0.4  |                    |        |
| 20-24 .....    | —3.1  | +7.9  |                    |        |
| 25-44 .....    | —0.5  | +2.3  |                    |        |
| 45-64 .....    | —0.5  | +9.0  |                    |        |
| 65+ .....      | —7.3  | —3.3  |                    |        |

## Investment Trends *With Particular Reference to Construction*

The capital investment program has been maintained at a relatively high level during the current business recession. If present plans are carried out, total outlays will be only 2 per cent lower than the record achieved last year. The composition of the program, however, differs considerably from that of the preceding two years. The mid-year investment survey of the Department of Trade and Commerce shows that plans formulated by businessmen indicate a 13 per cent decline in expenditures on new plants and equipment, while housing, institutional and government spending is expected to be 17 per cent higher than last year.

The shift in the pattern of investment has produced many cross-currents in the economy. The decline in business construction has resulted in a sharp drop in machinery and equipment purchases which, in turn, has been partly responsible for production cut-backs in the iron and steel products industries. The upsurge in housing and road building, on the other hand, has stimulated activity in the manufacture of construction supplies and household appliances and furnishings.

While machinery and equipment purchases declined sharply (16 per cent between the first quarter of 1957 and the first quarter of 1958), only part of the impact has fallen on domestic production. It is estimated that more than one-half of the decline has been reflected in a cut-back of imported goods. Nevertheless, domestic production of iron and its products was 19 per cent lower in the first quarter of 1958 than in the first quarter of last year. Smaller capital outlays accounted for much of this drop, although decreases in consumer expenditures on automobiles and other durable goods were also an important factor.

The level of construction employment has been fairly well maintained this year; in July, it was estimated to be 493,000, down less than 2 per cent from a year earlier. The strong recovery in housing can be attributed to the combined effects of easier conditions in the mortgage markets and special government financing. Residential construction was maintained at an exceptionally high rate during the first half of 1958 and provided much of the employment strength throughout this period. The annual rate of starts for the first six months of 1958, after allowing for seasonal factors, was 165,300. This represents a substantial gain over the 122,300 units started last year. Completions showed a similarly sharp increase over the last year; in urban centres they were 26 per cent higher than in the first half of 1957.

Engineering construction has been maintained at a high level, largely because of increased public expenditures by all levels of government. A particularly heavy volume of road and highway construction was undertaken during the first half of the year and prospects are good for a continuation of this trend. Employment in this sector of construction was also bolstered by work on projects which were initiated in previous years. The most important among these were the St. Lawrence Seaway and the Trans-Canada gas pipeline. In the first half of 1958, the value of contracts awarded for engineering types of construction was only 2.6 per cent lower than in the comparable period last year.

Weaknesses in the business sector of construction are centred largely in the commodity-producing industries which provided much of the impetus for expansion in 1956 and 1957. Forestry and the mineral products industries recorded sharp declines in planned investment as domestic and export markets softened at a time when additional capacity created for these products was more than capable of meeting current demands. Outlays for transportation and communication facilities are expected to be somewhat larger than last year, but in trade, finance and commercial services, expenditures are likely to be somewhat lower.

Total construction employment can be expected to show continued strength during the last half of the year, despite signs of weaknesses in certain sectors. Some of the larger construction projects, such as the St. Lawrence Seaway and the major gas lines, are well advanced and prospects are that smaller work crews will be needed, but much of this employment drop will be offset by increased hirings in other types of engineering construction. The over-all strength of the industry will depend to a considerable extent on the rate of housebuilding, which in turn will largely depend on the level of effective demand and the availability of mortgage money.

# Current Labour Statistics

(a) Distribution of these figures between male and female workers can be obtained from *Labour Force*, a monthly publication of the Dominion Bureau of Statistics. See also inside back cover, April issue of *Labour Gazette*.

(b) See inside back cover, April issue of *Labour Gazette*.

(c) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

# Labour-Management Relations

## The Bargaining Scene

Negotiations affecting at least one-third of the workers covered by collective agreements in Canada were in progress during the past month. Of the larger agreements, surveyed from month to month in this article, 84 covering 426,000 workers were open. These involved some major bargaining relationships in the steel, automobile, railway, pulp and paper, B.C. logging, and other industries. Ten settlements were reached in the group of agreements covering 1,000 or more workers.

In the railway negotiations the conciliation board on the non-operating employees contracts reported earlier in the month. It proposed a 4 cents an hour wage increase retroactive to January 1, 1958 plus an increase of 3% in September 1958 together with a further 3% increase in April 1959. The board also proposed a four-week vacation after 35 years service. The contract would be for two years. The unions are meeting to consider these proposals on August 19. All negotiations are listed below.

|                           |                                                                       |                                   |

### Union Membership, January 1, 1958

Preliminary figures are now available for Canadian trade union membership as at January 1, 1958. These figures are shown below and are extracted from more detailed information at present being prepared for the Labour Organization Report 1958.

### CONGRESS AFFILIATION AND UNION MEMBERSHIP

(As reported by International, National and Regional Unions)

|                                                                            | Number of Branches |                 | Membership      |                 |

\*Since last year some formerly unaffiliated railway brotherhoods have become AFL-CIO-CLC affiliates.

# Manpower Situation in Local Areas

## ATLANTIC

EMPLOYMENT in the Atlantic region increased seasonally during July. In the week ending July 19 the number of persons with jobs was estimated at 533,000, about 14,000 more than in the previous month but 22,000 fewer than a year earlier. Agriculture accounted for much of the increase in employment during the month. Non-agricultural employment showed little over-all change, owing to opposing trends in some of the leading industries; increased hirings in construction were largely offset by layoffs in manufacturing, forestry and coal mining.

Construction employment increased in all areas of the region during July, but was still lower than last year. Temporary layoffs and part time were prevalent in coal mining and manufacturing; approximately 6,000 coal miners in the Sydney area were reported to be affected by a 25-day staggered shutdown. Progressive layoffs were reported in certain parts of manufacturing, notably in steel plants. The pulp and paper industry showed some improvement as the mill at Hantsport reopened, but other paper mills in the region continued below capacity.

Unemployment declined fairly sharply during the month in all parts of the region and resulted in the reclassification of 13 of the 21 areas; five moved from the moderate surplus to the balanced category and eight from the substantial surplus to the moderate surplus category. At August 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 1 (0); in moderate surplus, 15 (8); in balance, 5 (13).

## Local Area Developments

**St. John's** (metropolitan). Reclassified from Group 1 to Group 2. The construction industry showed considerable improvement during the month, after registering unusually small increases in employment earlier in the season. Further substantial gains in construction employment can be expected as work commences on some of the larger building projects which are currently in the planning stage. Total employment in the area was virtually the same as a year before.

**Corner Brook** (major industrial). Reclassified from Group 1 to Group 2. Increased construction activity resulted in a fairly sharp drop in unemployment. Logging employment declined as usual. Newsprint production held up fairly well, so that for the first seven months of 1958 it was only slightly lower than last year.

# CLASSIFICATION OF LABOUR MARKET AREAS—AUG. 1, 1958

|                                                                                                                  | SUBSTANTIAL<br>LABOUR<br>SURPLUS           | MODERATE<br>LABOUR<br>SURPLUS                                                                                                                                                                                                                                                                                                                                                                                                                                                     | APPROXIMATE<br>BALANCE                                                                                                                                                                                                                                                                                                                                                                                                    | LABOUR<br>SHORTAGE |

→ The areas shown in capital letters are those that have been reclassified during the month; an arrow indicates the group from which they moved. For an explanation of the classification system used, see inside back cover April issue.

**Halifax** (major industrial). Reclassified from Group 2 to Group 3. Seasonal employment expansion occurred in agriculture, fishing, construction, trade and services. Industrial employment was considerably lower than last year with decreases in virtually all industries. The most noticeable curtailment was in transportation, reflecting unusual slackness on the Halifax waterfront. Construction employment also showed a marked year-to-year decline, though prospects in this industry were fairly bright.

**New Glasgow** (major industrial). Reclassified from Group 1 to Group 2. Progressive layoffs in some of the larger steel plants resulted in manufacturing employment falling below last year's level. Coal mines in the area continued operating on short time. Agriculture and construction were almost entirely responsible for the drop in unemployment during the month.

**Moncton** (major industrial). Reclassified from Group 1 to Group 2. Urban unemployment declined in accordance with the usual seasonal pattern. There was little pickup in activity in the outlying districts, however, owing to a lack of woods employment and a poor run of herring and mackerel.

**Charlottetown, Grand Falls, Kentville and Truro** (major agricultural and minor). Reclassified from Group 2 to Group 3.

**Yarmouth, Bathurst, Campbellton and Newcastle** (minor). Reclassified from Group 1 to Group 2.

## QUEBEC

EMPLOYMENT registered a strong seasonal rise during July in the Quebec region, increasing by some 39,000 over the month to an estimated 1,663,000 at July 19. This figure was about 8,000 higher than a year ago. There was a further narrowing of the year-to-year gap in unemployment, though it still remained very high. The number of persons without jobs and seeking work formed some 6.1 per cent of the labour force, compared to 3.2 per cent a year ago. The level of registrations for work at NES offices, though falling sharply during the month, remained significantly higher than a year ago.

Farm employment wholly accounted for the year-to-year advance in total employment. Inclement weather retarded operations in some parts of the region by as much as two weeks. Nevertheless, the hay, fruit and vegetable harvest resulted in a rise in farm employment that was considerably sharper than in any similar period of the past three years.

The employment increase in non-farm industries, with the exception of construction and the service industries, was only moderate during the month. Forestry employment began declining a week earlier than last year and by the middle of the month there were some 20 per cent fewer men at work in the woods than a year ago. Employment in construction rose, with some shortages of skilled tradesmen developing. Residential building

continued strong; however, the value of contracts awarded for industrial construction during June was well below last year's figure. In manufacturing, extended holidays prevailed at many plants. Employment continued higher than last year in most plants manufacturing food and beverages; it rose seasonally in wood, paper and iron and steel products but remained lower than last year in these industries. The textile industry showed some signs of recovery; and the outlook in many mills was somewhat brighter than in the early part of the year.

Twelve of the 24 labour market areas in the region were reclassified during the month. At August 1, the areas were classified as follows (last year's figures in brackets): in substantial surplus, 1 (0); in moderate surplus, 20 (14); in balance, 3 (10).

### Local Area Developments

**Montreal** (metropolitan). Remained in Group 2. Employment was still moderately lower than last year. Weakness was centred in manufacturing—many plants were closed for extended holiday periods; employment in the services, in transportation and trade was at least on a level with a year ago. Some signs of improvement appeared in the condition of the textile and clothing industry. With activity brisk in residential construction, plants manufacturing furniture, doors and sashes, roofing paper, structural steel and building materials were active.

**Quebec-Levis** (metropolitan). Remained in Group 2. Employment was at last year's level in the area, strength in the service industries and construction offsetting weaknesses in manufacturing. Short time and extended holidays prevailed at textile mills and in clothing factories. Employment rose during the month at saw and planing mills; however, paper mills continued working short time. Housebuilding continued to provide the main stimulus to the construction industry. Activity was brisk in the Levis shipyards.

**Lac St. Jean, Joliette, Shawinigan Falls and Trois Rivières** (major industrial). Reclassified from Group 1 to Group 2. River driving and pulpwood cutting operations were in progress, though at a curtailed rate compared to last year. Construction activity rose during the month, and was particularly strong in the residential sector.

**Rivière du Loup** (major agricultural). Reclassified from Group 1 to Group 3.

**Thetford Mines-Megantic-St. Georges** (major agricultural). Reclassified from Group 1 to Group 2. Employment was considerably higher than last year at the peat bogs in Rivière du Loup. At Thetford Mines, three new asbestos plants were beginning to hire workers.

**Gaspé, Rimouski, Quebec North Shore and Victoriaville** (minor). Reclassified from Group 1 to Group 2.

**Lachute-St. Thérèse, St. Hyacinthe** (minor). Reclassified from Group 2 to Group 3.

### ONTARIO

EMPLOYMENT in Ontario continued to increase during the month. The number of persons with jobs at July 19 was estimated to be 2,161,000, an increase of 38,000 from the previous month, but a decline of 25,000 from the

previous year. Agricultural employment accounted for about 70 per cent of the month-to-month increase and for 80 per cent of the year-to-year decline in total employment. Unemployment decreased slightly during the month, but remained much higher than a year ago.

Activity in the non-agricultural industries continued to increase during the first half of the month, with construction remaining the principal force behind this increase. The seasonally adjusted number of housing units started in urban centres in July, though lower than a month earlier, remained much higher than a year ago. Public and commercial building was increasingly active, particularly in larger cities. The volume of construction boosted production and employment in sawmills and in wood products industries, and accounted for increased output of fabricated and structural steel and of heavy construction machinery. Activity rose in seasonal industries, particularly in canning and food processing and secondary textiles. As a result, total manufacturing employment rose slightly, in spite of the continuing low employment level in the motor vehicle industry.

The tempo of activity slowed down in the second half of the month. Besides extending the holiday period in many cases by another week, practically all employers followed the 1957 pattern in closing down their plants entirely rather than employing replacements or staggering production as they did in 1956. However, as local reports indicate, full resumption of work and, in many cases, new hirings were expected at the beginning of August. This does not apply to the motor vehicle industry, which began closing plants earlier than last year and was not expected to resume operations until some time in September. As a result of early shutdowns, motor vehicle production in July dropped by about 25 per cent from June and from a year earlier; total output during the first seven months of this year was 19 per cent lower than in the same period a year before. Steel production also declined from close to 80 per cent of capacity at the beginning of the month to 69 per cent at the month's end.

Nine of the 34 areas in the region were reclassified during the month, all but one from the moderate surplus to the balanced category. At August 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 2 (1); in moderate surplus, 14 (5); in balance, 18 (28).

## Local Area Developments

**Metropolitan Areas**—Classification remained unchanged: *Hamilton* (Group 2). Employment increased in most industries in spite of the intervening holidays; there was a substantial narrowing of the year-to-year employment gap. The largest increase occurred in construction. The iron and steel industry showed no change. The agricultural implements industry shut down for the summer. *Ottawa-Hull* (Group 3). Employment increased

sharply during the month to exceed last year's level. The increased labour demand came mainly from the construction industry and from agriculture. The demand for farm help was met by workers from Western Canada and the Maritimes. Sawmills were operating at full capacity. Pulp production continued at a reduced level. *Windsor* (Group 1). The substantial labour surplus situation continued. The closing down of motor vehicle plants for extended vacation periods will temporarily add several thousand workers to the labour surplus. Housing starts in June dropped sharply from May, and were fewer than a year ago.—Reclassified from Group 2 to Group 3: *Toronto*. The employment situation showed a noticeable improvement over June, when total industrial employment was slightly below a year earlier. The construction industry accounted for most of the increase in employment. In manufacturing, increased production and new hirings were reported, particularly in the seasonal industries. The primary steel industry showed no improvement, but production of fabricated iron and steel and sheet metal increased.

**Guelph, Timmins-Kirkland Lake** (major industrial) were reclassified from Group 2 to Group 3.

**Peterborough** (major industrial) was reclassified from Group 1 to Group 2.

**Brampton, North Bay, St. Thomas, Simcoe and Woodstock-Ingersoll** (minor) were reclassified from Group 2 to Group 3.

## PRAIRIE

EMPLOYMENT continued to rise in the Prairie region during the month. The number of persons with jobs at July 19 was estimated at 1,084,000, an increase of some 39,000 from the month earlier and some 31,000 more than a year ago. Increased farm activity was almost entirely responsible for the gain in employment during the month. Unemployment declined moderately and in July was relatively lower than in other regions; it was, however, much higher than last year.

Non-farm employment, rising only slightly in July, was 6.4 per cent higher than last year. This contrasts markedly with year-to-year declines in other regions. Construction of all types showed

further gains, with residential construction particularly active; in July the number of housing starts was 45 per cent higher than July 1957. Little change took place in manufacturing employment. While employment increased in plants connected with the construction industry, weaknesses continued to characterize the iron and steel and transportation industries.

Employment in trade, finance and service industries was the main support to total industrial employment in the first half of the year. Employment in these groups was, on the average, from 2 to 6 per cent higher than in the

corresponding period of 1957. Construction registered a vigorous recovery; at the beginning of the year employment in this industry was more than 8 per cent lower than a year before but was 5.5 per cent higher in June. On the other hand, manufacturing and transportation employment were respectively 3 and 5 per cent lower during the first six months of this year than last year.

Seven of the 20 labour market areas were reclassified during the month, six from the moderate surplus to the balanced category and one from the substantial to the moderate surplus category. At August 1, the area classification was as follows (last year's figures in brackets): in moderate surplus, 2 (0); in balance, 18 (18); in shortage, 0 (2).

### Local Area Developments

**Calgary** (metropolitan). Remained in Group 3. Total industrial employment was slightly lower in June than a year ago, but rose during the month owing to seasonal increases in construction and manufacturing.

**Edmonton** (metropolitan). Reclassified from Group 2 to Group 3. Total industrial employment at the beginning of June was slightly higher than last year. Unemployment was also considerably greater, owing to a continued influx of workers from other parts of the country. Construction was the most active industry in July; the number of housing units started during the first half of the year was almost three times as high as in the same period last year.

**Winnipeg** (metropolitan). Reclassified from Group 2 to Group 3. Total industrial employment was about 1 per cent lower in June than in the same month a year ago. In July, employment rose as construction activity increased. Manufacturing employment registered seasonal gains, but remained at a lower level than last year.

**Fort William-Port Arthur** (major industrial). Remained in Group 2. At the beginning of June total industrial employment was a little more than 1 per cent lower than last year. In July, construction activity increased moderately; forestry employment, however, remained almost 20 per cent lower than a year earlier.

**Prince Albert, Yorkton** (major agricultural). Reclassified from Group 2 to Group 3.

**Dauphin, Portage La Prairie** (minor). Reclassified from Group 2 to Group 3.

**Dawson Creek** (minor). Reclassified from Group 1 to Group 2.

### PACIFIC

EMPLOYMENT, though hampered by strikes and forest fires, rose by 10,000 during July. This increase, slightly less than the July average of previous years, brought the employment total to 493,000, some 7,000 less than a year earlier. Unemployment, though slightly lower than in June, was still much higher than a year earlier.

Drought and the accompanying fire hazard caused the complete shutdown of logging operations in July, with the resulting layoff of most of the 10,000 loggers in the region. Some 3,000 of these were engaged in fighting fires in

various areas. Demand for lumber continued to strengthen during July and producers in most areas had a sufficient (though by no means a large) supply of sawlogs on hand to support an increasing production rate. Shipments of lumber in the first five months were 7 per cent higher this year than last. There were notable gains in the amounts shipped to the United Kingdom and the United States. Pulp and paper mills, however, were all operating under capacity levels and one plant (at Woodfibre, B.C.) was still shut down owing to poor market conditions. Plywood production was also lower than last year.

There were no significant changes in the mining industry. Employment

in June was down 17 per cent from last year, and surpluses of skilled and unskilled workers were reported in all mining areas. Production and employment were stable at Kitimat and Trail, the two main smelting centres. Shipbuilding and the manufacture of iron and steel products were well below last year's level.

The unsettled labour dispute involving plumbers and pipefitters accounted for most of the 33 per cent year-to-year decline in construction employment. The number of new houses started in July was much higher than last year, offsetting a drop in other types of construction.

Four of the 10 labour market areas were reclassified to the balanced category during the month, but the two largest areas, Vancouver-New Westminster and Victoria, were still in the moderate surplus category. The classification at August 1 was as follows (last year's figures in brackets): in substantial surplus, 1 (0); in moderate surplus, 5 (2); in balance, 4 (8).

### Local Area Developments

**Vancouver-New Westminster** (metropolitan). Reclassified from Group 1 to Group 2. The dispute affecting some plumbers and pipefitters was still unsettled at the beginning of its fourth month, and was holding up work on projects valued at about \$50 million. In saw and planing mills, employment was close to last year's level, but in all other industries it was considerably lower. Registrations at NES offices declined by 19 per cent during July, but were more than 50 per cent higher than a year ago.

**Victoria** (major industrial). Remained in Group 2. In June, employment in the area was down 5 per cent from a year earlier and there appeared to be little over-all change in July. Employment in hotels, restaurants and other service establishments was given a boost by the restoration of steamship service through federal and provincial government action.

**Minor Areas**—Reclassified from Group 2 to Group 3: *Cranbrook, Okanagan Valley, Trail-Nelson* and *Prince Rupert*.—Reclassified from Group 1 to Group 2: *Prince George*.—Remained in Group 1: *Central Vancouver Island*. Labour continued in surplus owing to the closing of logging camps.

# NOTES OF CURRENT INTEREST

## **Federal Vacation Act Comes into Force Oct. 1**

The federal Annual Vacations Act enacted by Parliament last January has been proclaimed to come into force on October 1 this year.

The Act, which affects some 500,000 employees in industries under federal jurisdiction, provides for a one-week vacation with pay after one year of service and two weeks after two years of service.

For the information of employers and unions affected, the Minister of Labour has sent them a copy of the Act and an explanatory memorandum of the principal provisions of the legislation.

### **Regulations Being Prepared**

Regulations to govern procedures under the Act are in course of preparation and, when approved, will be published in the *Canada Gazette*, the Minister's letter announced.

The memorandum listed the industries coming under federal jurisdiction as: those whose operations are interprovincial or international in nature; those that relate to inland and maritime shipping, and certain industries that have been declared to be "for the general advantage of Canada".

Particular industries are, for example: railways; ship, ferry, bus, trucking, telegraph, and telephone service; longshoring; air transport and aerodromes; radio and television broadcasting stations; banks; flour and feed mills; grain elevators; certain mines; and certain federal crown companies.

Employers in these industries are required by the Act to grant vacations with pay of the lengths stated to employees who have completed a year of service within, or partly within, the two-year period preceding October 1, 1958. The Act is thus retroactive in the case of employees whose qualifying year of service began before that date, and who are still in service with the same employer. The Act, of course, also covers employees whose service begins at any time after October 1, 1958.

An exception to the above application of the Act is that when employees are subject to a collective agreement entered into before October 1, 1958 which provides for

vacations with pay conditions that do not meet the standards provided in the Act, such conditions will continue to apply for the duration of the term of the agreement only. However, if an agreement entered into before October 1, 1958 makes no provision for vacations with pay the Act applies immediately it comes into force.

For the purpose of the Act, completed years of service are measured from the date on which an employee starts or started his employment, and from each anniversary day of such date. The initial and anniversary dates also determine the period within which the vacation must be given, i.e., not later than 10 months after the completion of a year of employment.

The rate at which pay for the vacation is computed is 4 per cent of gross wages, salary, or remuneration, including the vacation pay itself, received during the qualifying year for employees entitled to two weeks vacation; and 2 per cent for those entitled to one week of vacation.

An employee who would normally be entitled to two weeks vacation whose employment is terminated before he has completed a given qualifying year is to receive pay at the 4-per-cent rate for the portion of the year completed.

An employee with less than one year but more than 30 days of service whose employment is terminated for any reason is entitled to pay at the 2-per-cent rate for his period of service. Employment that is terminated within 30 days does not carry entitlement to vacation pay.

## **Study Manpower Effects Of Electronic Installation**

A case study of the manpower effects of the installation of an electronic data processing machine in a large insurance company will be undertaken shortly by the Economics and Research Branch of the Department of Labour.

Since similar installations will likely be made in other large offices, the value of this particular study will be in getting advance information on the impact of electronic computers on office occupations.

The proposed study was made known at the recent meeting of the Committee on Technological Change (L.G., July p.710).

## **Appoint Administrator of Strike-bound CPR Ships**

Robert Knowlton Smith, QC, LL.D., former Chairman of the National Harbours Board, was appointed July 25 as administrator of the British Columbia Coastal Steamship Service of the Canadian Pacific Railway Company. The appointment was made under the provisions of the British Columbia Coast Steamship Service Act.

Mr. Smith was charged with the restoration and maintenance of the CPR steamship services which had been suspended since the middle of May by a strike by the Seafarers' International Union. He will remain in charge until the differences between the Company and the Union are settled.

The Act, passed July 24, requires the return to work of all employees on strike and the withdrawal of all strike notices and directions for strike action authorized by unions representing employees on the coastal ships.

The Act requires the Company and the unions to resume negotiations with a view to settlement of their differences. In the event that further negotiations are unsuccessful in bringing about agreement, the Governor-in-Council has been granted authority by the Act to establish procedures for effecting a settlement.

Under the Act the terms of each existing collective agreement will continue to apply to Company and workers until settlement is reached, but are provisionally amended by the Act to increase immediately by 8 per cent each rate of wages established by the agreement.

## **Social Consequences of Automation Analysed**

"In one sense the co-called problem of automation is merely the problem of an increased rate of technological change," says J. R. Gass, industrial research specialist of London, writing in a new *International Social Science Bulletin*, *Social Consequences of Automation*\*.

But, he continues, in addition to the ordinary effects that are common to all forms of displacement of labour by capital equipment, "the pattern of human organization that matches the technical features of automatic production may raise issues peculiar to automatic processes".

These issues are "a second and more or less independent set of social effects, such as those on skills, satisfactions and organiza-

tional forms that are peculiar to a particular form of production technology," the writer says.

Contributors to the bulletin include: Pierre Naville, of the National Scientific Research Centre of Paris, who analyses the effects of automation on the kind of work required of workers, foremen and technicians of all kinds; Paul Einzig, London economist, who deals with the influence of automation on industrial relations; J. D. Diebold, of John Diebold and Associates, of New York, who studies the problems that automation imposes on management; K. Klimenko, of the Academy of Sciences of the USSR, and M. Rakovski, Deputy of the Automation Tools and Equipment Industry of the USSR, who discuss problems involved in automation in a socialist economy; and A. D. Booth, of the University of London, who analyses the principle of the operation of translating machines and discusses their possibilities.

### **International Aspect**

In a second part, David A. Morse, Director-General of the ILO, reviews the international aspect of the problems of automation; while J. R. Gass analyses certain social effects of automation. The bulletin also reproduces a report on the work of a study group of the Carnegie Foundation that examined the basic principles of automation.

## **U.K. Body Suggests Ways To Deal with Automation**

The progress of automation in the United Kingdom and some of the problems arising from it were discussed at a recent meeting of the National Joint Advisory Council, a body through which the U.K. Minister of Labour and National Service consults representatives of employers and employees.

After a review of the action being taken to deal with the problems arising from automation, the meeting declared that automation was not likely to cause serious unemployment if it was not introduced too rapidly, if firms kept redundancies to a minimum, and if a state of full employment was maintained; that the transition to automation would be eased if the trade unions were consulted in advance of each step; that changes in operative skills will also be made more smoothly if they are carefully planned, if provision is made for training on the job, and if the workers are kept informed of developments; and that the most important brake on progress will be the shortage of technicians and managers.

\**International Social Science Bulletin*, Vol. X, No. 1, 1958, a UNESCO publication.

## **Productivity Index Could Assist in Negotiations**

Although admitting that an index of productivity could not be used as the sole criterion in determining wage changes through collective bargaining, such an index, together with the existing consumer price index, could be used as a valuable guide in negotiations.

This is the leading suggestion made by James C. Cameron, Professor of Industrial Relations, and F. J. L. Young, Lecturer in Industrial Relations, Queen's University, in a recently published bulletin, *Productivity and Wages\**.

"The lack of a reliable index of productivity seems to be a dangerous deficiency in the economic armoury of a modern industrial nation," say the authors. But, they admit, productivity is "an elusive concept" that defies accurate measurement.

### **Difficulties Involved**

A large part of the booklet is occupied with a discussion of the difficulties involved in defining and measuring productivity. It is pointed out, however, that in some respects the task of calculating productivity is considerably less complicated when it relates to the productivity of the whole industry of a country than when industries are dealt with individually.

"With the resources at their command, the statisticians of the Dominion Bureau of Statistics should be able to construct and maintain the desired index in a far more accurate and up-to-date manner than any private group of researchers. Such calculations have been made in the United States. In Britain there is a realization of the need for the same type of measurements," the bulletin says.

While arguing for the usefulness of an index of productivity, the authors reject the idea of attempting to establish a rigid relationship between wages and productivity. They also reject the theory that consumer demand and employment should be stimulated, during a recession, through higher wages; this theory, they say, is based on a misinterpretation of Keynesian theory.

Regarding their suggestion that an index of productivity, if available and if used with intelligence and sincerity, could be of value in the negotiation of wage changes, the writers say:

"Undoubtedly there will be those who scoff at the writers' approach. It is incumbent on these individuals to provide an

alternative solution... Those who object to the writers' approach on the ground that it curtails their freedom of action need to examine the validity of their position. More than that, this latter group, in *both management and labour*, should give further consideration to the ultimate effect of continued inflation.

"Powerful groups may now be able to maintain or improve their real income despite the eroding influence of higher money wages not offset by commensurate improvements in productivity. The eventual result of these advances in real income 'subsidized through inflation' by the less well organized sections of the community could well be demands for the regulation of the powerful. This could spell the death knell of wage settlements now reached through collective bargaining. It could result in a system of compulsory arbitration similar to that practised in Australia. If that occurred, both parties at the bargaining table would lose much of the freedom of action that they now cherish."

The authors think it questionable whether that situation will arise, pointing out that the current interest in productivity is in itself a good sign, revealing a "growing, albeit non too clear, awareness that a problem exists... Forward thinking men on both sides of the bargaining table recognize the need for a new approach to the relationship of wages to productivity."

## **Pay Boosts in New York Average 11 Cents in 1957**

An average of 11 cents an hour provided by 1,341 collective agreements, affecting 955,000 workers, reached in New York State in 1957 compares with an average increase of 10.4 cents in 1956, the state's Department of Labor reports. In each of the two years the 3 per cent of the agreements that gave no increase were included in reckoning the averages (medians) given above.

### **Long-Term Agreements**

Two thirds of the agreements signed or reopened in the two years were for periods of more than one year, compared with 60 per cent in 1955. About 42 per cent of the longer-term agreements reached in 1957 provided for both immediate and deferred increases. In 1956 the corresponding percentage was 37. About two thirds of the contracts reached in 1957 contained changes in fringe benefits.

For the sake of comparison the Department showed that during 1956 the United States consumer price index rose from 114.6 to 117.7, while in 1957 it rose from 118.2 to 121.1.

\*Bulletin No. 16 of the Department of Industrial Relations, Queen's University, Kingston, Ontario.

## **Canadian UAW Produces Plan for Full Employment**

A huge program of public works and the calling of a conference, in which industry, labour, agriculture, consumers and government would be represented, to "draft a practical worksheet for full employment and full production" is urged in a "program for full employment" prepared by a council of Canadian members of the United Automobile Workers.

A greatly expanded international program of economic aid and trade is also advocated.

The program has been published in a booklet entitled "The Aim—Prosperity For All".

"Sufficient buying power, in the hands of those who will spend it, is and always has been the key to Canadian prosperity," the union believes.

The first item on the list of public works advocated by the UAW is the stepping-up of "the tempo of housing construction by many thousands of additional new homes each year until every family is adequately housed."

Secondly, federal aid is urged to help the provinces and the local authorities to launch a program of school construction, to increase teachers' salaries, to develop health services for children of school age, to provide hot meals for school children, and to provide funds to enable qualified students who would otherwise be unable to do so to go to university.

Thirdly, it is proposed that the hospital insurance plan be expedited, and "followed by enactment of the complete national health insurance program that has been so long promised and so long delayed. The program should provide complete hospital, medical, dental, optical and other health care for every man, woman and child in Canada regardless of income."

We also need to build thousands of new hospitals and health centres, the union says.

The booklet also urges a program of highway construction, construction of parking facilities, and expansion of dock works in the ports on the Great Lakes.

Other measures advocated include further legislation against discrimination in hiring labour based on the grounds of race or colour, "the establishment of a federal farm program that will provide full equity to working farmers," increased unemployment insurance benefits and increased pensions for the old and disabled, lower income taxes and higher taxes on corporations and wealthy families, and "a planned immigration policy...co-ordinated with a planned program for full employment".

## **Marked Rise in Wages in Manufacturing since 1945**

Since 1945, the percentage rise in hourly and weekly wages in manufacturing in Canada has been particularly marked, and notably so in the production of non-durable goods, the Dominion Bureau of Statistics reports in a *Review of Man-Hours and Hourly Earnings, 1946-1957*.

Above-average expansion in recent years in employment in the relatively highly-paid components of the division, such as oil refining, pulp and paper and printing and publishing, with a levelling in several of the relatively low-pay industries and successive wage increases were important factors in narrowing the percentage differences between earnings in plants producing durable and non-durable manufactured goods.

Large increases in employment in the 13 years were also reported by several industries within the durable goods group, notably by the non-ferrous metal products and electrical apparatus industries; but the earnings in them were closer to the divisional average, so that the higher employment has had less effect on the gain in the group as a whole.

Within the non-durable goods division, hourly earnings in major groups have risen since 1945 by proportions varying from 98 per cent in clothing to 194 per cent in tobacco processing.

In the durable goods division, the range has been from 109 per cent in transportation equipment to 148 per cent in non-ferrous metal products. Because of reduced hours, the percentage gains in average weekly wages has been somewhat less.

Average hours of work have fallen since 1945 in all main industries except construction, which in that year had been adversely affected by wartime shortages of labour and materials. In addition, this industry has enjoyed a particularly marked expansion in recent years, accompanied by much overtime work on many important projects.

Hourly earnings of factory workers in the larger metropolitan areas have shown gains ranging from 104 per cent in Windsor and 106 per cent in both Quebec and Winnipeg, to 142 per cent in London and 157 per cent in Hamilton.

Reductions in the average work week between 1945 and 1957 have varied from 1.7 hours in Toronto and Edmonton to 3.9 hours in Montreal and 5.9 hours in Quebec.

In June 1958 the Government Employees Compensation Branch, Department of Labour, received 1,485 accident claims, 120 more than in June last year.

## **Favours Unionization of White-Collar Workers**

Although white-collar workers have so far remained largely outside the union movement, it is desirable that this rapidly growing class should organize in order to participate, along with the manual workers, in the evolution of our society.

This proposition is advanced in the recently published report of a study on "the growth and structure of the white-collar class" prepared by Jacques Henripin, demographer and professor in the Faculty of Social Science at the University of Montreal. Mr. Henripin undertook the study in co-operation with a team of research workers from the Canadian and Catholic Confederation of Labour.

Among the causes that have kept white-collar workers from joining unions the study mentions two:

1. The isolation of certain categories of white-collar workers in small groups—often the case with employees in offices—makes it hard for them to achieve unity and a sense of power.

2. White-collar workers are often closer to the employers than manual workers, physically and psychologically, which gives them the hope that eventually they will take their place in the ranks of management; or the belief—right or wrong—that they are already part of it, which makes them less independent than other workers in their attitude towards employers.

The study defines white-collar workers as "salaried employees who work neither on the material transformation of products nor on their transport". These include the liberal occupations—i.e., nurses, teachers, professors, librarians, writers, editors and journalists—office workers, insurance agents, brokers, employees in business and communications services. Administrators, managers and highly-skilled technicians are excluded.

The increasingly large number of women among the white-collar workers is another obstacle to getting these workers to join unions, the report points out. Women make up about 47 per cent of the white-collar workers in Canada, the report says. (In 1891 there was not one woman among five white-collar workers, but by 1951 there was one in two.)

Many of the women are young and unmarried, and they are not interested in unionism because they do not expect to remain for long in the labour force, their expectations being set rather on marriage.

The study suggests that it is imperative for the union movement to impress on

these future wives the importance of unions to the life and home they are setting out to establish.

The growth of white-collar workers has been phenomenal, the report says, and it agrees with the Gordon Commission that this growth will continue. In 1891, there were 131,300 white-collar workers in Canada; in 1951 there were 1,177,800. During the 60-year period Canada's active population increased 3.2 times, while the white-collar workers increased nine times.

During the same period the factors by which some of the other main groups of workers increased were as follows: agriculture, 1.1; factory workers, 4.1; construction workers, 3.7; transport workers, 8; personal services, 3.5; manual workers, 2.8.

In 1891 white-collar workers comprised 8 per cent of Canada's active population, and in 1951 they amounted to 21 per cent.

The report attributes this growth to three factors: "the increase in the productivity of machines, development of business and the need for co-ordination."

The study shows that the more highly developed and industrialized an area is, the larger the proportion of white-collar workers. For example, in Montreal 30 per cent, and in Toronto 35 per cent of the salaried workers are white-collar workers, compared with 27 per cent for the whole of Canada.

## **CLC, Office Employees Sign New Agreement**

The Canadian Labour Congress and the union representing its office employees have signed a new collective agreement, effective until November 30, 1959, that provides for wage increases and for a 100-per-cent employer contribution to hospital and medical insurance plans.

Minimum rates were increased \$20 to \$30 monthly for all job classifications; maximum rates, \$15.

The agreement covers employees in the CLC's head office at Ottawa and regional offices in Montreal, Toronto, Vancouver, Regina and Moncton. The 35 employees are represented by Local 225, Office Employees' International Union.

### **Labour Income Rises**

Wages, salaries and supplementary forms of labour income received by Canadians in April were estimated at \$1,261,000,000, an increase of \$28 million (2.3 per cent) over the previous month and \$43 million (3.5 per cent) over April 1957.

For the January-April period the total was \$14,957,000,000; a year earlier it was \$14,825,000,000.

## **Agreement Establishes Employee Training Plan**

An off-the-job training plan, designed to assure qualified employees job openings as they occur, is included in a new contract between the Fisher Flouring Mills Company, Seattle, Wash., and the American Federation of Grain Millers.

Under the program the company first identifies the jobs requiring off-the-job training and establishes a line of succession for such jobs in each department; makes an inventory of employee skills and experience; and determines where additional training is needed.

Training opportunities are then posted, and selections for training are made on the basis of seniority. Management develops and provides courses that employees take on their own time, up to a maximum of three sessions or six hours a week. A joint educational committee settles any differences arising in the program's administration.

## **B.C. Announces New Plan For Vocational Training**

Vocational courses, open to all residents of British Columbia and designed to prepare young men and women for employment in skilled trades and occupations, are being offered by the Technical Branch of the provincial Department of Education and the Apprenticeship and Tradesmen's Qualification Branch of the B.C. Department of Labour.

Training is given for various types of employment in the following trades and occupations: building trades, mechanical trades, electrical and electronic occupations, distributive and business occupations, service occupations, and occupations based on those industries that develop the country's natural resources.

The Departments of Education and Labour, aiming to do all that is possible to equalize the opportunities for all the citizens of the province, intend to see that the most worthy students, regardless of the community in which they live, are provided with an opportunity to take part in any one of the programs offered in the established centres.

Training is offered to the following groups:

Students who have or will have completed their high school education and wish to take short intensive courses in the skilled trades;

Students who have left the regular public and high school educational system prior to graduation and wish to get specialized vocational training;

Those who desire further training for upgrading in their own particular occupations;

Those who due to disability or desire for change from their present occupations wish to rehabilitate themselves in some new line of work;

New Canadians who need to familiarize themselves with local job customs, conditions, methods and requirements before seeking employment.

It is not the intent of the Departments offering these courses to attract students away from regular high school programs.

Under certain circumstances financial assistance can be provided under the federal-provincial agreements for applicants for pre-employment training when the need for such assistance can be proved.

## **France Studying Placing Of Young Workers**

Two studies on problems related to young workers in France are being conducted by the Young People's Employment and Working Conditions Study and Research Centre, set up under the French Department of Labour and Social Welfare in 1955.

The projects, a study of work places, and an inquiry into the placing of young people and checking on the results obtained, are being conducted side by side. Investigations are made on the spot by teams consisting of a physician, vocational guidance counsellor, female social worker and a labour inspector or supervisor.

### **Study of Work Places**

The placing of an adult is a relatively simple operation, since, provided the labour market situation is favourable, it requires only the bringing of a worker with the necessary qualifications into contact with a particular job. Placing a young man under 18 years of age, however, calls for special precautions, particularly if it is his first job.

It should be made sure that the trade which the young person intends to take up is suited to his physical and intellectual capacity, and that it offers chances of success, not only in the immediate but in the more remote future. Thus the studies undertaken by the Centre deal with jobs or positions held or likely to be held more especially by young people.

Summaries of the studies are given out in employment and vocational guidance centres, schools and families.

### **Inquiry into Placing of Young People**

Young people looking for employment in France come under the labour services. In some centres their employment is assured by specialized sections for juvenile labour.

The placing of young applicants for employment, 14 to 18 years of age, depends on the advice of the vocational guidance counsellors and the labour physicians. At a joint meeting, agents vocational guidance counsellors, physician and social worker try to find the job, among those available, which seems to be best suited to the real capacity and the wishes of the young person concerned.

The Centre thought it advisable to ascertain the scientific value of the methods used by the specialized sections by keeping an eye on the placements made and by determining whether the participation of labour physicians and vocational guidance counsellors really does favour the stability of the young person in his job and his adaption to the position which he has been advised to accept.

For this task, the Centre has at its disposal some 50,000 complete files (medical, psychotechnical, social) on young people who came to look for employment during the last five years.

All the information in these files is coded and collected on index cards. A study of these cards makes it possible to gain a better idea of the characteristics of juvenile labour looking for work. It is completed by investigations of a sample of 500 young people placed by the services, by interviews with the young people concerned, their families and their employers.

The Research Centre is also inquiring into and making known the effects of distance between home and job on the state of health of young people.

### **Enough Building Workers To Meet All Demands**

A surplus of construction workers existed in most areas of Canada at the beginning of last month despite the summer activity in the industry, it was stated in the monthly employment summaries by regional offices of the National Employment Service of the Unemployment Insurance Commission.

The surplus on the West Coast was partly the result of the plumbers' strike, which was delaying work on a number of projects.

Skilled sewing machine operators, experienced stenographers and nurses, on the other hand, were in short supply in many centres.

Glove manufacturers at Winnipeg, tent makers and upholsterers at Calgary, and foundation garment firms at Montreal and Quebec were seeking skilled sewing machine operators.

Approximately 260 vacancies for general duty hospital nurses were recorded in

Alberta. In Fort William a shortage of nurses necessitated the closing of a hospital wing. Hospitals in the Quebec region were seeking nurses in the United Kingdom.

Well-qualified stenographers, particularly for legal and insurance concerns, were in demand in the Prairie, Pacific, Quebec and Atlantic regions.

Aircraft plant workers were being recalled in Montreal and Winnipeg but still awaiting recall by an Edmonton aircraft repair plant.

### **First Quarter Imports Decline 13 Per Cent**

Imports into Canada in the first quarter this year declined 13 per cent from the first-quarter total in 1957. The 1958 figure, however, was higher than the value of first-quarter imports for every other year except 1956.

Imports in this year's first quarter were valued at \$1,189,000,000; in last year's first quarter, a record \$1,359,000,000. March imports, at \$426,800,000, were 9 per cent less than in the same month of 1957.

The decline in value was more than accounted for a reduction of almost 15 per cent in the physical volume of imports, partly offset by import prices that averaged about 3 per cent higher than in the first three months of 1957.

### **Lakeshore Union Leader, Matthew Drummond Dies**

Matthew Drummond, one of the founders of the former Lakeshore Labour Council (CCL), died July 27. He was also founder and former president of the New Toronto local of the United Rubber Workers.

The Lakeshore Council later merged with the Toronto Labour Council.

Mr. Drummond was also a member of the New Toronto municipal council for 11 years.

Union representatives of some 100,000 workers at 72 plants of the General Electric Company in the United States have announced that they will demand guaranteed annual wages.

John M. Callahan, Chairman of the G. E. Conference Board of the International Union of Electrical, Radio and Machine Workers, said the demands would be made when the current five-year contract expires October 1.

The union is seeking a guaranteed wage equal to 80 per cent of take-home pay, or 65 per cent of gross pay, whichever is the greater, plus \$2 weekly for each dependent of a laid-off worker.

## **Plan Drive to Organize Workers Along Seaway**

A meeting that a Canadian Labour Congress officer said was "preliminary and exploratory" into the question of overlapping jurisdiction on the St. Lawrence Seaway and another of the participants described as the launching of an all-out organizing drive among Seaway workers was held in Montreal July 9.

The meeting was attended by Canadian and United States officials of the International Brotherhood of Teamsters and the International Longshoremen's Association, and by Executive Vice President William Dodge of the CLC. Also present were observers from the National Maritime Union (AFL-CIO), which has no Canadian members but which has entered a mutual aid pact with the Teamsters and the ILA.

The Montreal meeting came a week after a meeting in Washington at which the ILA, NMU and the Teamsters agreed to the establishment of a permanent "Conference on Transportation Unity" with James R. Hoffa, Teamster President, as temporary chairman.

Other unions with an interest in the organization of Seaway workers were not represented at the Montreal meeting. Although invited, neither Frank Hall, Vice President of the Brotherhood of Railway and Steamship Clerks, nor Hal Banks, Canadian Director of the Seafarers' International Union, attended the meeting.

### **SIU Co-operation Pledged**

It is understood, however, that Mr. Banks had pledged the co-operation of his union, whose members man the greater number of Canadian-owned vessels plying the Great Lakes, in the mutual assistance alliance formed by Teamster President James Hoffa.

The Teamsters were represented by Thomas Flynn, a vice president of the union and chairman of its Eastern Division, and the ILA by Capt. William V. Bradley, President.

Both the Teamsters and the ILA have been expelled from the AFL-CIO but remain affiliates in good standing of the Canadian Labour Congress.

The ILA-Teamsters organizing drive along the Seaway is aimed at an estimated 200,000 unorganized Canadian workers and, later, workers in U.S. Great Lakes ports.

After the Montreal meeting, both the Teamsters and the ILA declared they had no intention of invading the jurisdiction of other unions.

"The CLC will have the final say in any problems of jurisdiction," said Capt. Bradley. "This will be a Canadian opera-

tion," he explained. "The drive will be conducted by Canadian citizens. They will organize Canadian citizens and the union they will belong to will be a Canadian union."

CLC Executive Vice President William Dodge described the meeting as "preliminary and exploratory". He said that firm decisions would be made later at a meeting to be called officially by the Congress, which would probably be open to all unions with memberships whose interests were connected with the Seaway.

These unions, he said, would include the SIU, the Canadian Brotherhood of Railway Employees, the Brotherhood of Railway and Steamship Clerks, the ILA and the Teamsters.

This CLC meeting will probably be convened within 60 days of the close of the Montreal meeting.

### **Washington Meeting**

The alliance established at the Washington meeting was joined a few days later by the SIU. The conference's only action up to press time had been to issue invitations to some 50 unions in the transportation field to attend the next meeting.

Two rejections came almost immediately. Guy L. Brown of the Brotherhood of Locomotive Engineers expressed the belief that the proposed alliance of transportation unions "might become so powerful that it could result in the destruction of the nation". Clarence N. Sayen, President of the Air Line Pilots Association, said he saw no benefits from the plan.

On July 15 AFL-CIO President George Meany prohibited alliances between affiliates of the Federation and the Teamsters. "Any alliance to build up the strength and prestige of unions that have been put outside the Federation for violation of its ethical practices requirements is out," he said.

It will be recalled that 13 affiliates of the Maritime Trades Department, AFL-CIO, earlier this year created a policy committee to co-ordinate an organizing drive among Seaway workers (L.G., May, p. 479).

## **Musicians Guild Tops AFM In Representation Vote**

The Musicians Guild of America, a splinter from the American Federation of Musicians, has won a representation election among film musicians in Hollywood. The vote was 580 for the Guild, 484 for the AFM.

The Federation had represented musicians in the motion picture industry for 30 years. The Guild was organized only last March.

Herman D. Kenin, President since June of the AFM, issued a warning that AFM members who join the Guild would be expelled.

Cecil F. Read, temporary chairman of the Guild, said his organization would seek a union shop contract with the film industry "but would not enforce the union shop for musicians who work in movies occasionally".

## **Items of Labour Interest in House of Commons**

**Thursday, June 19**—*Report of proposed layoffs* of government employees at Citadel Hill, Halifax, will be investigated if particulars of the matter are made available, Hon. Ellen L. Fairclough, Acting Minister of Labour, informs questioner.

**Friday, June 20**—*Base prices* based on the average prices for the previous 10 years established by the Agricultural Stabilization Board in accordance with requirements of the Agricultural Stabilization Act, Agriculture Minister D. M. Harkness advises House.

*Bill to amend Hospital Insurance and Diagnostic Services Act* to authorize federal payments from July 1, 1958 to participating provinces with a plan in operation was read the third time and passed.

*Minister of Mines and Technical Surveys* "not too hopeful" that Government can prevent the shutdown planned by the Dominion Steel and Coal Company due to lack of markets for coal that will make 8,000 or 9,000 miners idle.

**Monday, June 23**—*Negotiations* between Black Ball Ferries, plying between Vancouver and Vancouver Island, come under the jurisdiction of the provincial government, and are being attended to by the provincial labour minister, Hon. Ellen L. Fairclough, Acting Labour Minister, tells questioner.

*Government is awaiting report* of commissioner on the West Coast inquiring into the strike involving the SIU and Canadian Pacific Railway Company ships. The report is expected shortly, Hon. Ellen L. Fairclough, Acting Labour Minister, tells questioner.

*The Government* is not aware that any vessel of the Canadian National Steamships fleet has been sold, Transport Minister informs questioner, nor can the Government give one of these ships to the West Indies in lieu of a new one that is being built at a cost of \$2.5 million, because it would not be suitable for the purpose required. (The Government earlier promised the West Indies Federation a passenger-cargo vessel as a gift).

*Employment will continue* for some months for the extra personnel put to work

at the Halifax Citadel during the winter months in an effort to relieve unemployment in the area, Minister of Northern Affairs and National Resources says in reply to an earlier question.

**Tuesday, June 24**—*Seasonal unemployment insurance* benefits will not be extended further than already is the case, the Prime Minister informs questioner.

*Number of persons registered* for employment at local offices of the Unemployment Insurance Commission on May 29, the date closest to June 1 for which data are available, were: In the province of Quebec, 197,191; in the Montreal area, 68,200; in the Quebec area, 13,002; in Ontario, 185,524; in the Toronto area, 52,846; in the Hamilton area, 15,630, Acting Labour Minister Fairclough tells questioner.

**Thursday, June 26**—*Letter from William Mahoney*, National Director of the United Steelworkers of America (CLC), has been received, Prime Minister tells questioner. It asks for a meeting with the Government to discuss steel prices and policies in Canada. The Prime Minister added that no decision has been reached as yet as to what action shall be followed in this regard "although I am expecting that an opportunity will be given to Mr. Mahoney to make the representations he apparently has in mind. I feel that the representatives of the steel corporations should have the same opportunity at the same time."

**Friday, June 27**—*Financial assistance* will be given by the federal Government, in co-operation with the Government of Nova Scotia, to keep the coal miners in that province employed on a continuing basis this year. Earlier, layoffs had been announced that would have affected 9,000 coal miners. The announcement was made in the House by the Prime Minister.

**Monday, June 30**—*Hospital insurance* agreements have been signed with four provinces, British Columbia, Alberta, Saskatchewan and Manitoba, under the Hospital Insurance and Diagnostic Services Act, Health Minister informs House. The effective date of the four, as was the case with

Newfoundland, is July 1. Signing of the agreements makes it possible for the federal Government to contribute financially to the provincial plans.

*Government commissioner* still hopes he can effect a settlement in the dispute between the Canadian Pacific Steamships and its employees on the West Coast, Acting Labour Minister Fairclough replies to question.

**Wednesday, July 12**—*The Minister of Labour* advised the House that the Government Commissioner of Inquiry, Eric Taylor, had recommended that the shipping dispute on the West Coast involving the CPR, the SIU, the Canadian Merchant Seamen's Guild and the National Association of Marine Engineers be referred to arbitration by an arbitrator appointed by the Minister of Labour for Canada for the purpose of resolving the matters in issue and the making of a decision thereon by August 15, 1958.

*Fishermen became eligible* to receive benefits under the Unemployment Insurance Regulations December 1, 1957, Labour Minister informs questioner, and there have been no changes in that situation since that time.

**Thursday, July 3**—*The Government had already extended* the period for giving seasonal unemployment benefits twice during the year and did not intend to make "any further extensions," Labour Minister tells questioner.

*Invitations sent out* to persons concerned to attend conference on seasonal unemployment, to be held in Ottawa July 14 and 15, Labour Minister informs questioner.

**Friday, July 4**—*Questioned about reports that James Hoffa* of the Teamsters union plans to organize a trade union monopoly of the workers of the St. Lawrence Seaway, the Minister of Transport replied that he had seen the press reports but had no comment to make.

*Representations have been made* for the establishment of an employment office at Waterloo, Que., by the Chief Commissioner of the Unemployment Insurance Commission, and by the Member for Shefford, Minister of Labour announces.

**Wednesday, July 9**—*Amendment to the Returned Soldiers Insurance Act* that would increase the amount of insurance that may be paid to the beneficiary as an annuity in certain cases and to remove restrictions in payment of insurance in the case of pensioners was given second reading.

*Measure to amend the Veterans Insurance Act* so as to increase the amount of insurance that may be paid to a beneficiary

as an annuity in certain cases, to remove restrictions in payment of insurance in the case of pensioners, and to extend the time limit for applications for insurance was given second reading. The Bill calls for extension of the time limit until September 30, 1962, for Korea veterans whose eligibility is due to expire October 31 of this year. It also proposes to extend to the same date eligibility of Second World War veterans who have continued to serve in the regular forces.

**Thursday, July 10**—*The Minister of Labour* had "no comment at all" to make on the new organization of dockers and truckers in Canada formed by the Teamsters and Longshoremen (See page 844).

*Government efforts to effect a settlement* of the West Coast steamship strike by the SIU against the CPR are continuing, the Minister of Labour informed a questioner.

*No provisions in the Unemployment Insurance Act* completely bar a person from accepting supplementary income, the Labour Minister informs questioner. A certain supplementary income is allowed, and benefits are graded accordingly. For example, a person drawing benefits under the Act of \$30 weekly is allowed to earn an additional \$13. A person drawing \$21 is permitted to earn up to \$8.

**Tuesday, July 15**—*Mine provincial Labour Ministers* are attending the conference on seasonal unemployment being held in Ottawa, Labour Minister advises questioner. One Minister could not be present due to illness.

**Wednesday, July 16**—*Number receiving seasonal benefits* on June 28, when seasonal unemployment insurance benefits expired, Minister of Labour informs questioner, was 131,878, distributed as follows: Atlantic region, 24,383; Quebec region, 44,426; Ontario region, 36,970; Prairie region, 12,437; Pacific region, 13,662.

**Thursday, July 17**—*Definite action to end* the stoppage of service of CPR steamships on the West Coast being seriously considered by the Government, Minister of Labour tells questioner.

**Friday, July 18**—*On-the-spot investigation* by the Government of the strike of deck officers and engineers of Black Ball Ferries is being made, Minister of Labour tells questioner.

**Wednesday, July 23**—*Bill to provide for resumption* of the British Columbia coast steamship service operated by the Canadian Pacific Railway Company, including provisions for the appointment of an administrator to carry on all or any part of the said service, given first reading.

# National Winter Employment Conference

Delegates agree that while Government alone cannot solve problem of seasonal employment it should lead the way by providing incentives to create work in winter. Government will implement "feasible" ideas

The federal Government alone cannot solve the perennial problem of seasonal unemployment, delegates to the National Winter Employment Conference, held in Ottawa July 14 and 15, decided. But they almost unanimously declared that the Government should lead the way in providing incentives to create winter work, particularly in the form of cash or its equivalent.

At the close of the conference, Hon. Michael Starr, Minister of Labour, assured the delegates that the ideas put forward would be "very carefully scrutinized by the Government with a view to implementing those that would appear to be most feasible at this time".

The delegates, representatives of industry, business, labour and all levels of government, were welcomed to the conference by Prime Minister Diefenbaker and Labour Minister Michael Starr, who said he hoped that from the deliberations of the delegates would emerge "a result that will have the effect of easing, or at least coming to grips effectively," with the seasonal unemployment problem.

Some of the incentives proposed by the delegates were:

- Further government help through low-cost loans or speedier depreciation for winter construction of houses, factories and office buildings;

- Government studies of ways of offering incentives to business and industry to maintain employment in normally slack periods;

- Federal help for much-needed and costly municipal redevelopment and works programs. This might take the form of loans at lower rates and for longer terms;

- Alteration of unemployment insurance so that it will be an incentive to reduction of seasonal swings;

- Encouragement of secondary industries. This would call for positive Government aid—tariff or otherwise—to manufacturing industries where employment is relatively stable. Some delegates felt that this indirect method offers the most benefit for the Canadian economy, since it would encourage processing of raw materials in Canada.

The delegates also thought that considerably more money should be spent in future on winter work campaigns, both by industry and Government; more aid should be accorded to municipalities for redevelopment

and works projects that they cannot now afford; that governments should give greater consideration to awarding construction contracts earlier in the year to encourage quicker starts and therefore an earlier end to the winter lull; and that consideration should be given to increasing worker mobility.

## Hon. Michael Starr

Hon. Michael Starr, Minister of Labour, who was Chairman of the conference, in his opening address said that recurring seasonal unemployment was one of the most serious and difficult problems of the day.

He said he was made aware of the problem long before he became Minister of Labour; it was brought home to him forcibly through his municipal experience in an industrial town.

The problem of putting men and women to work and keeping them at work is one that interests him greatly as Minister of Labour, Mr. Starr said.

"It is my hope in calling this conference—and I know that the Prime Minister has evinced a keen interest in the outcome—that from your deliberations will come suggestions for practical and positive measures to deal with recurring seasonal unemployment which has been a problem in Canada for many years," he said.

A number of measures, both on a domestic and an international scale, have already been adopted by the Government to maintain buoyancy in the Canadian economy, the Minister continued. "I think there is little doubt, comparing Canada's economic situation now with that which prevails in some other countries, that these measures have been, within the limits of their application, reasonably effective.

"Nevertheless, it is evident that seasonal dislocation will continue to be a problem," he said.

While he did not intend to "direct" the delegates' deliberations, he assumed they would take into consideration factors highlighted in the Report of the Royal Commission on Canada's Economic Prospects and other recent studies, as well as the direction in which our economic development is tending, and the question of whether it contains imbedded within it "factors that might aggravate or worsen the seasonal drag".

## The Prime Minister

Rt. Hon. John G. Diefenbaker, Prime Minister, thanking the delegates for having gathered from every part of the country, said the winter unemployment problem is one that deserved their serious consideration "as it is one that affects all Canadians".

Seasonal unemployment is a serious problem and has been intensifying year by year in recent years. Indeed, generally speaking, the proportion of unemployed each winter is increasing. This is a problem for all of us as distinct from the general problem of unemployment, in respect of which I think I can tell you with optimism that there has been a measure of improvement in the situation. But we must not overlook the fact that in this coming winter, unless action is taken, the situation can become most serious. That is why I welcome this gathering, which I hope will recommend action to be taken well in advance of winter to the end that the problem can be met as far as it is practical...

## Prof. V. W. Bladen

Prof. V. W. Bladen, Chairman of the Department of Political Economy, University of Toronto, was guest speaker at the Conference.

He told the delegates that all he could do was suggest the framework within which an answer to the seasonal unemployment problem should be sought.

"What I have to say is quite simple and by no means original; yet it is important and frequently neglected. Essentially I plead for a recognition of the character of a free enterprise system and the propriety of seeking solutions to seasonal unemployment within the context of that system."

Prof. Bladen noted that in the report prepared by the Department of Labour for the conference it was stated that one of the guiding principles from the outset of the National Winter Work Campaign has been that the problem is basically a business problem. Following from this it has been recognized that business incentives and the profit motive have a proper and necessary place in the program.

"I would be happier if this extract gave 'business incentives' not just a proper place, but the place of honour as the principal means, the only really effective means," he said.

"I would be happier, too, if I found evidence of more than lip service to this idea. In the program of action too much still seems to depend on exhortation."

One useful part of the program of exhortation is that part which draws the attention of business to possibilities of cost reduction that had escaped notice, he went on. If by research such as that carried out by the National Research Council on win-

ter building and by dissemination of the results of such research the cost of winter construction can be reduced, "one can rely on the profit motive to lead to an increase in winter work".

If irrational habits have prevented business from doing work in the winter when it could have been done in that period at less cost, publicity may shake such businessmen out of the rut and into more profitable operation. But I am inclined to be skeptical about the magnitude of these missed opportunities for profit making. Most of the publicity seems to me to be directed at the goodwill and community spirit of the businessmen.

The problem of influencing the buying policy of government departments is different from that of business firms, Prof. Bladen went on. "Intelligent and conscientious administrators in government and universities are anxious to make the limited budget for repairs and maintenance produce a maximum of result. "They will hesitate to risk untried methods which may turn out more costly; this would mean less in the way of amenities for their department.

"Prove that it would cost less to do the work in the winter and they will change. But if it really will cost the same, and means extra inconvenience, then offer an incentive."

As an example of an incentive he suggested that the Cabinet issue an instruction that 10 per cent of the cost of the work done in the winter months be charged against a special fund, and only 90 per cent against the departmental appropriation. "If 10 per cent is not enough, increase the incentive," he advised.

But pointing out that it must be made profitable to change before drastic changes in the timing of works programs will be made is only the first step, Prof. Bladen continued. The cost, and the propriety of incurring such cost, must also be considered.

In a country as wealthy as this the most serious aspect of winter unemployment is not the loss of the goods and services that might have been produced (though we are not so wealthy that this does not matter); the most serious aspect is the effect on the personal distribution of the goods and services that are produced.

To mitigate the personal distress and the consequent social unrest we spend millions of dollars on unemployment benefits and on relief; to remedy the situation it would be worth incurring a considerable cost, he said, adding that only our selected representatives can determine how much.

In estimating the cost of any such measures to the Government one would have to consider the reduction in payments to the unemployed as an offset to any additional outlay incurred under the program. It is more

important, however, to consider the over-all social cost of such measures, and then there appears a reasonable chance that the cost will be negative.

If unemployed resources could be utilized the aggregate net national product would be higher. From this greater product the group who might be employed as a result of the program (who would be unemployed otherwise) would take in wages rather more than twice as much as they would have taken in unemployment benefits and relief from the smaller national product.

One can reasonably assume that the addition to the national product would be of the order of twice the wage bill; so that one would expect that the newly employed would be better off, and that there would remain no less, but rather somewhat more, for the rest of the community.

Even if the increase in the national product resulting from an increase in winter employment were only half as much as the wages paid to those kept employed—a gross underestimate, he said—"there would still be no social cost, and there would be a real gain for the re-employed, a real gain in social justice and in social solidarity," Prof. Bladen pointed out.

In his opinion, the problem was to increase total employment and not just spread it more evenly over the year. He did not believe that the inflationary threat was reduced by reducing the seasonal pressure of scarcities in the summer.

Most employment in Canada is provided by firms operating under the free enterprise system, which works reasonably well as long as competition forces prices down and as long as costs to the businessman are closely related to costs to society. If private and social costs are nearly equal, we should leave things as they are; but if private and social costs diverge, we should seek ways to impose on business, and therefore on consumers, the full social cost, he suggested.

"To allow pollution of the atmosphere in order to avoid the expense of proper combustion is to fail to make the producers so operating meet the whole cost: others bear this cost in the form of discomfort, ill-health, increased cost of cleaning," he said in explanation.

It is the function of government in a free enterprise economy to establish such rules and regulations as will make private and social costs more nearly coincide. This is more difficult, perhaps, when private cost is higher than social cost.

An employer's cost of hiring is the same whether he attracts a worker from another job or from the pool of unemployed; but the social cost differs. In the first case the social cost is the loss of product in the worker's other job; in the second, it is nil.

"How can we change the rules and conditions to change this?" Prof. Bladen asked.

Lower wages in winter would be objected to by those whose work continues in winter. Some form of subsidy to those who increase their winter work would create formidable problems of administration, he pointed out.

Perhaps we are failing to impose the cost of seasonality on those who produce and consume the products of the seasonal industries," he commented.

From incentives he turned to "disincentives". He did not take too seriously the suggestion that unemployment insurance benefits make workers less anxious to find winter work, although he admitted the possibility that rates of benefit sufficient to maintain only a minimum standard of decency in a metropolitan area might in some rural communities be generous enough to become a disincentive to work.

Prof. Bladen closed with the reminder that the problem of winter employment is more serious when general employment conditions are bad. "By all means let us try to reduce the seasonal element but let us remember that the really serious problem is the maintenance of full employment," he said.

### William Dodge

Chief spokesman for organized labour at the conference was William Dodge, Executive Vice President of the Canadian Labour Congress.

The Canadian Labour Congress was not in a position to initiate works programs, he pointed out, but could submit suggestions, he said. The CLC was participating in the winter construction committee, and representatives of federations and labour councils and affiliated unions have participated to a great extent in the publicity campaigns that have been conducted by the Department of Labour.

Because of the uncertainty about how much unemployment there is, or what it costs, Mr. Dodge suggested that these facts should be determined. He thought the number of seasonal unemployed was between 100,000 and 200,000 each winter, and that a "reasonable working figure" would be 140,000.

"What," he asked, "does seasonal unemployment of these proportions cost? Assuming that 140,000 persons are idle about 500 hours each, and that their work might be valued at \$1 an hour, the answer is something in the order of \$70 million." The problem is a big one, and costly, he declared.

The CLC thinks, he said, that a detailed study of Canada's seasonal unemployment and the seasonally unemployed should be made, possibly in conjunction with the DBS Labour Force Survey or through the Unemployment Insurance Commission.

To conduct such surveys would cost a good deal of money; but any reasonable government, Mr. Dodge was certain, "should be prepared to spend the amounts involved. If anything like \$70 million is there to be saved per year, no statistical investigation can be reckoned as expensive."

Another aid could be supplied by making certain depreciation allowances a little more onerous in the summer and less so in the winter.

He believed there was no good reason why railway maintenance work should not be notably less seasonable than it is at the present time.

Pointing out that the Congress was not advocating a Royal Commission to make the suggested survey, he said that what is needed is a "first class technical investigation, not briefs by the uninformed to the uninformed".

The Congress was not suggesting, either, that concrete measures should be deferred till the survey is finished, he went on. "We need to know a great deal more about this problem before we can solve it completely. But the Government almost certainly has in its possession now enough information to be able to frame plans that would solve it in part..."

Individuals and firms, provincial and local governments, need some financial inducement to do more work in off-season periods. Even if they are notably public-spirited, and would like to heed the Government's exhortations to "Do It Now" in the winter, they may not have the money then, or may not be able to afford the extra cost that would be involved.

### **Mrs. Rex Eaton**

Mrs. Rex Eaton, speaking for the National Council of Women of Canada, praised the Unemployment Insurance Commission and the Department of Labour as a whole for the fine work done in research into employment and unemployment.

We have in our membership those who suffer from seasonal unemployment, she went on. "On the other hand, because of the great variety of our membership, we have women who are able to gear their planning and their work in connection with renovation or construction to a period. If we can bring forcefully to their attention that what they do at that time is of benefit to people who are distressed, then we will be doing something worthwhile.

She believed that the conference would be of great benefit because "there was hope that our traditional thinking in respect to work and employment might be broken in Canada to the point where we would be willing to accept new ideas and planning."

Mrs. Eaton drew attention to the importance of a friendly word and encouragement from Government agencies to the individual seeking a job. "You do not know how much good it would do just to have a person feel that a Government agency which is usually so impersonal is desperately concerned about his individual unemployment," she said.

"I think a great deal of good could be done through the (Unemployment Insurance) Commission to ameliorate the emotional shocks that people go through. When you are emotionally shocked you do not have good judgment or a good process of thought. You just have to get them beyond that point."

She said the National Council of Women, under the direction of the Department of Labour, "could work out a technique and perhaps some financial assistance so that we could through literature and radio and so on reach the homes that you cannot reach through the medium of meetings and committees".

### **Group Meetings**

During the conference, delegates were divided into four groups—government, promotion and publicity, trade and commerce, and industry—that met separately to discuss the seasonal unemployment problem. Group chairmen then reported to a plenary session.

The government group recommended:

- Greater availability of money for financing housing construction with lowest possible interest rates and low down payments;

- Assistance in slum clearance to create employment during winter months;

- Expansion of the federal assistance program in the construction of roads to underdeveloped areas in winter months, and in the construction of camp sites and picnic grounds;

- Establishment of municipal and provincial committees to develop measures for creating winter employment;

- Incentive by way of greater federal assistance to provinces for public works during winter months;

- Continuing and intensified winter employment campaigns and adequate staff for National Employment Offices, to assist them in the conduct of such campaigns;

—Better timing and planning on part of all levels of government of public construction projects;

—Better timing of purchase of supplies by public utilities, railroads and other large users of materials, with a view to creating winter employment;

—Overtime in high employment periods should be discouraged with a view to levelling out employment the year round; the practice of holding two jobs—commonly known as “moonlighting”—should also be discouraged;

—Sharing by the federal Government with provinces and municipalities the cost of renovation of municipal public buildings, streets, etc.;

—Expansion, wherever possible, of trade training to provide training so as to improve the skills of unemployed persons, thereby enhancing their prospects of obtaining employment;

—Encouragement for the development of secondary industries, so that more basic materials will be processed in Canada;

The group endorsed the suggestion that, as well as conducting campaigns to encourage action towards alleviation of winter unemployment, serious study be given to providing incentives to business generally to retain and/or hire employees in the winter season.

The group suggested that federal and provincial governments stipulate in government contracts that Canadian materials and services be used, when and if available.

The Hon. Charles Daley, Ontario's Minister of Labour, served as chairman and spokesman for the government group.

The promotion and publicity group praised the Department of Labour for its advertising efforts to promote employment in the past, but noted that: “manpower and funds are inadequate to do the job of persuading the consumer, the dealer, the manufacturer in the winter... There are a lot of people to reach, and to reach them requires an adequate program, sufficient manpower and funds.

We came to these definite conclusions. Our first, that in this particular area of advertising, publicity and promotion, necessarily the responsibility for leadership must fall on the Government. Independent organizations, industry and outside forces can be of enormous help, but the responsibility for leadership, we believe, must necessarily fall on the Government.

We are going to recommend three main things: an intensified advertising campaign; an intensified personal selling campaign with some new twists in it for group selling; an intensified promotional and publicity campaign...

One delegate to the conference compared the expenses for advertising in connection with recruiting for the armed forces with the amount of money spent to promote employment for Canadians. He noted that the Army spends an average of \$12 per man for advertising and the Navy \$17, while the amount spent to promote employment is 36 cents per person.

M. M. Schneckenburger, President, Canadian Advertising Advisory Board, was chairman and spokesman of the group.

The trade and commerce group recommended that studies be undertaken of the relationship between the purchasing of consumers and of the retail trade and the existence of seasonal unemployment in the consumer goods manufacturing industries. It considered that on such a study the following might be represented: manufacturers of consumer goods, retailers, consumers and labour.

The group felt that various business organizations within the trade and commerce category should be encouraged to incur capital outlays during the winter and that they might do this if they were given some financial incentive. They felt the Minister of Finance should determine what exactly should be done along that line, but thought accelerated depreciation or depreciation amounting, for example, to 125 per cent or more of the cost in order to recognize obsolescence might be one form of incentive.

It also thought that consideration should be given to winter vacations in Canada, and to assist this that, in addition to those previously mentioned, resort operators should be included in the recommendations made in respect of assistance or incentives to improve the quality of their establishments. Better use should be made of existing transportation and hotel facilities and national and provincial parks where facilities are suitable for use in winter as well as in summer.

Another suggestion was that the volume of expenditures on home improvements could be increased by having local contractors and building supply dealers inform the public of the advantages of having such work done in the winter. There would also be an advantage to the contractor himself in having an increased volume of work for his trained supervision and trades. This would help to spread the overhead, which in turn would lower the cost to the consumer if the work was done in the winter or off season as opposed to the normal busy season.

It was also felt that some thought should be given to making the unemployment insurance program play a part, in some incentive form, to help reduce seasonal unemployment.

Leonard Hynes, Vice President, Canadian Industries Limited, was chairman and spokesman for the group.

Broadly speaking, the industry group felt that there must be some type or types of incentive provided by the federal Government in such a way "as it deemed best" to spur industry, construction groups, municipalities, agricultural groups and others into taking concrete action in their own spheres of activity.

Some of the things that would result from such action would be new buildings, new building projects, the ordering of new equipment, the beginning of municipal works programs and other programs that are long overdue, it predicted.

The group pointed out that the type of incentive to be offered obviously would depend on the industry or community to be served, but urged the Government to institute as soon as possible a review of the types of incentives that might be applied.

So, in principle, we stress that there must be some incentive, something that would hit the pocket of the industrialist, of the home-maker, of the municipality; that is the prime thing that could result in developing action.

W. Allan Campbell, Vice President, Canadian Westinghouse Company Limited, acted as chairman and spokesman for the group.

### Groups Represented

Groups represented at the conference included:

Building supply dealers, Canadian Advisory Board, Canadian and Catholic Confederation of Labour, Canadian Association of Advertising Agencies, Canadian Association of Consumers, Canadian Association of Radio and TV Broadcasters, Association of Canadian Advertisers, Canadian Chamber of Commerce, Canadian Construction Association;

Canadian Council—Operation Home Improvement, Canadian Daily Newspaper Publishers Association, Canadian Federation of Agriculture, Canadian Federation of Mayors and Municipalities, Canadian Labour Congress, Canadian Legion, Canadian Manufacturers' Association, Canadian Metal Mining Association, Canadian Retail Federation, Canadian Universities, Canadian Weekly Newspapers Association, Canadian Welfare Council;

International Labour Organization, The National Council of Women of Canada, National House Builders Association, The Railway Association of Canada, The Retail Merchants Association of Canada Incorporated, Western Retail Lumbermen's Association.

The federal Government was represented by participants from the Departments of Defence Production, Finance, Labour Northern Affairs, Public Works, and Trade and Commerce, and from the following: Unemployment Insurance Commission, Canadian Broadcasting Corporation, Central Mortgage and Housing Corporation, Defence Construction Limited, National Research Council, and Privy Council Office.

All provinces were represented at the conference by their Ministers of Labour, except one that was represented by the Deputy Minister of Labour because the Minister was ill.

---

## 50th Anniversary Meeting of Canadian Nurses' Association

Shortage of nursing personnel at all levels found everywhere in the world, WHO Nursing Chief tells delegates. Shortage acute in Canada and not likely to diminish for some time. Nurses' problems discussed

Everywhere in the world there is a shortage of nursing personnel at all levels, said Miss Lyle Creelman, Chief of the Nursing Section of the World Health Organization, in an address at the 50th Anniversary Meeting of the Canadian Nurses' Association in Ottawa in June.

In Canada, the shortage of nurses is acute and not likely to diminish for some time.

Increasing population, higher standards of health, and new hospital insurance plans are contributing to the demand.

Enumerating the problems facing nursing administrators, Miss Creelman said:

—Nurses are not distributed in the field in accordance with health needs and it is difficult to recruit nurses for rural areas.

—Salaries are inadequate and do not attract men and women to the profession.

—Many nurses must accept administrative positions without sufficient preparation.

—There are conflicts between service needs and educational objectives for students.

—Relationships between hospital and public health nursing services need to be strengthened.

—Nurses are still performing domestic and housekeeping tasks.

—Nurses themselves sometimes defeat attempts at relieving them of non-nursing tasks because they like to do what they have always done.

The nursing profession is being called to give assistance to under-developed countries that are rapidly requiring nursing services of all kinds, she went on. To give the greatest assistance, nursing personnel will have to learn to adapt long-standing methods and systems of nursing to the conditions in the various countries, rather than trying to compel these countries to adopt existing standards, Miss Creelman emphasized.

Hon. Waldo J. Monteith, Minister of National Health and Welfare, then listed the problems facing the nursing profession in Canada:

—how to make the most effective use of nursing skills, having regard for the increasingly heavy demands for these services;

—how to integrate more successfully various members of the nursing team;

—how best to reconcile the conflicting claims of nursing service and nursing education;

—how to establish closer co-operation between nursing and other professions;

—how to increase public awareness of various nursing problems which cannot be fully mastered without public support.

The Minister recognized the concern expressed in nursing circles that nurses might be faced with excessive demands as a result of the introduction of the national hospital insurance program. "I am convinced that this will not be the case", he said. "As evidence, I would point out that before the Dominion Government enters into an agreement with any province, the latter is required to have formulated methods for the control of hospital utilization. Considerable responsibility in this regard will rest, of course, with hospital officials and doctors. Through their active co-operation, I believe that suitable arrangements will be worked out whereby the quality of hospital care may not only be maintained but even raised above its present standards."

## Nursing Education

Several speakers dealt with the concern being felt about the quality and content of nursing education. Miss Agnes Ohlson, President of the International Council of Nurses, suggesting how the Canadian Nurses' Association might help promote high nursing standards throughout the world, presented a series of questions on which the nursing profession must "take definitive action":

Are we (the nursing profession) preparing the practitioner for the more complex and extended functions of the professional nurse of today, as well as the nurse of tomorrow?

Is the pattern of basic nursing education one that interests the best qualified graduate from our secondary schools?

Do we have an adequate number of qualified persons to administer and teach in our schools and to administer our nursing service?

Do we merit the status of being designated as a distinctive health science that is related to but separate from medicine?

Are we preparing nurses for research in our own field and to work with persons from other health disciplines in research relating to total health care?

The Canadian Nurses' Association has been active in the field of nursing education, reported President Miss Trenna Hunter in her address to the meeting. A number of studies have been made by the Association, including the Head Nurse Study, completed in 1956, the Cost Study of Nursing Education in Saskatchewan, the Study of Nursing Functions at Notre Dame, and the Study of Nursing in New Brunswick by Dr. K. Russell. Various methods of educating nurses have also been practised in different schools (e.g., the Metropolitan School of Nursing at Windsor, the Atkinson School in Toronto and the centralized teaching program in Saskatchewan) in an attempt to learn what constitutes a good plan of education for nurses. At present, Miss Hunter stated, the Association is engaged in a pilot study to evaluate schools of nursing in Canada.

Miss Daisy Bridges, General Secretary of the International Council of Nurses, dealing with the international responsibilities and privileges of the nursing profession, reminded the meeting that as members of the oldest international association for professional women, nurses had for half a century built up a fine spirit of international co-operation. "In a world of chaos," she said, "it is our contribution, as nurses, to no less a cause than the cause of world peace."

# International Association of Personnel in Employment Security Holds 45th Convention

Director of Canada's National Employment Service tells Philadelphia meeting that payments from unemployment insurance fund have played no small part in maintaining purchasing power during recession periods

Benefit payments from the Unemployment Insurance Fund injected into the Canadian economy during times of recession since the Fund's inception in 1940 have played no small part in maintaining purchasing power when most needed, and this without the usual drain upon government revenues, said William Thomson, Director of the National Employment Service, in an address given before the 45th annual meeting of the International Association of Personnel in Employment Security, held at Philadelphia, Pa., in June.

No less important as a stabilizing influence on Canada's economy, although harder to assess since it was not measurable in money, was the part played by the National Employment Service, Mr. Thomson pointed out.

The keynote address at the convention was given by John N. Irwin II, United States Deputy Assistant Secretary of Defense, who told the delegates that "We must pursue sound and consistent policies which will demonstrate to the less developed areas of the free world that our way of life, our free enterprise system, can meet the challenge of their problems and their aspira-

tions." The speaker described the defence and the economic aspects of the Mutual Security Program as being of equal importance.

Other speakers at the convention included: U.S. Assistant Secretary of Labor Newell Brown; Alun M. Morgan, Labour Counsellor, British Embassy, Washington; Herman W. Bremer, Federal Republic of Germany; Frank E. Johnson and E. L. Nelson, Bureau of Employment Security, U.S. Department of Labor; and Hugo P. Rodriguez, job analyst for the Co-operative Employment Service of Peru.

## William Thomson

The Director of Canada's National Employment Service, the subject of whose address was "Employment Security—Stabilizer of Canada's Economy," said that since unemployment insurance began in Canada benefit payments have totalled \$1,848,000,000. During the 1954-55 recession the sum paid out in benefits was \$258,000,000, and in that of 1957-58 payments from the Fund had reached a total of \$385,000,000 at the end of March 1958.

The Fund, which in December 1956 stood at a high point of \$926,000,000, at the end of March this year had fallen to \$744,000,000. "It will be readily seen from this," the speaker said, "that the good years did indeed provide for the lean years."

Another easily recognized stabilizing influence exercised upon the economy by the Canadian Unemployment Insurance Act was the payment of seasonal benefits during the winter months, some \$58,000,000 having been paid out in that way during the 1957-58 season, Mr. Thomson pointed out.

Turning to the National Employment Service, the speaker suggested that the purpose of the NES was the more effective utilization of manpower. The means used to bring this about was the organization of an employment market through the bringing together of job-seekers and employers through local employment offices.

The main business of the Employment Service, he said, was the selection, referral and placement of workers in the jobs to which, by virtue of their training and abilities, they were best suited.

William Thomson

The Employment Service, he said, "gets the best—not only for the individual but also for industry and the country—by getting people into the jobs which they can do best," Mr. Thomson said. The result was likely to be increased productivity.

"Annual placements by the NES run close to 1,000,000, of which 92 per cent are non-agricultural. More significant perhaps is the fact that in cities and towns where we have offices almost 70 per cent of employers use our service for all or part of their hiring needs. Measurable or not, it seems to me that all the evidence points towards employment service operation as a real stabilizing influence on the economy," the speaker said. "Combined with its companion operation of unemployment insurance, who can deny that employment security and all that the term implies has a tremendous influence on the economic well-being of a nation."

### Alun M. Morgan

Referring to the development of the Employment Service in Great Britain from its beginnings in 1909 through the years after the First World War, when the task was that of dealing with heavy unemployment, U.K. Labour Counsellor Alun M. Morgan said that in the period following the second war the great business of the service had been the adjustment of the labour market to the demands of full employment. "Here, paradoxically, its contribution to stability has been its contribution to change," the speaker said.

In an industrial economy such as Great Britain's there must be continual change in the field of production, and thus of employment, or else there will be stagnation and decay, he said. "This means that labour must be mobile, and in the widest sense, i.e., that workers must be ready to transfer from one plant to another in their normal occupation even if it means moving to another area."

The speaker outlined the measures that had been taken to soften the impact of falling demand for labour in certain industries and districts by placing those thrown out of work in other employment, if necessary by helping them to move to other parts of the country, and by encouraging employers to give reasonable notice of impending layoffs.

In the matter of retraining workers who became redundant, the Government had encouraged employers to undertake this work and had itself provided training centres where maintenance allowances are paid during training.

The Government also dealt with the problem of depressed areas, the speaker said, by encouraging the development of new industries in such areas, and by using its powers to prevent the setting up of new factories in other areas already congested.

### Frank E. Johnson

Agreements for exchange of labour between the United States and Canada, Mexico, and the British West Indies were discussed by the Assistant Director of Farm Placement of the U.S. Department of Labor.

"Major construction projects on both borders are manned by joint action—undertakings like the St. Lawrence Waterway, the Falcon Dam, and many road, bridge and communications-building projects. But the international mobility of labour in North America operates at its peak in agriculture. And here is where we make full use of international employment security resources," the speaker said.

"Canadian-United States co-operation in employment security is more diverse than any other that I know of on the North American continent," he stated in dealing with arrangements in force between Canada and the United States. Co-operation between the two countries had started with the Jay Treaty of 1794, which allowed Indians of many tribes to cross the Canadian-United States border freely without passports or entry permits. Many of them, he said, continue to cross from Canada to the United States every year to help harvest crops from Washington to Maine.

"Another unusual feature of the joint United States-Canada program is that it is a two-way street. While we depend on workers from Canada to fill many agricultural and woods jobs, Canada depends on United States workers from the eastern seaboard "tobacco states" to help cure its tobacco crop. Last year 4,056 United States tobacco workers were employed in Canada," Mr. Johnson pointed out.

He also referred to the movement of Canadian workers across the border to help in harvesting the potato crop in the New England states, and sometimes to Minnesota and North Dakota. "For many years there has been a movement of Canadian woodworkers to the United States, chiefly into the forests of Maine, New Hampshire, and Vermont," he said. The number of workers involved had approximated 6,700 two or three years ago. This spring it reached about 3,500.

HON. MICHAEL STARR

# LABOUR

## Hon. Michael Starr Minister of Labour

(Prepared for Labour Day publications of local Labour Councils)

As we celebrate once again the great national holiday set aside to honour the working people of Canada, I think it is appropriate to consider the plight of those who will find themselves without work this coming winter through the traditional cold weather slowdown of many sections of business and industry.

Again this winter a national campaign to increase winter employment will be carried out by the Government at all levels—federal, provincial and municipal—in support of locally-organized campaigns all across the country. In the past Organized Labour has played active roles in these local campaigns and I hope that this support will be maintained and increased wherever possible.

Where these campaigns have been waged most vigorously, real results have accrued in terms of increased employment, particularly among the building trades and allied occupations. But business and industry and government are still only learning from their early experiments and I look forward to a real increase in their activities, and therefore results, as more and more learn the value of special efforts and arrangements during the cold weather.

As a partner with management you can help to increase the interest of industry at large in such things as the planning of maintenance of plant and equipment during the winter months—and as individual householders you can be of real assistance if you plan your home renovations, repairs, additions and general maintenance work as far as possible for the cold season. Your purchases of new home furnishings and the replacement of outdated fixtures during winter months will help to keep at work fellow workers who are employed in a variety of industries.

With your help I believe we can cut back the unemployment figures in this and in coming winters—without your support Government action will be wasted. Remember, no matter what our occupation or what industry we work for, we are all affected by winter unemployment.

On behalf of your Government, I extend my very best wishes to you on this Labour Day, 1958.

CLAUDE JODOIN

GERARD PICARD

A. H. BALCH

# DAY MESSAGES

## Claude Jodoin President, Canadian Labour Congress

It has become traditional for union members to hold rallies in various centres on Labour Day. Naturally it is impossible to hold one single gathering that would bring together all our 1,150,000 members, scattered as they are throughout Canada; but this year there is need for such a rally, in spirit at least.

Recent years, and particularly the two years since the merger which brought about the formation of the Canadian Labour Congress as a united organization, have brought a new realization of the strength and possibilities of a movement such as ours, composed of men and women in any number of occupations, banded together in a common interest and in the interest of their fellow-citizens. It is probably not surprising that with this realization has come criticism and attacks from individuals and groups whose interests seem to be in conflict with those of the Canadian people as a whole.

As we celebrate Labour Day in 1958 our movement is being made the target for attacks on a scale seldom seen before. Members of unions throughout Canada must rally and realize that those who would weaken organizations of Canadian workers and make them ineffective are attacking not only those organizations but all that Labour stands for, and has stood for throughout the years since Labour Day was first celebrated.

Great progress has been made over those years. Wages and working conditions, the primary concern of the pioneers of our movement, have been improved tremendously and the strides that organized labour has been able to make in this regard have brought a better standard of living for all Canadians. The unions which make up the Canadian Labour Congress are, quite properly, continuing their efforts in this direction. There are still many inequalities which must be eliminated. To accept even the highest standards now enjoyed as the ultimate would be a disservice to our country. We live in a land of great opportunity and it is essential to Canadian development that we should constantly move forward and that the benefits of such development should be shared by all the people.

At the same time, those who would weaken the labour movement would curb our efforts to win for Canadians the type of legislation that can contribute to a better life. Organized labour has always been in the forefront of every struggle for greater educational opportunities and for better social legislation. Those who now attack unions are symbolic of the reactionary forces that have fought every progressive measure that has ever been considered by Parliament.

Those attacks take many forms. Some are so ridiculous that they defeat themselves. The record of the labour movement in

Canada, and the individuals who hold office in it, speaks for itself. Some of the attacks are more insidious. They are based on the propaganda technique of embracing a generally acceptable principle and attempting, under its cloak, to introduce something entirely different.

This is true of those who are seeking to impose so-called "right-to-work" laws on the Canadian people. "Right-to-work" is a completely dishonest title for such laws; they have nothing whatsoever to do with the right of an employee to a job. If they had, such laws would indeed be welcomed by those who have suffered in recent months from unemployment and those who are still without work. These laws, which some people are attempting to smuggle in through the back doors of legislative buildings, are designed, rather, to deny the majority of any group of workers the right to conduct their own affairs. They are intended to undercut the whole principle of majority decision which is basic to every level of government.

Employers who ally themselves with attempts now being made to introduce "right-to-work" laws in Canada are, in effect, declaring war on organized labour. We are confident that such efforts will not be successful.

We are very deeply concerned with the real right to work. Hundreds of thousands of Canadian men and women were deprived of this right in the months just past. Canada's unemployment record last winter was a national disgrace, and throughout the summer the number of people without jobs has continued at an alarmingly high level. Under these circumstances it is not surprising that we face another winter with deep concern.

We are well aware that this is a complex problem, that many factors affect employment; but the fact remains that ours is a young country which should offer great opportunity. At a stage in the development of civilization when scientific achievements which were considered fantastic only a short time ago have become realities, there is obviously need for greater attention to the ordinary human need for work that will provide bread and shelter. The battle against unemployment, on every possible front, is obviously one to which our movement must devote every effort.

We, in the Canadian Labour Congress, will continue to drive for the social objectives I have already outlined. We will continue our efforts to develop better-informed

and more active Canadian citizens. It was with this in mind that delegates to our national convention in Winnipeg last April gave enthusiastic support to an extended program in the field of national affairs.

Since that time progress has been made. Many conferences have been held between people representing various groups with a view to providing a means of expression for the Canadian people. That is the aim of the Canadian Labour Congress in its increasing interest in public affairs.

But our concern is not confined to affairs in Canada alone. We realize that solutions to our domestic problems depend to a large extent on the ever-changing world situation. Canadians cannot afford the doubtful luxury of isolation in the era of artificial moons and intercontinental ballistic missiles. At a time when two thirds of the world's people are under-nourished and living in misery, when a frightful gap exists between the have and have-not nations of the world, Canadians must realize that an increase in the standard of living of people in other parts of the world would react favourably on our own living and working conditions, and would contribute to world peace and democracy.

Organized labour demands, therefore, a substantial increase in Canada's contribution to technical assistance and capital development programs for underdeveloped countries. We will also increase our own contribution to the world-wide organization of free labour, the International Confederation of Free Trade Unions, which is carrying on an educational and organizational campaign in less-developed countries to build and strengthen free trade union organizations. We consider this phase of our work as Labour's technical assistance program and as our own contribution to the urgent task of battling poverty, ignorance and disease on a world-wide scale.

We fully realize that the success of our efforts depends on a relaxation of international tension, and on world peace. Unfortunately, the brutal murder of the heroic leaders of the Hungarian revolt has again revealed the callous attitude of the Soviet rulers and their total disregard for basic human values. While strongly supporting our own defensive shield, Canadian Labour will continue to welcome all efforts for the peaceful settlement of international disputes, and specifically for a ban on testing and production of thermonuclear weapons, under proper international control.

This Labour Day is, therefore, one of great challenge. It will be celebrated in various forms in different places and it will, quite properly, be a day of pleasure and relaxation; but let us take time, also, to pause and reflect as we enter a new

season of activity; and let us determine that in the months ahead we will not only protect what has been won at such cost by so many pioneers of our movement, but also go on to better things for all Canadians and for people throughout the world.

## Gérard Picard

General President, Canadian and Catholic Confederation of Labour

*(Translation)*

Every year since 1894, the first Monday in September has been a holiday in Canada, intended for the workers and known as Labour Day. The Canadian Parliament made this decision, as you may well imagine, in deference to repeated requests on the part of the labour organizations of the day. The idea was to pay tribute to all workers, but it is the trade unionists who bring this holiday to the fore and give it its real meaning.

Public opinion is becoming more and more sensitive to the claims and concerns of the workers. It is sympathetic when the labour organizations speak of unemployment and of the possibility of remedying it by means of a policy resolutely directed towards full employment; it has noted the benefits of social security and supports health insurance, the measure so vigorously

called for nowadays by all labour organizations, which will be added to the other provisions already in effect; it accepts the collective bargaining system; it is awake to the solutions in the general interest suggested for such important problems as education and housing; it understands the need for greater participation in the prosperity arising from our natural resources. In short, the common good is becoming more and more the principal criterion of popular opinion, which is a most auspicious trend.

On the occasion of this 1958 Labour Day, I offer my best wishes to all men and women workers and to their families, and I hope that the CCCL and the other labour organizations will continue to seek and to suggest the most suitable solutions for the problems of the hour.

## A. H. Balch

Chairman, National Legislative Committee,  
International Railroad Brotherhoods

I am pleased to have the opportunity to extend warm fraternal greetings to all labour groups, members, and their families, from the National Legislative Committee, International Railroad Brotherhoods.

Labour has a great deal to commemorate on this day, and tribute should be paid to those in the past who, through their efforts, overcame obstacles that seemed unsurmountable but which resulted in the changed atmosphere now existing between Management and Labour. It has been, and is, the aim of Labour to promote legislation to safeguard the social and economic status of the worker. Advancement has been slow, but results have justified the patience of Labour. Through their efforts improvements in the various Acts have resulted.

It is regrettable that periodically workers have to face the problems and worries brought upon them by the spectre of unem-

ployment. Labour cannot accept without protest the inexcusable situation where, in the past year, over half a million were unemployed. Regardless of the position taken by those responsible, one of the factors contributing to it was the increase in immigration. Potentially Canada is in a good position for large population increases because of its unoccupied land and incomplete development of manufacturing industries; however, immigration must be controlled. A state which is underpopulated in relations to its resources is in a more favourable position than one overpopulated, because it can add to its numbers by a controlled system of immigration, and by encouraging the internal migration of its people to develop its natural resources. It has been said, and rightly so, that a state may be rich in raw materials and poor if its resources are underdeveloped.

Automation and advancement in technology increases and advances the power of the state. Although Labour recognizes these facts and does not oppose advancement it feels a study should be made by Government to provide the means for an adjustment period during technological changes. Senior workers should not be discarded indiscriminately. Responsibility falls upon the employer to see this does not happen.

It is noted with appreciation that an Act governing Hospital Insurance and Diagnostic Services is now a fact. It is to be hoped that a far more comprehensive plan will develop from the present Act.

It is gratifying to note that serious thought is being given to a contributory form of old age pension. Far too many workers are retired on poor or no pensions. Every worker, no matter how humble a position he has held in the working forces, has in his own way contributed to the growth and development of the country and should receive an adequate pension upon retire-

ment. An industrial pension is only partly the answer unless a worker can build up pension credits with all his employers. There is a need for some system of "portable pension credits". The adoption of such a system should not mean the disappearance of existing private schemes. It has been expressed that many employees feel that when they leave a plan they should be free to obtain their own contributions. From personal experience and observation I do not think that is so. Of course, there is the difference that under a vast majority of pension plans now in effect no provision is made to carry contributions to the next employer; therefore, the worker naturally wishes his contributions to be returned to him. Should provision be made for his contributions to be carried to the next employer, it would be found that the Canadian worker is ready and willing to accept such a scheme. The 1958 worker is more "pension conscious" than his predecessors.

On this Labour Day the National Legislative Committee, International Railroad Brotherhoods, send greetings to all groups.

---

## Successful Rehabilitation—IX

Ninth in a series of articles on success in rehabilitation achieved through the precise matching of the handicapped person to the job

*This is the ninth in a series of articles illustrating that the particular demands of any job—the unique combination of skill, aptitudes and attitude required in the worker—can often be met by a disabled person not by coincidence but by a precise matching of the person to the job. It was prepared by Paul E. Connolly, Quebec Regional Public Relations Officer, Unemployment Insurance Commission.*

When the National Employment Service was established by the Unemployment Insurance Act of 1940, a Handicapped Section of the Special Placements Division was set up to provide special employment assistance to physically disabled workers. It was created for the express purpose of rehabilitating into employment those disabled persons capable of working but who, because of their physical, mental or emotional handicaps, might otherwise remain on the fringe of the employment market. The Section's special placement officers concentrate their efforts on, in the words of the manual of instructions, persons who, on account of injury or disease of a character which is likely to last more than six months, or on account of congenital conditions, are substantially handicapped in obtaining or keeping employment of a kind generally suited to their age, previous experience and qualifications.

There is no mental anguish to equal that which results from being employed in a menial job solely because of a physical handicap.

Too often in the past, debasing work was the lot of handicapped persons who were otherwise intelligent. Too often it was thought that, since their occupational abilities were reduced, these persons would readily accept any offer of employment.

Evidence of this is the story of Phil, aged 36, married, with one child. In 1943 a car accident resulted in the amputation of his left arm.

With a global war on at that time, Canada still wanted the use of his remaining arm. For the rest of the conflict Phil worked at parachute packing and performed his duties very efficiently.

In 1946, with only a sixth grade education, he became a salesman of awnings for a retail outlet. His war work experience had given him a liking for canvas, rayon and jute goods. Five years of selling made him yearn to start in this business himself.

The best years for these goods had already gone by. New products were being introduced with which he could not compete and after two years he ended in failure.

A welfare society looked after him for quite a while. He was almost completely disillusioned when he was offered a job. Though he did not relish the idea, he nevertheless accepted the offer because he needed money. For one year he worked as a public room attendant in a public square.

For a man who had done selling, this position was a blow to his pride. He kept refusing in his mind to accept as permanent a job which he thought degrading. His wife and child tried to comfort him as much as they could, but the man steadfastly refused to consider this his final lot.

After some time he heard of the special placements service of the National Employment Service. Here, he was sympathetically greeted by a counsellor, who carefully reviewed his experience, his habits, his handicap, etc. The applicant's appearance was good. He was neat and tidy. His health was good. He had a good artificial arm. His only flaw was that he was on the verge of a mental breakdown. The work he was performing, coupled with his business failure, was taking its toll.

He would have liked to sell again but his experience was limited and moreover he would have nothing more to do with selling awnings. A few attempts to interest speciality firms in his services failed.

However, work as a watchman was available. At first, with his mind still affected by his work as a public room attendant, Phil categorically refused to consider that type of work; he said any handicapped person can at any time secure that kind of work. To prove his point, he accepted a referral to an employer not forewarned of his handicap; he failed to obtain the job.

Feeling dejected, he then put his faith in the counsellor's ability to guide him. Eventually a proper frame of mind was created.

The counsellor now solicited a special interview with the employer who wished to hire a watchman. Together the applicant and the special placements officer went to the employer's premises. The NES officer presented a convincing argument based on employment stability, alertness, intelligence, and good health. Finally, the employer agreed to give Phil a chance.

The results, both for the company and the handicapped applicant, have been gratifying. Phil is paid an adequate salary and both he and his family are content with his status. As for the company, its officers never lose an opportunity to point out to visitors how pleased they are to have a handicapped person discharging his duties for them in such an efficient manner.

---

## Idleness or Shortened Hours Affected 1 U.S. Family in Four Last Year

One out of every four families in the United States was affected by unemployment or shorter work weeks between mid-1957 and mid-1958, it is revealed in a report by Profs. William Haber and Wilbur J. Cohen of the University of Michigan, following a nation-wide survey.

The survey indicated that 8,500,000 families had the head or one other member unemployed at some time during the period studied, while 4,000,000 were affected by shortened work periods.

Other findings of the study included:

—Those out of work at the time of the survey averaged 21 weeks of unemployment; those previously unemployed who had found jobs averaged 11 weeks.

—Sixty per cent of those unemployed for a time in the 12 months received some unemployment benefits and 30 per cent received benefits the entire period they were out of work.

—After counting unemployment benefits as income, unemployed families estimated their income losses as follows: under \$500,

38 per cent; \$500 to \$1,000, 25 per cent; \$1,000 to \$2,000, 25 per cent; \$2,000 and over, 12 per cent.

—Unemployment was most widespread among families with 1957 incomes of \$5,000 or less.

—Unemployment was concentrated among younger members of the labour force. About one in four family heads under the age of 30 was unemployed at some time during the year. Only 13 per cent of family heads between the ages of 40 and 50 were unemployed at any time during the 12 months.

—About one-third of those who were unemployed at the time of the survey expected to get their old jobs back soon, or find other jobs paying equally well. Slightly more than a third were pessimistic about their chances of getting another job with equal pay.

The report was based on interviews with a random sample of 1,456 adults. Special interviews conducted in Detroit indicated that there were more unemployed there than elsewhere.

# Report on Rehabilitation Cases Closed

Reports from only eight provinces show 1,055 persons rehabilitated during fiscal 1957-58, of whom 919 were placed in regular employment, 45 are self-employed, 12 in sheltered employment and 22 work at home

Reports from eight provinces on rehabilitation cases closed show that 1,055 persons were rehabilitated during the fiscal year 1957-58. This, however, does not tell the whole story; the reports were not complete because much rehabilitation work in Canada is carried out by a variety of agencies and at present it is difficult to obtain figures from all of them, and two provinces have not reported.

Of the 1,055 persons, 919 were rehabilitated to regular employment, 45 to self-employment, and 12 to sheltered employment. A further 22 were working at home and 57, though not working, were enabled to take care of themselves.

It is estimated the cost of support of the whole group before rehabilitation was \$948,460 a year. Their earnings after rehabilitation were reported to total \$1,860,165.

The new Kinsmen Centre for the Handicapped in Saskatoon now under construction will accommodate two sections previously housed separately; the John Dolan School and the Saskatoon Council for Crippled Children and Adults. The building is planned to provide for both the education and training of the handicapped, with the object of enabling them to take their place in the community. School rooms, workshops, and recreational facilities will be provided.

\* \* \*

The Rehabilitation Society of Alberta for the Handicapped will apply to the provincial Government for incorporation under the Societies Act, and at the same time will have its name changed to the Alberta Rehabilitation Council for the Handicapped. The main aim of the new council will be to aid in the rehabilitation of the mentally and physically handicapped throughout the province.

\* \* \*

The rehabilitation of arthritic and rheumatic patients more than pays for itself in a two-year period, says Dr. H. S. Robinson, Medical Director of the British Columbia Division of the Canadian Arthritis and Rheumatism Society. He stated that a cost

study has shown that rehabilitation is economically sound and can save the community money.

Thirty-four, disabled by arthritis, were given intensive treatment for three months at a cost of \$44,538. The increase in their earnings over a two-year period was \$42,322, and another \$6,000 was saved in community costs. Dr. Robinson said that the families of these men also benefited through a higher standard of living, and the community received more income and other taxes from them.

\* \* \*

The British Columbia Division of the Canadian Paraplegic Association has established a permanent office in Vancouver to organize welfare for paraplegics. The new office is at the G. F. Strong Rehabilitation Centre, 900 West 27th Avenue.

\* \* \*

Vocational rehabilitation in the United States has been growing steadily since the idea was first introduced by statute in 1920.

An article describing how co-ordinated services are provided to the disabled through federal-state programs under which the states conduct their own rehabilitation activities, and the federal authorities provide encouragement through financial aid, advisory and research functions, appears in *International Labour Review* of March 1958.

The article was contributed by Mary E. Switzer, Director, Office of Vocational Rehabilitation, U.S. Department of Health, Education and Welfare.

\* \* \*

The President's Committee on Employment of the Physically Handicapped, designed to focus attention in the United States on the employability of persons with serious disabilities and to enlist the support of business, industry and government in a year-round campaign, in a report on its work during the past 10 years says that employers are increasingly coming to realize the capabilities of the handicapped and are hiring more such people. Able-bodied workers, on their side, have overcome their prejudices and are accepting handicapped persons as fellow workers.

# Home Economics Education in Canada

Digest of report by Dr. Helen Abell, Department of Agriculture, for Ninth International Conference on Home Economics, July 28 to August 2

The demand for university-trained home economists continues to exceed the supply in Canada, despite the fact that increasing numbers of young women are making home economics their career.

In 1957, more than 1,100 women were enrolled in university courses in home economics. Most graduates become teachers or dietitians, but more and more of them are entering other fields of employment through which home economics is being applied to the improvement of home and family living.

Many graduates, though by no means all, become members of either the Canadian Home Economics Association or the Canadian Dietetics Association, which serve the professional interests of women in these fields. Of the approximately 900 members of the C.H.E.A. in 1956-57, some 55 per cent were teaching; 11 per cent were homemakers; 10 per cent were in business occupations, including journalism; and another 15 per cent were nutritionists or in food service. Of the approximately 1,000 members of the C.D.A., on the other hand, about 55 per cent were employed in hospitals; 15 per cent in business; 13 per cent by government; and 13 per cent by universities and schools.

## Origins of Home Economics Education

Education in home economics dates back many years in Canada. A school established in 1882 by the Ursuline Sisters at Roberval, Que., is thought to have been the first in Canada to offer a course in household science. Courses in needlework and other household subjects were made optional in the public school curriculum in Ontario for the first time in 1894 but progress was slow because of the lack of trained teachers.

The efforts of Mrs. Adelaide Hoodless, founder of the Canadian Women's Institute, led to the establishment of centres for the teaching of home economics, the first of which was the Ontario Normal School of Domestic Science and Art opened in 1900 in Hamilton. In 1902 the University of Toronto established the first course in Canada leading to a bachelor's degree in Household Science, and in 1903 a division of home economics was set up at the Ontario

Agricultural College. By 1957, some 17 Canadian institutions were offering courses leading to a bachelor's degree in home economics.

## Change of Emphasis in Teaching

In the early days of home economics, when Canada was still primarily an agricultural country and women were mainly employed as homemakers, the emphasis in teaching was on household skills. Since then the widespread economic and social changes that have occurred have pointed up the necessity for a change from the "skill-centred" to the "family-centred" teaching of home economics.

The consensus now is that home economics should be taught within the framework of family relationships rather than concentrated on a few household skills. In the past few years, the Family Life Committee of the C.H.E.A. has been studying the teaching of home economics in Canada with a view to promoting "family-centred" teaching throughout the country. This method is currently being practised in Nova Scotia.

The need to expand facilities for post-graduate training and research in this country is also being recognized. A current report of the Education Committee of the C.H.E.A. recommends that "a concentrated effort be made to obtain awards at the post-graduate level that would stimulate interest in research and further professional studies and thus increase the supply of teachers at both the university and high-school levels".

## Informal Education

Quite apart from formal instruction, Canadians nowadays are kept informed of advances in home economics through the various mass media. Interest in better nutrition and better homemaking became keen during the war under the stress of wartime restrictions. Since then, this interest has been kept alive by voluntary women's organizations such as the National Council of Women and the Canadian Association of Consumers, the Women's Institutes, Homemaking clubs and Parent-Teacher associations.

## Two Women's Groups Hold Conventions

Canadian Nurses' Association celebrates 50th anniversary at biennial general meeting. Canadian Federation of Business and Professional Women's Clubs decides to undertake survey of equal pay legislation

Some 2,000 nurses, representing all branches of the nursing profession, celebrated the 50th Anniversary of the founding of the Canadian Nurses' Association during the Biennial General Meeting held in Ottawa, June 22-27.

Although past achievements of the Association, whose current membership stands at some 50,000, were reviewed during the discussion of the various reports of working committees, the general theme of the meeting was "Into the Future, Open a Better Way". It was within this general framework that the delegates heard distinguished guest speakers discuss the nursing profession from a number of different aspects (*see page 852*).

Among the many items of particular interest was the progress report on a "Pilot Project for the Evaluation of Schools of Nursing in Canada". Twenty-five schools of varying kinds and sizes have been chosen for study from among nearly 100 that signified their willingness to participate in the pilot project.

The meeting approved the adoption of the "Canadian Nurses' Association Retirement Plan", to come into effect September 1. The pension plan, the first of its kind for the nursing profession, is designed to take care of both nurses working for employers and self-employed nurses. One of the best features of the plan is that nurses who move from one employer to another or who change their kind of work will be able to carry their pension rights with them.

The Women's Bureau was established to help bring about a better understanding of the problems of women workers and their jobs and to promote good labour standards in all fields of women's employment. It studies the particular problems of women workers and publishes the results of such studies, and makes available information regarding occupational opportunities for girls and women.

A highlight of the meeting was the dramatic presentation of the story of nursing in Canada under the title "Cavalcade in White".

Miss Alice Girard, Director of Nursing, St. Luke's Hospital, Montreal, succeeded Miss Trenna Hunter of Vancouver as President of the Association.

### Business and Professional Women

Legislation affecting women was among the major items discussed at the 16th Biennial Convention of the Canadian Federation of Business and Professional Women's Clubs, held at Edmonton, July 8-11.

The effectiveness of equal pay legislation was examined critically. Six provinces have enacted equal pay legislation to date and a federal Equal Pay Act was passed in 1956, but a report before the meeting suggested that information on the real effectiveness of this legislation was lacking. The fact that few complaints have been received in the provinces regarding discrimination in rates of pay because of sex was not considered an indication that "everything in the garden is lovely". At present claims must be made directly to the respective Departments of Labour by the women with a grievance. Some women, it was felt, might be afraid of losing their jobs if they registered a complaint.

Accordingly, the Convention supported a recommendation that provincial clubs be asked to conduct a survey on the effect and results of equal pay legislation, with particular emphasis on the method of making claims under the Acts.

Establishment of a national office in Ottawa, to begin operations immediately after the close of the Convention, was authorized by the meeting of some 400 delegates.

Miss Isabel Menzies of Montreal was elected President of the National Body for the next two years, succeeding Mrs. Maude Baylay of Brampton, Ont.

## 50 Years Ago This Month

Good crop prospects and large-scale railway construction bring about improvement in employment conditions. Harvest labour scarce in some areas, although surpluses of unskilled labour reported in other areas

Under the stimulus of good crop prospects, helped by the continuation of railway construction on a large scale, industrial and labour conditions showed an improvement in July 1908 compared with the previous month.

The August 1908 *LABOUR GAZETTE* reported that there was still a surplus of unskilled labour in some places, though it was smaller than in June. At the same time there was a scarcity of men in other parts after harvesting began.

The CPR re-engaged hundreds of its employees at the Angus shops in Montreal who had been laid off a few months before because of lack of work. In the locomotive works and in the Montreal Steel Works business also showed improvement.

The contract for the construction of the Legislative Building in Regina was awarded at a price of \$1,424,150.

The *LABOUR GAZETTE*'s correspondent for St. Hyacinthe reported that "the Penman Manufacturing Company had a busy month. The strike which was declared on May 11 in this factory is practically finished, nearly all the old employees having returned to work at the company's conditions and signing an agreement not to form part of any labour union while in the employ of the company. There are a number of the strikers whom the company will not re-employ."

The Ottawa correspondent said that the Ottawa Electric Railway Co. had a force of between 125 and 200 men employed on track construction and repairs at a wage of 17½ cents an hour. "Residents and rate-payers of Ottawa are given preference in the employment. The company reported that floating labour offered itself during the month at 14 cents an hour and lower, but was refused on account of the policy of the company to give city men a chance to earn in the dull time."

Even in 1908, and at a time when there was more than the usual amount of unemployment, it appears that farmers had trouble in getting the labour they needed. "Farmers of the Ottawa district found it almost as difficult as last year to secure help in the busy haying season," said the Ottawa correspondent. "Unless extra wages are paid, native labour shows an aversion

to go into the country, and there is consequently a fairly brisk demand for recent arrivals from Europe."

The correspondent at Woodstock, Ont., reported: "The weekly half-holiday is being partially observed. The jewellers and dentists take Wednesday afternoon, and barbers Thursday afternoon, and the banks and law offices Friday afternoon."

The call for the 24th annual session of the Trades and Labour Congress of Canada, to be held in Halifax on September 21, which was issued during July, said that the outstanding feature of the past year had been the effect of immigration on trade conditions. The sixth annual convention of the National Trades and Labour Congress of Canada, which was to be held in Quebec September 15-19, placed immigration first on its list of subjects for discussion.

Figures on immigration published in the *LABOUR GAZETTE* for August showed that in the three months, April, May, and June 1908, the number of immigrants who entered Canada was not much more than half the number who entered in the corresponding period of 1907. The numbers for the period were 127,371 in 1907, and 68,975 in 1908. During the first six months of 1908 the number of British immigrants to Canada, according to figures published by the U.K. Board of Trade, dropped to 56,595 from 107,000 in the first half of 1907.

"On the morning of July 30, while rounding a curve at full speed on the double track at Osco, Ont., Train No. 2 ran into an extra gang of 60 trackmen who had stepped on to the eastbound track out of the way of a westbound freight train, with the result that three workmen were instantly killed and another dangerously injured," the *LABOUR GAZETTE* reported.

During July, 20 railway employees were accidentally killed and 22 were injured, compared with 28 killed and 32 injured during June, and 26 killed and 25 injured in July 1907. In the number of fatal accidents during the month railway service headed the list of industries.

The number of fatal industrial accidents in July 1908 was 92; June, was 138; and in July 1907, it was 125.

# INTERNATIONAL LABOUR ORGANIZATION

## 42nd Conference Adopts Four New International Labour Instruments

Delegates approve Convention and Recommendation on discrimination in employment and occupation, and Convention and Recommendation on the conditions of employment of plantation workers; 10 resolutions passed

The 42nd International Labour Conference, in session at Geneva, Switzerland, from June 6 to 26, accomplished the following:

—Adopted four new international instruments: a Convention and a Recommendation calling on ILO member states to take steps to eliminate discrimination regarding employment and occupation; and a Convention and Recommendation on the conditions of employment of plantation workers;

—Took preliminary action with a view to final discussion next year on four other instruments: three proposed draft Conventions on (1) minimum age for admission of fishermen to employment, (2) medical examination of fishermen, (3) fishermen's articles of agreement; and a Recommendation on the organization of health services in places of employment;

—Held a general discussion on hours of work, and adopted a resolution inviting the Governing Body to place the question of the reduction of hours of work on the agenda of an early session of the Conference with a view to the adoption of an international instrument;

—Adopted an ILO budget for 1959 amounting to \$8,529,857 (Canada's share will be \$261,416, or 3.53 per cent).

—Adopted other resolutions on the living standards and conditions of employment of plantation workers; occupational diseases; publication of labour laws; human rights; industrial health and safety campaigns; manpower aspects of economic development; management development; measures to promote employment and action against unemployment; unemployment in agriculture and the influence of agrarian reform on the improvement of the social conditions of agricultural workers; the setting-up of

a special committee on conditions of fishermen; expansion of international trade; labour-management relations; and on increased technical assistance for the integration of indigenous populations into the economic, social and cultural life of their countries;

—Examined a report on the manner in which member countries are applying ILO Conventions;

—Held a general debate on the annual Report by Director-General David A. Morse, and heard him reply to the discussion.

The Convention concerning discrimination in employment (full text on page 000) was adopted by 189 votes for, 24 against, and 13 abstentions. The Canadian Government and Worker Delegates voted in favour; the Canadian Employer Delegate was opposed.

The Recommendation on discrimination in employment (full text on page 876) was adopted by a vote of 212 for, none against, and 11 abstentions. All Canadian delegates voted in favour.

Nearly 900 delegates, advisers and observers from 73 countries and nine territories attended the Conference. Many ministers of labour, including Hon. Michael Starr, Canada's Minister of Labour, attended either as visiting ministers or as leaders of their country's government delegations. The composition of Canada's tripartite delegation was listed on page 621 of the June issue.

Pakistan's Minister of Labour and Education, Basanta Kumar Das, was elected President of the Conference. A total of 161 government, worker and employer delegates took part in the general discussion on the annual Report of the Director-General, titled: "The ILO in a Changing World."

## Discrimination in Employment

The best contribution that the ILO could make on the eve of the 10th anniversary of the Universal Declaration of Human Rights would be to adopt the two instruments on discrimination, said Kalmen Kaplansky, Director, International Affairs Department, Canadian Labour Congress, and an adviser to the Canadian Worker Delegate. He was speaking in the debate on the report of the committee on discrimination, which dealt with the instruments, and of which A. H. Brown, Deputy Minister of Labour, was Chairman.

There is hardly a country in the world where this problem of discrimination does not exist.

The official policy of governments may be to the contrary and the grounds for discrimination may differ from country to country. In some it may be on grounds of race or religion; in others, on grounds of sex; in some because of social or national origin; in others because of political opinion.

The degree and privileges of discrimination may also vary. But the problem is universal and dates back to ancient times and is embedded in the very consciousness and in the very fabric of human history and human behaviour.

He thought it was wise on the part of the committee not to sit in judgment on the practices of any country and regretted that some delegates "raised an accusing finger at certain practices in certain countries".

He resented the implication that just because Canada has passed legislation in this field it was guilty more than any other country of discriminatory practices.

"We are a country of many origins and of people who have come from many countries with many religions, and the fact that we are dealing with this problem through legislation does not indicate that our problem is any greater than that of any other country; it shows that public opinion is determined to wipe out any vestiges of this evil and to deal with the small number of cases that do exist, instead of just appearing and declaring and proclaiming that we are in favour merely of principle," Mr. Kaplansky said.

For delegates to state that this problem did not exist in their countries was a wrong approach, he thought. "What this Convention will do and what specifically the Recommendation will do is to make each and every Government review its own practices and its own existing legislation in the light of the recommendations contained in the second document and in the light of the principles contained in the first and examine them in the light of the norms of behaviour which we are establishing and of the standards we are setting," he said.

G. R. Carroll, adviser to the Canadian Government Delegates, noting that there is national legislation and legislation in a number of the provinces that is directed to the elimination of discrimination in employment on grounds of race, colour, religion and national extraction, said the Canadian Government Delegates would vote for the proposed Convention and Recommendation.

But, he pointed out, "in voting for the proposed instruments I should like to make it clear that the subject matter of the Convention and Recommendation is one in which legislative jurisdiction in Canada is divided between the Parliament of Canada and the provincial legislatures.

"Consequently, if these instruments are approved, the obligations which Canada undertakes to give effect to with respect thereto are of necessity the federal state obligations."

## First Discussions

With a vote of 175 for, none against and one abstention, the Conference decided to place the question of the conditions of work of fishermen on the agenda next year for final discussion.

The conclusions it adopted on this question take the form of three proposed draft Conventions. The first of these is on the minimum age for admission of fishermen to employment. It provides that children under 15 shall not be employed on fishing vessels. Young persons under 18 would not be employed or work on coal-burning ships as trimmers or stokers. These provisions would not apply to work done by children on school ships, provided that it was approved and supervised by public authority.

The second proposed draft Convention concerns medical examination of fishermen and states that no person shall be engaged for employment in any capacity in a fishing vessel unless he produces a certificate attesting to his fitness for the work. For young persons of less than 21 years, the certificate will remain in force for a period not exceeding one year from the date when it was granted. For persons of 21 and over, the competent authority would determine the period for which the certificate should remain in force.

A third proposed draft Convention concerned fishermen's articles of agreement. It says that articles of agreement shall be signed both by the owner of the fishing vessel or his authorized representative and by the fisherman. Reasonable facilities to examine the articles of agreement before they are signed shall be given to the fishermen and their advisers. Where both

### Message from President Eisenhower

Delegates to the Conference heard a message from President Eisenhower of the United States, read by U.S. Secretary of Labor James P. Mitchell, immediately following the opening of the Conference. The President said:

Throughout its history the International Labour Organization has worked effectively to secure the foundations of peace. As a persistent champion of human values, it has advanced the right of each person to live in dignity and to prosper according to his ability. By promoting higher living standards, improved methods of production and greater labour-management co-operation, the ILO has promoted the welfare of all.

The increasing attention given by the ILO to the opportunities of technical assistance provides real promise to newly industrializing nations around the world. With operating programs to meet the immediate problems of many countries, the ILO renders constructive help in this fast developing field. It is well equipped to extend assistance in the interests of workers, employers and governments.

In its concern for the economic and social problems of mankind the ILO has done much to bring about a better understanding among nations. It is essential for the cause of peace that this creative work be continued and expanded.

vessel owner and fisherman are covered by collective bargaining agreements, individual signatures will not be required.

A record of employment of every fisherman shall be maintained by the competent authority, and a copy shall be handed to the fisherman or entered in his service book.

The Conference also adopted a Resolution requesting the Governing Body to consider setting up a special committee to continue or initiate studies by ILO, in co-operation with other appropriate international agencies, on questions affecting employment conditions on fishing vessels. These covered safety, certificates of competency, holidays with pay, accidents, unemployment and sickness insurance, accommodation, medical care on board ship and vocational training.

The conclusions will be taken up at next year's Conference for final discussion and decision after they have been circulated during the intervening year among governments for their comments.

The Conference also approved the conclusions of the committee charged with studying the question of the organization of occupational health services in places of employment, which proposed a draft Recommendation and a resolution. Next year's Conference will take a final decision on this new international instrument.

The proposed draft Recommendation, which was adopted by 185 votes for, one against, with no abstentions, provides that occupational health services should be organized as a separate service within the framework of a single undertaking or as a service common to a number of undertakings, whether set up by the undertakings themselves or attached to an outside body.

Where occupational health services cannot immediately be set up for all undertakings, those services to be established first should be for undertakings where workers are exposed to special health hazards, to be defined by national laws or regulations, and for undertakings employing more than a minimum number of workers to be prescribed by national law or regulations, the draft provided.

The role of occupational health services should be essentially preventive, and the service provided by occupational health services should not involve the workers in any expense, it said.

The resolution, which concerned occupational diseases, was adopted by 175 for, 3 against, with 12 abstentions. It pointed out that recent developments in production processes and methods and the extraordinary multiplicity of new materials are daily raising new problems in the protection of the health of the workers. It requests the Governing Body of the ILO to give a high priority to the study of these problems and to consider the desirability of placing them on the agenda of an early session of the Conference.

It was decided by the Conference to invite the Governing Body to place the question of the reduction of hours of work on the agenda of an early session of the Conference, not later than 1960, with a view to the adoption of an international instrument. The vote was 100 for, 77 against, with 17 abstentions.

The Canadian Worker Delegate voted for, the Employer Delegate against the resolution. The Government Delegates abstained.

### Other Resolutions Adopted

The Conference adopted 10 other resolutions on the following subjects:

*Human Rights*—The Conference noted that the General Assembly of the United Nations will be celebrating on December 10 this year the 10th anniversary of the adoption of the Universal Declaration of Human Rights, pledged the continued co-operation of ILO with the United Nations in promoting universal respect for the observance of human rights and fundamental freedom on the basis of the dignity and worth of the human person, and

requested the Director-General to communicate this pledge to the General Assembly of the United Nations. The resolution was adopted unanimously.

*Publication of Labour Laws*—The Conference called on member countries to publish promptly laws, decrees and regulations affecting the terms and conditions of employment of workers, and to ensure that they come to the attention of all concerned. The resolution was adopted unanimously.

*Industrial Health and Safety Campaigns*—The Governing Body was asked to consider stimulating public interest throughout the world in the prevention of industrial accidents and the protection of the health of the workers through such measures as the promotion of a world accident prevention day, a national industrial safety day, or other suitable means. The resolution was adopted unanimously.

*Manpower Aspects of Economic Development*—The Conference called on the ILO to give high priority to intensifying its action programs in the development of human resources and to make available to member states information on how to deal with problems in the field of development of manpower resources. The resolution was adopted unanimously.

*Management Development*—The Conference urged governments of newly industrializing countries to promote and spread knowledge of economically and socially sound principles and techniques of management, and it invited the Governing Body and the Director-General to give high priority, both in the research and in the operational activities of ILO, to action that would contribute to meeting the need for management development. The resolution was adopted by 162 votes for, three against, with 26 abstentions.

*Measures to Promote Employment and Action Against Unemployment*—The Conference urged member states to promote measures for the maintenance and expansion of employment in their own countries by methods that will avoid the impairment of employment opportunities in other countries. The Governing Body was requested to ask ILO to undertake and arrange for studies of measures to promote and maintain employment and to communicate the resolution to the United Nations, other specialized agencies, governments of member states and, through them, to employers' and workers' organizations. The vote was 166 for, one against, with 10 abstentions. (The resolution was proposed by Canada. See full text below.)

*Underdevelopment in Agriculture and Influence of Agrarian Reform on Improve-*

### Freedom of Association Survey

Both the United States and Russia have invited the ILO to send study missions to their countries as part of a proposed survey of conditions relating to freedom of association, Director-General David A. Morse announced during his reply to the debate on his Report.

The studies in the two countries, which will be the first in the survey, will begin next year, he said.

Announcing that other governments had expressed willingness to co-operate in the survey, Mr. Morse said he considered this "a significant advance in international action to promote universal respect for human rights".

*ment of Social Conditions of Agricultural Workers*—The resolution noted with satisfaction the decision of the Governing Body to consider at its 140th Session placing on the Agenda of the Conference for general discussion the question of the contribution of ILO to the raising of incomes and living conditions in the rural communities, including the question of unemployment and underemployment in agriculture, and the need for agrarian reforms. It was adopted by a vote of 153 for, 11 against, with 20 abstentions.

*Expansion of International Trade*—The Conference urged the governments of ILO member states to continue their efforts to reduce existing barriers to international trade in a mutually satisfactory manner. These efforts should pay due attention to the development need of underdeveloped countries. The resolution was adopted 124 votes for, 34 against, with 48 abstentions.

*Labour-Management Relations*—This resolution noted with satisfaction the importance attached to ILO's efforts to improve relations between Labour and Management throughout the world. The Conference recommended that the ILO intensify its program of research in and reporting on labour-management relations and practices in the various countries, and said it should become a centre for the exchange of information. The voting was 162 for, 33 against, with one abstention.

*Increased Technical Assistance for the Integration of Indigenous Populations into the Economic, Social and Cultural Life of Their Countries*—Adopted unanimously, this resolution stated that governments concerned should consider formulating requests for additional assistance on the basis of national plans.

**Canadian delegates to 42nd International Labour Conference (l. to r.): Pat Conroy, Government Delegate; A. H. Brown, Head of Delegation; Hon. Michael Starr, Minister of Labour; Claude Jodoin, Worker Delegate; and H. McD. Sparks, Employer Delegate.**

### Canadian-Sponsored Resolution

The resolution concerning measures to promote employment was submitted by the Government of Canada. The full text follows:

The General Conference of the International Labour Organization, having adopted in earlier years various Conventions, Recommendations and resolutions relating to employment and unemployment, recalling resolutions dealing with employment adopted at sessions of the Economic and Social Council and of the General Assembly of the United Nations, bearing in mind the importance of the optimum utilization of human as well as material resources as a fundamental social and economic objective, realizing that change and adjustment occur in the economies of all countries, recognizing that national economic programs can have adverse effects upon employment and income in other States Members of the Organization;

Urges member states to promote and maintain employment in their own countries by taking positive measures that will not impair employment opportunities in other countries. Draws to the attention of member states the possibilities of promoting and maintaining employment by pursuing vigorously:

(a) programs to maintain purchasing power, including adjustments in fiscal and monetary policies and in social security measures;

(b) resources development, housing improvements and various other types of needed investment;

(c) a freer flow of trade, technical information and capital as between countries;

(d) measures to bring quickly and effectively job openings to the attention of workers and suitable workers available for employment to the attention of employers;

(e) technical and vocational training and retraining programs;

(f) reduction of seasonal fluctuations in employment;

(g) development of an unemployment insurance or compensation program ensuring protection to workers and their families while unemployed.

Emphasizes the importance of member states' undertaking studies of changing manpower requirements, including the nature and extent of technological improvements, population and labour force trends, employment, underemployment and the relation of these to productivity and working and living standards.

Urges employers' and workers' organizations to examine their policies and actions in relation to their over-all effect on employment and unemployment.

## The Canadian Delegation to the 42nd International Labour Conference

Seated (left to right): Delegates Pat Conroy (government) and Claude Jodoin (worker); Hon. Michael Starr, Minister of Labour; Delegates A. H. Brown (government) and H. McD. Sparks (employer); Miss Nancy Lishman, assistant secretary. Standing (same order): H. T. Pammett, Secretary to the delegation; Advisers G. R. Carroll (government), M. R. Mathieu and A. A. Hutchinson (worker), Dr. T. H. Patterson (government), J. C. Nicholson (worker), J. W. Stewart (employer), Kalmen Kaplansky (worker), D. A. Page, J. R. Kimpton and K. G. K. Baker (employer), Gil Schonning (government), Edouard Larose (worker) and J. M. Soules (employer). Substitute Government Delegate Max Wershof and Government Advisers H. Jay and I. S. McArthur were absent when the photograph was taken. (Photo by G. G. Vuarchex, Geneva)

Requests the Governing Body of the International Labour Office to ask the Director-General:

(a) to undertake studies of measures to promote and maintain employment, as approved from time to time by the Governing Body; and

(b) to communicate this resolution at an early date to the governments of member states and through them to employers' and workers' organizations.

### Debate on Director-General's Report

#### H. McD. Sparks

H. McD. Sparks, Vice President of Industrial and Public Relations, Northern Electric Company Limited, Montreal, Canada's Employer Delegate, said that in his country it was being recognized that more and better education was essential not merely to maintain and improve the production of material wealth but also to ensure, by developing their latent capacities, that people would be able to deal constructively with the many changing social issues.

"This is in full accord with the freedom of enterprise principle in which we firmly believe—that the best way to help people in this as in any field is to help them to help themselves," he said.

"Another point emphasized by the Director-General commends itself to us as employers, namely the vital importance of doing everything possible to improve employee-employer relations. Standard-setting, as experience has shown, is not enough; there must be positive co-operation between Management and Labour to enable them to deal with the problems of the rapidly changing world of today," he added.

#### James P. Mitchell

In the debate on the Director-General's Report, James P. Mitchell, U.S. Secretary of Labor, said that the United States has for 10 years placed its principal reliance for the building of world peace and the advancement of mankind upon the endeavours of the United Nations and its family of specialized organizations, of which the ILO is a senior member.

"Thus we have an opportunity and a responsibility here in the ILO to contribute to the achievement of lasting peace among the peoples of the world at the same time that we discuss the improvement of working and living standards for the workers of the world," he declared.

## Rt. Hon. Iain Macleod

"The Director-General's Report this year," said Rt. Hon. Iain Macleod, Minister of Labour and National Service for Britain, "is both an inquiry and a challenge about the future, because the Director-General asks for our advice about the need for a new departure. He says in effect that, while we have gone a long way in setting agreed basic labour standards in our modern society, such standards cover only part of the ground and there still remains the need to understand and to deal constructively with social problems as they arise, and this need is not one that can be met just by a code of rules."

Mr. Macleod went on to say that ILO has its greatest opportunity to do the greatest good in countries where the living standards are lowest, and that top priority should be given to the needs of such countries when policy of the ILO is being made.

While he agreed with the Director-General about the value and importance of the "traditional" research, information and standard-setting of the ILO, he thought the Conference now had to give more attention than in the past to the application of the standards that have been set.

By this I mean not only supervision of the application of ratified Conventions, although that indeed is very important, but the promotion by the ILO itself of the application of standards irrespective of the ratification of Conventions.

I agree too with Mr. Morse that by promoting an understanding of social problems and of differing viewpoints concerning them we do assist in the framing of specific proposals for their solution, and we encourage those who can and should deal with them to do so for themselves, within the context of their own circumstances.

Mr. Macleod stressed the need for a high degree of organization in industry, and for responsible leadership, not only for effective service to the members of the individual industrial organizations, but also for the good of the nation as a whole.

"The representatives of organized industry have a vital part to play in the wider field of general economic and social progress, and this clearly requires leadership in industry of a very high order; but it also demands partnership, and in my own country top-level consultation between the Government and industry has become a firmly established feature of our national life." He then cited three examples of this consultation:

1. The National Joint Advisory Council, composed of representatives of the British Employers' Confederation, the Trades Union Congress and the management boards of

the nationalized industries, to advise the Minister of Labour on matters of common interest to employers and employees.

2. The National Production Advisory Council on Industry, a council with a very large membership, including the BEC and the TUC, to advise the Government on industrial conditions and on general questions of production.

3. The Economic Planning Board, set up to give advice to the Government on the best use of the economic resources of the United Kingdom, sits under a chairman appointed by the Government and includes representatives of industry and of the trade unions as well as a number of senior government officials.

There is in my country hardly a Government department that does not have an advisory or a consultative body on which there are representatives of organized employers and organized workers, and this kind of co-operation is not confined to permanent standing bodies, because frequently the Government has need of an independent examination of social and industrial problems and wishes to entrust this examination to an independent body of experienced persons on whose judgment it can rely, and almost always such a body contains members who are drawn from industry.

Now I believe that this readiness to give the Government the benefit of their experience as men of affairs is of inestimable value to Government, but I also believe that it is of great benefit to industry itself, and I think both the trade unions and the employers would agree with that...

Mr. Macleod thought the tripartite approach of the ILO is the right one not only in the international but in the national sphere. "Of course the machinery for consultation will differ but the conception of partnership should remain," he said. "I do not believe that a country's problems can be solved by governments alone or trade unions alone or employers alone—or, indeed, by any two of them but only by the united efforts of the three parties."

## Director-General's Reply

The Director-General recalled, in his reply to the discussion on his Report, that in his Report he had raised a number of questions about the future evolution of ILO activity.

"Virtually every statement in the discussion," said Mr. Morse, "confirmed the importance of directing the ILO's work towards the problems of the underdeveloped countries. The success of the ILO, as the Indian Worker Delegate put it, will be judged by what it can do to close the gap in social standards between the industrialized and less developed countries." Otherwise, he warned, the ILO would cease to have any attraction to those who have been left behind.

Referring to the beginning of great changes in the societies of Asia, the Middle East, Africa and certain parts of Latin America, the Director-General said: "Social problems of these countries cannot any longer be seen in the perspective of a gradual relief of seemingly eternal poverty. They must be seen in terms of a dramatic race against time to create sound foundations for the new emerging society. It is a race in which the resources we dispose of are quite inadequate to the needs and opportunities for action."

Mr. Morse did not find that the discussion called for a radical re-orientation of the ILO's work towards new subjects or away from present fields of activity. The ILO must continue and extend its work in the fields of training, productivity and social security.

"There has also been general agreement," Mr. Morse found, "upon the worth of the ILO's efforts to promote human rights. There is no question in my mind but that this is the fundamental aspect of our work without which the rest has but little value."

The Director-General commented on the affirmative response to the question in his Report whether the ILO should not expand its educational work.

While workers' education is already a well-established part of the ILO's activities, management development has up to now been dealt with in a partial way through activities concerned with raising productivity, training supervisors and promoting better human relations. As yet we have no comprehensively conceived program in this field. The Conference has approved a resolution advocating such a program. I would judge from the discussions that there is broad support for the idea of such a program. The ILO will look to the employers particularly to make a positive contribution towards it.

### Credentials Committee

The Conference refused to admit the government, employer and worker delegates from Hungary, as well as their technical advisers.

The vote on the Government delegates was 142 in favour of refusal, 48 against, with 29 abstentions. The vote on the refusal to admit the employer delegate was 146 for, 47 against, with 23 abstentions, and that on the refusal to admit the worker delegate 146 for, 48 against, with 23 abstentions.

The refusals of admission obtained the necessary two-thirds majority.

The votes were taken on the basis of reports from the Conference's credentials committee on objections laid down at the beginning of the session.

In the debate on the question of the Hungarian delegates, Arthur H. Brown, Deputy Minister of Labour and head of the Canadian delegation, pointed out that when

questions involving the possible rejection of government credentials involve objections to government credentials which are also before the United Nations, the ILO has always refused to adopt a solution that would not conform to the attitude adopted by the United Nations.

This policy was followed and given effect to by last year's Conference in dealing with the objections taken to the credentials of the Hungarian Government delegation. It is a policy with which my Government is in general agreement.

However, there are new and exceptional factors which are involved in the consideration of the credentials issue at this Conference arising out of the tragic developments which have recently taken place in Hungary.

The callous execution of Imre Nagy and General Maletier has shown that the persons who now control the fate of the Hungarian people have remained untouched by the world-wide condemnation which followed their utter disregard for the assurances given that these victims would not be molested... The fact that the information concerning these brutal executions was first made known from a Moscow source is a reminder of the part played by the Soviet Government in the matter...

Mr. Brown expressed regret that the Conference was not permitted to adopt an emergency resolution condemning the executions. "It is my conviction that a Conference resolution, which could also have been transmitted to the United Nations, would have had a wide impact upon and response from world opinion," he said.

The Canadian Government Delegates would vote to reject the credentials of the Hungarian government delegation and of the Hungarian worker and employer delegations, he announced.

"In doing so," he went on, "I should like to make it clear that this action is without prejudice to whatever position my Government might deem it appropriate to take in the light of the then existing circumstances when the basic issue concerning the Hungarian Government delegates is under further consideration by the United Nations."

The credentials committee also decided that it was not in a position to receive objections which had been lodged against the nomination of the workers' delegation of the Union of South Africa, Italy, France, Chile and Spain, on the grounds that these objections were based on facts and allegations which had already been examined at previous sessions.

The Conference was called on to take a decision on the question of whether employer delegates from certain Eastern European countries should be seated as titular members of the technical committees, contrary to the recommendation of a majority of the Employers' Group.

Employer delegates of Albania, Byelorussia, Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, the USSR and Yugoslavia requested the Conference to seat them as titular members on the committees. Their proposal was defeated. The vote was 53 for, 115 against, with 51 abstentions.

A proposal was then put forward by the government delegates of France, Italy, Pakistan and the United Kingdom that these employer delegates should be seated in the committees as deputy members. This proposal was also defeated, the voting being 63 for, 97 against, with 53 abstentions

## Canadian Participation

Canadian Government Delegates were appointed to six committees at the Conference: selection, resolutions, discrimination, health services, fishermen, and hours of work. A. H. Brown was named Chairman of the committee on discrimination.

The Canadian Employer Delegate and his advisers were appointed to six com-

mittees, as follows: H. McD. Sparks to the selection committee; J. M. Soules to the resolutions committee, of which he was named Vice Chairman; J. R. Kimpton to the committee on discrimination; D. A. Page to the committee on health services; J. W. Stewart to the committee on fishermen; and K. G. K. Baker to the committee on hours of work.

The Canadian Worker Delegate and his advisers were appointed to seven committees, as follows: Claude Jodoin and Kalman Kaplansky to the selection committee; Claude Jodoin to the resolutions committee, of which he was named Vice Chairman; Kalman Kaplansky to the committee on discrimination, of which he was named a Vice Chairman; Edouard Larose to the committee on plantations; J. C. Nicholson to the committee on health services; A. A. Hutchinson to the committee on fishermen; and M. R. Mathieu to the committee on hours of work.

The delegates were listed and identified in the June issue, page 621.

## Text of Convention Concerning Discrimination in respect of Employment and Occupation

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Forty-second Session on 4 June 1958, and

Having decided upon the adoption of certain proposals with regard to discrimination in the field of employment and occupation, which is the fourth item on the agenda of the session, and

Having determined that the proposals shall take the form of an international Convention,

Considering that the Declaration of Philadelphia affirms that all human beings, irrespective of race, creed or sex, have the right to pursue both their material well-being and their spiritual development in conditions of freedom and dignity, of economic security and equal opportunity, and

Considering further that discrimination constitutes a violation of rights enunciated by the Universal Declaration of Human Rights;

adopts this 25th day of June of the year one thousand nine hundred and fifty-eight the following Convention, which may be cited as the Discrimination (Employment and Occupation) Convention, 1958:

### Article 1

1. For the purpose of this Convention the term "discrimination" includes—

(a) any distinction, exclusion or preference made on the basis of race, colour, sex, religion, political opinion, national extraction, or social origin which has the effect of nullifying or impairing equality

of opportunity or treatment in employment or occupation;

(b) such other distinction, exclusion or preference which has the effect of nullifying or impairing equality of opportunity or treatment in employment or occupation as may be determined by the Member concerned after consultation with representative employers' and workers' organizations, where such exist, and with other appropriate bodies.

2. Any distinction, exclusion or preference in respect of a particular job based on the inherent requirements thereof shall not be deemed to be discrimination.

3. For the purpose of this Convention the terms "employment" and "occupation" include access to vocational training, access to employment and to particular occupations, and terms and conditions of employment.

### Article 2

Each Member for which this Convention is in force undertakes to declare and pursue a national policy designed to promote, by methods appropriate to national conditions and practice, equality of opportunity and treatment in respect of employment and occupation, with a view to eliminating any discrimination in respect thereof.

### Article 3

Each Member for which this Convention is in force undertakes, by methods appropriate to national conditions and practice—

(a) to seek the co-operation of employers' and workers' organizations and other appropriate bodies in promoting the acceptance and observance of this policy;

(b) to enact such legislation and to promote such educational programmes as may be

calculated to secure the acceptance and observance of the policy;

- (c) to repeal any statutory provisions and modify any administrative instructions or practices which are inconsistent with the policy;
- (d) to pursue the policy in respect of employment under the direct control of a national authority;
- (e) to ensure observance of the policy in the activities of vocational guidance, vocational training and placement services under the direction of a national authority;
- (f) to indicate in its annual reports on the application of the Convention the action taken in pursuance of the policy and the results secured by such action.

#### Article 4

Any measures affecting an individual who is justifiably suspected of, or engaged in, activities prejudicial to the security of the State shall not be deemed to be discrimination, provided that the individual concerned shall have the right to appeal to a competent body established in accordance with national practice.

#### Article 5

1. Special measures of protection or assistance provided for in other Conventions or Recommendations adopted by the International Labour Conference shall not be deemed to be discrimination.

2. Any Member may, after consultation with representative employers' and workers' organizations, where such exist, determine that other special measures designed to meet the particular requirements of persons who, for reasons such as sex, age, disablement, family responsibilities or social or cultural status, are generally recognized to require special protection or assistance, shall not be deemed to be discrimination.

#### Article 6

Each Member which ratifies this Convention undertakes to apply it to non-metropolitan territories in accordance with the provisions of the Constitution of the International Labour Organization.

#### Article 7

The formal ratifications of this Convention shall be communicated to the Director-General of the International Labour Office for registration.

#### Article 8

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Director-General.

3. Thereafter, this Convention shall come into force for any Members twelve months after the date on which its ratification has been registered.

#### Article 9

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the

Convention first comes into force, by an act communicated to the Director-General of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

#### Article 10

1. The Director-General of the International Labour Office shall notify all Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the second ratification communicated to him, the Director-General shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

#### Article 11

The Director-General of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding Articles.

#### Article 12

At such times as it may consider necessary the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall examine the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

#### Article 13

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides—

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 9 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

#### Article 14

The English and French versions of the text of this Convention are equally authoritative.

## Text of Recommendation Concerning Discrimination in respect of Employment and Occupation

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Forty-second Session on 4 June 1958, and  
Having decided upon the adoption of certain proposals with regard to discrimination in the field of employment and occupation, which is the fourth item on the agenda of the session, and

Having determined that these proposals shall take the form of a Recommendation supplementing the Discrimination (Employment and Occupation) Convention, 1958;

adopts this 25th day of June of the year one thousand nine hundred and fifty-eight the following Recommendations, which may be cited as the Discrimination (Employment and Occupation) Recommendation, 1958;

The Conference recommends that each Member should apply the following provisions:

### I. DEFINITIONS

1. (1) For the purpose of this Recommendation the term "discrimination" includes—

(a) any distinction, exclusion or preference made on the basis of race, colour, sex, religion, political opinion, national extraction, or social origin which has the effect of nullifying or impairing equality of opportunity or treatment in employment or occupation;

(b) such other distinction, exclusion or preference which has the effect of nullifying or impairing equality of opportunity or treatment in employment or occupation as may be determined by the Member concerned after consultation with representative employers' and workers' organizations, where such exist, and with other appropriate bodies.

(2) Any distinction, exclusion or preference in respect of a particular job based on the inherent requirements thereof is not deemed to be discrimination.

(3) For the purpose of this Recommendation the terms "employment" and "occupation" include access to vocational training, access to employment and particular occupations, and terms and conditions of employment.

### II. FORMULATION AND APPLICATION OF POLICY

2. Each Member should formulate a national policy for the prevention of discrimination in employment and occupation. This policy should be applied by means of legislative measures, collective agreements between representative employers' and workers' organizations or in any other manner consistent with national conditions and practice, and should have regard to the following principles:

(a) the promotion of equality of opportunity and treatment in employment and occupation is a matter of public concern;

(b) all persons should, without discrimination, enjoy equality of opportunity and treatment in respect of—

(i) access to vocational guidance and placement services;

(ii) access to training and employment of their own choice on the basis of individual suitability for such training or employment;

(iii) advancement in accordance with their individual character, experience, ability and diligence;

(iv) security of tenure of employment;

(v) remuneration for work of equal value;

(vi) conditions of work including hours of work, rest periods, annual holidays with pay, occupational safety and occupational health measures, as well as social security measures and welfare facilities and benefits provided in connection with employment;

(c) government agencies should apply non-discriminatory employment policies in all their activities;

(d) employers should not practise or countenance discrimination in engaging or training any person for employment, in advancing or retaining such person in employment, or in fixing terms and conditions of employment; nor should any person or organization obstruct or interfere, either directly or indirectly, with employers in pursuing this principle;

(e) in collective negotiations and industrial relations the parties should respect the principle of equality of opportunity and treatment in employment and occupation, and should ensure that collective agreements contain no provisions of a discriminatory character in respect of access to, training for, advancement in or retention of employment or in respect of the terms and conditions of employment;

(f) employees' and workers' organizations should not practise or countenance discrimination in respect of admission, retention of membership or participation in their affairs.

3. Each Member should—

(a) ensure application of the principles of non-discrimination—

(i) in respect of employment under the direct control of a national authority;

(ii) in the activities of vocational guidance, vocational training and placement services under the direction of a national authority;

(b) promote their observance, where practicable and necessary, in respect of other employment and other vocational guidance, vocational training and placement services by such methods as—

(i) encouraging state, provincial or local government departments or agencies and industries and undertakings operated under public ownership or control to ensure the application of the principles;

(ii) making eligibility for contracts involving the expenditure of public funds dependent on observance of the principles;

(iii) making eligibility for grants to training establishments and for a

licence to operate a private employment agency or a private vocational guidance office dependent on observance of the principles.

4. Appropriate agencies, to be assisted where practicable by advisory committees composed of representatives of employers' and workers' organizations, where such exist, and of other interested bodies, should be established for the purpose of promoting application of the policy in all fields of public and private employment, and in particular—

- (a) to take all practicable measures to foster public understanding and acceptance of the principles of non-discrimination;
- (b) to receive, examine and investigate complaints that the policy is not being observed and, if necessary by conciliation, to secure the correction of any practices regarded as in conflict with the policy; and
- (c) to consider further any complaints which cannot be effectively settled by conciliation and to render opinions or issue decisions concerning the manner in which discriminatory practices revealed should be corrected.

5. Each Member should repeal any statutory provisions and modify any administrative instructions or practices which are inconsistent with the policy.

6. Application of the policy should not adversely affect special measures designed to meet the particular requirements of persons who, for reasons such as sex, age, disablement, family responsibilities or social

or cultural status are generally recognized to require special protection or assistance.

7. Any measures affecting an individual who is justifiably suspected of, or engaged in, activities prejudicial to the security of the State should not be deemed to be discrimination, provided that the individual concerned has the right to appeal to a competent body established in accordance with national practice.

8. With respect to immigrant workers of foreign nationality and the members of their families, regard should be had to the provisions of the Migration for Employment Convention (Revised), 1949, relating to equality of treatment and the provisions of the Migration for Employment Recommendation (Revised), 1949, relating to the lifting of restrictions on access to employment.

9. There should be continuing co-operation between the competent authorities, representatives of employers and workers and appropriate bodies to consider what further positive measures may be necessary in the light of national conditions to put the principles of non-discrimination into effect.

### III. CO-ORDINATION OF MEASURES FOR THE PREVENTION OF DISCRIMINATION IN ALL FIELDS

10. The authorities responsible for action against discrimination in employment and occupation should co-operate closely and continuously with the authorities responsible for action against discrimination in other fields in order that measures taken in all fields may be co-ordinated.

## 139th Session of ILO Governing Body

Two resolutions adopted by the 42nd International Labour Conference, those on human rights and on measures to promote employment and action against unemployment (see above), will be transmitted immediately to the United Nations, it was decided at the 139th Session of the ILO Governing Body.

The meeting opened May 30, prior to the opening of the Conference, and held its last sitting June 27, after the close of the Conference.

The Governing Body also decided to communicate to the U.N. Economic and Social Council the report on the world employment situation that had been prepared by ILO Director-General David A. Morse.

Mr. Morse's report stressed the need for advance planning by governments to enable prompt action to be taken to "forestall or counter any unexpected turn for the worse in the world employment situation".

Ambassador Julio Barboza-Carneiro of Brazil was elected Chairman of the Governing Body for 1958-59. He succeeds Emilio

Calderon Puig, Mexico government representative on the Governing Body. Pierre Waline of France and Sir Alfred Roberts, United Kingdom, were re-elected Employer and Worker Vice-Chairmen, respectively.

### World Employment Situation

The report on the world employment situation notes that after several years in which unemployment was of limited importance in most economically developed countries, it has now become a matter of special concern to governments, employers and workers. Attention is focused in particular on the current recession in the United States, which, though by no means so severe as the crises of the 1930's, is nevertheless the most serious since the Second World War.

In Western Europe, some slackening of the rate of growth of industrial production has also resulted in relatively small increases in unemployment.

Most of the current rise in unemployment appears to be associated with a slackening in demand for, and consequently in output

of, manufactured goods, and in some countries, building. A few of the factors that have played a role in present economic difficulties are the reduced investment in capital goods, reductions in inventories, credit controls, and, in the United States, the decline in the demand for automobiles.

There is little evidence at the present time of any close relationship between the conditions leading to unemployment in Europe and in North America. To date the present unemployment is not an example of the classic case where a recession in one country tends to spread throughout the world.

Rather there has been a tendency for the boom in the production of capital goods to come to an end at roughly the same time in Europe and North America. At a later stage, of course, the situation may change.

The 1948-49 recession in the United States was followed by a balance of payments crisis in Europe. The 1953-54 recession, on the other hand, had relatively little effect on the economy of the rest of the world. Accordingly, the points that follow must be regarded as highly speculative.

There appears to be two quite separate ways in which a recession in the United States may affect employment in the rest of the world:

1. a decline in United States demand for exports from other countries may result in a corresponding fall in the level of total demand in these countries;

2. a fall in these countries' exports to the United States may result in a decline in their earnings of foreign exchange and consequently in their purchases of goods from other countries, especially those that require payment in dollars.

In order to prevent too great a decline in its foreign exchange reserves, a country may have to restrict its imports directly by import or exchange control, or check the demand for imports indirectly by measures of fiscal and monetary policy which will reduce internal demand.

Action of the first type may cause unemployment in certain industries due to shortage of imported raw materials, while action of the second type may cause more widespread unemployment.

### **National Measures against Unemployment**

The national measures against unemployment described in the ILO paper are grouped under four main headings according to whether they are designed to deal with unemployment arising from lack of demand, unemployment arising from difficulties in the organization of the employment market, unemployment in depressed

areas, and unemployment and underemployment in underdeveloped countries.

Particular attention is given to measures concerned with unemployment arising from lack of demand, because of the prevalence of this type of unemployment in certain countries at the present time.

One of the most striking trends of economic and social policy in the last two decades is the development of a whole series of new remedies against this type of unemployment. At the same time many old ideas have been discarded.

Public works programs and tax and credit policies are among the weapons governments can use. Many governments have established reserves of public works programs, and some offer inducements to private concerns to set up "crisis reserves"—funds set aside during periods of prosperity to be used during recessions.

Tax reductions may take many forms—lower income and corporate taxes, larger tax allowances for depreciation. Credit policies may also be used so as to encourage increased spending.

Recent trends in economic policy have also led to the creation of a series of "built-in stabilizers" in most industrial countries. Among them are:

The higher level of government spending, which is relatively unaffected by the factors that cause variations in private expenditure.

Progressive income taxes: as incomes fall the tax levied on them falls at a faster rate.

Unemployment insurance, which saves money in high employment periods and puts it back into circulation when unemployment rises.

The stabilizing of the incomes of fairly large groups of people through such devices as agricultural price support systems.

The growing strength of trade unions and changes in the generally accepted views on wage policy which make unlikely a substantial reduction in wage rates.

The cost for the community as a whole of frictional unemployment may be small compared with the advantages of freedom of choice and higher productivity that go with a flexible employment market.

The costs involved may, however, be extremely serious for at least some of the individuals concerned and there is every reason to make the fullest use of the techniques that have been developed to keep these costs to a minimum.

The present recession, which is already more severe than those of 1948-49 or 1953-54 and may also last longer, is a challenge to governments, especially those of economically developed countries, to show that they will

(continued on page 890)

Since August 16, 1956, no employee of the American Can Company's Montreal plant has suffered a lost-time accident. Up to May 13, this meant that the plant had worked 2,200,000 man-hours without a lost-time accident.

Before an audience of more than 500, the company and employees received several awards on May 13 for this outstanding achievement.

In 1955, accidents in this plant had reached serious proportions. A senior management representative said that accident prevention was at a very low level at that time. Today, the picture is entirely changed. The company, in co-operation with the union, the Can Workers Union (CLC), decided to take action to improve accident prevention and to cut lost-time accidents. Only two of the company's 65 plants have equalled the Montreal safety record attained as a result of this concentrated labour-management campaign, and in the province of Quebec only five of 2,200 plants registered with the Quebec Accident Prevention Association have reached the two million man-hour mark without lost-time accidents.

One of the first steps in this broad program of accident prevention was to organize a joint labour-management safety committee. Under the chairmanship of Personnel Superintendent Stanley Jacob, this committee has worked to co-ordinate the safety program.

The accident prevention committee meets once a month with the safety captains. The general accident prevention record in all the company's Canadian plants is reviewed and then the accident prevention situation in the Montreal plant is studied. Each safety captain reports for his department on his regular safety checks and also what action was taken as the result of his written reports. A representative of the Quebec Industrial Accident Prevention Association also attends each meeting.

\* \* \*

The *Marathon Mercury* states that Marathon Corporation of Canada Limited has been awarded a Certificate of Achievement in the 1957 Paper Industry Safety Contest conducted by the National Safety Council.

The Marathon mill reduced, since 1956, the frequency rate of disabling injuries to a point below the average for all plants competing in its group of the Pulp and Paper Mills Division.

Commenting on the award, Grant D. Ross, Manager of the Mill and Town Divisions, said that it was most gratifying to see the combined efforts of all acknowledged in this way. "I wish," he said, "to personally congratulate the co-operative effort of our employees in their program to eliminate disabling injuries in our plant."

The 1956 frequency rate (i.e., accidents per million hours worked) was 7.55. In 1957, this was reduced to 6.42 while the average for the group was 7.33.

\* \* \*

Two labour-management committees are presently functioning at *Le Droit*, one of Ottawa's large daily newspapers. One is made up of four shop employees, representing the hand and machine typesetting department, the stereotyping and rotary press department, and a representative of the company. The second consists of two commercial printing employees, representing typesetting and presses, and a representative of the company.

The newspaper's LMPC has been meeting regularly since March 1957. Suggestions made are given immediate consideration first with the employee making the suggestion, and then with the heads of the departments concerned. At the next meeting the employer's representative reports on the decisions made and gives explanations why any ideas not accepted have been rejected. Workers are free to comment on the company's decisions and, should the occasion arise, to present the suggestion again in a different form.

Among suggestions already accepted are: purchase of an additional number of tape machines for sticking plates; replacing the large wooden type with lead type, cast with new moulds; agreement between the various departments concerning the way in which certain new words should be written, and a new method of translating comic strips.

Establishment of Labour-Management Committees is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions, the Service provides various aids in the form of booklets, posters and films.

# INDUSTRIAL RELATIONS AND CONCILIATION

## Certification and Other Proceedings before the Canada Labour Relations Board

The Canada Labour Relations Board met for two days during June. The Board issued four certificates designating bargaining agents, ordered five representation votes, and granted one application for revocation of certification. During the month the Board received eight applications for certification and allowed the withdrawal of one application for certification.

### Applications for Certification Granted

1. General Drivers, Warehousemen and Helpers, Local 979, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of driver-helpers and warehouse employees of Hill the Mover (Canada) Limited, operating in and out of its Winnipeg terminal (L.G., June, p. 628).

2. International Association of Machinists, on behalf of a unit of maintenance and service personnel employed by TransAir Limited, St. James, Man. (L.G., July, p. 754).

3. International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, Local 990, on behalf of a unit of employees of Superior Cartage (Lakehead) Limited, Fort William, Ont. (L.G., July, p. 755).

4. Chalk River Technicians and Technologists, Local No. 1568 (CLC), on behalf of a unit of technicians employed by Atomic Energy of Canada Limited at Chalk River, Ont. The American Federation of Technical Engineers intervened. (L.G., July, p. 755).

### Representation Votes Ordered

1. Warehousemen & Miscellaneous Drivers' Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and MacCosham Storage and Distributing Company Limited, Kingston, Ont., respondent. (L.G., July, p. 754) (Returning Officer: G. A. Lane).

2. International Association of Machinists, applicant, and Pacific Western Airlines Ltd., Vancouver, respondent (L.G., July, p. 754) (Returning Officer: D. S. Tysoe).

3. Warehousemen & Miscellaneous Drivers' Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and Dew Moving and Warehousing Limited, Toronto, respondent (L.G., July, p. 754) (Returning Officer: T. B. McRae).

4. Teamsters, Chauffeurs, Warehousemen and Helpers, Local Union No. 880, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, Leamington Transport (Western) Limited, Winnipeg, respondent, and W. C. Austin, intervener (L.G., July, p. 755). The Board directed that only the name of the applicant union be on the ballot. (Returning Officer: A. B. Whitfield).

5. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, applicant, and Canadian Pacific Railway Company, respondent (Office of Data Centre, Montreal) (L.G., July, p. 755) (Returning Officer: C. E. Poirier).

### Revocation of Certification Granted

The Board granted an application for revocation of certification affecting W. K. Gutteridge, *et al*, applicants, International Association of Machinists, respondent and Eastern Air Lines Inc., respondent (L.G., July, p. 755).

### Applications for Certification Received

1. Warehousemen & Miscellaneous Drivers' Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehouse-

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

men and Helpers of America, on behalf of a unit of employees of C. A. Fraser Limited, Toronto. (Investigating Officer: T. B. McRae).

2. International Longshoremen's Association, Ind., on behalf of a unit of longshoremen employed by the Seaway Forwarding Agencies Limited, Sarnia, Ont. (Investigating Officer: A. B. Whitfield).

3. National Association of Broadcast Employees and Technicians, on behalf of a unit of employees of Northern Radio-Radio Nord Inc., Rouyn, Que. (Investigating Officer: C. E. Poirier).

4. Transport Drivers, Warehousemen and Helpers Union, Local 106, on behalf of a unit of employees of Smith Transport

Limited operating in and out of terminals located in Nova Scotia and New Brunswick. (Investigating Officer: C. E. Poirier).

5. Chalk River Atomic Energy Draftsmen, Local No. 1569 (CLC), on behalf of a unit of draftsmen employed by Atomic Energy of Canada Limited at Chalk River, Ont. (Investigating Officer: G. A. Lane).

6. Canadian Guards Association, on behalf of a unit of security guards employed by Canadian Arsenals Limited at Long Branch, Ont. (Investigating Officer: T. B. McRae).

7. Brotherhood of Railroad Trainmen, on behalf of a unit of yardmasters employed by The New York Central Railroad Company in its Canada Southern Division. (Investigating Officer: T. B. McRae).

### Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch also acts as the administrative arm of the Canada Labour Relations Board, in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and, international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to

the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's Newfoundland. The territory of two officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; three officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

8. Brotherhood of Locomotive Engineers, on behalf of a unit of locomotive engineers employed by the Canadian National Railways in its Newfoundland District (Investigating Officer: W. L. Taylor).

#### **Application for Certification Withdrawn**

United Steelworkers of America, applicant, and Canadian Arsenals Limited, respondent (Gun Ammunition Division, Lindsay, Ont.) (L.G., June, p. 628).

## **Conciliation and Other Proceedings before the Minister of Labour**

### **Conciliation Officers Appointed**

During June, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Eastern Canada Stevedoring Company Limited, Montreal, and International Longshoremen's Association, Local 1845 (Conciliation Officer: R. Trépanier).

2. B.C. Airlines Limited, Vancouver, and Canadian Brotherhood of Railway Employees and Other Transport Workers (Conciliation Officer: D. S. Tysoe).

3. Clarke Steamship Company, Quebec; Albert G. Baker Limited, Quebec; Quebec Terminals Limited, Quebec; and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Conciliation Officers: R. Trépanier and R. Duquette).

4. Polymer Corporation Limited, Sarnia, and Oil, Chemical and Atomic Workers International Union, Local 16-14 (Conciliation Officer: F. J. Ainsborough).

5. Marine Industries Limited, Montreal, and Seafarers' International Union of North America, Canadian District (Conciliation Officers: R. Trépanier and R. Duquette).

6. The J. P. Porter Company Limited, Montreal, and Seafarers' International Union of North America, Canadian District (Conciliation Officers: R. Trépanier and R. Duquette).

7. Canadian Dredge and Dock Company Limited, Toronto, and Seafarers' International Union of North America, Canadian District (Conciliation Officer: F. J. Ainsborough).

8. Russell Construction Limited, Toronto, and Seafarers' International Union of North America, Canadian District (Conciliation Officer: F. J. Ainsborough).

9. McNamara Construction Company Limited, Toronto, and Seafarers' International Union of North America (Conciliation Officer: F. J. Ainsborough).

10. Eldorado Mining and Refining Company, Port Hope, and United Mine Workers of America, District 50, Regina 77, Local 13173 (Conciliation Officer: F. J. Ainsborough).

11. Canadian Pacific Transport Company Limited, Winnipeg, and Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 198 (Conciliation Officer: J. S. Gunn).

12. Pacific Tanker Company Limited and Seafarers' International Union of North America, Canadian District (Conciliation Officer: G. R. Currie).

13. Northland Navigation Company Limited and Seafarers' International Union of North America, Canadian District (Conciliation Officer: G. R. Currie).

14. Union Steamships Limited and Seafarers' International Union of North America, Canadian District (Conciliation Officer: G. R. Currie).

15. Radio Roberval Inc. and the Syndicate of Employees of CHRL (Conciliation Officer: R. Duquette).

16. Marine Industries Limited (Dredging Division) and National Association of Marine Engineers of Canada Inc. (Conciliation Officers: R. Trépanier and R. Duquette).

### **Settlements by Conciliation Officers**

1. Construction Contractors of Whitehorse, Yukon Territory, Poole Construction Company Limited, Dawson and Hall Limited, Whitehorse, Y.T., and Local 2499, United Brotherhood of Carpenters and Joiners of America (Conciliation Officer: D. S. Tysoe) (L.G., July, p. 755).

2. Hill the Mover (Canada) Limited, Vancouver, and General Truck Drivers and Helpers Union, Local 3 (Conciliation Officer: D. S. Tysoe) (L.G., July, p. 755).

3. Clarke Steamship Company Limited, Quebec; Albert G. Baker Limited, Quebec; Quebec Terminals Limited, Quebec; and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Conciliation Officer: R. Duquette) (*see above*).

4. Eastern Canada Stevedoring Company Limited, Montreal and International Longshoremen's Association, Local 1845 (Conciliation Officer: R. Trépanier) (*see above*).

## **Conciliation Board Appointed**

Canadian Pacific Railway Company (Dining, Cafe and Buffet Car Employees) and Brotherhood of Railroad Trainmen (no previous conciliation officer appointed).

## **Conciliation Boards Fully Constituted**

1. A Board of Conciliation and Investigation was established in June to deal with a dispute between the Newfoundland Employers Association Limited, St. John's, and Longshoremen's Protective Union (St. John's) (L.G., June, p. 630) with Prof. Moses M. Morgan, St. John's, as Chairman. Prof. Morgan was appointed on the joint recommendation of the other two members Capt. M. G. Dalton and Lawrence J. Daly, both of St. John's, who were previously appointed on the nomination of the company and union respectively.

2. A Board of Conciliation and Investigation was established in June to deal with a dispute between the Union Steamships and Tidewater Shipping Company, Vancouver and National Association of Marine Engineers of Canada, Inc. and Canadian Merchant Service Guild, Inc. (L.G., Nov. 1957, p. 1320) with Adam Bell, Victoria, as Chairman. Mr. Bell was appointed in the absence of a joint recommendation from the other two members, P. E. Ayhrhart and Elwyn Hopkins, both of Vancouver, who were previously appointed on the nomination of the companies and unions respectively.

## **Board Reports Received During Month**

1. Association of Lake Carriers (Canada Steamship Lines Limited, N. M. Paterson and Sons Limited, Colonial Steamships Limited, Upper Lakes and St. Lawrence Transportation Company Limited, Mohawk Navigation Company Limited, Hall Corporation of Canada, Beaconsfield Steamships Limited and Sincennes-McNaughton Line Limited, La Verendrye Line Ltd.) and National Association of Marine Engineers of Canada, Inc. (L.G., May, p. 495). The text of the report is reproduced below.

2. Western Union Telegraph Company, Cable Division, and American Communications Association (L.G., April, p. 391). The text of the report is reproduced below.

## **Settlement Following Board Procedure**

Quebec North Shore and Labrador Railway Company and Lodge 767, International Association of Machinists, Local 96, Brotherhood of Maintenance of Way Employees and Lodge 217, Brotherhood of Railroad Signalmen of America (L.G., July, p. 756).

## **Strike Following Board Procedure**

Canadian Pacific Railway Company (British Columbia Coast Steamship Service) and Canadian National Railways (Pacific Coast Service) and National Association of Marine Engineers of Canada, Inc. and Canadian Merchant Service Guild, Inc. (L.G., June, p. 633). Stoppage of work occurred on CPR vessels on June 24.

# **Report of Board in Dispute between**

Association of Lake Carriers (Canada Steamship Lines Limited, N. M. Paterson & Sons Limited, Colonial Steamships Limited, Upper Lakes & St. Lawrence Transportation Company Limited, Mohawk Navigation Company Ltd., Hall Corporation of Canada, Beaconsfield Steamships Limited, and Sincennes-McNaughton Line Limited)

and

Seafarers' International Union of North America

The Board of Conciliation and Investigation appointed under the provisions of the Industrial Relations and Disputes Investigation Act in this matter presents herewith its unanimous report.

The Board was composed of: H. Carl Goldenberg, Esq., QC, Chairman; Francis Gerity, Esq., nominee of the employer; and Colin A. Gravenor, Esq., nominee of the bargaining agent.

Proceedings before the Board opened in Montreal on May 12, 1958, and were continued at various dates thereafter. Each party presented its case at length and was afforded an opportunity for rebuttal.

Having heard and examined the submissions of the parties, the Board unanimously finds and recommends as is hereinafter set out.

During June, the Minister of Labour received the unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Seafarers' International Union of North America, Canadian District, and the Association of Lake Carriers, Montreal, (Canada Steamship Lines Limited, N. M. Paterson & Sons Limited, Colonial Steamships Limited, Upper Lakes & St. Lawrence Transportation Company Limited, Mohawk Navigation Company Ltd., Hall Corporation of Canada, Beaconsfield Steamships Limited, and Sincennes-McNaughton Line Limited).

The Board was under the chairmanship of H. Carl Goldenberg, QC, Montreal, who was appointed by the Minister in the absence of a joint recommendation from the other two members, Francis Gerity, Toronto, and Colin A. Gravenor, Montreal, nominees of the companies and unions respectively.

The text of the report is reproduced here.

## Part I

### *General Considerations*

The Board finds it necessary at the outset to consider the general situation of the industry, a subject with which both parties dealt fully in their submissions. Our recommendations must be read in the light of our consideration of these submissions since the absence of agreement between the parties on the principal matters in dispute arises from a wide disparity in their views on the general condition of the industry and its prospects for profitable employment.

It is the planned opening of the St. Lawrence Seaway in the early spring of the year 1959 which weighs heavily with the parties. The employer submits that: "It is of the utmost importance in these proceedings to recognize that the Companies are now in the midst of what is in all probability the most critical period in the history of the industry."

The union says: "There are, nevertheless, certain advantages which the Canadian Great Lakes Shipping Industry will derive from this project and which, incidentally, have an important bearing on the merits of the various requests of the unlicensed employees."

The Board has, therefore, felt it necessary to give consideration to these diverse views on the probable effects of the Seaway development.

The employer filed with the Board as part of its submission a copy of the Report of the Royal Commission on Coasting

Trade, which was tabled in the House of Commons during the course of these proceedings, and invited our particular attention to pages 97, 98, 99, 100, 101, 107, 115 and 136 paragraph E thereof. In order to show the nature of the problem involved and its bearing upon this dispute, we here reproduce only one paragraph appearing on page 107 of the Report:

The greatest concern expressed was with respect to the future of Canadian registered lakers in competition for inland bulk cargoes, including the inland movement of grain destined for export. The trades at stake are both coasting and international. *The fears appear justified.* Under present tax structures, a specialized ocean-going bulk carrier on U.K. registry may have an advantage not only over a Canadian registered laker built in Canada but also over one built in the United Kingdom or otherwise acquired at comparable costs. While existing lakers would be operated for their remaining useful life, competition may force Canadian operators to arrange in future for the seasonal chartering of suitable United Kingdom vessels built for the purpose.

(The emphasis supplied is ours.)

The Report, as is generally known, is the result of an exhaustive inquiry by the Commission and is based on oral and written submissions and other material presented in the course of lengthy hearings at the various ports and in other places across Canada. This Board must take cognizance of its findings.

Our analysis of the situation leads us to conclude that the industry and, therefore, its employees face an uncertain future, which lends emphasis to the difficulties with which we have been confronted. This uncertainty arises from the competition which is in prospect from ships of Commonwealth and foreign registry. It must be conceded that these ships can be built and operated at substantially lower cost than the ships of the Association of Lake Carriers. The employer has not hitherto had to meet such competition except from such small vessels as have been able to pass through the St. Lawrence Canal system, a requirement that severely restricted their carrying capacity.

Stability with its necessary ingredient, labour peace, is considered by the Board to be essential at this time. The Board recognizes the fact that the employees have made very substantial progress in wages, hours, and working conditions during the past few years. It is of the opinion that some of the further objectives which they may seek would be better deferred until the employer has had an opportunity to prepare to meet the anticipated com-

petition. Amongst the problems which the employer faces are the tolls which will be charged for the use of the Seaway and the requirement of considerable financing to build replacements for obsolete ships which cannot be expected to use the new facilities economically. There are also other problems to be solved.

WE ARE, THEREFORE, OF THE OPINION THAT THE INDUSTRY AT THIS STAGE MUST BE ASSURED OF A MINIMUM PERIOD OF STABILITY AND THAT THE MINIMUM IS AT LEAST TWO YEARS. ACCORDINGLY:

- (1) We recommend a two-year collective agreement, and this recommendation is basic.
- (2) We must also emphasize that our recommendations which now follow, considered as a whole, are, in our opinion, the maximum concessions that each party can fairly be asked to make at the present time.

## Part II

### *Principal Issues*

#### 1. *Hours of Work* (Union Demand No. 11)

The union demands a normal work week of five days of eight hours each, Monday through Friday, and compensatory payment for all hours worked in excess of forty hours per week. The employer submits that the nature of the operation on the Great Lakes makes it physically impossible to inaugurate a regular forty-hour week. Since neither party was prepared to recede from its position, the door was closed to discussion of an alternative basis.

Having considered the representations of the parties, the Board finds that three important facts emerge, of which it must take cognizance:

*First:* The industry is a seasonal one having some eight months of the year in which navigation can be safely conducted. Even where the full season of navigation is available to the employer, cargoes do not always offer so as to enable the ships to be continuously employed.

*Second:* The nature of the cargo carried, together with the methods of loading and discharge, make rapid turn-around at terminal ports a prime consideration of efficient management.

*Third:* It appears to us to be impossible for an owner operating on the Great Lakes to schedule his operation in such a way as to reproduce conditions of shore employment to which a 5-day 40-hour week can be effectively applied. There is, further, an apparent difference between the shipping

operation on the Great Lakes and vessels operating in a regular and scheduled ferry service.

Considering all of the foregoing, as well as the actual and potential competitive aspects of the Great Lakes operation, the Board finds that it cannot approve the union's demand. However, since the employees, owing to the nature of the employment which they have voluntarily chosen, are not in a position to enjoy some of the benefits available to employees in other industries, the Board is of the opinion that they are entitled to a compensatory payment in lieu thereof and, accordingly, FINDS AND RECOMMENDS AS FOLLOWS:

An employee shall receive 16 additional days' pay provided he serves *continuously* aboard ship from the time of spring fit-out to the completion of lay-up in the fall, or has been absent for reasons satisfactory to the Master.

In making this recommendation the Board has taken cognizance of the provision of the last agreement entitling employees to receive 14 days' pay in lieu of vacation, if they have served continuously during the navigation season. The implementation of the Board's recommendation should contribute toward a reduction in the rate of employee turn-over and will materially benefit the employee in the off-season of navigation when no ship-board employment is offering. In effect, the employee who serves continuously through the navigation season will receive a bonus which represents a further substantial increase in wages. Combined with the payment in lieu of vacation, he will draw pay for a full 30-day period following the termination of the navigation season.

#### 2. *Wages* (Union Demand No. 10)

In the last agreement between the parties wages were on a 30-day monthly basis, 8 hours per day. The union now demands wages on an hourly basis with an increase of 10c. per hour or \$24.00 per month *over and above* the very substantial increase that is implicit in the proposed introduction of the 40-hour 5-day week without reduction in pay. It was submitted to the Board and not denied by the union that the total of the increase thus proposed ranges from 37.3 per cent to 49.9 per cent for all categories of employees. An additional percentage increase must ensue by reason of overtime necessarily incident to the employment of the vessels on each day of the navigation season. It was submitted by the employer that even without calculating the additional overtime, the pro-

posed wage increase would approximate \$5.5 million.

Having given careful consideration to the submissions of the parties and having examined relevant facts, including existing wage schedules and earnings and changes in the consumer price index since January 1, 1956, the Board rejects the union's demand and RECOMMENDS AS FOLLOWS:

The rates of pay of the employees shall be increased for each classification of employment by 9 per cent, of which an increase of 5 per cent shall be retroactive to the beginning of the 1958 navigation season and the remaining 4 per cent shall become effective at the beginning of the 1959 navigation season.

In making this recommendation the Board finds it cannot recommend the increase in overtime payments requested by the union. (Union Demand No. 19)

### 3. Manning Scale (Union Demand No. 9)

The union has requested that the employer place in effect a minimum manning scale for each vessel as an integral part of the collective agreement. The employer maintains that its ships are more than adequately manned, that it is subject to and bound by the provisions of the Canada Shipping Act, and that the requirements of its underwriters must be met in maintaining adequate insurance to cover the fleets.

The union's proposal is new. There was no provision for a manning scale in previous collective agreements between the parties and the Board notes that there is no such provision in the two collective agreements filed by the union with the Board. (Exhibit U-4 of the union brief and Exhibit U-15 filed in rebuttal.) In fact, the agreement in Exhibit U-4 submitted to us contains a provision that manning is an exclusive function of management. Article XII of this Exhibit declares, *inter alia*, that "the laying off and calling to work of employees in connection with any reduction or increase in the working forces, are the exclusive functions of management."

The basis of the employees' contention is contained in Exhibit U-5, which purports to show a manning scale in respect of each vessel owned by the members of the Association. The vessels mentioned vary very greatly in respect of age, dimension, method of propulsion, and deck machinery, which, of course, poses a very difficult problem to the Board in the consideration of the union's proposal. No further satisfactory evidence was presented to the Board as to the manning scales on vessels of the employer's fleet.

The adequate manning of steamships and the efficiency of personnel are generally conceded to be matters connected with the seaworthiness of the ship. In this respect the Board has taken notice of certain statutory provisions enacted by the Parliament of Canada, namely, The Canada Shipping Act, 1952, chapter 29, and The Criminal Code, 2-3 Elizabeth II, chapter 51. The attention of both parties is drawn, more particularly, to Section 407 of the Canada Shipping Act, which reads as follows:

407. (1) Every steamship registered in Canada shall be manned with a crew sufficient and efficient from the point of view of safety of life for the purpose of her intended voyage, and shall, during such voyage, be kept so manned.

(2) If any of the provisions of this section are not complied with in the case of any steamship, the owner, if in fault, is liable, in respect of each offence, to a fine not exceeding five hundred dollars, and the master, if in fault, is liable in respect of each offence, to a fine not exceeding two hundred and fifty dollars.

Accordingly, while the Board finds that it cannot recommend specific manning scales, it does not envisage "the wholesale slashing of ship's crews at the expense of the remaining personnel", as suggested in the union's brief. In its opinion such "wholesale" reductions might well constitute a violation of the foregoing statutory provisions. In addition, the employer must consider other applicable law and the basis of its insurance coverage.

Connected with this demand is a union demand in respect to qualified electricians. The union brief says:

As we have shown, it is a well-considered and authoritative opinion that the type of machinery of an electrical nature with which these employees work should be provided with a qualified electrician to keep it in safe operating order at all times.

The Board has carefully examined Exhibit U-5 and finds, for example, in the case of one of the employers, Canada Steamship Lines Limited, that an electrician is in fact borne on every one of its large modern vessels where presumably electric deck machinery is fitted. This is also found to be the case in self-unloading vessels. In the absence of more precise information or proof on this matter the Board is not in a position to recommend the addition of electricians to the personnel as requested. The Board cannot help but take note of the fact that in another dispute which it is hearing, affecting the National Association of Marine Engineers, the latter is demanding an increase in wages in part because of the installation of new electrical equipment on vessels for which the engineers are said to be responsible.

### Part III

#### *Other Issues*

1. *Vacation Pay* (Union Demand No. 1)—The Board is advised that the parties have reached an understanding on this issue and recommends that effect be given to such understanding.

2. *Statutory Holidays* (Union Demand No. 2)—The union demands penalty rates for work done on eight statutory holidays. The Board finds that this would involve a scheduling of steamship operations as in an industrial plant on shore, which is not practical, and, therefore, cannot recommend that this demand be granted.

3. *Other Conveniences* (Union Demand No. 3)—The Board is advised that the parties have reached agreement on this demand except as to two items, and recommends that effect be given to such agreement.

The remaining items in dispute are, first, a demand for the installation of electric fans if no other form of mechanical ventilation is provided. Due to the enumerated reasons given by the employer, we are unable to recommend that this demand be granted.

Secondly, the union demands that crew quarters shall be painted once yearly and that the date of such painting shall be stencilled on the bulkhead of each room or compartment. THE BOARD RECOMMENDS THAT IN THE INTERESTS OF MAINTAINING CLEAN AND TIDY QUARTERS, THE CREW QUARTERS SHALL BE PAINTED WHEN REASONABLY REQUIRED.

4. *Meals, Coffee and Light Lunches* (Union Demand No. 4)—The Board finds that the union's demand cannot be given practical effect on a steamship operation and therefore does not recommend that it be granted.

5. *Transportation* (Union Demand No. 5)—Clause (a) of this demand requests the payment of transportation to the homes of unlicensed personnel when a vessel is laid up on the close of its navigation for the season and also a refund of the fare from their homes to the vessel. THE BOARD RECOMMENDS THAT THE EMPLOYER SHALL FURNISH TRANSPORTATION TO THE EMPLOYEE'S HOME BUT NOT TO EXCEED A DISTANCE OF 500 MILES, AND SHALL ALSO REFUND TO AN EMPLOYEE WHO SHALL HAVE SERVED THE ENTIRE SEASON SINCE FIT-OUT OR WHO HAS BEEN ABSENT DUE TO ILLNESS OR ACCIDENT, THE AMOUNT

OF HIS FARE FROM HIS HOME BUT NOT TO EXCEED A DISTANCE OF 500 MILES.

With respect to item (b) of this demand, the Board is advised that the parties have reached agreement thereon and recommends that such agreement be implemented.

With respect to item (c), the Board is advised that agreement has been reached except with respect to the subsistence allowance. THE BOARD RECOMMENDS THAT THE RATE OF SUBSISTENCE ALLOWANCE BE FIXED AT \$4.00 PER DAY IN ADDITION TO REGULAR WAGES.

6. *Room and Meal Allowance* (Union Demand No. 6)—The Board is advised that the parties have agreed on a payment of \$1.00 per meal and \$4.00 for room per night when the employer does not provide room and board, and recommends that effect be given to this agreement.

7. *Tank, Bilge and Boiler Cleaning* (Union Demand No. 7)—Having heard the representations of the parties, the Board cannot recommend a penalty payment, as demanded by the union, when employees are required to clean tanks, bilges or inside boilers.

8. *Loss of Personal Belongings* (Union Demand No. 8)—The Board is advised that agreement has been reached on this demand except with respect to certain of its wording, and RECOMMENDS THAT THE CLAUSE BE REMOVED BY MUTUAL AGREEMENT.

9. *Hours of Work for the Deck and Engine Departments* (Union Demand No. 12)—The Board cannot recommend that this demand be granted and deals with it further in its consideration of the demands made by the employer.

10. *Hours of Work of the Catering Department* (Union Demand No. 13)—The Board finds that the clause in the last agreement between the parties relating to this matter is satisfactory and, therefore, does not recommend a change.

11. *Hours of Work when an Employee Fails to Report* (Union Demand No. 14)—The Board is advised that the parties have reached agreement on this demand and recommends that effect be given to such agreement.

12. *Hours of Work when Vessel Sails Without a Full Complement* (Union Demand No. 15)—The Board has considered the counter-proposal made by the employer and recommends that effect be given thereto.

13. *Hours of Work—Replacements* (Union Demand No. 16)—The Board is advised

that the parties have reached agreement on this demand and recommends that effect be given thereto.

14. *Hours of Work—Routine Duties* (Union Demand No. 17)—The Board has considered the union's demand and the counter-proposal of the employer. It does not find that it can recommend either proposal and, therefore, **RECOMMENDS THAT THE PROVISIONS OF CLAUSE 19 (g) OF THE LAST COLLECTIVE AGREEMENT BE RETAINED.**

15. *Fit-Out and Lay-Up* (Union Demand No. 18)—The Board does not find that it can recommend that the union's demand be granted but **RECOMMENDS THAT THE EMPLOYER GIVE A PREFERENCE TO MEMBERS OF THE UNION IN HIRING EMPLOYEES FOR THE WORK OF FIT-OUT AND LAY-UP.**

16. *Overtime and Overtime Payments* (Union Demand No. 20)—The Board cannot recommend payment for 15 minutes in which to dress when employees not on regular duty are called for overtime work.

17. *Overtime and Overtime Payments for Work of Less than One Hour* (Union Demand No. 21)—The Board is advised that the parties have reached agreement on this demand and recommends that effect be given to such agreement.

18. *Overtime and Overtime Payments for One-Half Hour Periods* (Union Demand No. 22)—The Board is advised that the parties have reached agreement on this demand and recommends that effect be given to such agreement.

19. *Overtime and Overtime Payments for Less Than Two Hours* (Union Demand No. 23)—The Board **RECOMMENDS THE RETENTION OF THE PROVISION OF THE LAST AGREEMENT IN THIS MATTER.**

20. *Overtime and Overtime Payments in Port* (Union Demand No. 24)—This is a demand for a new clause in the collective agreement which the Board does not find that it can recommend.

21. *Overtime and Overtime Payments—Firemen* (Union Demand No. 25)—The Board cannot recommend that this demand be granted.

22. *Overtime and Overtime Payments—Check Sheets* (Union Demand No. 26)—The Board is advised that the parties have reached agreement on this demand subject to a rewording of the proposed clause. It **RECOMMENDS THAT THE CLAUSE BE WORDED AS FOLLOWS:**

At the completion of any overtime work the employee and the Officer in charge shall both sign duplicate daily overtime sheets, which shall be supplied

by the Company, recording the duration of such work, which shall be countersigned and approved by the Master. In the event there is a disagreement, these overtime sheets shall be signed by both parties and marked "disputed" and referred to Article (4) of this agreement. One (1) copy of the sheet shall be given to the employee and the other retained by the Master.

23. *Longshore Work Done by Crew* (Union Demand No. 27)—The Board has been advised that the parties have reached agreement on this demand and recommends that effect be given to such agreement.

24. *Steward's Department* (Union Demand No. 28)—The Board finds that the clause in the last agreement dealing with this matter is satisfactory and does not recommend any change therein.

## Part IV

### *Employer's Demands*

1. *Hours of Work—Deckhands* (Employer's Demand No. 1)—We have dealt with this question in Part III hereof under the heading "Hours of Work for the Deck and Engine Departments" (Union Demand No. 12). The union's demand would further restrict the present work spread of 8 hours within a period of 16 hours as provided by Clause 19 (a) of the last agreement. The employer's position is that it should be able to obtain 8 hours' work from the deckhands in any 24-hour period so that the hours of work and rest might be arranged in a way compatible with the actual operations of the vessels. Overtime is in any case paid outside the work spread which is provided.

The Board appreciates the difficulties which have been encountered in giving effect to the clause of the last agreement and is of the opinion that if a more workable arrangement could be mutually agreed upon, it would be of benefit to both parties. It must be obvious that by restricting the hours of work in which the deckhands may be employed these ratings, in comparison with other members of the crew, will receive excessive overtime payments with resultant ill-feeling among the crew members who regard themselves as the more highly skilled workers. However, having had regard to this situation and having thus given it point, the Board feels unable at this stage, in the absence of mutual agreement between the parties, to revert to a stage antecedent to the last contract.

2. *Employer's Demand No. 2*—This demand is of the same general character as the preceding demand, and is presently

covered by Clause 19 (g) of the collective agreement. For the same reasons, the Board is unable to recommend any change.

3. *Employer's Demand No. 3*—The Board is in agreement with the employer's submission and **RECOMMENDS THAT THE WORD "TANKS" PRESENTLY APPEARING IN CLAUSE 17 OF THE COLLECTIVE AGREEMENT SHOULD BE REPLACED BY THE WORDS "WATER BOTTOMS"**.

The whole of the foregoing, comprising the unanimous report of the Board, is respectfully submitted this 12th day of June, 1958.

## Report of Board in Dispute between

### Western Union Telegraph Company, Cable Division and American Communications Association

Your Board of Conciliation, consisting of Mr. John J. Urie, employer nominee, and Mr. Jean Pare, union nominee, with His Honour Judge J. C. Anderson as Chairman, met the parties in the Federal Post Office Building in Montreal on May 13 and 14, 1958, and heard the full evidence and representations of both parties with respect to the issues in dispute.

The union representatives at the meetings on both these days were Mr. Victor Rabinovitz, Counsel, and Mr. Frank Lenahan, Secretary-Treasurer, Local 11.

The company representatives at the meetings on both days of the hearing were Mr. Alastair Macdonald, QC, Ottawa, and Mr. Gregory J. Gorman, Ottawa, as Counsel, and Mr. John A. Corty, Manager, Employee Relationships; Mr. L. G. Chapin, General Operations Manager; and Mr. F. G. Mesner, Administrative Assistant, International Communications.

The issues in dispute as referred to the Board were as follows:

1. *Wages.* The union asked that the company accord the employees in Quebec, Newfoundland and Nova Scotia the same wage levels as they pay the cable employees of the company in the United States. The company rejected this proposal and argued that its wages generally were comparable with wages paid for this kind of work in Canada. At the conclusion of negotiations the union had reduced its wage demand to 25c. an hour across-the-board, and the company had raised its proposal to one of 8c. an hour across-the-board.

2. *Other Issues.* In addition to the dispute over wages, still in dispute were union proposals for an additional holiday (the August Bank Holiday) over and above the

present eight paid holidays; double time for Sunday work; and double time for work performed on Christmas Day and New Year's Day, in addition to a regular day's pay which is accorded all employees.

At the conclusion of the hearings, since the union had not introduced any evidence or made any representations concerning the "*Other Issues*", the Board asked the union if the "*Other Issues*" were still before the Board, and the union indicated that it did not wish the Board to report on the "*Other Issues*", and that if the question of wages was settled, the "*Other Issues*" would be withdrawn.

The first day of the hearing was all taken up by the evidence and representations of the parties with respect to the issue of wages. The second day of the hearing was taken up in an attempt to conciliate the issues, and some progress was made in this direction, but at the conclusion of the hearing on the second day, the Board had not brought the parties together on the question of wages.

During June, the Minister of Labour received the unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between Western Union Telegraph Company, Cable Division, and American Communications Association.

The Board was under the chairmanship of His Honour Judge J. C. Anderson, Belleville, who was appointed by the Minister in the absence of a joint recommendation from the other two members, John J. Urie, Ottawa, and Jean Pare, Laval, Que., nominees of the company and union respectively.

The text of the report is reproduced here.

Therefore, the Board unanimously recommends to the parties that all issues referred to the Board be settled on the following basis:

1. The contract to run from January 1, 1958, to December 31, 1958.

2. As and from January 1, 1958, there be paid by the company an across-the-board increase in all classifications of 8 cents per hour.

3. In addition and added thereto, there be set aside by the company a sum of money, as and from January 1, 1958, amounting to 4.5 cents per hour, per employee, which shall be paid throughout the duration of the contract, and shall be used by the parties in a manner to be determined by them.

4. Failing agreement between the parties as to how and when the additional 4.5 cents per hour, per employee, is to be applied, the Board at the request of either party, and with the approval of the Minister of Labour, will reconvene with the

parties and attempt to seek approval of the parties as to the time and method that the additional 4.5 cents per hour per employee is to be applied, and on such reconvening if the Board is not able to bring about an agreement on the matter, it will then write a report covering its recommendations with respect to the same.

The Board understands that certain issues were settled in the course of collective bargaining, which are not in dispute between the parties, but any collective agreement will, of course, embody the basis of settlement of these issues which have already been mutually agreed upon.

All of which is respectfully submitted.

Dated at Belleville, Ont., this 2nd day of June, 1958.

(Sgd.) J. C. ANDERSON,  
Chairman.

(Sgd.) JOHN J. URIE,  
Member.

(Sgd.) JEAN PARE,  
Member.

## 139th Session of ILO Governing Body

(continued from page 878)

not tolerate severe or persistent unemployment and that they can combat it effectively with the wide range of measures that have been developed since the 1930's.

The recession is severe enough to provide an opportunity to gauge the effectiveness of many of the measures against unemployment that a *priori* seem workable but have not so far been put to the acid test of actual experience. The choice of the particular measures to be used must, of course, depend on the type of unemployment that exists and on the general economic background of the country concerned, but of the need for action there is no doubt.

Were any economically developed country, because of excessive caution or wishful thinking that recessions always cure themselves, to tolerate the want, suffering and frustration that severe and prolonged unemployment would bring in its train, and to fail to take all action within its power to restore employment to a normal level, there would be widespread dis-illusionment, both within and beyond its own borders, with its economic structure and social institutions.

Unemployment exists in a variety of forms, singly or in combination, and derives

from a variety of causes, the ILO report says. The correct identification of its nature and causes is of great practical importance since action that may be effective against one type of unemployment may be useless or even harmful when applied to another type.

As an example of this, the report points out that new investments to provide work for the unemployed would be wasteful if all that is required to end unemployment in a particular area is action by an employment service to move workers from one industry to another. A mass movement of manpower away from a depressed area may be wasteful if capital could be moved into the depressed area with a good prospect of reasonable returns on the investment.

Such possibilities of error demonstrate that every case of unemployment requires careful study as a basis for determining what type of action is required against it, the report warns.

## N.Y. State Raises Workmen's Compensation Benefits

The maximum benefit for workmen's compensation in New York state has been raised from \$36 to \$45 a week, and the minimum to \$20 a week.

The law now requires the state's Workmen's Compensation Board to include a

statement of facts in its decisions.

A new section on occupational loss of hearing was added to the compensation law, and the maximum benefit period for off-the-job disability was extended from 20 to 26 weeks.

# LABOUR LAW

## Labour Relations Legislation in 1958

Prince Edward Island, Ontario, Manitoba and Saskatchewan amend labour relations legislation this year. Manitoba amendment will bring Crown Corporations under Act, P.E.I. provides for government conciliation

Four provinces, Prince Edward Island, Ontario, Manitoba and Saskatchewan, amended their labour relations legislation this year.

The Manitoba amendment, effective April 10, brought Crown Corporations under the Act, set up a special procedure for dealing with disputes between the Corporation and its employees and prohibited the employees from going on strike in a situation which would likely be prejudicial to the public interest.

The Prince Edward Island Act was amended to provide for the first time for the appointment of a government conciliation officer to aid the parties to a dispute to reach a settlement of their differences.

Other changes dealt with the times for making application for certification in Ontario when a collective agreement is in effect, the composition of the Ontario and Saskatchewan labour relations boards and the length of agreements made between Ontario policemen and firemen and the municipal council.

A committee of the Ontario Legislature to inquire into the Labour Relations Act has concluded hearings but has not yet made its final report. The federal Industrial Relations and Disputes Investigation Act is also under review, the Minister of Labour having asked the principal labour and management organizations for suggested changes that might make the Act more effective in its application to the industries covered.

### Crown Corporations in Manitoba

Employees of specified Crown Corporations are brought under the Manitoba Labour Relations Act by a 1958 amendment to section 55 of the Act, which became effective April 10, 1958. Since the Act was passed, in 1948, civil servants and employees of government agencies were excluded thus:

55. This Act does not apply

(a) to Her Majesty in right of Manitoba or to employees of Her Majesty in right of Manitoba; or

(b) to any board, commission, association, agency, or similar body, whether incorporated or unincorporated, all members of which, or all the members of the board of management, board of directors, or other governing board, of which are appointed by an Act of the Legislature or by the Lieutenant-Governor in Council, or to the employees of any such board, commission, association, agency or similar body.

The Crown Corporations now brought under the Act are: The Manitoba Power Commission, The Manitoba Telephone Commission, The Manitoba Hydro-Electric Board, The Winnipeg Electric Railway and the Liquor Control Commission. According to press reports, the change will bring about 4,700 additional workers under the Act.

The majority of employees of Crown Corporations in Canada are covered by labour relations legislation but there is some variation in the way the legislation is applied.

Federal Crown Companies, which employ somewhere in the neighbourhood of 165,000 employees, are covered by the Industrial Relations and Disputes Investigation Act, in the same manner as employees in the industries subject to the jurisdiction of the Act, unless they are excluded by order in council. Only the National Research Council and some plants of Canadian Arsenals are now excluded, the Canadian Arsenals plants at Long Branch and Lindsay, Ont., which were formerly excluded, having been made subject to the Act on April 1, 1958.

Provincial Corporations commonly operate provincial and municipal utilities of various kinds such as hydro-electric systems,

This section, prepared by the Legislation Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

telephone systems, street railways, provincial liquor control boards and, in Saskatchewan, carry out in addition various other industrial and commercial enterprises. Provincial labour relations Acts vary somewhat in respect to coverage of such Corporations.

In Saskatchewan Her Majesty is stated to be an employer subject to the Act and employees of Crown Corporations are covered by the Trade Union Act in the same way as employees in industry generally.

The Newfoundland Labour Relations Act is like the federal Act. It specifically covers Crown Companies unless they are excluded by an order in council.

The New Brunswick Labour Relations Act excludes Crown Companies but provides that the Lieutenant-Governor in Council may bring them under the Act. The New Brunswick Electric Power Commission and the New Brunswick Liquor Commission have been brought under the Act by this method.

The Nova Scotia Trade Union Act does not apply to any "...board, commission or similar body of which any of the employees are subject to the Civil Service Act or the Public Service Superannuation Act or to the employees of... any such board, commission or other body". An order in council passed in 1956 states the right of government employees who are not covered by the Civil Service Act to become members of trade unions and establishes a procedure for negotiations between such employees and their employer apart from the procedure which applies to industrial employees under the Trade Union Act. The Nova Scotia Power Commission and the Nova Scotia Liquor Commission are dealt with under this Order.

The Acts of Prince Edward Island, Quebec, Ontario, Alberta and British Columbia make no mention of coverage of Crown Companies. The general rule of statutory interpretation is that if it is not specifically stated in the legislation that Her Majesty is bound, then the Crown is not bound by the law. However, it is not always easy to determine how far the immunity of the Crown extends with respect to agencies, commissions or corporations set up to carry out an industrial function and employees in some Crown Corporations in some of these provinces have been considered to be subject to the labour relations legislation (for example, the Ontario Hydro Electric Power Commission).

In Quebec certain essential utilities whether publicly or privately owned and in Prince Edward Island specified public utilities under private ownership are under

the general labour relations legislation but, as with the Crown Corporations in Manitoba, special provisions also apply. In Quebec, the Public Services Employees' Disputes Act prohibits strikes by employees engaged in the transmission of messages by telephone or telegraph; transportation, railways, tramways or navigation; and the production, transmission and the distribution or sale of gas, water or electricity. Any dispute arising between the employer and employees in these undertakings is to be submitted to arbitration in accordance with the provisions of a collective agreement if any exists and in other cases according to the provisions of the Quebec Trade Disputes Act. In Prince Edward Island, provision was made in 1953 for a special commission to hear and settle disputes between a public utility (i.e., a telephone or electric power company) and its employees. If the commission makes an award and the parties do not accept it and a strike vote is taken, a public hearing is held. After the hearing the commission must confirm or vary the previous award and its decision is then final and binding on the parties.

Under the amendment in Manitoba this year the major part of the Labour Relations Act applies to Crown Corporations and their employees in the same manner as to any other undertaking. The provision respecting the rights of employees and employers and outlawing certain unfair labour practices apply, as do the sections governing the procedure for certification of unions and negotiation of collective agreements.

The special procedure begins at the point where the union and the employing Crown Corporation have been unable to reach an agreement and a conciliation officer has been appointed by the Minister of Labour and has conferred with the parties without obtaining a settlement.

At this point, instead of the usual provision for the appointment of a conciliation board, the new section applying to employees of Crown Corporations provides for the appointment of a mediation board to be set up to mediate the difficulties and make an award in the dispute.

Provision is made for either party to the dispute to request the Minister of Labour in writing to appoint a mediation board and set out the difficulties encountered in the course of the bargaining, or the Minister may appoint a mediation board on his own initiative.

A mediation board is to consist of three members drawn from a list maintained by the Minister of persons nominated by employers, by trade unions representing

employees in the province, and by the Minister. The Minister is to nominate persons whom he considers to be independent with respect to the views of employers and employees and to be capable of acting as the chairman. When a mediation board is to be set up the Minister is required to notify the parties and each side to the dispute is to nominate a member from the list and the Minister will appoint a chairman.

Within seven days after receiving the report of the mediation board each of the parties must notify the Minister in writing as to whether or not it is prepared to accept the award. The award will be binding on the parties unless one of them notifies the Minister within the prescribed time limit that it is not prepared to accept the award.

The mediation board may fix the effective date of the award. If it does not do so, the award comes into force on the expiry date of the collective agreement, if there was an agreement in effect at the time notice to bargain was given, or, if there was no agreement, on the date the mediation board reports its award to the Minister.

Where a party to the dispute has notified the Minister within the prescribed time that it does not accept the award, it is required to file with the Minister a notice of appeal and serve it on the other party. Within 10 days, each party must file with the Minister and serve on the other party a statement of its argument respecting the award. Within 15 days of the filing of the last statement the Lieutenant-Governor in Council is to fix a time and place and hear evidence and argument presented by the parties respecting the award. As soon as possible after the hearing, the Lieutenant-Governor in Council is to make an order confirming or varying the award of the board, and the Minister is to send a copy of the order to each of the parties to the dispute.

The Lieutenant-Governor in Council may declare in his order that the uninterrupted operation of the business or the uninterrupted work of the employees in the bargaining unit is essential to the health and well-being of the people of the province. If such a declaration is made, the parties will be bound by the order of the Lieutenant-Governor in Council confirming or varying the mediation award and no strike or lockout may take place. The question of essentiality of a degree to warrant prohibition of strike action is that determined by the Government in each case and may be with reference to specific groups of employees in the undertaking concerned.

Where the parties are bound by an award of a mediation board or an order of the

Lieutenant-Governor in Council, they must prepare a collective agreement giving effect to the award, give each other a true copy of the agreement and file a copy with the board.

If no declaration of essential work is made by the Lieutenant-Governor in Council the employer is no longer restrained from locking out the employees in the bargaining unit and the employees may strike, but not until they have applied to the Manitoba Labour Board to hold a strike vote. They may then strike within a 60-day period after the results of the vote are announced. Except in these circumstances strikes and lockouts are forbidden.

The Act was also amended to provide that where a collective agreement is in force between employees of a Crown Corporation and their employer and a dispute arises between the parties with reference to the revision of a provision of the agreement which is subject to revision during the term of the agreement, either party may in writing request the Minister to appoint a conciliation officer to assist them in settling the dispute. They are to file a statement of the difficulties involved in settling the dispute.

#### Conciliation Services in P.E.I.

As passed in 1945, the Prince Edward Island Trade Union Act set out the right of employees to join trade unions and to bargain collectively through a trade union and its duly chosen officers. It placed an obligation on an employer to "recognize and bargain collectively with the members of a trade union representing the majority choice of the employees eligible for membership in said trade union" when requested to bargain by its officers.

A procedure was added to the Act this year under which either the bargaining agent or the employer may, by notice, require the other to meet for negotiation of a collective agreement after a union has been certified. Where notice to negotiate has been given, the certified bargaining agent and the employer must, within 15 days from the date of notice or such time as both parties have agreed upon, meet and commence bargaining and make every effort to conclude an agreement.

A procedure for certifying unions was added to the Act by a 1953 amendment which also enacted new provisions for the settlement of disputes in public utilities by arbitration without resort to strike action.

In regard to the settlement of other disputes, the Act, when passed, did not provide for conciliation by government officers or by conciliation boards, as the other pro-

vincial Acts do, but it forbade strikes and lockouts unless and until all differences between the parties have been submitted to arbitration in conformity with the Arbitration Act. This year's amendment, however, provides for the appointment of a conciliation officer on the request of either party in writing to the Minister of Labour after a notice to commence collective bargaining has been given and bargaining has not begun within the specified time limit. The request is to be accompanied by a statement of any difficulties which have been encountered before collective bargaining began or during the course of the bargaining. The conciliation officer is to assist the parties to conclude a collective agreement or a renewal or revision of a previous agreement. The Minister is also authorized in his own discretion to instruct one or more conciliation officers to confer with the parties engaged in collective bargaining.

There is no provision in Prince Edward Island as there is in the other provinces for the appointment of a conciliation board by the Minister in the event that the conciliation officer fails to effect a settlement of the dispute. As noted above, in place of this provision, the Prince Edward Island Act forbids strikes and lockouts until the dispute has been submitted to arbitration under the Arbitration Act. Subject to the terms of any existing collective agreement, when a trade union files its constitution, as required by the Act, an agreement will be deemed to exist to submit all present or future differences to arbitration. Nevertheless the Act contemplates an ultimate recourse to strike action in that a procedure was set out in the Act in 1953 for a government-supervised strike vote.

### Amendments to Ontario Act

Because the Select Committee of the Ontario Legislature on Labour Relations\* was still continuing its deliberations, only minor amendments were made to the province's Labour Relations Act at the 1958 session. The most important of these dealt with the times at which a new union may make application for certification or a certified union may apply for decertification in cases where collective agreements of varying durations are in force.

\*Appointed March 27, 1957 "to examine into and report regarding the operation and administration of the Labour Relations Act in all its aspects." The Committee presented an interim report on March 25, 1958 (L.G., June, p. 615), held further hearings from April 28 until May 15, then adjourned until June 9, when it began consideration of its report.

On introducing the Bill in the Legislature, the Minister of Labour stated that the amendment is "designed to provide greater stability in industry by giving greater protection to long-term agreements," the change affecting only collective agreements made for a period longer than one year. Where an agreement is for a term of not more than two years, application may be made during the last two months of its operation. Where the agreement is for a term of more than two years, application may be made during the twenty-third and twenty-fourth months of its operation or during the two months preceding any anniversary date or the two months preceding the termination of the agreement. If the agreement is for a fixed term but provides that it will continue in effect for a further term or successive terms if either party fails to give notice of termination or of a desire to bargain with a view to renewal, a new certification application may be made during the last two months of each successive year or after the commencement of the last two months of operation.

Until this year the Ontario Act was like the federal Act and the Acts of most of the other provinces in that, for the purpose of permitting applications for certification when agreements were in force, it treated all agreements as if they were one-year agreements and allowed such applications to be made after 10 months of the agreement had expired. (The principal exceptions to this rule are Quebec and Alberta, Quebec authorizing applications to be made between the 60th and 30th day prior to the expiry of the agreement—which may be for as long as three years—and Alberta having amended the Labour Act in 1957 to provide that where the term of an agreement is not in even years, e.g., 18 months, application may be made during the last two months of the agreement.)

A further amendment made this year provides that where the Minister of Labour is requested by either party to an agreement to appoint arbitrators for the purpose of arbitrating disputes arising out of the interpretation or alleged violation of an agreement he may refer any question as to whether a collective agreement is in existence or as to which parties are bound by it to the Labour Relations Board for determination.

The Lieutenant-Governor in Council was given authority to appoint additional persons representative of employers and employees to act as members of the Board on the request of the chairman or vice-chairman. Last year, due to the volume of work pending before the Board, the constitution

of the Board was revised in order to enable it to sit simultaneously in two divisions and the vice-chairman was made a permanent member to head one of the divisions. Each division of the Board at present consists of three persons, the chairman or vice-chairman and one employers' member and one employees' member.

### **Alternate Members of Saskatchewan Board**

The Saskatchewan Trade Union Act was also amended with respect to membership on the Labour Relations Board. The Saskatchewan Board consists of seven members including a chairman and vice-chairman and is equally representative of employers, employees and the public. The amendment this year provides for the appointment of three alternate members, representing each of these groups, to act as a member of the Board in place of a member similarly representative who for any reason is unable to act.

### **Policemen and Firemen in Ontario**

Minor changes were made to the Ontario Police Act and the Fire Departments Act with respect to the duration of collective agreements.

Since 1947 these two statutes have provided for collective bargaining and compulsory arbitration of disputes between full-time paid firefighters and the municipal authority and between full-time members of the municipal police force and the municipal council. Members of a municipal police force are forbidden to join a trade union or any organization affiliated with a union, but may belong to an "association" limited to one police force which has as its object the improvement of the working conditions and pay of its members. There is no such prohibition on firefighters.

With respect to the duration of agreements, the Acts provide that a collective agreement will remain in force until the end of the year in which it came into effect and thereafter until replaced by a new agreement. The 1958 amendments permit the parties to make agreements to remain in force until the end of the year following the year in which it comes into effect (i.e., two-year agreements) and thereafter until replaced by a new agreement.

A further amendment to the Fire Departments Act provides that all collective agreements and all decisions and awards of arbitration boards must be in writing. Since 1956 agreements under the Police Act have had to be in writing.

---

## **Changes in Safety Legislation in 1958**

### **Ontario, New Brunswick and Nova Scotia amend Acts relating to safety**

Three Acts relating to safety were amended in 1958, the Ontario Trench Excavators Protection Act, 1954; the New Brunswick Stationary Engineers Act; and the Nova Scotia Steam Boiler, Pressure Vessel and Refrigeration Plant Inspection Act.\*

#### **Trench Excavation Protection**

The 1958 amendment to the Ontario Trench Excavators Protection Act, 1954, defines the term "trench" more specifically, excludes certain types of excavation from the Act, and imposes on the owner of the land or the contractor specific obligations designed to increase the safety of trench workers.

Five provinces have special legislative provisions for the protection of trench workers. In the Ontario Trench Excavators

Protection Act, the only Canadian Act designed exclusively for the protection of persons working in trenches, these special provisions are incorporated largely in the Act itself; the regulations under this Act (O. Reg. 136/55 (L.G. 1955, p. 1173)) are concerned mainly with detailed requirements for shoring.

In the other four provinces, the special provisions are contained mainly in regulations made under Acts that have a wider scope. These Acts and the relevant regulations are as follows: Quebec—the Industrial and Commercial Establishments Act (O.C. 652) (L.G. 1956, p. 1293); Manitoba—the Building Trades Protection Act (Regulation 43/56) (L.G. 1956, p. 1039); Alberta—the Workmen's Compensation Act, Regulation No. 15 (L.G. 1942, p. 682), now Alta. Reg. 782/57; and British Columbia—the Workmen's Compensation Act (General Accident Prevention Regulations, effective September 1, 1950).

\*Amendments to the Ontario Mining Act and to the Coal Mines Regulation Act in Nova Scotia will be reported in a separate article in a later issue.

Standards to be observed in trench excavation work are also set out in accident prevention regulations for construction and related industries issued by the Workmen's Compensation Board of Saskatchewan for the guidance of the industry.

The Ontario Act is administered by the municipalities, except in territory without municipal organization, in which case it is the responsibility of the Department of Labour. The Act provides that the council of every local municipality shall, by by-law, appoint one or more inspectors to enforce it; in territory without municipal organization, the Lieutenant-Governor in Council may appoint inspectors.

The Act further provides that an inspector may enter any land for the purpose of carrying out an inspection and that no person shall obstruct an inspector in the performance of his duties or furnish him with false information. Where an inspector finds that any provision of this Act or the regulations is being violated, he may give such order in writing as he thinks necessary to secure compliance therewith, and until such order is carried out the work upon that part of the trench in which the violation occurs shall be suspended.

The Department of Labour administers the legislation in Quebec and Manitoba. The Manitoba Act requires that in municipalities in which it is necessary to obtain a permit before commencing any building or excavation the official issuing the permit shall advise the Minister of Labour once each week of permits issued, giving the location and estimated cost of the work. In Alberta and British Columbia, the Workmen's Compensation Board is the administrative authority.

The special legislative provisions, with certain exceptions, apply to excavations four feet or more in depth—six feet in Manitoba—where the depth is at least equal to the width.

The Ontario Act excludes several types of excavation. The principal exclusions made prior to this year are: a trench where the work is done by the owner in person; a trench into which no person is required to enter; and a trench, mechanically excavated and back-filled, for a pipe-line or conduit whose sections are permanently assembled before being mechanically placed in the trench. Additional exclusions made in 1958 are: (a) a cutting for the right-of-way of a highway or railroad—exclusions already existing in the Alberta regulations; (b) construction work where men are employed in compressed air; construction of tunnels and open caisson work; construction of coffer dams and crib work in water or

other places where pressure of sand, water or soil is likely to endanger human life, these excavations being covered by Section 10 of the Department of Labour Act and regulations made under that section; and (c) an excavation for a grave.

The 1958 amendment to the Ontario Act re-defines the term "trench". Prior to this amendment "trench" meant "any excavation in the ground where the depth of the excavation exceeds the width". The amended definition of "trench" is: "any excavation in the ground where the vertical dimension from the highest point of the excavation exceeds the least horizontal dimension of the excavation, such dimensions being taken in a vertical plane at right angles to the longitudinal centre line of the excavation."

The 1958 Ontario amendment also added to the responsibilities of the owner of the land or the contractor by requiring that he cause to be inspected by a qualified person, at least once in each eight-hour period that a person is working in or near a trench, the condition of the trench, the shoring and timbering, the soil or rock piled and equipment stored or used in or near the trench, and the fences, ladders and other things provided for the safety of any person in or near the trench. The person making this inspection must immediately take any remedial action that he deems necessary to protect the safety of any person in or near the trench.

In Quebec, the regulations state that all equipment must be examined prior to use in trench-making operations by a qualified person designated by the employer and, if necessary, repaired immediately.

The Manitoba regulations, which also include general construction, provide that all ropes, cables, chains, blocks, and like equipment or apparatus shall be carefully inspected by the contractor or the person in charge of the work before being used in any work or project, and at frequent intervals as the work progresses; equipment found to be defective shall not be used thereafter, except under such conditions as may be permitted by written order of an inspector.

In British Columbia, the employer is responsible for the regular inspection of all structures, machinery and equipment by a competent person as often as the character of the equipment and type of operation require. Defective equipment or unsafe conditions found by these inspections must be remedied.

Other provisions not changed in 1958 relate to notification of intention to excavate and to the wide range of safety rules in all five provinces.

Notification to excavate is required in the Quebec, Ontario and Manitoba legislation. The owner of the land, the contractor, or the employer, before starting work on a trench, must notify, in writing, the appropriate administrative authority in the jurisdiction in which it is proposed to excavate, submitting particulars, which vary in the different provinces, such as: the name and address of the owner of the land, the contractor, the employer, and the person who will be in charge of the trench work; trench specifications and drawings; the date work will begin; and particulars in connection with the soil, location of pipes, conduits, and prior excavations in or adjacent to the proposed excavation.

Safety rules have been made dealing with the employer's general responsibility for the safety of trench workers; supervision of trench work; shoring requirements; scaffolding requirements; the use of mechanical equipment; ladders; the storage, transportation and use of explosives; gas fumes, rock dust and similar hazards; the use of protective hats; the location of excavated material, tools and other objects; lighting; barricades and fences; first aid; and several other matters.

## Boilers and Pressure Vessels

In New Brunswick, the provision of the Stationary Engineers Act which stipulates that a boiler or pressure vessel may not be used unless it is insured by an insurance company licensed to transact boiler and machinery insurance under the provisions of the Insurance Act, or has been inspected by the boiler inspection branch of the Department of Labour, was amended to provide that in any proceedings for a violation of this provision the burden of proving that a boiler or pressure vessel is insured shall be upon the person charged.

In Nova Scotia, the Steam Boiler, Pressure Vessel and Refrigeration Plant Inspection Act was amended to give authority in specific terms to the Governor in Council to make regulations prohibiting the use of a steam boiler pressure vessel or refrigeration plant for which a prescribed certificate of inspection is not in effect; governing welding methods and procedures to be used; providing for the registration of boiler welders and employers of such welders; providing for the testing, approval and recording of welding procedures used by employers; prescribing qualifications and tests for welders; and permitting the adoption, as regulations, of codes or standards. Under the general authority for regulations, rules respecting a number of these matters are already in effect.

---

# Legal Decision Affecting Labour

**Saskatchewan Court of Appeal confirms principle that, in *certiorari* proceedings, Court cannot sit in appeal from Labour Board's decision**

On May 5, 1958, the Saskatchewan Court of Appeal, in *certiorari* proceedings to quash an order of the Saskatchewan Labour Relations Board, ruled that when an order of an administrative tribunal is challenged for errors on the face of the order, no further material, for example, by way of supporting affidavits, is necessary and such affidavits are not to be considered. On the other hand, when the alleged grounds for quashing of an order is the denial of natural justice the Court is to consider the affidavit evidence to ascertain the facts which are necessarily relevant to the issues and not extrinsic or extraneous to the grounds relied on.

The circumstances of the case were related by Mr. Justice Culliton, who delivered the opinion of the Court.

MacCosham Storage and Distributing Company (Saskatchewan) Limited made an application to the Court to quash an order made by the Labour Relations Board of Saskatchewan on February 11, 1958.

Under the order the Board found that the company in discharging one Frank Girling on November 22, 1957, engaged in an unfair labour practice within the meaning of s. 8 (1) (c) of the Trade Union Act, and ordered the company to reinstate the said employee and to pay him \$284 for the monetary loss he suffered.

The Company's application for quashing the order was based on the following grounds.

The order showed an error on its face in failing to specify or to disclose the facts that made the discharge in question an unfair labour practice within Section 8 (1)

(c) of the Trade Union Act; in requiring the Company to reinstate the employee within 24 hours from service of the order instead of forthwith; this delay in effectiveness of the order on its face contradicts the finding of an unfair labour practice; in stating that the application for an order was made in respect of discharging of an employee on November 22, 1957.

Further the Company argued that the findings of the Board were contrary to natural justice because the evidence presented by the Company showed that the employee was discharged for cause and there was no evidence of discharge for any other reason; the absence of natural justice was so fundamental to the jurisdiction of the Board as to render its findings of no effect. As a consequence of quashing of the order, the Company also asked for the quashing of the order fixing the monetary loss of Girling and its payment.

In support of this application the affidavits of the Manager of the Company and of M. A. Macpherson, QC, were filed. The union, Canadian Brotherhood of Railway Employees and other Transport Workers, Division No. 189, in opposing the Company's application, filed the affidavit of its counsel, and the Board the affidavit of its chairman.

When the motion came on for hearing, counsel for the Board raised, *inter alia*, the following preliminary objections: that certain paragraphs in the Company's affidavit contained matters entirely irrelevant, and facts that the Court could not consider on this application; and that the affidavits of M. A. Macpherson, QC, and the union's affidavit were both irrelevant and should not be considered by the Court.

Counsel for the union supported counsel for the Board in these objections and agreed that his affidavit was in no different position than those to which objection had been taken.

In disposing of these preliminary objections raised by counsel for the Board against the Company's application to quash the Board's order, the Court first considered the question whether the application at bar was of the kind in which the Court should consider the affidavit evidence.

In the opinion of the Court the grounds supporting the Company's contention that the order shows an error in law on its face could be argued without further material. Also no material was required to support the contention that the order fixing the monetary loss suffered by the employee and directing payment thereof should be

quashed as a consequence of quashing of the order finding that the Company had engaged in an unfair labour practice.

However, in disposing of the Company's contention that the order of the Board should be quashed on the ground that there had been a denial of natural justice, the Court in ascertaining the facts would have to look at affidavit evidence filed in support of the application (*The King v. Wandsworth Justices*, (1942) 1 K.B. 281). But, the Court added, this general statement is subject to the well-accepted principle that the facts alleged in the affidavit must be relevant to the questions in issue and must not relate to matters extrinsic and extraneous to the grounds relied upon. Within these terms, then, affidavit evidence would be admissible on this application.

In determining the relevancy of the affidavits to the issues raised, the Court added, it must be kept in mind that the application at bar is a *certiorari* application, and the Court cannot sit in appeal on the decision of the Board, and consequently the applicant is restricted to the grounds set forth in the notice of motion.

The Company in its contention that there was a denial of natural justice argued: (a) that the evidence of the Company showed that the employee was discharged for cause; (b) that there was no evidence of discharge for any reason other than cause; or (c) alternatively, if there was any such evidence such evidence was not creditable.

Mr. Justice Culliton stated that he had read carefully all the affidavits which were submitted to the Court. He could not find anything that would assist the Court in determining as a fact whether the Company was denied natural justice on the grounds claimed in its application. He could not find anything of evidential value to support the Company's contention that there was no evidence, or alternatively, no creditable evidence upon which the Board could base its findings; nor was there a suggestion that the Board did not give full opportunity to all parties concerned to produce their evidence and present their arguments.

In conclusion the Court held that the affidavits presented were not relevant to the issues raised in the application at bar and should not be considered by the Court. Preliminary objections raised by the Board against the Company's application were sustained.

*MacCosham Storage & Distributing Co. (Saskatchewan) Ltd. v. Canadian Brotherhood of Railway Employees and other Transport Workers, Division No. 189, (1958) 13 DLR (2d), Part 3, p. 246.*

# Recent Regulations under Provincial Legislation

Rules under Saskatchewan Apprenticeship and Tradesmen's Qualification Act are consolidated. Plumbing trade code published in New Brunswick

The general and special trade rules for the 15 trades designated under the Saskatchewan Apprenticeship and Tradesmen's Qualification Act have been consolidated into one order and re-issued.

Standards for plumbing work and equipment and some rules with respect to permits and qualifications of plumbers are set out in the *Code for Plumbing Services* recently published by the Plumbing Branch of the New Brunswick Department of Municipal Affairs.

Other regulations deal with work weeks of fishing establishments in Quebec and statutory holidays occurring during a vacation period in Alberta.

## Alberta Labour Act

In Alberta, an amendment to the general vacation order providing for a week's vacation with pay after a year's service and two weeks after two years was gazetted on June 14 as Alta. Reg. 142/58. As a result, an employer is still required to allow an employee an extra day immediately following his vacation if a statutory holiday on which the employer's place of business remains closed occurs within the employee's vacation period, but is not now obliged by this order to pay him wages for that extra day.

## New Brunswick Plumbing Trade Act

The Plumbing Branch of the New Brunswick Department of Municipal Affairs recently published regulations governing the installation and repair of plumbing and sewerage systems to be known as *A Code for Plumbing Services*. The Code was previously adopted by Order-in-Council under the authority of the Plumbing Trade Act.

As provided in the Act (L.G. 1955, p. 833), the Code may be brought into effect in any area by an order of the Lieutenant-Governor in Council or by a municipal by-law.

In addition to setting out specific standards for work and equipment, the Code lays down some rules with respect to permits, qualifications of plumbers and inspection. Except for minor repairs, no construction, reconstruction, replacement, alteration or disconnection of a plumbing system may be commenced without a permit from the plumbing inspector.

An application for a permit must be accompanied by specifications and also by plans if the installation consists of more than five fixtures.

A permit will not be issued to any person who does not hold a certificate of qualification as a journeyman plumber under the Trades Examination Act, plumber's licence under the Health Act, or a certificate stating that he is an apprentice in the plumbing trade serving under the immediate supervision of a qualified person.

A permit will be valid for six months or for the period fixed by the plumbing inspector.

All new work and, where necessary, portions of existing work will be subject to inspection, at the conclusion of which the inspector may issue a certificate of approval.

## Quebec Minimum Wage Act

Order 4 (1957), the general minimum wage order governing the majority of unorganized workers in the province of Quebec, was amended by O.C. 692 of June 26 to include fishing establishments in the electoral districts of Saguenay, Matane, Gaspé and Bonaventure among the list of establishments deemed to be without a fixed work week. This means that employees in these places are not entitled to overtime.

Other places without a fixed work week are: fishing establishments in the Magdalen Islands, cemetery undertakings, diamond drilling operations, snow-clearing undertakings and open air sporting clubs.

## Saskatchewan Apprenticeship and Tradesmen's Qualification Act

A consolidation of the general and trade regulations under the Saskatchewan Apprenticeship and Tradesmen's Qualification Act approved by O.C. 1065/58 was gazetted on June 20, replacing regulations authorized by O.C. 2120/53 (L.G., 1953, p. 1816).

All the trade rules specify the minimum number of hours to be worked before a person may obtain a certificate of journeyman's status. These range from 4,000 to 10,000. The lowest minimum, 4,000, applies in the barbering and beauty culture trades. In three construction trades, bricklaying, painting and plastering, the minimum for a journeyman's certificate is 6,000 hours. A minimum of 8,000 hours must be worked in the carpentry, motor vehicle body repair,

radio and television electronics and sheet metal trades. This minimum also applies to the electric arc welding and gas welding trades, except that, if a person holds a journeyman's certificate in one type of welding, he need work only 2,000 hours to qualify in the other welding trade. In the motor vehicle mechanics repair, pipefitting and plumbing trades, tradesmen must work at least 10,000 hours before being eligible for a certificate of journeyman's status. In all cases, time credits for appropriate trade training are included.

Only a limited number of apprentices may be employed in any establishment. In the barbering, beauty culture, electrical and radio and television electronics trades, there must be one journeyman for every apprentice employed except that, if no journeymen are engaged, an employer in the radio and television electronics trade may have one apprentice. This exception also applies in the electrical trade provided the establishment is not located in any city or within a five-mile radius of a city.

In the sheet metal trade, the ratio of apprentices to journeymen is one to two, with an employer being permitted one apprentice in establishments where fewer than two journeymen are employed.

In the 10 other designated trades, the ratio of apprentices to journeymen is one to three. In the bricklaying, electric arc and gas welding, painting, pipefitting, and plastering trades, however, in places where fewer than three but at least one journeyman are employed, the employer may have one apprentice. In the carpentry, motor vehicle body repair, motor vehicle mechanics repair and plumbing trades, employers are permitted one apprentice in establishments where there are fewer than three journeymen.

Provincial quotas are also set for seven trades. The number of registered apprentices in the radio and television electronics trade may not exceed the total of journeymen regularly engaged in the trade in the province. In the sheet metal trade, the provincial ratio of apprentices to journeymen is one to two. In the carpentry, electrical, motor vehicle body repair, motor vehicle mechanics repair, and plumbing trades the total of registered apprentices may not exceed one third the number of journeymen in the province.

Provision is made in certain trades for indenturing apprentices to the Director of Apprenticeship. In the electric arc and gas welding trades, in the motor vehicle

body and mechanics repair trades and in the carpentry, plumbing, radio and television electronics and sheet metal trades, one person in any establishment who is not a journeyman but is regularly engaged in the trade may enter into a contract of apprenticeship with the Director. This practice also prevails in the electrical trade except in the cities and a five-mile radius.

Every tradesman and every apprentice in the barbering, beauty culture and motor vehicle mechanics repair trades must hold a certificate of status in his trade. Certificates of status are also obligatory in the carpentry, motor vehicle body repair, plumbing and sheet metal trades for tradesmen in the cities or in the town of Melville or a five-mile radius. Employers in all of these trades and in the places indicated are prohibited from hiring a person unless he holds a certificate of status.

An apprentice barber may not be paid less than the minimum fixed by an order under the Minimum Wage Act or 60 per cent of gross earnings, whichever is greater. An apprentice in the beauty parlour trade may not receive less than the minimum wage.

During the first 1,000 hours of his apprenticeship, an apprentice electrician must be paid not less than 50 cents an hour, or 40 per cent of the prevailing journeyman's hourly rate or 40 per cent of the average hourly journeyman's rate paid by the employer, whichever is the greatest. Upon the completion of each 1,000 hours of work, the regular wages of an apprentice are to be increased progressively until during the last 2,000 hours, when the minimum is to be not less than 70 per cent of the prevailing journeyman's rate or the rate paid to journeymen by the employer, whichever is greater.

The general regulations provide that during the first 1,000 hours of his apprenticeship, an apprentice in any of the other designated trades may not receive less than the current minimum wage rate for the area, or 40 per cent of the prevailing journeyman's hourly rate or 40 per cent of the average hourly journeyman's rate paid by the employer, whichever is the greatest. Reasonably equal increments are to be given upon the completion of each 1,000 hours until the last 1,000 hours, when the minimum payable is 90 per cent of the prevailing journeyman's rate or the rate paid to journeymen by the employer, whichever is greater.

# UNEMPLOYMENT INSURANCE

## Monthly Report on Operation of the Unemployment Insurance Act

Number of initial and renewal claims for benefit and of claimants in "live" file both drop 24 per cent in May from April figures, and total of payments made during month drops 23 per cent, statistics\* show

The number of initial and renewal claims for unemployment insurance benefit in May was 165,075, a figure 24 per cent below the 217,500 in April but 58 per cent higher than the 104,326 claims filed in May 1957.

These totals approximate the number of new cases of recorded unemployment among insured people, in that persons who separate from employment and wish to draw benefit are required to file either an initial or a renewal claim. Cases in which the claimant has exhausted his regular benefit and benefit is extended under seasonal terms also come into the category of "initial" claims. Such claims do not constitute new cases.

The number of persons having a claim for benefit in the "live" file was 551,103 on May 31, a decline of 171,000 or 24 per cent from the total of 722,252 for April 30. These totals include claimants for seasonal benefit numbering 183,059 on May 31 and 226,870 on April 30. Seasonal benefit was not applicable on May 31, 1957, the number of claimants for regular benefit being 250,283. The April to May decline in the number of claimants for regular benefit was 26 per cent.

While claimants for seasonal benefit showed a seasonal decline (19 per cent), they increased slightly in relative importance, comprising 33 per cent of the total on May 31 in comparison with 31 per cent on April 30. A factor contributing to this relative increase is that claimants who exhaust their entitlement to regular benefit and who remain in claimant status have payments extended under the seasonal benefit terms, thus causing a certain number to shift from regular to seasonal benefit.

A sharp reduction occurred in the number of fishing claimants, who declined from 12,578 on April 30 to 6,552 on May 31.

Since contributions in respect of employment in fishing first became payable on April 1, 1957, the duration of benefit for these claimants is relatively shorter than for others.

The usual seasonal decline was shown in the proportion of male claimants, who numbered 409,051 on May 31 as against 570,818 on April 30, comprising 74 per cent of the May 31 total as against 79 per cent on April 30. Ninety-five per cent of the seasonal decrease in the number of claimants was accounted for by males. This is associated with the highly seasonal character of certain industries, such as construction, which employ mostly males.

On May 31, postal claimants accounted for 39 per cent of the total, a decline of 3.4 percentage points from the 42.4 per cent who were postal on April 30. Seasonal benefit claimants were 47 per cent postal, whereas only 35 per cent of regular claimants were in this category.

Two thirds of the persons having a claim in the live file on May 31 had been in claimant status nine weeks or more, and one third had a record of 20 or more weeks. On April 30 these proportions were 65 and 25 per cent, respectively. On May 31, 1957 seasonal benefit was inoperative.

Initial and renewal claims adjudicated during May totalled 172,006, of which 150,893 or 88 per cent were entitled to benefit. Of the 115,046 initial claims adjudicated, 8,965 or 8 per cent were found

In a comparison of current employment statistics with those for a previous period, consideration should be given to relevant factors other than numbers such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation.

\*See Tables E-1 to E-4 at back of book.

unable to fulfil the minimum contribution requirements for either regular or seasonal benefit.

Benefit payments during May totalled \$51,700,000, a 23-per-cent drop from the \$66,700,000 paid out during April. Last year's payments (\$26,300,000) were below this year's partly because seasonal benefit was not then applicable in May.

The average weekly payment was \$21.10 for May, \$21.59 for April and \$20.96 for May 1957.

### Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission for May show that insurance books or contribution cards have been issued to 2,138,492 employees who had made contributions to the Unemployment Insurance Fund since April 1, 1958.

At May 31 employers registered numbered 301,486, a decrease of 1,648 since April 30.

### Enforcement Statistics

During May, 5,876 investigations were conducted by enforcement officers across Canada. Of these, 4,180 were spot checks of postal and counter claims to verify the fulfilment of statutory conditions, and 119 were miscellaneous investigations. The remaining 1,577 were investigations in connection with claimants suspected of making false statements to obtain benefit.

Prosecutions were begun in 113 cases, 8 against employers and 105 against claimants.\* Punitive disqualifications as a result of claimants making false statements or misrepresentations numbered 1,082.\*

### Unemployment Insurance Fund

Revenue received in May totalled \$20,579,908.18 compared with \$15,552,419.16† in April and \$18,460,786.19 in May 1957. Benefits paid in May totalled \$51,626,650.72 compared with \$66,649,644.72† in April and \$26,249,196.58 in May 1957. The balance in the fund on May 31 was \$662,056,156.77; on April 30 it was \$693,102,899.31† and on May 31, 1957, \$846,819,435.32.

## Decisions of the Umpire under the Unemployment Insurance Act

### Decision CUB-1529, June 17, 1958

**Summary of the facts:** The claimant, married, 30 years of age, who registered for employment as a stenographer, filed a postal claim for benefit at the office of the Unemployment Insurance Commission in S....., Ont., on May 2, 1957, stating that she had worked as such in C....., Ont., from May 19, 1953 to March 22, 1957, when she voluntarily left to reside with her husband in B....., Ont. At the time of separation from this employment, her rate of pay was \$58.40 a week.

The local office notified the claimant by letter, on August 9, 1957, of continuing employment as a stenographer at E....., Ont., a distance of 58 miles from her home, at a wage ranging from \$50.00 to \$75.00 a week. The letter also instructed the claimant to apply for the position by 11.00 a.m. on August 12, 1957. According to the submissions, the prevailing rate of pay in the district for that type of work is from \$200 to \$300 a month depending on experience. The hours of work were eight a day and 40 a week, day work. Bus transportation was available between these two points.

The claimant did not apply for the employment, stating, in a letter dated August 13, 1957, that she had received the local office's letter on August 12; that she and her husband lived with their children in B....., where he is employed, and that transportation to and from E..... was not favourable during the winter months. On August 14, 1957, the S..... office commented that there was little possibility of the claimant obtaining employment in B..... and that transportation was difficult in the winter months.

The insurance officer disqualified the claimant from receipt of benefit from August 11, 1957 to September 21, 1957, because, in his opinion, she had, without good cause, failed to apply for a situation in suitable employment (section 59 (1) (a) of the Act).

The claimant appealed to a board of referees, which heard the case in S....., Ont., on September 19, 1957. The board, by a unanimous decision upheld the dis-

\*These do not necessarily relate to the investigations conducted during this period.

†Revised from the interim figure published on April 30.

qualification imposed under section 59 (1) (a) of the Act and imposed an additional disqualification under section 54 (2) (a) of the Act, effective August 11, 1957, on the ground that the claimant, by restricting her employment to B....., where opportunities of work for her were virtually non-existent, was deemed not to be available for work.

With the permission of the chairman of the board of referees, the claimant appealed to the Umpire on the grounds that the local office's letter of August 9, 1957, herein before referred to, which requested her to apply to the prospective employer at 11.00 a.m. on August 12, 1957, did not reach her until the afternoon of the latter-mentioned date. She added also: "I could not have gone to E..... until the next day. Mail is not delivered in B..... until at least 11.30 a.m., and then sorted. The exact time I cannot say, but the time to go for mail to be picked up is about noon hour, and afternoon".

**Conclusions:** On the facts before me, I find that the board of referees erred in maintaining the disqualification imposed by the insurance officer pursuant to section 59 (1) (a) of the Act. The claimant's contention that she received the local office's letter after 11.00 a.m. on August 12, 1957 has not been refuted. Consequently, in view of the wording of the letter and of the distance (58 miles) and expenses involved, I consider that, in the particular circumstances of the claimant's case, the reason which she advanced to explain her failure to apply for the position constituted "good cause" within the meaning of the aforementioned section, in that it was reasonable for her to believe that it would have been useless to go and apply for the position any later than at the time specified in the letter of notification.

As to the question of the claimant's availability for work, it was not before the board of referees, inasmuch as the said question had been submitted to an insurance officer in accordance with section 68 of the Act and no action had been taken by him pursuant to section 69. Therefore, following the principle established by my predecessor in decisions CUB-1251 and CUB-1308, it was *ultra vires* of the board of referees to impose a disqualification under section 54 (2) (a) of the Act and its decision to that effect must be treated as a nullity.

The appeal is allowed.

As I said in a recent decision, namely CUB-1527, I might well have reached a different conclusion if this case had been referred to me strictly on a question of availability under section 54 (2) (a) of the Act.

## Decision CUB-1531, June 20, 1958

**Summary of the facts:** The claimant, who was employed as an assembler by the G..... company at O....., Ont., filed a renewal application for benefit following a mass layoff at the company's plant during the week commencing August 18, 1957.

In a weekly report (form UIC497) signed by the claimant on September 3, and received in the O..... local office on September 4, 1957, the space provided in the said report form for declaring earnings for the week commencing August 18, 1957, was left blank. However, the local office learned from the employer that the claimant had worked during the week of August 18 and had been paid for the period in question on August 30, 1957, which was prior to the date claimant had signed the weekly report form. In fact, the employer reported that the claimant had worked on August 19, 20, 21 and 22, 1957, for which he had received \$39.79.

This information was referred to the claimant for comment and, on September 20, 1957, he stated on Form UIC 201B that his wife had completed the weekly report form and he had signed it without looking to see if it had been filled out correctly.

On September 27, 1957, the insurance officer notified the claimant that his earnings for the week commencing August 18, 1957, had been determined to be \$39.79 (section 172 of the U.I. Regulations) and that he was also disqualified in the amount of \$27.00 under section 65 of the Act for having incorrectly declared his earnings for that week.

The claimant appealed to a board of referees on October 4, 1957, contending that, as he had erred in reporting his earnings for the week commencing August 18, 1957, and had subsequently rectified this error of his own volition, he should not have been disqualified under section 65 of the Act.

The board of referees, which heard the case in O....., Ont., on October 30, 1957, unanimously dismissed the appeal on the ground that, as the claimant had been on benefit before and consequently was familiar with the method of reporting earnings, he had not shown "cause for confusion on his part," although his action in later voluntarily rectifying his error was commendable.

The interested union of which the claimant is a member appealed to the Umpire on November 7, 1957, and stated in part:

Mr. A..... made an honest error in reporting his earnings which in my opinion could happen to any person. When Mr. A..... received his money from the Unemployment Insurance Commission Local Office, he immediately knew an error had been made and he reported to my office. I

(continued on page 909)

# LABOUR CONDITIONS IN FEDERAL GOVERNMENT CONTRACTS

## Wage Schedules Prepared and Contracts Awarded during June

### Works of Construction, Remodelling, Repair or Demolition

During June the Department of Labour prepared 256 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition. In the same period, a total of 220 contracts in these categories was awarded. Particulars of these contracts appear below.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practice;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week.

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

### Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in June for the manufacture of supplies and equipment were as follows:

| Department               | No. of Contracts | Aggregate Amount |
|--------------------------|------------------|------------------|
| Agriculture .....        | 1                | \$ 21,000.00     |
| Defence Production ..... | 96               | 341,992.00       |
| Post Office .....        | 18               | 236,117.39       |
| R.C.M.P. ....            | 2                | 15,733.77        |

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour, showing the applicable wage rate for each classification of workmen deemed to be required in the execution of the work. These

wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classifications to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be had upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no event shall the wages paid be less than those established by the laws of the province in which the work is being performed;

(b) the working hours shall be those fixed by the custom of the trade in the district or if there be no such custom, then fair and reasonable hours;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

## Wage Claims Received and Payments Made during June

During June the sum of \$2,319.03 was collected from eight contractors for wage arrears due their employees arising out of the failure of the contractors, or their sub-contractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contracts. This amount has been or will be distributed to the 163 workers concerned.

## Contracts Containing Fair Wage Schedules Awarded during June

(The labour conditions of the contracts marked (\*) contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of eight per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto).

### Department of Agriculture

*Near Rivers Man:* Mamczasz Bridge Construction & Acorn Construction Ltd, construction of dam & spillway, etc, Minnedosa River.

### Central Mortgage and Housing Corporation

*Gander Nfld:* Eastern Woodworkers Ltd, construction of housing units, CMHC 6/57; Sidney Burry, exterior painting of housing units, CMHC 2/53. *St John's Nfld:* Hubert Stokes, exterior painting of housing units, VR 1/49. *Chatham N B:* North Shore Construction Ltd, hard surfacing of roads & drives, DND 6/54. *Camp Gagetown N B:* Terminal Construction Division of Henry J Kaiser Co (Canada) Ltd, site improvement & planting, DND 53/54. *Aylmer Que:* J M Montpetit, exterior painting, project 1/48. *Bagotville Que:* Barnabe & Fils Ltd, construction of school extensions, DND 3/57. *Valcartier Que:* C Jobin Ltd, construction of school & gymnasium, DND 9/57. *Camp Borden Ont:* Evans Contracting Co Ltd, site improvement & planting, DND 14/55; Borgstrom Brothers Ltd, site improvement & planting, DND 15/56. *Deep River Ont:* Louis Markus & Son Ltd, construction of foundation posts & renovations to bldgs, AECL 21/57. *Toronto Ont:* Oldcastle Nurseries Ltd, site improvement & planting, FP 5/54. *Kamsack Sask:* Joe Beer, \*exterior painting of housing units. *Moose Jaw Sask:* J H From Ltd, site improvement & planting, DND 4/55. *Regina Sask:* Les-Mair & Co, exterior painting of housing units, VR 2-6; Yarnton Decorating Co Ltd, exterior painting of housing units, VR 8/49.

### Department of Citizenship and Immigration

*The Pas Indian Agency Man:* F W Sawatzky Ltd, construction of ancillary bldgs, Guy IRS, Clearwater Lake. *Williams Lake Indian Agency B C:* Cariboo Electric & Plumbing Co, installation of stokers & equipment, Cariboo IRS.

### Defence Construction (1951) Limited

*Goose Bay Labrador:* Terminal Construction Division of Henry J Kaiser Co (Canada) Ltd, construction of extension to school; W A Moffatt Co, replacement of roof covering & flashings on hangars & leantos. *Gander Nfld:* Dominion Structural Steel Ltd, supply & erection of structural steel & steel joists for drill & recreation hall, etc. *Halifax N S:* Annapolis Valley Construction Ltd, construction of canteen bldg, *HMC Dockyard*; Fundy Construction Co Ltd, construction of damage control school & outside services; Quemar Co Ltd, construction of submarine battery charging bldg, *HMC Dockyard*; Standard

Construction Co Ltd, repairs to CVD jetty. *Camp Gagetown N B*: Forbes & Sloat Ltd, construction of POL bulk storage bldg & outside services. *Chatham N B*: Foundation Maritime Ltd, supply & installation of bulk fuel storage & handling equipment. *St Johns Que*: Desourdy Freres Ltee, construction of prestressed reinforced concrete water reservoir. *Ville la Salle Que*: Conway & Whittaker Co Ltd, painting & waterproofing exterior walls, Naval Supply Depot. *Angus Ont*: Brennan Paving Co Ltd, resurfacing of roads, RCAF Station. *Camp Petawawa Ont*: M J Sulpher & Sons Ltd, construction of physical training bldg & outside services; Douglas Bremner Construction Ltd, construction of pontoon storage bldg & workshop bldg; A Janin & Co Ltd, construction of medical & dental equipment depot bldg. *Downsview Ont*: Gardiner-Wightton Ltd, construction of wing & addition to animal colony, Defence Research Medical Laboratories. *Gloucester Ont*: E P Electric Products Co Ltd, supply & installation of power & communication cables. *Ottawa Ont*: Perini Ltd, clearing, excavation & pouring concrete foundations for Medical Centre. *Uplands Ont*: Standard Structural Steel Ltd, supply & erection of structural steel & steel joists for barrack block; Chemesco Ltd, \*supply & installation of air drying plant. *Churchill Man*: Horton Steel Works Ltd, supply & erection of elevated steel tank. *Portage la Prairie Man*: H G Hay Decorating Co, exterior painting of PMQs. *Winnipeg Man*: Canadian Comstock Co Ltd, installation of electrical distribution system, Fort Osborne Barracks. *Prince Albert Sask*: Thode Construction Ltd, construction of access road & fine grading. *Cold Lake Alta*: Mix Brothers Construction Co Ltd, construction of roads, walks & parking areas. *Namao Alta*: Conniston Construction Co Ltd, grading & seeding, RCAF Station. *Comox B C*: Moore Electric, renewal of power lines, poles & distribution system. *Whitehorse Y T*: Dawson & Hall Ltd, construction of garage, Services Area.

### Building and Maintenance

*Greenwood N S*: S W Ferguson Ltd, exterior painting of PMQs, RCAF Station. *Kingston Ont*: Canadian Comstock Co Ltd, rewiring & relighting of bldgs & renovations to outside electrical distribution system. *Winnipeg Man*: Oswald Decorating Co, exterior painting of PMQs, RCAF Station. *Moose Jaw Sask*: Roy A Belbin, exterior painting of PMQs, RCAF Station.

### Department of Defence Production

*Greenwood N S*: Municipal Spraying & Contracting Ltd, \*asphalt surfacing of PMQ driveway, etc, RCAF Station; Geo W Sampson, \*interior painting of PMQs, RCAF Station. *Halifax N S*: T Hogan & Co Ltd, \*alteration to landing flat, jetty No 3, HMC Dockyard. *McGivney N B*: Alfred Mockler, replacement of heaters & wiring in TDMs, Repair Area. *Longue Point Que*: Hiland Ltd, exterior painting of bldgs, Barracks Area. *St Johns Que*: Weatherproofing Ltd, excavation & installation of underground steam lines, etc, RCAF Station; Weatherproofing Ltd, excavation & installation of underground steam lines between heating plant and/or mess bldg No 147, RCAF Station; Byers Construction Co Ltd, \*repairs to & replacement of truss work, hangar No 101, RCAF Station. *Camp Petawawa Ont*: Walter Mansveld, exterior painting of bldgs, 25 Works Coy, RCE; National Roofing & Waterproofing Ltd, roofing of garages. *Hagersville Ont*: Black Top Paving Co, repairs to road surfaces, No 1 Vehicle Sub Depot, 27 COD. *Madoc Ont*: Colt Contracting Co Ltd, repairs to & repointing of masonry, Armouries. *Ottawa Ont*: McNeilly-Bavington Ltd, redecorating of Beach Bldg; Ontario Building Cleaning Co Ltd, repointing & replacement of brick stone, Beach Bldg. *Picton Ont*: McNeilly-Bavington Ltd, repainting exterior of bldgs, Old Camp; Quinte Machine & Repair Co Ltd, retubing of boilers, central heating plant, Old Camp; Quinte Roofing Ltd, reroofing of bldgs, Old Camp. *Renfrew Ont*: Louis Markus & Son Ltd, laying of concrete floor & installation of drains, Armouries. *Rockcliffe Ont*: Malloff Ltd, finishing of reinforced concrete slab, RCAF Station; S H Newman Co Ltd, supply & installation of aluminum duct work, etc, Bldg 133, RCAF Station. *Shilo Man*: Ambassador Sales of Winnipeg, installation of doors on PMQ garages, Military Camp. *Regina Sask*: Bird Construction Co Ltd, removal of old & construction of new concrete slab around RCASC petrol point, N D Bldg; A Larsen, repointing & waterproofing, etc, exterior of bldgs. *Saskatoon Sask*: Elite Decorators, painting of MDPH blocks, RCAF Station; Foulds Construction Ltd, construction of concrete garage floors & driveways, RCAF Station; Foulds Construction Ltd, partial replacement of concrete floors in hangars, RCAF Station. *Calgary Alta*: Wm Clark Roofing & Building Supplies Ltd, roofing of garages, PMQ area, Currie Barracks; F Neilson & Son, roofing of garages, PMQ area, Currie

Barracks; Muri Paving & Construction Ltd, excavation & hard surfacing, etc, of parking lot, Currie Barracks; Pioneer Paving Ltd, hard surfacing of parking lots, Currie Barracks. *Edmonton Alta*: National Roofing & Paint Co Ltd, application of bonded roofing on PMQ garages, Griesbach Barracks. *Comox B C*: Pacific Tile Co Ltd, installation of tile in washrooms & shower rooms in barrack blocks, RCAF Station. *Ladner B C*: Hume & Rumble Ltd, replacement of power distribution poles & electrical services, Vancouver Wireless Station. *Rayleigh B C*: Atlas Construction Co Ltd, repairs to aprons around magazines, No 37 OAD. *Vancouver B C*: J T Devlin & Co Ltd, interior painting of bldg No 113, HQ B C area; Hume & Rumble Ltd, replacement of power line poles, Jericho area. *Vernon B C*: Storm Construction (Pacific) Ltd, resurfacing of roads, Military Camp.

### National Harbours Board

*Halifax N S*: Fundy Construction Co Ltd, construction of shed 34 on pier A-1. *Vancouver B C*: Harold Jones & Henry A Switzer, construction of roadway fill, No 3 jetty.

### Department of Public Works

*Codroy Nfld*: Chisholm Construction Co Ltd, harbour improvements. *Bonavista Nfld*: Babb Construction Ltd, wharf improvements. *Little Catalina Nfld*: Babb Construction Ltd, construction of breakwater-wharf. *Beach Point P E I*: Morrison & McRae Ltd, construction of retaining wall. *Launching Pond P E I*: Norman N MacLean, construction of landing. *Montague P E I*: Stanley Reid, wharf repairs. *Naufrage P E I*: R A Blyth, breakwater extension. *North Lake P E I*: Morrison & McRae Ltd, extensions to landing piers. *South River P E I*: Wm Whiteway, repairs to deck of quay wall. *Wood Islands P E I*: Morrison & McRae Ltd, reconstruction of fishermen's landing. *Battery Point (Victoria Beach) N S*: B & M Comeau Construction Co Ltd, breakwater repairs. *Canso (Burying Island) N S*: F W Digdon & Sons Ltd, breakwater extension. *Carter's Point N S*: Mosher & Rawding Ltd, construction of wharf. *Cooper's Point N S*: Campbell & McIsaac, breakwater repairs & improvements. *Delaps Cove N S*: Hampton Construction Co Ltd, breakwater reconstruction. *D'Escousse N S*: M C Campbell & D J Grant, wharf repairs. *Dover N S*: Stanley Reid, wharf reconstruction. *Fourchu N S*: Foundation Maritime Ltd, breakwater repairs. *Halifax N S*: Fundy Construction Co Ltd, addition & alterations to Camp Hill Hospital. *Liscomb N S*: Stanley Reid, wharf extension. *Main-a-Dieu N S*: Martell's Construction Ltd, breakwater extension. *Port Greville N S*: K J Cochrane, breakwater repairs. *Port Hood N S*: Foundation Maritime Ltd, construction of breakwater. *Back Bay N B*: Foundation Maritime Ltd, construction of breakwater. *Blue Cove N B*: Comeau & Savoie Construction Ltd, harbour improvements. *Curry's Cove N B*: J W McMulkin & Son Ltd, wharf extension. *Dalhousie N B*: J W & J Anderson Ltd, construction of wharf. *Harshman's Brook N B*: Harold N Price, harbour improvements. *Port Elgin N B*: McKay Builders Ltd, construction of RCMP detachment quarters. *Aylmer East Que*: M J Sulpher & Sons Ltd, construction of post office bldg. *Fryer's Island Dam Que*: Rene Deslauriers & L A Laferriere, construction of residence. *Gascons (Anse a Mercier) Que*: Geo K Steele, wharf improvements. *St Joachim de Tourelle Que*: Gaspe Construction Inc, wharf extension. *St Romuald Que*: J P A Normand Inc, construction of retaining wall; J P A Normand Inc, construction of retaining wall. *Tete a la Baleine Que*: Gulf Maritime Construction Ltd, construction of wharf. *Arnprior Ont*: M J Sulpher & Sons Ltd, construction of radioactive stores bldg, Civil Defence College. *Bracebridge Ont*: Andeen Construction Ltd, construction of federal bldg. *Nanticoke Creek Ont*: Dean Construction Co Ltd, breakwater repairs. *Oshawa Ont*: Appleton Air Conditioning Ltd, improvements to ventilation system in post office area of federal bldg. *Ottawa Ont*: Canadian Comstock Co Ltd, installation of mechanical & electrical distribution system, Central Heating Plant, Riverside Drive; J R D'Aoust Reg'd, construction of overpass between No 2 & No 4 Temporary Bldgs; Dominion Protective Electric System, supply & installation of fire alarm system, etc, RCMP Headquarters Bldg; A Lancot Construction Co Ltd, alterations for additional space for Senate staff, Centre Block, Parliament Bldgs; Sanco Reg'd, interior cleaning of Kent-Albert Bldg; Allied Building Services Ltd, interior cleaning of East Bldg, Veterans Memorial Bldgs; H G Francis & Sons Ltd, installation of hot water storage tanks, etc, Food & Drug Laboratory, Tunney's Pasture. *Sarnia Ont*: Ruliff Grass Construction Co Ltd, harbour repairs & improvements. *Sioux Lookout Ont*: S E Oslund Construction, alterations to federal bldg. *Tobermory Ont*: Kalbfleisch & Whicher, repairs to harbour works. *Wheatley Ont*: Sir Lindsay Parkinson (Canada) Ltd, harbour improvements. *Selkirk Man*: Harris Construction Co Ltd, wharf reconstruction. *Whitemouth Man*: North

American Bldgs Ltd, construction of RCMP detachment quarters. *Winnipeg Man*: Claydon Co Ltd, alterations to basement storage space, New Post Office Bldg. *Kerrobert Sask*: Wolfe Construction, construction of RCMP detachment quarters. *Regina Sask*: Smith Bros & Wilson Ltd, alterations to tenth floor of Motherwell Bldg. *Barons Alta*: Bird Construction Co Ltd, construction of RCMP detachment quarters. *Coronation Alta*: C Burrows Construction Ltd, construction of RCMP detachment quarters. *Edmonton Alta*: R V Coombs Construction Ltd, alterations to basement & first floor, University Hospital, Colonel Newburn Wing; Alexander Construction Ltd, alterations to third & fourth floors, Post Office Bldg. *Vegreville Alta*: C H Whitham Ltd, construction of office, laboratory & headerhouse bldg, Experimental Substation. *Vulcan Alta*: Bird Construction Co Ltd, construction of RCMP detachment quarters. *Bella Bella B C*: Leonard Belliveau & Granby Construction & Equipment Ltd, breakwater improvements. *Bella Coola B C*: Basarab Construction Co Ltd, construction of RCMP detachment quarters. *Campbell River B C*: Orion Builders Ltd, construction of federal bldg. *Departure Bay B C*: Jenkins Brothers Contracting Ltd, construction of salmon tanks, Pacific Biological Station. *Duncan B C*: A V Richardson Ltd, construction of federal bldg. *Port Alberni B C*: Orion Builders Ltd, construction of federal bldg. *Spences Bridge B C*: C J Oliver Ltd, construction of RCMP detachment quarters. *Uchuelet West B C*: Ivan Ossinger, reconstruction of float. *Vancouver B C*: Modern Building Cleaning Service of Canada Ltd, cleaning interior of new customs bldg.

### Contracts Containing the General Fair Wages Clause

*Daniel's Harbour Nfld*: Avalon Dredging Ltd, dredging. *Griquet Nfld*: Avalon Dredging Ltd, dredging. *Caribou N S*: J P Porter Co Ltd, dredging. *Grand Etang N S*: Harriss & Harriss, dredging. *Halifax N S*: Maritime Warehousing & Transfer Co, moving office & laboratory equipment to Ralston Bldg. *Meteghan N S*: Bay Shore Dredging Co Ltd, dredging. *Skinnners Cove N S*: F W Digdon & Sons Ltd, dredging. *Hull Que*: Edge Ltd, repairs to Printing Bureau. *Cobourg Ont*: McNamara Construction Co Ltd, dredging. *Hamilton Ont*: A N Show & Sons Ltd, alterations to Cornell Bldg. *New Liskeard Ont*: Tri-Town Construction Co, exterior painting of federal bldg. *Newmarket Ont*: D E Cook, repairs to lock boxes, Federal Bldg. *Ottawa Ont*: Wallmaster Sales & Service Co Ltd, repairs to venetian blinds, Tunney's Pasture; Hull Plumbing & Heating Co, installation of pumps, PWD testing laboratory, Tunney's Pasture; Douglas Bremner Co, alterations to RCMP Headquarters Bldg; Unida Plumbing & Heating Ltd, installation of tank at Militia Stores Bldg; Rene Cleroux, alterations to bldg at 220 Wellington St; A Lanctot Construction, alterations to 6th floor, Postal Terminal Bldg; Ray Sheet Metal Works, installation of iron apron, 552 Booth St; Canartic Refrigeration, air conditioning offices of Transport Commissioners, Union Station; F J Shouldice, alterations to West Block, Parliament Bldgs; Bedard-Girard Ltd, electrical repairs at West Block, Parliament Bldgs; Oak Construction Co, alterations to "A" Bldg; J R D'Aoust Reg'd, alterations to Booth Bldg; Bedard-Girard Ltd, electrical repairs at DVA Memorial Bldg; Unida Plumbing & Heating Ltd, heating repairs at Experimental Farm; Gaston Lavoie Construction, repairs to Aylmer Bldg. *Pictou Ont*: E W Vanner & Son, repairs to Federal Bldg; J L Farrell, repairs to lock boxes, Federal Bldg. *St Catharines Ont*: John Peart & Son Ltd, ventilation repairs in Federal Bldg. *Toronto Ont*: Hydro Silea Co, alterations to Station "G"; McNamara Construction Co Ltd, dredging in Eastern Channel. *Fraser River B C*: Marine Pipeline & Dredging Ltd, dredging in Morey Channel. *Vancouver B C*: Ray-Bilt Contractors, repairs to Begg Bldg; Burrard Dry Dock Co Ltd, repairs to Dredge PWD No 322; B C Marine Engineers & Shipbuilders Ltd, repairs to Dredge PWD No 303.

### Department of Transport

*Boar Island Nfld*: James J Hussey, construction of dwelling & demolition of existing dwelling. *Cape St Mary's Nfld*: James J Hussey, construction of dwelling & demolition of existing dwelling. *Charlottetown P E I*: Morrison & McRae Ltd, additional development at airport. *Dartmouth N S*: Trynor Construction Co Ltd, additional development at airport. *Halifax N S*: Brown & Hall Drilling Contractors, drilling several wells, International Airport. *Scatari Island N S*: Harry Hawkins, construction of dwellings & demolition of existing dwellings. *Sydney N S*: Municipal Ready-Mix Ltd, additional development at airport. *Portage Island N B*: J W & J Anderson Ltd, construction of dwelling. *Saint John N B*: Stephen Construction Co, construction of taxiway fillet at airport. *Cap de Rabast Que*: Maurice L'Italien, construction of dwelling & demolition of existing dwelling.

*Pointe Noire Que:* A Daris, construction of dwelling. *Seven Islands Que:* Mitis Construction Co Ltd, construction of garages. *Cape Crocker Ont:* Percy Spears, construction of dwelling. *Earlton Ont:* H Boudreau Construction, construction of power house at airport; J M Fuller Ltd, additions to operations bldg at airport. *North Bay Ont:* J M Fuller Ltd, construction of power house at airport. *Pagwa Ont:* J M Fuller Ltd, additions to operations bldg at airport. *Red Lake Ont:* Bergman & Nelson Ltd, construction of garage. *Sudbury Ont:* Power Installations (Sarnia) Ltd, installation of additional lighting facilities at airport. *Windsor Ont:* Cart Paving Co Ltd, additional development at airport. *The Pas Man:* Horton Steel Works Ltd, erection of elevated steel water storage tank, construction of concrete footings, vault, etc, at airport. *Beaverlodge Sask:* Standard Gravel & Surfacing of Canada Ltd, hard surfacing of runway at Airport. *Regina Sask:* Terminal Construction Division of Henry J Kaiser Co (Canada) Ltd, construction of raytheon AASR site & related work at airport. *Port Hardy B C:* W J Cutt Plumbing & Heating, installation of water supply main at airport. *Wrigley N W T:* McRae & Assocs Construction Ltd, construction of dwellings, transmitter bldg & related work at airport.

---

## Decisions of the Umpire

(continued from page 903)

immediately contacted Mr. S....., the Local Unemployment Insurance Commission Acting Manager, and informed him of Mr. A.....'s plight. Mr. S..... requested that I send Mr. A..... to his office so that the mistake could be rectified. I am given to understand that Mr. A..... reimbursed the Unemployment Insurance Commission during his visit with the Local Acting Manager. Subsequent to this he was then disqualified for a week's benefits even though he rectified this error of his own volition.

I am rather amazed at the board of referee's action in commending the claimant for his honesty, yet in the same breath upholding the disqualification.

The union also requested an oral hearing before the Umpire, which was held in T....., Ont., on April 17, 1958. The claimant was represented by the president of the interested union local; the Unemployment Insurance Commission was also represented.

Included in the file is a memorandum from the manager of the O..... local office dated January 24, 1958, which reads in part:

There were approximately 40 to 50 misrepresentations of this nature during the G..... company's layoff. These were dis-

covered when the claimants reported to the G..... company's SUB office, where they were told no SUB benefit would be paid until the discrepancy had been rectified at our office...

(The union local's president) phoned on several occasions in this connection and was advised to have the claimant repay the overpayment or return the warrants if applicable. It was not expected this would have any bearing on the imposition of the penalty.

**Conclusions:** On the facts before me, I agree with the union's appeal that the claimant's omission to state, in the weekly report which he signed on September 3, 1957, whether or not he had received any earnings for the week commencing August 18, 1957, was an "honest error" and not a false statement or misrepresentation within the meaning of section 65 of the Act. The view that the claimant acted in good faith is supported also by the fact that he voluntarily rectified his error as soon as he became aware thereof, an action for which he was commended by the board of referees.

The appeal is allowed.

---

## N.Y. State Eases Requirements to Qualify for Jobless Insurance

A New York State law modifying the requirements necessary to qualify for unemployment insurance went into effect in the last quarter of June.

The new law makes it possible for unemployed workers in the state to draw payments if they have earned an average of at

least \$15 a week in 15 of the preceding 52 weeks and in 40 of the preceding 104 weeks.

The two-year provision was intended to protect the worker against being cut off from insurance because of one bad job year.

# WAGES, HOURS, WORKING CONDITIONS

## Number of Workers Covered by Pension Plans in Canada

Number of workers covered by pension plans has increased steadily in recent years, from 62.7 per cent of workers in 1951 survey to 70 per cent in 1954 and 77.8 per cent in 1957. Firms with plans: 6,034

The number of Canadian employees covered by pension plans has shown a steady increase in recent years, according to information obtained from the annual surveys of working conditions conducted by the Economics and Research Branch of the Department of Labour.

As of April 1957, 77.8 per cent of the workers covered by the survey were in establishments in which pension plans were available to them, compared with 70 per cent in 1954 and 62.7 per cent in 1951. Establishments with pension plans, for non-office or for office employees only or for both, numbered 6,034, or 53.4 per cent.

The statistics presented in this study differentiate between plans for non-office and office employees even though in some firms the same pension plan applies to both classes of workers.

The 1957 survey was compiled from information received from 11,304 reporting units. Employed in these units were 1,854,086 persons: 1,374,518 non-office workers and 479,568 office employees.

Of the 1,854,086 employees covered by the 1957 survey, 1,442,864 were in establishments which had a pension plan. Not all these workers, however, were actually covered by pension plans, since many of the plans had eligibility requirements based on age or length of service. In such cases, however, the younger or new employees would expect to be covered ultimately if they remained in employment.

The 1957 survey covered establishments employing approximately 40 per cent of the total number of wage and salary workers in the non-agricultural labour force. Establishments employing approximately 70 per cent of such workers were surveyed in the

manufacturing and in transportation, storage and communication industries, but smaller proportions in other industries, ranging from 63 per cent in public utilities to 7 per cent in service. The coverage in finance consisted of banks and head offices of insurance companies; the service group included laundries, hotels, restaurants and municipalities. The forestry and construction industries were not surveyed. In general the survey covered establishments with 15 or more employees in the industries dealt with.

The growth in pension coverage over the past 20 years is roughly indicated by comparing of the Economics and Research Branch surveys with two previous surveys conducted under different auspices and with different coverage.

In 1936-37, a survey by the National Employment Commission found that 8 per cent of the establishments covered had pension plans. Shortly after the war, in 1947, the Dominion Bureau of Statistics conducted a survey in which the proportion was found to be almost 25 per cent. The 1951 survey of the Economics and Research Branch showed a proportion of 37 per cent, while in 1954 the proportion had risen to 45 per cent and in 1957 to 53 per cent.

### Present Coverage — Non-Office Workers

As of April 1, 1957, three out of four non-office employees covered by the survey of working conditions were employed in establishments in which pension plans were in operation (Table 1).

The highest percentage coverage of non-office workers is in the Public Utilities Group, in which 98 per cent of such workers are employed by establishments having pension plans. In Municipal Services, 95 per

cent of the non-office workers are under or will be eligible to come under pension plans. In the Transportation, Communication and Storage group just under 94 per cent of the non-office workers are employed by establishments having pension plans. Practically all railway and telephone companies have such plans.

While a figure is shown in Table 1 for non-office workers in the financial establishments covered by the survey, it should be noted that these workers—commissionaires, maintenance personnel, etc—comprise only a small portion of the total number of workers in the Finance group.

In Trade, 85 per cent of the non-office workers covered by the survey are in establishments which report having pension plans. As noted above, however, the present survey deals mainly with establishments having 15 or more non-office employees; a considerable number of establishments in Trade, especially in retail trade, have fewer than this number of employees and are

therefore not included in the survey. (The number of wage and salary earners in Trade covered by the survey was approximately one quarter of the total of such workers in Trade according to labour force estimates of the same date.) Pension plans occur less frequently in smaller establishments (see Table 4) and it is therefore probable that the percentage of pension plan coverage in Trade as a whole would be considerably less than that shown for those establishments covered by the present survey.

The proportion of non-office employees in Manufacturing who are in reporting units having pension plans is 68.5 per cent. While this is a smaller percentage than those for some of the other groups mentioned above, this group is, numerically, by far the largest group covered by the survey and therefore has the highest pension coverage in absolute terms.

Table 2 contains statistics of the number of employees in manufacturing establishments classified in 17 major groups. The

**TABLE 1.—NUMBER OF EMPLOYEES IN ESTABLISHMENTS REPORTING PENSION PLANS, BY INDUSTRY, APRIL 1, 1957**

NOTE: These figures do not represent the number of employees actually covered by pension plans, but the number of employees in establishments in which a pension plan is in effect.

<sup>1</sup> "Durable goods" is comprised of: wood products, iron and steel products, transportation equipment, non-ferrous metal products, electrical apparatus and supplies, and non-metallic mineral products.

<sup>2</sup> "Other transportation" is comprised of: air transportation, urban and suburban bus transportation, interurban bus transportation, and truck transportation.

<sup>3</sup> "Other industries" (under Transportation, Storage and Communication) is comprised of: grain elevators and radio and television broadcasting.

<sup>4</sup> "Services" is comprised of: laundries, year-round hotels and restaurants.

highest percentage of plant workers in establishments which reported having pension plans is in the Tobacco and Tobacco Products group, where 97.6 per cent of the plant workers are in such establishments. The second highest percentage of coverage, 95.3, was that for the Products of Petroleum and Coal group, while the third, 89.9, was that for the Paper and Paper Products group.

Table 3 contains an analysis of the percentage of pension coverage of non-office

workers by provinces in all groups except the chartered banks and steam railways, statistics concerning which are not available by province. These percentages range from 52.4 to 78.7. Excluding the provinces of Newfoundland, Prince Edward Island and New Brunswick, which are not heavily industrialized, the range of the distribution is approximately 12 per cent.

Table 5, which analyzes pension coverage in establishments by size groups (based on the number of non-office workers), shows

**TABLE 2.—NUMBER OF EMPLOYEES IN ESTABLISHMENTS REPORTING A PENSION PLAN, BY MANUFACTURING GROUPS, APRIL, 1957**

NOTE: These figures do not represent the number of employees actually covered by pension plans, but the number of employees in establishments in which a pension plan is in effect.

<sup>1</sup> Canada Total includes Northwest Territories. Since reports from railway companies and banks are made by their head offices and cover their nation-wide operations, it is not possible to compile statistics by provinces for these; they are therefore not included in this table.

that the percentage of workers in establishments reporting pension plans rises in each size group from the 15 to 24 group, in which the percentage of non-office workers was 43.6; in the size group of 1,000 and over this percentage was 95.4. It might be added that the coverage of the survey is less complete in the smallest size groups, and there is some reason for supposing that pension coverage in these groups is actually less than is indicated in the table.

### Present Coverage — Office Employees

Almost nine out of ten office employees covered by the April 1957 survey were in establishments which reported that they had pension plans.

All the establishments in the Finance group reported that they had pension plans

for their office employees. In the Public Utilities group, 99.2 per cent of office workers were in such establishments. In Municipal Services, reporting units which employed 96.1 per cent of all office workers in this group had pension plans covering their office employees.

In the Transportation, Communication and Storage group, 96.0 per cent of office workers were in establishments which had pension plans. In the Steam Railway subgroup all office workers were in such establishments while in the Telephone sub-group, the corresponding percentage was 99.8.

### Trend from 1951 to 1957

The three Economies and Research Branch surveys show a definite increase in the number of employees, both office and

**TABLE 4.—PERCENTAGE OF EMPLOYEES IN ESTABLISHMENTS REPORTING A PENSION PLAN, BY INDUSTRY, OCTOBER 1951, APRIL 1954, AND APRIL 1957**

NOTE: These figures do not represent the percentage of employees actually covered by pension plans, but the percentage of employees in establishments in which a pension plan is in effect for non-office workers or office workers respectively.

\* Size groups are based on the number of non-office workers employed by reporting units, except in Retail Trade, in which the size code is based on the number of sales persons.

non-office, working in establishments where pension plans were in operation (Table 4). While part of these increases were due to increased employment in firms which had pension plans at the time of the earlier surveys, there is a clear indication that the number of pension plans in Canada has increased during the period covered by these surveys.

There were approximately 17 per cent more non-office employees in establishments reporting pension plans at April 1, 1957 than in October 1951. (At the dates of these two surveys the total number of non-office workers covered varied less than 1 per cent.) The most notable increases in pension coverage of non-office workers were in the Trade and Mining classifications. In both Transportation, Communications and

Storage and Public Utilities the percentage of non-office employees in establishments with pension plans was already quite high in 1951.

In the office worker classification there was an increased survey coverage of 178,000 or 59 per cent between the 1951 and 1957 surveys. The increase in the number of office workers in establishments with pension plans was approximately 198,000 or 89 per cent.

At the time of the 1951 survey 70 per cent of office workers covered by the survey were in establishments which had pension plans for these employees; by 1957 this percentage had increased to almost 88 per cent of a much larger number of office employees.

---

## Number of Workers Covered by Pension Plans in U.K.

It is estimated that in 1956 the number of workers in the United Kingdom covered by occupational schemes was just over 8 millions, 4½ millions of them in private schemes, and that the number of pensioners was about 1,100,000, of whom 300,000 were in private schemes.

The information was obtained by the U.K. Government Actuary in a survey, and was published by Her Majesty's Stationery Office in a booklet titled "Occupational Pension Schemes".

It is noted in the report that the total amount paid in 1956 as contributions to private schemes was about £246 millions, of which £72 millions was paid by employees; the annual amount paid out in pensions was about £50 millions.

The corresponding figures for public service and nationalized industries were about £221 millions as contributions (£56 millions by employees) and about £150 millions as pensions.

The total number of persons covered by the various schemes at the present time is probably about 8½ millions, including 7 million men and 1½ million women; nearly one-half of employed males thus have some provision for pensions in addition to those provided under the National Insurance scheme.

The analysis of the rules of pension schemes showed that few of them are registered under the relevant Acts (the Friendly Societies' Acts, etc., and the Superannuation and other Trust Funds (Validation) Act, 1927).

Of the schemes surveyed, 47 per cent covered all employees, 22 per cent staff only, 19 per cent works employees only, and 12 per cent special categories only.

A material proportion of the schemes are non-contributory so far as employees are concerned. Relatively few members are entitled to a lump sum without pension on retirement, although death benefits usually consist of lump sums.

On withdrawal from a pension scheme, an employee usually receives a sum equivalent to the total contribution he has himself made, but, if joining another firm with a pension scheme, he may qualify for a transfer value.

Except in the public service and nationalized industries, provision for pension in case of retirement on health grounds is by no means universal and in many schemes only the normal withdrawal benefit is payable.

The Government Actuary gives information also on the methods by which employees' contributions are assessed, the methods by which financial support for schemes is provided by employers, the actual age of retirement compared with that provided for in the rules, the grant of back-service credits, actuarial valuation, dissolution of schemes, and voluntary variation by the employee of benefits and conditions. An appendix reproduces the letter and questionnaire form that were sent to employers.

# PRICES AND THE COST OF LIVING

## Consumer Price Index, July 1958

The consumer price index (1949=100) declined 0.3 per cent from 125.1 to 124.7 between June and July 1958.\* Most of this decrease resulted from a drop of 1.1 per cent in the food index, with the other four group indexes recording little or no movement; other commodities and services were down slightly, household operation unchanged, while both shelter and clothing rose fractionally.

In foods the index moved from 122.7 to 121.4 as sizeable seasonal price decreases occurred for a number of fresh vegetables, and a break in beef prices, which had been steadily rising, left some cuts 2 cents below June levels. Pork prices eased slightly as did those for sugar, coffee and fats. Egg prices rose 7 cents per dozen, while apple and grapefruit prices rose more moderately.

The decline in other commodities and services from 130.7 to 130.4 reflected almost entirely a drop in the price of passenger cars, as well as lower gasoline prices in a number of cities, particularly Winnipeg. Newspaper prices rose in a number of cities.

Further minor advances in both the rent and home-ownership components moved the shelter index from 138.3 to 138.4.

The clothing index recorded a small advance from 109.7 to 109.9 as a result of price changes in men's suits and topcoats. Both women's and children's wear declined slightly and footwear was unchanged.

The absence of movement in the household operation index, unchanged at 120.6, reflected the offsetting effects of declines in both coal and fuel oil prices, higher domestic gas and electricity rates, mixed but minor price changes in furniture items and somewhat higher prices for new season's appliance models and floor coverings.

Group indexes one year earlier (July 1957) were: food 118.2, shelter 135.1, clothing 108.4, household operation 119.6, and other commodities and services 126.5.

## City Consumer Price Indexes, June 1958

Consumer price indexes (1949=100) remained stable in four of the ten regional cities between May and June.† Slight increases of 0.2 per cent were recorded in Saskatoon-Regina and Edmonton-Calgary.

\*See Table F-1 at back of book.

†See Table F-2 at back of book.

Vancouver registered a 0.5-per-cent decline, while Saint John, Halifax and Ottawa followed with decreases of 0.3 per cent, 0.2 per cent and 0.1 per cent respectively.

Food prices were moderately lower in all the eastern regional cities. The western cities, other than Vancouver, recorded higher food prices; Vancouver registered a substantial decrease. Declines in the prices of oranges, potatoes and tomatoes were mainly responsible for decreases in the food components. Increased pork and other meat prices partially offset these decreases and contributed to the higher food prices in the western cities.

Slight increases were noted in the shelter group in nine of the ten regional cities, as May is generally a moving month. Clothing prices declined fractionally in all 10 cities, due to sale prices on spring items. The household operation group showed mixed changes, with prices for home furnishings slightly higher in the western cities. Winnipeg recorded lower domestic gas prices, but these were offset by increased prices for shoe repairs and textiles. Changes in the other commodities and service group were slight. Gasoline prices in Winnipeg decreased over the period but interurban bus fares increased for this centre and also for Calgary and Edmonton. Slight increases were apparent in drug and personal care items.

Regional consumer price index point changes between May and June were as follows: Vancouver -0.6 to 125.1; Saint John -0.4 to 124.9; Halifax -0.3 to 122.4; Ottawa -0.1 to 125.4; Saskatoon-Regina +0.3 to 122.2; Edmonton-Calgary +0.2 to 121.9. St. John's, Montreal, Toronto and Winnipeg remained unchanged at 112.3\*, 125.2, 128.8 and 123.3 respectively

## Wholesale Prices, June 1958

The general wholesale price index (1935-39=100) eased 0.3 per cent between May and June, moving from 228.1 to 227.4. Five of the major groups receded, two advanced and one remained unchanged.

Animal products dropped 0.7 per cent to 257.2 from 259.0, this decrease being the first since last November and largely due to prices of livestock, fresh meats and poultry.

‡On base June 1951=100.

# CONSUMER PRICE INDEX

Index 1949=100

Index 1949=100

Higher prices registered by cured meats were not enough to avert the drop. Decreases in copper, lead, tin and silver brought the non-ferrous metals group down a further 0.7 per cent to 163.7 from 164.9. This compares with an index of 168.6 at January last and 189.8 at January 1957.

Textile products showed an increase of 0.2 per cent to 228.5 from 228.1. Higher prices for raw wool, both domestic and imported, raw cotton and worsted yarns were the main causes. Increases in prices for industrial gases, coal tar and inorganic chemicals largely contributed to the advance of 0.3 per cent to 182.9 from 182.4 in chemical products.

Vegetable products group index declined 0.3 per cent to 196.5 from 197.0, with decreases in potatoes, livestock and poultry feeds, and fresh fruits. The wood products group also fell 0.3 per cent, dropping to 295.9 from 296.7, decreases being posted for pine lumber and newsprint paper. The iron products group was unchanged at 251.6. For

the non-metallic minerals group there was a decrease of 0.2 per cent to 187.0 from 187.4.

The building materials prices indexes was down slightly on balance between May and June. The residential building materials index (1949=100) went down from 126.8 to 126.7 while the non-residential series (1949=100) remained the same at 129.3.

## U.S. Consumer Price Index, June 1958

Increases in the non-goods area—transportation, reading and recreation, medical care and personal care—boosted the United States consumer price index (1947-49=100) by 0.1 per cent in mid-June to 123.7 from 123.6 in mid-May.

## U.K. Index of Retail Prices, May 1958

The index of retail prices (Jan. 17, 1956 =100) in the United Kingdom dropped 0.4 per cent to 109.2 from 109.6 in mid-April. At mid-March the index of retail prices stood at 108.4.

In an effort to get rid of what President David Dubinsky of the International Ladies' Garment Workers Union calls "the 5 per cent of chiselers and bargain-hunters who enrich themselves only by debasing the

standards gained by organized labour," the Union will spend \$2,000,000 on a campaign to build up public support for the union label. The move is part of an effort to check racketeering in the dress industry.

# STRIKES AND LOCKOUTS

June 1958

During June, 40 work stoppages were in progress, resulting in an estimated time loss of a little more than 106,000 man-days. This was approximately 30,000 more man-days than the time loss resulting from the 33 work stoppages recorded during the preceding month\*. The increase in time loss was due in part to several large work stoppages which began in the second half of May and continued through June.

Of the 40 work stoppages in progress during June, 17 involved one hundred or more workers; 11 of the 17 started prior to June and of these 11 stoppages six were still in progress at the end of the month. Of the six larger stoppages that began during June, only one was still in progress at the end of the month.

On an industry basis, the highest time loss—a little less than 40,000 man-days—was recorded in manufacturing. Approximately one half of this time loss was caused by the dispute involving nearly 900 workers of the Dominion Glass Company in Hamilton and Toronto.

TABLE 1—STRIKES AND LOCKOUTS, WORKERS INVOLVED, AND TIME LOSS, BY INDUSTRY, JUNE 1958

| Industry           | No. of               |                | Time Loss |
|--------------------|----------------------|----------------|-----------|
|                    | Strikes and Lockouts | No. of Workers |           |
| Fishing .....      | 1                    | 175            | 2,800     |
| Mining .....       | 2                    | 1,095          | 12,765    |
| Manufacturing .... | 17                   | 2,710          | 39,040    |
| Construction ..... | 9                    | 1,800          | 31,025    |
| Transportation ... | 3                    | 623            | 8,500     |
| Trade .....        | 5                    | 1,216          | 11,680    |
| Service .....      | 3                    | 226            | 625       |

\*Table G-1 at the back of this issue compares, on a monthly basis, the number of strikes and lockouts in existence during 1958 and 1957. The approximate number of workers involved and the time loss resulting are also compared on a monthly basis and the number of strikes and lockouts beginning during each month is indicated.

Table G-2 deals more specifically with the stoppages involving 100 or more workers in existence during June 1958. The approximate time loss, together with the number of workers involved, is indicated for each stoppage. The major issues and the major terms of settlement, if the stoppage has ended, are also mentioned. Other details include such information as the dates on which the stoppages began and ended and the industries in which they occurred.

Among Canada's provinces, Ontario showed the highest time loss, some 42,000 man-days. An estimated 40,000 man-days were lost through work stoppages in British Columbia, where two disputes caused nearly three quarters of the total time loss in the province. These two disputes, which began prior to June and continued through the month, involved plumbers and pipefitters in Vancouver and the seamen and other personnel of the Canadian Pacific Steamships on the B.C. coast.

The remainder of the time loss for the month—approximately 24,000 man-days—was accounted for by stoppages in Newfoundland, Nova Scotia, Quebec and Saskatchewan.

TABLE 2—STRIKES AND LOCKOUTS, WORKERS INVOLVED, AND TIME LOSS, BY PROVINCE, JUNE 1958

| Province           | No. of               |                | Time Loss |
|--------------------|----------------------|----------------|-----------|
|                    | Strikes and Lockouts | No. of Workers |           |
| Newfoundland ....  | 2                    | 294            | 595       |
| Nova Scotia .....  | 3                    | 1,119          | 12,860    |
| Quebec .....       | 5                    | 626            | 10,650    |
| Ontario .....      | 22                   | 3,310          | 42,190    |
| Saskatchewan ....  | 1                    | 26             | 50        |
| British Columbia.. | 7                    | 2,470          | 40,090    |

## Other Countries

In the period January to June there were 1,525 strikes in the United States. The strikes made idle some 720,000 workers compared with 690,000 for the first six months of 1957. The stoppages, fewest for any six-month period since the end of the Second World War, resulted in more than 7,350,000 man-days of idleness, also a record low.

The 8,412,000 days lost through stoppages caused by industrial disputes in the United Kingdom during 1957 were the most since 1926, the Ministry of Labour and National Service reports. In 1956, time loss totalled 2,083,000 days.

Less time was lost in Australia through industrial disputes during 1957 than in any year since 1939, except for 1942, the year of the country's greatest wartime peril.

Man-days lost in New Zealand through industrial stoppages totalled 28,168 in 1957, compared with 23,870 in 1956 and 52,043 in 1955.

4. QUEBEC ASSOCIATION FOR THE PREVENTION OF INDUSTRIAL ACCIDENTS. *Annual Report, 1956*. Montreal, 1957. Pp. 36.

## Canada at Work Broadcasts

The following broadcasts were made in 1957 and 1958 under the auspices of, and published by, the Department of Labour, Ottawa.

5. BROWN, ARTHUR HUNTINGDON. *Pension Plans and the Employment of Older Workers*. Pp. 3.

6. CAMPBELL, IAN. *The Canadian Picture of Rehabilitation*. Pp. 4.

7. CANADA. DEPARTMENT OF LABOUR. *A Small Beginning (Dramatized Program on Anti-discrimination)*. Pp. 7.

8. CANADA. DEPARTMENT OF LABOUR. *Try, try again (Dramatized Broadcast on Anti-discrimination)*. Pp. 6.

9. DYMOND, WILLIAM RICHARD. *What does a Shortage of Professional Manpower mean?* Pp. 4.

The speaker, Director of the Economics and Research Branch of the Department of Labour, speaks about the problem of supply and demand in the field of professional manpower.

10. EATON, (MRS.) REX. *Winter Employment*. Pp. 4.

The speaker is president of the National Council of Women of Canada.

11. FEINBERG, ABRAHAM L. *Prejudice, a Spiritual Pestilence*. Pp. 3.

Rabbi Feinberg of Holy Blossom Temple in Toronto talks about religious and racial prejudice.

12. FERGUSON, MAUD. *Now is the Time for Home Improvements*. Pp. 4.

The speaker, the well-known commentator, points out the advantages of having work done around the house during the winter months.

13. HALL, FRANK HAROLD. *Fair Employment Practices—a Good Beginning*. Pp. 5.

The speaker, Chairman of the Human Rights Committee of the Canadian Labour Congress, talks about the Canadian Fair Employment Practices Act passed in May 1953 and tells what his committee has done about the problem of discrimination in employment.

14. HORNSTEIN, RUEBEN AARON. *A Career in Canada's Weather Service*. Pp. 4.

The speaker, Meteorologist-in-Charge of the Dominion Public Weather Office at Halifax, N.S., describes the jobs of meteorological technicians and of professional weathermen for which there is a demand at the present time.

15. LANK, HERBERT HAYMAN. *Is Fair Employment Good Business?* Pp. 4.

The speaker, President of the DuPont Company of Canada Limited, talks about discrimination and prejudice as they affect employment.

16. LONG, MARCUS. *The Roots and Causes of Prejudice*. Pp. 4.

Talk about prejudice and discrimination.

17. PAGE, GARNET THOMAS. *Have we Enough Science and Mathematics Teachers in our High Schools?* Pp. 5.

The author, Deputy General Secretary of the Engineering Institute of Canada, suggests means of recruiting more teachers.

18. ROBERTSON, W. E. *Community Rehabilitation Program in Action*. Pp. 4.

Mr. Robertson is chairman of the Division for the Guidance of the Handicapped of the Community Chest and Council of Greater Vancouver. His talk was about rehabilitation of the physically handicapped in Vancouver.

19. STARR, MICHAEL. *Job Justice—We can't turn Back*. Pp. 4.

The scope of the Canada Fair Employment Practices Act and how it protects every worker.

20. STARR, MICHAEL. *Winter Employment Campaign*. Pp. 4.

Mr. Starr, Minister of Labour, outlines reasons for having work done during the winter months to provide employment for those who would otherwise be unemployed.

21. THOMSON, WILLIAM. *Winter Employment*. Pp. 5.

The speaker, Director of the Employment Branch of the National Employment Service,

spoke about the campaigns now going on throughout the country to help provide jobs for those who might otherwise be unemployed owing to seasonal layoffs.

22. WHEALY, LYLE C. *Home Improvement*. Pp. 4.

The speaker, Interim Chairman of the Canadian Council, Operation Home Improvement, tells how his organization helps to encourage home improvement and to supply more work during winter months.

23. WHITELAW, J. C. *Winter Employment*. Pp. 4.

24. WOODBURY, JOHN F. L. *How We got our Rehabilitation Centre*. Pp. 4.

The author, Vice-President of the Nova Scotia Rehabilitation Council, tells about the work of the Centre, which was founded in 1953.

## Congresses and Conventions

25. COUNCIL OF PROFIT SHARING INDUSTRIES. *Every Man a Capitalist; Proceedings, Ninth Annual Conference, Cleveland, Ohio, 1956*. Chicago, 1957. Pp. 151.

26. DOMINION - PROVINCIAL CONFERENCE, OTTAWA, 1957. *Dominion-Provincial Conference, 1957, Ottawa, November 25th and 26th, 1957*. Ottawa, Queen's Printer, 1958. Pp. 140.

"During its sessions the conference discussed matters concerning the financing of hospital insurance, the sharing of costs of assistance to persons in need, special assistance to the governments of the Atlantic Provinces and fiscal matters."

27. NATIONAL CONFERENCE ON EDUCATION FOR LEISURE, WASHINGTON, D.C., 1957. *The Community Approach to the Leisure Problem; Report, the Role of the Public School*. Washington, American Association for Health, Physical Education, and Recreation, 1957. Pp. 73.

The Conference discussed how to make use of leisure time in the best way and how school facilities can be used for this purpose.

28. NATIONAL MARITIME UNION OF AMERICA. *Proceedings, Eleventh National Convention held in New York, October 7th to 11th, 1957*. New York, 1957. Pp. 211.

29. SEMINAR ON THE CIVIC RESPONSIBILITIES AND INCREASED PARTICIPATION OF ASIAN WOMEN IN PUBLIC LIFE, BANGKOK, 1957. *Proceedings, Bangkok, 5 to 16 August 1957*. Organized by the United Nations in co-operation with the Government of Thailand. New York, United Nations, 1957. Pp. 54.

The Seminar discussed, among other things, projects in which women could develop and increase their participation. These projects include those of government, intergovernmental, and national and international voluntary organizations.

## Economic Conditions

30. CANADA. BUREAU OF STATISTICS. *Incomes, Liquid Assets and Indebtedness of Non-Farm Families in Canada, 1955*. Ottawa, Queen's Printer, 1958. Pp. 66.

"... Analyzes the income size distribution, liquid assets and indebtedness of non-farm families and unattached individuals."

31. CANADA. BUREAU OF STATISTICS. *National Account Income and Expenditure, 1926-1956*. Ottawa, Queen's Printer, 1958. Pp. 203.

32. COMMITTEE FOR ECONOMIC DEVELOPMENT. *Anti-Recession Policy for 1958; a Statement by the Program Committee*. New York, 1958. Pp. 30.

Suggests policies which the Federal Government in the U.S. might follow in 1958 to aid economic recovery.

33. UNITED NATIONS. ECONOMIC COMMISSION FOR ASIA AND THE FAR EAST. *Economic Survey of Asia and the Far East, 1957*. Bangkok, 1958. Pp. 261.

34. U.S. BUREAU OF LABOR STATISTICS. *Daily Indexes and Spot Market Prices, January 1, 1954-December 31, 1956*. Washington, G.P.O., 1958. Pp. 56.

"The daily index of prices on commodity markets and organized exchanges is a measure of the trend and price movements of commodities that are particularly sensitive to factors affecting spot markets."

## Employment Management

35. BADGER, ALFRED B. *Man in Employment; the Fundamental Principles of Industrial Relations*. London, Arthur Barker Ltd., 1958. Pp. 320.

Some of the topics discussed are collective bargaining, compulsory arbitration, strikes, wages, joint consultation, absenteeism, overtime, pensions, automation, labour turnover, promotion, and management training.

36. GREAT BRITAIN. MINISTRY OF LABOUR AND NATIONAL SERVICE. *Positive Employment Policies; Examples of Management Practice contributing to Good Relations in Industry*. Prepared by the Ministry of Labour and National Service and the Central Office of Information. London, 1958. Pp. 40.

37. INDUSTRIAL WELFARE SOCIETY. *Trends in Apprenticeship Training*. London, 1957? Pp. 27.

Report of a Conference on Trends in Apprenticeship Training held at Ashridge, England, November 2 to 5, 1956.

38. NATIONAL ASSOCIATION OF MANUFACTURERS OF THE UNITED STATES OF AMERICA. INDUSTRIAL RELATIONS DIVISION. *Satisfying the Salaried Employee; a Practical Manual for building Better Relations with All Categories of White Collar People: Technical and Professional, Clerical and Stenographic, Staff Personnel, Supervisory and Administrative, Engineering and Scientific, Sales and Research*. New York, 1957. Pp. 64.

Suggests how management can examine and meet the needs of its salaried employees with respect to status and recognition, compensation, communication and supervision.

39. U.S. NAVY DEPARTMENT. *Manual of Employment Interviewing*. Washington, G.P.O., 1957. Pp. 42.

Intended as an aid in training new interviewers. Contents: The Employment Interview. Preparation for the Interview. Assessing the Applicant. The Interview Guide and its Use. Conducting the Interview. Making the Summary Evaluation.

## Industry

40. EUROPEAN PRODUCTIVITY AGENCY. *Industrial Uses of Nitrogen in the United States*. Project No. 371. Paris, 1957. Pp. 132.

A Mission, representing three European countries, visited the U.S. in order to study, among other things: the different nitrogenous compounds used for industrial purposes; new uses for nitrogen; the packaging and transport of technical nitrogen and ammonia solutions; and, technical assistance to industrial users of nitrogen.

41. LIVERPOOL. UNIVERSITY. SOCIAL SCIENCE DEPARTMENT. *Men, Steel and Technical Change*. London, H.M.S.O., 1957. Pp. 36.

Based on a study of technical change in a large British steelworks. Contents: The Technical Changes. Effects on the Labour Force. Problems of Management. Relations between Trade Unions and Management. Attitudes to Technical Change. The Melting Shop: a Case Study.

42. NATIONAL INDUSTRIAL CONFERENCE BOARD. *Foreign Licensing Agreements. I. Evaluation and Planning*, by Enid Baird Lovell. New York, 1958. Pp. 88.

Foreign licensing refers to "the licensing of foreign patents, trade-marks, and other industrial property rights by their private owners."

Contents: Nature and Scope of Licensing. Present Status. Reasons for and against Licensing. Company Licensing Policy. Organization for Licensing. Antitrust Considerations in Licensing. Deciding When and Where to license. Factors influencing Success or Failure in Licensing. Company Appraisal of Licensing.

43. UNITED NATIONS. ECONOMIC COMMISSION FOR EUROPE. *Railways and Steel*. Geneva, United Nations, Department of Economic and Social Affairs, 1957. Pp. 63.

Examines the demand for steel by railroads in European countries.

## Industry-Location

The following four studies were issued by the Alberta Industrial Development Branch in Edmonton in 1958.

44. *Survey of Coaldale*. Pp. 16.

45. *Survey of Drumheller*. Pp. 17.

46. *Survey of Grande Prairie*. Pp. 18.

47. *Survey of Vegreville*. Pp. 12.

## International Labour Conference

48. INTERNATIONAL LABOUR OFFICE. *Conditions of Employment of Plantation Workers*. Fifth item on the agenda. Geneva, 1957-1958. 2 Volumes.

Report 5(1)-(2), International Labour Conference, 42nd session, Geneva, 1958.

Part 1 contains the texts of a proposed Convention and a proposed Recommendation which were submitted to Member Governments.

Part 2 summarizes and briefly analyzes the replies for fifty Governments. It also contains English and French versions of the proposed texts to be discussed at the 42nd Session.

49. INTERNATIONAL LABOUR OFFICE. *The I.L.O. in a Changing World: Report of the Director-General to the 42nd Session of the International Labour Conference, 1958; Twelfth Report of the International Labour Organization to the United Nations*. Geneva, 1958. Pp. 127. At head of title: Report 1.

## Labour Organization

50. CHAMBERLIN, EDWARD HASTINGS. *The Economic Analysis of Labor Union Power*. Washington, American Enterprise Association, 1958. Pp. 48.

The author suggests that some restrictions should be placed on the monopoly powers of labour unions just as they are on the monopoly powers of business corporations.

51. COOGAN, JOHN E. *Voluntary Unionism for Free Americans*. Washington, National Right to Work Committee, n.d., 1957? Pp. 32.

The author thinks that the right-to-work law, which has already been adopted by 18 states, is one way to cut down on union abuses.

52. DESSAU, JAN. *Ten Years' Activity of the World Federation of Trade Unions in the United Nations*. London, W.F.T.U. Publications Ltd., 1956. Pp. 40.

## Labour Supply

53. CLAGUE, EVAN. *Testimony... before the Joint Economic Committee for Hearings on January 1958 Economic report of the President January 28, 1958*. Washington, 1958. Pp. 8, 44.

Mr. Clague, Commissioner of Labor Statistics, spoke about the findings of the U.S. Bureau of Labor Statistics concerning trends in the labor force, employment and unemployment, wages, prices, productivity, and construction.

54. U.S. DEPARTMENT OF LABOR. *Summary of the Discussion of the Meeting on Education and Employment, November 12-13, 1957 held in... Washington*. Washington, 1957? Pp. 14.

This meeting was called to seek advice on the Department of Labor programs in the manpower field as they relate to education and training.

## Older Workers

55. UNITED NATIONS. DEPARTMENT OF ECONOMIC AND SOCIAL AFFAIRS. *The Aging of Populations and its Economic and Social Implications*. New York, 1956, i.e. 1957. Pp. 168.

Partial Contents: Changes in the Age Structure of Populations. Trends and Differentials in the Aging of Populations. Causes of the Aging of Populations. Economic and Social Implications. Aging of Populations: Future Trends.

56. U.S. WOMEN'S BUREAU. *Suggestions to Employers in regard to hiring Older Women*. Washington, G.P.O., 1958. Pp. 8.

## Productivity

57. EUROPEAN PRODUCTIVITY AGENCY. *The Influence of Sales Taxes on Productivity*. Project No. 315. Paris, Organization for European Economic Co-operation, 1958. Pp. 268.

Examines sales taxation in nine countries: Austria, Belgium, France, Germany, Great Britain, Greece, Italy, the Netherlands, and Turkey.

58. FOURASTIE, JEAN. *Productivity Prices and Wages*. Project No. 235. Paris, European Productivity Agency of the O.E.E.C., 1957. Pp. 113.

Partial Contents: Productivity Measurement based on Prices. Productivity Measurement derived from National Production Statistics.

59. GREAT BRITAIN. COUNCIL ON PRICES, PRODUCTIVITY AND INCOMES. *First Report*. London, H.M.S.O., 1958. Pp. 75.

The Council had the following terms of reference: "... To keep under review changes in prices, productivity and the level of incomes (including wages, salaries and profits) and to report thereon from time to time."

60. INTERNATIONAL CONFERENCE ON INTER-FIRM COMPARISON, VIENNA, 1956. *Inter-Firm Comparison, on Incentive to Productivity; Papers presented at the International Conference on Inter-Firm Comparison, Vienna, 17th-20th September, 1956*. Project No. 379. Paris, European Productivity Agency of the O.E.E.C., 1957. Pp. 352.

"Inter-firm comparison is a... technique for exchange of experience and information between firms..." This book contains 34 papers contributed by experts from 11 European countries.

## Professional Workers

61. CONFERENCE ON HIGHER EDUCATION IN SCIENCE AND TECHNOLOGY, CHICAGO, 1957. *Engineering and Scientific Education; Foundation of National Strength; Conference, Proceedings... Chicago, Ill., October 31-November 2, 1957*. Washington? Scientific Manpower Commission? 1958. Pp. 99.

Conference sponsored by Engineering Manpower Commission of Engineers Joint Council, and others.

Partial Contents: Technological Manpower in Western Europe, by Dael Wolffe. Technological Manpower in the United Kingdom. Science Education in Communist Lands, by Nicholas De Witt. Manpower Aspects of Higher Education in Science and Technology, by M. H. Trytten. The Magnitude of the Problems confronting Technological Education, by Gordon B. Carson. Industrial Giv-

ing, by Laird Bell. Higher Education and Sponsored Research, by J. W. Buchta. Engineering Faculty Requirements, 1957-67, by William H. Miernyk. Recruitment of Science Faculties, by John S. Nicholas.

62. U.S. BUREAU OF EMPLOYMENT SECURITY. *Scientific and Engineering Occupations in the Chemical Industry*. Washington, 1957. Pp. 25.

Employment in engineering and scientific occupations accounted for 9.6 per cent of total employment in the surveyed plants. One third of the surveyed establishments had current vacancies. Turnover among professional workers was not considered a problem. Companies preferred to hire recent male college graduates.

## Wages and Hours

63. CONFERENCE ON ECONOMIC PROGRESS, WASHINGTON, D.C. *Wages and the Public Interest...* Washington, 1958. Pp. 62.

This study states that wages and living standards are advancing too slowly to maintain full employment and full production.

64. U.S. BUREAU OF LABOR STATISTICS. *Earnings of Communications Workers, October 1956: Class A Telephone Carriers, Western Union Telegraph Co., Radio-Telegraph Carriers, Ocean-Cable Carriers*. Washington, 1957. Pp. 10.

65. U.S. BUREAU OF LABOR STATISTICS. *Wage Structure, Men's and Boys' Shirts (Except Work Shirts) and Nightwear, February, April and October 1956*. Washington, G.P.O., 1957. Pp. 110.

Based on a survey of 286 establishments with a total work force of about 70,000.

## Works Councils

66. CANADA. DEPARTMENT OF LABOUR. *Labour-Management Co-operation through Joint Consultation*. Ottawa, Queen's Printer, 1958. Pp. 27.

Provides information about labour-management committees.

67. INDUSTRIAL WELFARE SOCIETY. *The Works Committee Members' Handbook; a Manual for All Representatives*. London, 1957. Pp. 34.

Explains the purpose of joint consultation, the purpose of having works councils, how to draft a constitution and standing orders for the works council, the duties of the chairman, secretary and members of the committee, and how to make joint consultation work.

## Miscellaneous

68. CANADA. UNEMPLOYMENT INSURANCE COMMISSION. *Worker's Handbook on Unemployment Insurance*. 12th ed. Ottawa, Queen's Printer, 1958. Pp. 18.

69. GREAT BRITAIN. CENTRAL OFFICE OF INFORMATION. REFERENCE DIVISION. *Some British Records and Achievements in Science, Industry and Technology*. London, H.M.S.O., 1958. Pp. 32.

Contents: Engineering and Energy. Industrial and Other Materials. Transport and Communications. Farming. Fundamental Science. Major World Speed and Aircraft Performance Records. Nobel Prizes for Science: Awards to UK Scientists.

70. NATIONAL INDUSTRIAL CONFERENCE BOARD. *How to stimulate Salesmen to Better Selling*. New York, c1958. Pp. 112.

Contents: Better Supervision to increase Sales. Using Sales Training to build Competence and Enthusiasm. Sales Meetings with Post-Meeting Punch. Compensation as a Stimulant. Contents. How Merit Ratings improve Sales Performance.

71. UNITED NATIONS. ECONOMIC COMMISSION FOR ASIA AND THE FAR EAST. *Mining Developments in Asia and the Far East, 1956*. Bangkok, 1957. Pp. 63.

72. U.S. PRESIDENT'S COMMITTEE ON EMPLOYMENT OF THE PHYSICALLY HANDICAPPED. *Reports on Employment of the Handicapped: Personnel and Industrial Relations; Two Doctors; the Safety Engineer*. Washington, G.P.O., 1958. Pp. 37.

Partial Contents: Personnel Planning in employing the Handicapped at Northrop Aircraft, Inc. What Personnel has learned from the Handicapped at Repeal Brass Co. Rehabilitation as a By-Product of Remunerative Employment at Hughes Aircraft Co. The Utilization of Special Groups such as the Epileptic, Heart, TB, Deaf, and Aged as practised at Northrop Aircraft, Inc. What Safety has learned from the Handicapped at Northrop Aircraft, Inc. The Safety Engineer's Part in the Placement of the Physically Handicapped at Ai Research Manufacturing Co.

## Housing Starts Increasing in Canada, United States, Great Britain

The number of new housing units on which construction began in Canada in May was 18,081, compared with 13,601 in May 1957, the Dominion Bureau of Statistics reported last month. This continued the upward trend that started some months ago, raising the number of starts in the January-May period almost 60 per cent, to 46,621 units compared with 30,713 a year earlier.

The number of units completed in May rose less sharply than the number of starts, to 9,900 from 7,597 in 1957, making the five-month total 15 per cent larger than last year, at 45,196 units compared with 39,253.

Units in various stages of construction at May 31 numbered 76,271, which was 26 per cent more than 60,594 units on that date last year.

### United States

In the United States non-farm housing starts rose more than seasonally to 115,000 in June, 15 per cent higher than a year earlier and the highest total for any month since August 1955.

At the end of the first half of 1958 a total of 530,400 new houses and apartments had been put under construction, which was 3 per cent more than the 513,600 units begun in the comparable period of 1957.

### Great Britain

In Great Britain in 1957, for the fifth year in succession, the number of houses built reached 300,000, the actual figure being 301,090. Of this total, local authorities were responsible for the building of 165,910 houses, despite restrictions on capital expenditure which the Government imposed in 1956 and 1957.

Continued progress was made in 1957 with slum clearance and rehousing. In England and Wales more than 148,000 were moved from unfit houses. Unfit houses demolished or closed totalled about 44,500, nearly 10,000 more than 1956, the first year of the campaign. In Scotland, more than 11,000 houses were demolished or closed.

## Co-operative Housing in U.S. Shows Marked Gains Since War

Co-operative housing in the United States has experienced marked gains since the end of the Second World War, according to an article in *Construction Review*, June 1958, a publication of the U.S. Departments of Labor and Commerce.

More than 100,000 co-operative housing units are in existence, and 45,000 of these have been financed with federally insured (FHA) mortgages since 1950.

An additional 22,000 units were built under various New York state laws. A

further 22,000 units were in war housing developments that were purchased from the Public Housing Authority by mutual or co-operative corporations.

Mortgage money for co-operatives has been furnished by insurance companies, union pension and welfare funds, and, in New York state, by state and municipal bond issues. Mortgages of co-operatives are also eligible for FHA insurance under the National Housing Act.

Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage-earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners of the co-operative firms.

## D—National Employment Service Statistics

Tables D-1 to D-5 are based on regular statistical reports from local offices of the National Employment Service. These statistics are compiled from two different reporting forms, UIC 751: statistical report on employment operations by industry, and UIC 757: inventory of registrations and vacancies by occupation. The data on applicants and vacancies in these two reporting forms are not identical.

(a) The record of the Department includes lockouts as well as strikes but a lockout or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of importance. Information as to a strike involving a small number of employees for a short period of time is frequently not received until some after time its commencement.

(b) Strikes unconcluded at the end of the previous year are included in these totals.

TABLE G-2.—STRIKES AND LOCKOUTS, JUNE 1958, INVOLVING 100 OR MORE WORKERS

(Preliminary, subject to revision)

| Employer(s)                                                                                                 | Union(s)                                                                                                                                                | On Strike or Locked Out       |                       |                  | Date Began(a) | Date Terminated or Lapsed | Major Issues                                                                | Result                                             |

## QUEEN'S PRINTER DEPOSIT ACCOUNTS

### An Easy Way to Subscribe for Labour Department Publications

*Labour Gazette* readers who regularly purchase publications of the Department of Labour (see list opposite) may find it useful to make use of a Queen's Printer deposit account. This account removes the necessity of making small individual remittances. The minimum deposit is ten dollars (\$10.00). Orders are charged to the account and statements on the status of the account are sent out regularly.

The account may be used, of course, to order other government publications. Make remittances payable to the Receiver-General of Canada and send to the Queen's Printer, c/o Superintendent of Government Publications, Ottawa.

## manpower and labour relations REVIEW

Economics and Research Branch, Department of Labour, Canada

### Current Manpower Situation

The estimated number of persons with jobs remained almost unchanged between July and August, following a strong advance in the previous month. Since spring, total employment, adjusted for seasonal changes, has been rising slowly and unevenly; in August it was about 1 per cent above the low point in February but was still not up to last year's high. The number of persons without jobs and seeking work continued to decrease.

The number of persons with jobs in August, at 6,025,000, was up only 2,000 from July, a considerably smaller rise than the average of past years. Agricultural employment rose by 17,000 during the month but was offset by a decline in non-farm employment. The decline was limited to male workers. The number working less than full-time because of short time or turnover dropped moderately. On the other hand, the number on temporary layoff (estimated at 37,000) was markedly higher than it has been at this time for several years.

The labour force growth has been much smaller in recent months than it was during 1956-1957. In August, the labour force estimate was 6,306,000, an increase of just over 1 per cent from the year earlier. The growth rate prevailing through most of last year was more than 3 per cent.

The number of persons without jobs and seeking work was estimated to be 281,000 in August, down 10,000 from July but still 60 per cent higher than a year earlier. This increase is reflected in the classification of labour market areas (table, p. 948) which shows that 50 of 109 areas were in labour surplus categories, compared with 28 a year ago.

The business trends of various industries have differed sharply in the past year. The goods producing sector has experienced a fairly sharp contraction, while a further expansion of the trade, finance and service industries has sustained the level of total non-farm employment (see below). The main weaknesses have been in forestry, mining, non-residential construction and durable goods manufacturing.

Apart from trade, finance and services, the main source of strength has been the high rate of residential construction. According to preliminary estimates, the number of new units started in larger urban centres during August was close to one-third greater than in August 1957 and the total for eight months was 54 per cent greater. The recent announcement that builders

may obtain NHA loans for an additional 25 dwelling units each is expected to maintain a high rate of activity in the industry during the remaining months of this year. The annual total of new units started may well exceed 150,000.

SOURCE: The Labour Force, DBS.

shutdown of automobile plants in preparation for the production of new models. This resulted in heavy layoffs in Windsor, Oshawa, Oakville, and Hamilton. The shutdown also affected supply plants, particularly those in St. Catharines and Sarnia.

In the Atlantic region a reduced pulp-cutting program resulted in the early release of some 2,000 workers in Newfoundland, and in Nova Scotia a cutback in coal mining affected more than 6,000 workers in Sydney and New Glasgow. Staggered layoffs were instituted in July, and in August all mines were closed for three weeks—a two-week holiday period and one additional week. A return to full-time employment was expected in September.

The current business recession has affected all parts of the country during the past year, although the rates of decline and recovery differed considerably. The approximate decline in employment (seasonally adjusted) between the peak period last fall and the trough this spring was close to 6 per cent in the Atlantic region, 3 per cent in Quebec, 2 per cent in Ontario and the Prairie Provinces, and less than 1 per cent in British Columbia. Although the trend has since risen in all regions, it is still lower than last year in Ontario, British Columbia and the Atlantic region.

## Recent Economic Trends

Most measures of business activity have shown moderate advances in recent months, indicating that the low point in economic activity was reached sometime this spring. Industrial production, on a seasonally adjusted basis, increased from a low of 272.0 in December 1957 to 280.8 in June. Total non-farm output showed a more moderate rise, about 1 per cent from the first to the second quarter. Non-farm employment (seasonally adjusted) showed an upturn in April after declining steadily for five months, and had advanced by more than 3 per cent in August.

The recovery in industrial production was fairly widely diffused in manufacturing and mining. Of the 18 industries comprising the index, 12 were expanding in May while only 4 were showing advances six months earlier. The upturn in production is noteworthy not only for its breadth, but also because strong advances were taking place in some of the industries that were hardest hit during the recession. Output of iron and steel products, seasonally adjusted, increased by 6.5 per cent between December and May, recovering almost one third of the preceding drop. Electrical apparatus and supplies showed an even sharper rise in output, although the turning point occurred somewhat later than in iron and steel (March compared with December). In the three months, March to June, production of electrical apparatus had risen by almost 10 per cent, making up for more than half of the loss that occurred in the preceding nine months.

The rising trend of iron and steel production is attributable to increasing demand from many sectors, particularly railways and construction. As a result, the inventory liquidation of past months has been halted and new orders have been met by increasing output. New orders for steel in July were substantially larger than in any month since the start of the business recession.

Production of electrical supplies turned upwards early in the year in response to a rising trend in orders. New orders for electrical supplies increased moderately from the first to the second quarter, reflecting firmer demands for various types of household appliances and electrical equipment. Much of the strength came from the record rate of housebuilding undertaken in the first half of the year.

Over-all business activity showed a relatively modest increase in recent months but the turnabout in trend was encouraging. The second quarter estimates of the Gross National Product, which measures the total value of goods and services produced, stood at \$32,248 million (seasonally adjusted at annual rates), up \$564 million from the first quarter. While part of the rise was due to price increases there was strong evidence of improvement in some sectors of the economy which previously had shown weaknesses. Outlays for new non-residential construction, seasonally adjusted, fell only about 2 per cent from the first to the second quarter, in contrast to a drop of about 10 per cent in the first quarter. Exports of goods and services advanced moderately after declining in both the fourth quarter of 1957 and the first quarter of this year. Grain, uranium and aircraft accounted for much of the increase in exports.

Increased outlays by governments for goods and services, and higher expenditures for housing, were additional sources of strength in the second quarter. Expenditures on new residential construction showed a quarter-to-quarter advance of 8.8 per cent, after allowing for seasonal factors. Personal expenditures on goods and services were virtually unchanged from the first quarter but they were up sharply from a year ago. Wages and supplementary labour income, seasonally adjusted, increased by 2 per cent, reflecting higher average weekly earnings; this was the first significant advance in labour income since the third quarter of 1957.

Most major industries showed some recovery in employment during the first half of the year. All but two of the eight leading non-farm industries showed a more-than-seasonal rise in employment between the first and second quarter. Forestry, trade and construction showed the most improvement while slight decreases occurred in the mining and service industries. By August, total non-farm employment was estimated to be 9,000 higher than in the previous year.

While the over-all employment picture is encouraging, certain industries have been experiencing a relatively slow recovery. Manufacturing employment, for example, was still lower in July than it was last year; a sharp cutback in automobile production accounted for much of the year-to-year decline. Employment in some other sectors of manufacturing such as iron and steel appeared to have lagged the upturn in production. Average hours worked in manufacturing, normally adjusted, were rising steadily during the first half of the year; after reaching a low of 39.5 in January 1958 the average increased to 40.8 in June. Forestry employment remained considerably lower than last year despite the sharp upturn in the second quarter. Excessive pulpwood inventories together with a failure to increase output in the pulp and paper industry continued to retard pulpwood production.

(a) Distribution of these figures between male and female workers can be obtained from *Labour Force*, a monthly publication of the Dominion Bureau of Statistics. See also inside back cover of April issue.

(b) See inside back cover, April issue.

(c) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

# Labour-Management Relations

## The Bargaining Scene

The number of major agreements affected by bargaining activity declined further in August from the peak reached in July to a total of 78 agreements covering 413,000 workers. Despite this decline, there has been a substantial increase in conciliation activity. Only two settlements were recorded during the month. One, covering more than 30,000 lumber workers on the B.C. coasts, provided no wage increase for the duration of the new agreement. The other provided a 30-cent-an-hour increase over two years for construction workers in Toronto.

In the railway negotiations, the union has accepted the majority report of the conciliation board on the non-operating trades. The railways have said they will implement the majority report if they can obtain permission to increase freight rates. The unions in the meantime have been preparing a strike ballot.

## Bargaining Status of Major Agreements Reviewed, September 15, 1958

N = negotiating C = conciliation P/C = post conciliation

A = arbitration W/S = work stoppage.

Brackets indicate information not confirmed

\* Contract expires September 1958.

In the July issue of the Labour Gazette information was given on wage changes in a sample of major agreements this year. This month Table 1 shows a breakdown of the principal fringe benefit clauses in 30 major agreements signed between January 1 and July 31, 1958. A comparison of the provisions of current and former agreements shows that fringe benefit items have remained static this year for these larger agreements. Last year the tendency in the major bargaining units was for longer-term agreements, improved vacations, increased union security, shorter working hours, the introduction of a few supplementary unemployment benefit plans and the extension of pension and medical plans. This year seems to have been one of little change, with maintenance of existing provisions.

# Manpower Situation in Local Areas

## ATLANTIC

The number of persons with jobs in the Atlantic region was estimated at 517,000 at August 23, virtually unchanged from the previous month but 19,000 lower than a year before. Temporary layoffs were prevalent in August, particularly in coal mining. More than 6,000 coal miners in Nova Scotia were on temporary layoff as the DOSCO mines remained closed for a week after the normal two-week shutdown for annual vacation. Progressive layoffs were reported in certain parts of manufacturing, notably in shipbuilding and railway rolling stock. Pulpwood logging was sharply curtailed during the month, particularly in Newfoundland, where this year's cutting was almost completed.

Retail trade was maintained at a fairly high level despite the fact that weaknesses existed in some of the major industries.

The effects of the current business recession have been more marked in this region than in other parts of the country. Industrial employment in July was almost 7 per cent lower than a year earlier. The drop was shared about evenly by Newfoundland, Nova Scotia and New Brunswick; the decline in Prince Edward Island was more moderate.

Most major industries in the region have been operating well below capacity for more than a year. Forestry recorded the sharpest curtailment in production and employment but weaknesses were also apparent in manufacturing, transportation and coal mining. During the first seven months of 1958 manufacturing employment was, on the average, about 6 per cent lower than last year; most of the drop occurred in primary iron and steel, shipbuilding and railway rolling stock. Construction employment expanded more slowly than expected this year so that in July it was still somewhat lower than last year. However, recent reports indicate that the seasonal peak in construction employment had not been reached by July and that further improvement could be expected. While the value of contracts awarded in the first seven months of 1958 was almost double that of last year many of the larger jobs were still in the early stages of building, when manpower requirements are lowest.

At September 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 3 (0); in moderate surplus, 7 (7); in balance, 11 (14).

# CLASSIFICATION OF LABOUR MARKET AREAS—SEPTEMBER 1, 1958

|                                                                                                                  | SUBSTANTIAL<br>LABOUR<br>SURPLUS                       | MODERATE<br>LABOUR<br>SURPLUS                                                                                                                                                                                                                                                                         | APPROXIMATE<br>BALANCE                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | LABOUR<br>SHORTAGE |

→ The areas shown in capital letters are those that have been reclassified during the month; an arrow indicates the group from which they moved. For an explanation of the classification system used, see inside back cover of April issue.

## Local Area Developments

**St. John's** (metropolitan) was reclassified from Group 2 to Group 3. The construction industry was principally responsible for the improvement in this area but labour supplies were still not being fully utilized; registrations of skilled construction workers were about 20 per cent higher than last year. Forestry employment declined during the month to a level substantially lower than that of a year ago. The iron ore mines at Bell Island continued to be affected by the drop in demand for steel and remained idle during the last week of August. Total employment was somewhat lower than last year, mainly because of weaknesses in mining and forestry.

**New Glasgow** (major industrial) was reclassified from Group 2 to Group 1. Layoffs at Eastern Car Co. Ltd., resulted in a substantial rise in unemployment. Some rehiring can be expected to take place at this plant in September when production gets under way on a new freight car contract. All major manufacturing plants in the area were slack for the month as holiday shut-downs were in progress. The construction industry showed some improvement but there was still a heavy surplus of skilled workers.

**Sydney** (major industrial) was reclassified from Group 2 to Group 1. All coal mines in the area were idle for a two-week vacation period, which was followed by a temporary layoff for one week. The cutback in coal production resulted from declining sales. Steel production was maintained at a fairly high level during the month. The construction industry was more active than in the previous month.

**Bathurst, Bridgewater, Edmundston, Summerside and Yarmouth** (minor) were reclassified from Group 2 to Group 3.

## QUEBEC

Employment in the Quebec region showed little change during the month. The number of persons with jobs at August 23 was estimated at 1,675,000, virtually unchanged from the previous month but about 23,000 higher than a year earlier. Farm employment declined by 4,000 during the month, but the decline was offset by a corresponding gain in the non-agricultural sector. Unemployment remained at about the same level as in the previous month but continued to be substantially higher than last year.

Labour demand, as indicated by the number of job vacancies registered with the National Employment Service, increased significantly during August, although it was still below last year's level. Strengthening occurred mostly, though not entirely, in seasonal industries. Forestry employment, which had experienced a considerable drop in August 1957, remained stable in August of this year, although by the end of the month it was still below last year's

level. The construction industry continued to play an important part in the employment market and had a sustaining influence on employment in plants producing building materials and supplies. The number of housing units started in urban centres in the region during July was about 22 per cent higher than a year earlier, and the total for the first seven months of this year about 37 per cent above the corresponding period a year ago; a further gain was registered in August. Total construction employment in July was, however, still slightly below last year's level, owing to the decline in industrial construction.

In manufacturing, the textile industry as a whole showed little improvement over the month, but the clothing industry began recalling workers in preparation for the fall season, and some shortages of experienced workers were reported. The wood products industry benefited from the increased housebuilding, and the majority of plywood plants were working steadily. Among the iron and steel products industries, increased activity and new demands for labour were reported from plants producing structural steel and home appliances. Lack of orders resulted in a drastic staff reduction at the Canadian Car Company; however, the company has recently received a large order for railway rolling stock which should soon be reflected in increased activity.

Four of the 24 areas in the region were reclassified during the month, one from the moderate surplus to the substantial surplus category, and three to categories denoting less unemployment. At September 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 1 (0); in moderate surplus, 18 (11); in balance, 5 (13).

### Local Area Developments

**Montreal** (metropolitan) remained in Group 2. Employment in July was fractionally below last year's level. Construction was mainly responsible for some improvement in the employment situation in August. Employment in the textile industry remained below last year's level, in spite of a seasonal increase in clothing manufacture. In the iron and steel products industry, output of structural steel and household appliances increased, but production of aircraft, aircraft parts, and railway rolling stock was down from a year ago.

**Quebec-Levis** (metropolitan) remained in Group 2. Employment in the area was at last year's level. A decline in manufacturing was offset by increases in the construction and service industries. A number of pulp and paper mills were still on short time. Some 2,000 employees of the Davie Shipbuilding Company at Lauzon were on strike.

**Major Industrial Areas** reclassified from Group 1 to Group 2—*Rouyn-Val d'Or*: The reclassification was due mainly to increased residential construction and the re-opening of a gold mine, which resulted in the hiring of 150 miners. **Shawinigan** (major industrial) remained in Group 2. A post-holiday recovery in the textile industry and increased seasonal activity in the leather products industry resulted in a decline in unemployment.

**Montmagny** (minor) was reclassified from Group 2 to Group 3.

**Sorel** (minor) was reclassified from Group 2 to Group 1, due mainly to layoffs at the shipyards.

## ONTARIO

Total employment in Ontario remained virtually unchanged during the month. The number of persons with jobs at August 23 was estimated to be 2,220,000, fractionally lower than in the previous month and about 34,000 lower than a year earlier. A decline of about 13,000 in non-agricultural employment during the month was offset by a corresponding seasonal rise in farm employment. Almost two thirds of the year-to-year decline in total employment was accounted for by agriculture. Unemployment declined slightly during the month but remained higher than a year earlier.

During the second half of August, a return to pre-vacation activity was evident in most manufacturing industries; the important exceptions were the motor vehicle industry and the industries indirectly affected by the current labour disputes. Extensive shutdowns in the motor vehicle industry, resulting in a drop in production to less than half of last year's volume, kept some 10,000 automotive workers idle and were responsible for reduced employment in the automotive parts and accessories industries. The strike involving employees of the Steel Company of Canada and the Brewers' Warehouse Company affected employment in the supply industries and in transportation, contributing substantially to a decline in freight car loadings. So far, the output of steel products does not seem to have been affected by the Stelco shutdown. Steel users have been able to draw upon their accumulated stocks, although there have been reports of developing shortages. The food processing and garment industries reported normal seasonal increases in employment. Output and employment in the electrical appliances and farm implements industries showed a marked improvement. Construction remained the most buoyant industry in the region. The number of housing units started in urban centres in August, seasonally adjusted, was about 30 per cent higher than in July, exceeding last year's volume by about one-quarter. At the same time, institutional and commercial construction continued at a high level, particularly in larger centres.

Five of the 34 areas in the region were reclassified during the month, three from moderate surplus to the balance category, and two in the direction of increased unemployment. At September 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 3 (2); in moderate surplus, 11 (6); in balance, 20 (26).

### Local Area Developments

**Metropolitan Areas**, classifications remained unchanged: *Hamilton* (Group 2)—This area was most directly affected by the labour dispute that resulted in the closure of the four local plants of the Steel Company of Canada normally employing about 8,000 workers. The strike temporarily interrupted

all trucking, construction and maintenance work done by outside contractors, and caused layoffs in the material and parts supplying industries. This was partly offset by high seasonal activity in the canning, food processing and farm implements industries. *Ottawa-Hull* (Group 3)—Most industries continued at a high level of activity. Labour demands from the construction industry increased during the month. One newsprint plant returned to a six-day work week. Total industrial employment was estimated to be slightly higher than a year ago. *Toronto* (Group 3)—Employment showed general improvement, as most plants resumed work following the annual holidays. However, much of the improvement was seasonal, particularly in the construction, canning and garment industries. In July, total industrial employment in the area was slightly below the year-earlier level. *Windsor* (Group 1)—August brought a further increase in the labour surplus, mainly as a result of temporary layoffs of automobile workers for prolonged annual vacations and model change-over. Production is expected to resume in September.

**London** (major industrial) was reclassified from Group 3 to Group 2. The reclassification was due mainly to a slight easing-off in the production of heavy electrical equipment and to layoffs resulting from the Brewers' Warehouse strike.

**Oshawa** (major industrial) was reclassified from Group 2 to Group 1. A temporary shutdown of the automobile plant affected most local industries, which depend on the automobile industry.

**Belleville-Trenton, Galt and Pembroke** (minor) were classified from Group 2 to Group 3.

## PRAIRIE

Persons with jobs in the Prairie region at August 23 were estimated at 1,080,000, unchanged from a month earlier but some 21,000 more than a year before. Unemployment declined slightly though it remained higher than in the same period last year. Agricultural employment increased as harvesting got under way but additional labour demands were readily met by local labour supplies, so that for the first time in many years the government-assisted movement of harvest labour from eastern Canada was not required.

Non-farm employment declined slightly, largely as a result of employment reductions in mining and transportation. Total manufacturing showed

strength, gains in some industries being offset by losses in others. Further hiring in the trade, finance and service industries was reported in most areas.

Employment trends showed little change in July. Total industrial employment remained at a slightly lower level than a year ago. Total construction employment continued to rise; residential construction activity remained at a record level in the Prairie region and other types of construction began to show strength as well. Between January and July, the number of housing

starts in urban centres with a population of 5,000 and over was almost 90 per cent higher this year than last. Manufacturing and transportation industries showed seasonal gains, although employment was about 3 per cent below year-earlier levels in both industries.

None of the 20 labour market areas was reclassified during the month. At September 1, the area classification was as follows (last year's figures in brackets): in moderate surplus, 2 (0); in balance, 18 (20).

### Local Area Developments

**Calgary** (metropolitan) remained in Group 3. Unemployment declined seasonally but was considerably higher than a year ago. Residential construction was mainly responsible for the rise in employment although all types of construction shared in the increase. In July total industrial employment increased further but remained slightly lower than a year ago.

**Edmonton** (metropolitan) remained in Group 3. Increased construction activity, as well as seasonal gains in other industries, contributed largely to a rise in employment. Unemployment decreased moderately but was higher than in the same month a year ago. In July total industrial employment showed a further increase. While manufacturing and trade showed seasonal gains, coal mining declined further and employment in the development and production of oil showed no improvement.

**Winnipeg** (metropolitan) remained in Group 3. Employment increased further during the month as activity in all types of construction, manufacturing, trade and service industries increased. Construction employment showed marked increases and, as a result, temporary shortages occurred in various skilled occupations. Unemployment declined during the month but remained at a higher level than a year ago.

**Fort William-Port Arthur** (major industrial) remained in Group 2. There was only a slight decline in unemployment in this area as seasonal gains in construction and pulp and paper manufacturing industries were offset by declines in forestry, shipbuilding, transportation and grain storage. Progressive layoffs occurred in Port Arthur shipyards as work was nearing completion on an ice-breaker and a tanker. Substantially reduced grain shipments from the west resulted in layoffs of elevator and railway personnel. Forestry employment was down 32 per cent from a year ago owing to curtailed pulp-cutting quotas.

### PACIFIC

The employment recovery in the Pacific region was still retarded during August by restrictions on logging operations and by labour-management disputes. Unemployment declined moderately during the month as labour requirements for construction (mainly housebuilding), fishing and agriculture expanded seasonally.

The number of persons with jobs was estimated to be 533,000 in August, almost 3 per cent lower than a year earlier. The difference in the number actually at work over the year was considerably greater than this because the "with jobs" figure includes, for example, persons on strike or loggers on temporary layoff.

Restrictions imposed because of the forest fire danger were lifted earlier in the month, permitting partial resumption of logging. On the 20th of the month a

closure of operations in some of the main logging areas was re-imposed, idling a substantial part of the 15,000 loggers in the region.

The settlement of the seamen's strike at the end of July had a favourable effect on the employment in the tourist industry but was followed at the end of August by a strike of longshoremen, which threatened to tie up all ocean freight traffic.

A dispute involving 1,000 plumbers and steamfitters in Vancouver entered its fifth month, retarding progress on many major construction projects. As a result, construction employment in the region during July was down from a year earlier by one-third. Housing

construction, however, continued to exceed last year's volume by a wide margin; for the first eight months the number of housing units started was two-thirds higher than the same period in 1957.

Lumber sales held up well this year and log inventories have been large enough to permit full production in most sawmills in the region. The volume of lumber shipped in the first seven months of this year was 7.5 per cent higher than in the same period of 1957. Gains of close to 20 per cent were made in shipments to the United States and United Kingdom.

Seasonal employment gains in fishing and fish canning were unusually large this year because of the record salmon run.

Reduced levels of construction, logging and mining employment have been transmitted to manufacturing in the region. Machine shops, structural steel, cement and explosive plants were principally effected. This spring shipbuilding employment fell to its lowest level in some years. Summer hiring has since taken place and prospects for new orders have improved.

Unemployment was considerably higher than last year in all parts of the region. The classification of the 10 labour market areas at September 1 was as follows (last year's figures in brackets): in substantial surplus, 1 (0); in moderate surplus, 4 (2); in balance, 5 (8).

### Local Area Developments

**Vancouver-New Westminster** (metropolitan) remained in Group 2. Employment in Vancouver was down 6 per cent from a year earlier in July. The decrease was concentrated in construction, trade, iron and steel products and shipbuilding. Other important industries in the area, notably lumber manufacturing, communication and services, were moderately higher than a year earlier. There was little change in the level of unemployment during the month, the decline being chiefly among lumbering and logging workers.

**Victoria** (major industrial) remained in Group 2. Shipbuilding and lumber manufacturing accounted for an employment decline of 5.4 per cent from a year ago. A rising demand for service and construction workers was responsible for a moderate decline in unemployment during August.

**Kamloops** (minor) was reclassified from Group 2 to Group 3.

# NOTES OF CURRENT INTEREST

## **Need High Productivity For High Wages—Starr**

"The standard of living of any people (and wages are, of course, the barometer of this standard of living) is precisely what they create for themselves and no more," said Hon. Michael Starr, Minister of Labour, in an address at a Labour Day luncheon at the Canadian National Exhibition in Toronto. There are no good grounds for being afraid of high wages, he said, as long as it is recognized that wages can be high only if productivity is high.

Because a number of important collective agreements are expiring, this is a difficult year in the labour field, Mr. Starr said.

"This is a situation in which both Labour and Management must exercise restraint and good judgment." The Minister went on to point out that the effect of a work stoppage in a major industry spread to other industries, causing layoffs and slow-downs, thus producing "a widening pool of unemployment which cannot but have a damaging effect upon our economy".

### **Unemployment**

Referring to unemployment, Mr. Starr said that in July there were close to 6,000,000 persons with jobs, which was about 15,000 fewer than in July last year but 11.7 per cent higher than the low point reached in February. It marked the greatest gain for the period since 1955, he stated.

But although with an average weekly wage of \$68 Canada's weekly income was greater than ever before, there were also more persons out of work. "The largest single reason for unemployment at any time in Canada today is the tremendous expansion that has taken place in our labour force," he contended.

The only solution for this situation that he could see was "more and more jobs"; in the last analysis this meant developing our manufacturing industries, because it was here that wages were highest. The aim of all expansion, he pointed out, should be the raising of the standard of living.

At the recent conference in Ottawa on seasonal unemployment, Mr. Starr said, he had been impressed with the way in which business and labour leaders were prepared to work together for the general interest of all Canadians. "This type of

co-operative consultation, if brought to bear upon all problems, will leave no doubt as to a solution," he said.

In a brief reference to automation, the Minister said there must be a reconciliation of the "twin necessities of production efficiency and the human factor.

"Labour is not a commodity," he said. "It is men and women and their families."

While he did not pretend that everything that could be done to provide training in skills for Canadians was being done, Mr. Starr asserted that a positive approach was being made.

## **Long-Service Employees Have Fewer Accidents**

More than 75 per cent of the accident claims filed by federal government employees during the year 1957-58 were filed by those with 10 or fewer years service.

There were twice as many accidents suffered by employees with five or fewer years service as there were by those with more than five years.

The annual report of the Government Employees Compensation Branch shows that there were 8,853 accidents to employees with five or fewer years service, 2,834 to those with six to 10 years, and 1,202 to workers with 11 to 15 years.

### **Labourers Top List**

Labourers led all claimants with 2,199, followed by letter-carriers with 1,246. Claims among other occupations were: carpenters, 669; food service attendants, 601; mechanics 473; clerks, 466; drivers, 457; fireman-labourers, 410; postal clerks, 315; mail handlers, 311; packers and helpers, 289; electricians, 284; engineers, 277; machinists, 241; painters, 217; inspectors, 178; miscellaneous, 1,505.

There was a wide variety of accident causes. Cause of the majority of them, 14,758, was: "struck by objects". The commonest types of injury were bruises, contusions and abrasions.

The report is based on claims finally processed. These totalled 15,932 in 1957-58. Some claims brought forward from the previous year are included in the figure, but many claims are carried forward into the succeeding year before they are closed.

## **Winter Unemployment Has Chain of Causes**

That winter unemployment stems from a whole network of causes was one fact that emerged from a sample survey of seasonal unemployment during the winter of 1956-57 in the Federal Republic of Germany conducted by the Federal Institution for Placement and Unemployment Insurance.

An account of the survey is contained in an article published in the *International Labour Review* of the International Labour Office for July.

The causes mentioned in the article include: "the number and date of the December holidays, the character and urgency of the building jobs involved, disinclination to build under threat of frost, the size of undertakings, availability of capital, traditional customs, the desire of building workers from other countries or regions to spend the holiday with their families, statutory or contractual arrangements for the payment of wages during public holidays, and last but not least the actual impossibility of continuing outdoor work owing to the weather."

Furthermore, it was pointed out, owing to the shorter period of daylight and lack of piecework a building operative's earnings were lower during the winter than during the rest of the year. The difference between earnings and unemployment benefit was thus reduced, and the inducement to work was lessened accordingly. This inducement was still further reduced if the worker was able to draw benefit from a private wage compensation fund.

The article also noted a point which is not often mentioned: "The calculation of unemployment benefit, based on the wages last earned, provides workers with a motive for not postponing unemployment until late in the winter, when the lower level of earnings will mean less benefit also."

That winter unemployment is a special kind of risk has been amply proved, the article concludes. "The solution of the problems relating to it must be sought either within the framework of unemployment insurance itself (at the level of contributions or benefits) or else in some special scheme outside unemployment insurance."

Such a special scheme, it was suggested, might take the form of "establishment of a compensation fund for loss of earnings in the cold season, formation of bad-weather funds, or some similar arrangement, perhaps with the participation of the unemployment insurance itself.

"It would be more valuable still, of course, to promote winter building even in cold weather, so that benefit or assistance would be claimed only in exceptional cases," the article adds.

---

## **CLC Executive Council Supports Steel Strike**

Meeting in Ottawa August 19 to 21, the Executive Council of the Canadian Labour Congress in a series of policy statements supported the steel strike at Hamilton, criticized portions of the Government's broadcast bill, objected to compulsory arbitration in the West Coast ship dispute, supported wage boosts for Government employees, reaffirmed support for the Seafarers' International Union despite the sale of Canadian National Steamships vessels to a Cuban firm, supported a strike of quarry workers, urged a ban on atomic tests, and called for a solution of the Middle East crisis.

Referring to the strike at Hamilton, the Executive Council called it a matter of "national importance" and asked all CLC affiliates for moral and financial support.

In the West Coast ship dispute the CLC felt that Government intervention "has resulted in an invasion of civil liberties and created dangerous precedents for arbitrary Government action on future occasions. Workers have been required to work against their will, which amounts to involuntary servitude..."

The Executive reaffirmed support for the 400 strikers at a quarry at Windsor, N.S., who have been off their jobs at the Canadian Gypsum Company for some 10 months.

---

## **Post Office Adopts Plan To Improve Supervisors**

A booklet entitled *Building a Better Team Through Personnel Development* has just been published by the Post Office Department. The booklet outlines the methods the Department has adopted for developing a strong staff of supervisors.

In 1956 under the Department's plan more than 2,200 supervisors in the postal service were appraised, and special development action was undertaken by more than 600 of them. It is stated that 63 of these supervisors received training at other centres, at least 358 received rotation training in their own offices, and 154 were helped by special advice and instruction. The Department holds, however, that the spirit behind the plan is more important than such statistics.

## **Clause in New Agreement Prohibits "Moonlighting"**

A clause prohibiting "moonlighting" and another prohibiting the acceptance of favours or bribes by anyone in the employ of the city have been agreed to by the parties to a recently negotiated renewal of a contract between the city of Prince Rupert and the Prince Rupert Civic Employees Union, Local 5.

The agreement, reached with the assistance of a provincial conciliation officer, also provided for a 7½-per-cent wage increase retroactive to January 1. It expires January 1, 1959.

## **26 Firms across Canada Sign with Boilermakers**

An agreement with 26 firms engaged in the erection and field construction of boilers and pressure vessels throughout Canada, with the exception of British Columbia, has been signed by the International Brotherhood of Boilermakers.

The agreement, effective from July 1, 1958 to June 30, 1960, provides for a total wage increase of 40 cents an hour.

Also included in the agreement are provisions for increased subsistence allowance and improved overtime pay.

## **Representation Votes At Six-Year High in U.S.**

More collective bargaining elections were conducted by the United States National Labor Relations Board during the April-June quarter this year than in any quarter since July 1, 1952, and unions won a larger proportion of these elections (66 per cent) than in any quarter since January 1, 1957, according to the Board's report for the quarter.

At the same time the number of decertification elections also set a record. Of 56 elections conducted, 30 resulted in decertification, while 26 were won by the incumbent union.

A large increase in the number of charges of unfair labour practices is said to be greatly due to the effect of the disclosures of corruption that have been made before the Senate investigating committee.

The number of these charges was 73 per cent higher than in the corresponding quarter of 1957. In 1958 there were 2,780 cases during the quarter, compared with 1,608 in the 1957 quarter.

Of the unfair labour cases filed during the 1958 quarter, 1,803 were complaints lodged by individuals, which was 175 per

cent more than in the corresponding period of 1957. Cases filed against employers totalled 1,827, an increase of 74 per cent compared with the previous year; and those filed against unions totalled 953, an increase of 70 per cent.

## **Australian Code Provides For 13 Weeks Leave**

Agreement has been reached in Australia between representatives of employers' organizations—including the Australian Council of Employers' Federations—and the Australian Confederation of Trade Unions whereby employees who come under the Federal Code of Long Service Leave will be entitled to 13 weeks leave after 20 years of service.

The Code provides for lesser amounts of leave where an employee terminates service after 10 years but before 15 years of service have been attained, and after 15 but before 20 years.

After becoming entitled to the initial period of 13 weeks leave after 20 years service, employees will become entitled to an additional 6½ weeks leave on completing a further 10 years service.

Service must be continuous within the meaning of the Code with one employer, but in the case of transmission of a business, service with both the old and new owners will count as qualifying service.

The Code does not provide for payment in lieu of leave—the obligation is to give and take actual leave—and the Code prohibits employees from engaging in any other employment while on long service leave.

The Code has no operative force unless incorporated in awards or collective agreements.

## **Work Study Manual Published by ILO**

A simple manual on work study has been published by the International Labour Organization. Entitled *Introduction to Work Study*, it sets out in easy terms the technical principles involved and gives examples of how they are applied.

The first part of the manual is called "Productivity and Work Study" and includes a brief description of the causes of low productivity and the techniques to eliminate them.

Other parts of the manual deal with method study and work measurement.

## **1st Half Housing Starts Up Nearly 50 Per Cent**

Starts on the construction of new residential units increased nearly 50 per cent during the first six months of this year, 72,877 units compared with 48,847 for the same period in 1957, the Dominion Bureau of Statistics reported last month. June starts rose more than 15 per cent to 20,921 from 18,134 a year earlier.

Completions in the half-year climbed almost 16 per cent to 58,308 units from 50,435 a year earlier, while the June total was more than 17 per cent greater, 13,112 compared with 11,182 for June 1957.

Because of the larger year-to-year increase in starts than in completions, the number of units in various stages of construction at June 30 was more than 28 per cent higher than for the same date last year, 86,818 units compared with 67,640.

## **Wage Settlements in U.S. Fall Behind 1957 Figures**

During the first six months of 1958 wage settlements in the United States fell behind the 1957 level, according to a Bureau of National Affairs analysis of 1,763 contracts.

The median increase for all industries, the BNA found, was 9.4 cents an hour, compared with 10 cents for the last quarter of 1957 and 10.3 cents for 1957 as a whole.

By region, the West Coast had the highest rates with an all-industry median of 10.4 cents. New England had the lowest, with 7.9 cents.

In the industry continuing to have the top increases—construction—40 per cent of the contracts call for 15 cents or more, and textile industry agreements continue at the bottom of the list, with one of three giving no increase at all.

## **GM, Rubber Union Agree On Income Security Plan**

Provisions for an income security plan are contained in a two-year contract signed by the General Motors Corporation and the United Rubber Workers at GM's Inland Manufacturing Division, Dayton, Ohio. The contract became effective July 1.

The new feature of the contract is the income security plan, proposed by GM in 1955, that will replace the supplemental unemployment benefit plan established generally in the industry last year.

Instead of building up a reserve fund for benefits during jobless periods, under

the new scheme the company is to contribute 5 cents for each hour for which an employee receives pay.

The payments will be credited to each employee's personal account, from which he draws money when unemployed. On retirement, or upon leaving the company for any reason, an employee receives the full amount of his account, plus investment earnings.

## **Cost of Fringe Benefits Still Climbing in U.S.**

The cost of fringe benefits in the United States is continuing to increase, both absolutely and as a percentage of payroll, according to the sixth of the biennial surveys of the United States Chamber of Commerce, the report of which has been issued recently.

The average cost of such benefits in 1957 was 21.8 per cent of payroll, 47.4 cents an hour, or \$981 per year per employee, according to the survey, which was based on reports from 1,020 companies. By comparison, the 1955 survey showed that fringe benefits cost on the average 20.3 per cent of payroll, 39.2 cents per payroll hour, or \$819 per employee per year.

In 1957 fringe costs ranged from less than 6 per cent to more than 60 per cent of payroll. In 1955 they ranged from 5 per cent to more than 50 per cent of payroll.

## **One U.K. Worker in Three Is Paid by Results**

In British industry, one wage-earner in three is paid by results; in the country's manufacturing industry alone, two workers out of five.

According to a recent Ministry of Labour survey, payment by results systems are still more widespread among women workers than among men. In the manufacturing industry, 45 women wage-earners in every 100 are paid according to what they produce compared with 38 of every 100 men.

Metal manufacturing, engineering, shipbuilding and electrical goods are the industrial groups in the United Kingdom where payment by results schemes affect the greatest proportion of male workers.

Four out of five manufacturing firms that employ more than 500 have introduced pay by results schemes for at least some of their workers, and more than half the workers in firms with more than 1,000 employees are paid under such schemes.

## **N.Y. Amendment Prohibits Discrimination for Age**

An amendment to the New York Fair Employment Practices Act forbidding discrimination in hiring on account of age became effective July 1. New York is the fourth state to legislate job protection for older workers.

The Commission Against Discrimination, the agency responsible for enforcing the law, has issued the following rules:

(a) Help-wanted ads may not specify age or read "young" man or "young" woman. The aim of the law and these interpretations is to enable applicants to appear and be interviewed without automatically being barred by the advertisement.

(b) Pre-employment inquiries as to age or date of birth on application forms will be permitted when required to check on an applicant's personal history, background or work record. In such case, however, the application form must state that the law prohibits discrimination because of age.

(c) Employers may consider age (1) when it is a *bona fide* occupational qualification in job performance; (2) in apprentice or on-the-job training systems; or (3) where required by laws such as those regulating child labour. Employers claiming *bona fide* occupational qualifications may file applications for the state agency's review.

(d) Employment agencies share responsibility with the employer for placing workers without discrimination. But if they act in good faith in taking orders on which the employer claims a *bona fide* qualification and if they keep proper records, they will not be held to have violated the law. Application forms used by employment agencies must carry the statement that the law prohibits discrimination because of age.

(e) The law permits an employer to terminate employment because of physical disability. It therefore allows physical examinations before employment to be made where essential to the job. An employer may not arbitrarily fire older persons simply because he believes that all persons over a certain age are physically disqualified.

(f) Retirement policies or systems with compulsory retirement ages below 65 established after July 1, 1958, must justify their reasonableness. Provisions in a retirement plan stating a maximum eligibility age for entrance will not of itself bar an applicant from being hired. The employer may be required to hire an applicant though not to include him in the retirement plan. Each case will be judged on its own facts.

## **Total Payments to Aged, Blind, Disabled Increase**

The number of persons receiving old age assistance in Canada increased from 92,484 at March 31, 1958, to 94,589 at June 30, 1958.

The federal Government's contributions under the federal-provincial scheme totalled \$7,516,468.41 for the quarter ended June 30, 1958 compared with \$7,736,445.70 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$136,358,497.22.

At June 30, 1958 the average monthly assistance in the provinces ranged from \$49.76 to \$53.39, except for one province where the average was \$45.04. In all provinces the maximum assistance paid was \$55 a month.

### **Blind Persons Allowances**

The number of blind persons in Canada receiving allowances under the Blind Persons Act increased from 8,400 at March 31, 1958 to 8,545 at June 30, 1958.

The federal Government's contributions under the federal-provincial scheme totalled \$1,052,408.61 for the quarter ended June 30, 1958, compared with \$1,078,192.65 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$20,013,104.98.

At June 30, 1958 the average monthly allowance in the provinces ranged from \$52.97 to \$54.20. In all provinces the maximum allowance paid was \$55 a month.

### **Disabled Persons**

The number of persons in Canada receiving allowances under the Disabled Persons Act increased from 41,840 at March 31, 1958 to 44,366 at June 30, 1958.

The federal Government's contributions under the federal-provincial scheme totalled \$3,686,162.73 for the quarter ended June 30, 1958 compared with \$3,727,185.64 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$28,029,625.05.

At June 30, 1958 the average monthly allowance in the provinces ranged from \$51.73 to \$54.68. In all provinces the maximum allowance paid was \$55 a month.

---

Hon. Charles Daley, last month observing his 15th anniversary as Ontario Minister of Labour, has held the post longer than any predecessor.

## **Prevailing Rate Problem "Difficult"—Cushing**

It will be difficult, if not impossible, to ever get a satisfactory solution to the problem presented by wages of prevailing rate employees in the public service of Canada, in the opinion of Assistant Deputy Minister of Labour Gordon Cushing.

While improvements are always being pushed by the Department, and attained, the problem is a "never-ending" one, he told the second triennial conference of the National Defence Employees Association.

"I've been very unhappy," said Mr. Cushing, "to find that prevailing rates in some parts of Canada are pretty low. It's a lot more difficult to establish a fair prevailing rate than to set a classified salary."

He has found situations where classified employees and prevailing rate employees were working side by side and the classified employee's pay was "much greater" than that of the prevailing rate employee.

"There should be some form of liaison between the Civil Service Commission and the Department of Labour to ensure that this difference does not exist. It's not fair that prevailing rate people should be kept on a lower scale than classified civil servants."

In concluding his remarks, he noted that important steps are being taken to set prevailing rates at a "fair and reasonable" level.

## **Construction Workers in Demand across Canada**

Skilled construction workers were in demand in July in most parts of Canada except British Columbia, where labour disputes had shut down nearly all major building projects, according to the monthly employment summaries prepared by regional offices of the National Employment Service.

The disputes were also hampering the placement of handicapped persons.

### **Some Transfers Made**

Plasterers, bricklayers, carpenters, plumbers, cement finishers and painters were in short supply in some Ontario centres. Shortages of bricklayers and painters in some areas of Quebec were overcome by the transfer of workers from areas with surpluses.

With the release during July of about 500 men from the St. Lawrence Seaway and Power Projects, the work force there was reduced to about 2,100.

Both Ontario and Quebec also reported shortages of motor mechanics and automobile body repairmen.

Experienced stenographers and other office workers were still in short supply in many parts of the country. The Pacific region reported a shortage of qualified women hairdressers. Registered nurses, dieticians, medical technologists and nurses aides were also in short supply.

## **Employment Rise in U.S. Less than Usual in July**

Unemployment in the United States dropped less than normally and the rise in employment was less than normal during July, the U.S. Departments of Labour and Commerce reported last month.

The number of unemployed dropped by 143,000 to 5,294,000. Employment rose by 198,000 to 65,179,000.

After taking seasonal factors into account, the rate of unemployment increased from 6.8 per cent of the labour force in June to 7.3 per cent in July.

In the United Kingdom, the number of unemployed dropped by 17,419 to 411,838 in mid-July.

## **U.S. Farm Population Drops 16.9% Since 1950**

The number of persons living on farms in the United States has declined 16.9 per cent since April 1950, according to an estimate prepared by the U.S. Bureau of the Census and the Agricultural Marketing Service. The number in April 1958 was about 20,827,000, which was 4,231,000 less than it had been eight years before.

### **Continuation of Trend**

This loss of farm population while at the same time the population as a whole is increasing represents the continuation of a trend that has been going on for a long time. During the period in question, however, it appears that nearly all of the decline occurred between 1950 and 1954.

In 1910, about one out of every three persons lived on a farm. By 1950 the ratio had declined to one in six, and by 1958 to one in eight. Over the years the movement is explained by changes in farm technology and increased opportunities for other kinds of employment.

The decline, however, does not fully represent the magnitude of the change that has been taking place, because an increasing number of families living on farms do not gain their livelihood in the main directly from agriculture. In 1958 about four-tenths

of the workers living on farms were engaged mainly in non-agricultural work, while in 1950 the proportion was only three-tenths.

At the same time part of the change is apparent rather than real, since it results from a reclassification of dwelling places without any movement of the occupants. Owing to changes in the use of land a number of dwellings have ceased to be classified as farm houses.

The largest decline in farm population has been among those between the ages of 20 and 24 years, who were fewer by a third at the end than at the beginning of the period; while the next largest decline was of those between 25 and 44 years of age, who were fewer by a fourth.

---

### **Grants to Colombo Plan Near \$200 Million Mark**

Canada's financial assistance to foreign countries since the war now aggregates more than \$4,300,000,000, the External Affairs Department said recently. More than half this amount consisted of outright grants and the remainder was in the form of loans which have been partly repaid. More millions are earmarked for foreign aid in the current fiscal year.

The largest single amount—\$1,567,000,000—represents military aid for Canada's partners in the North Atlantic Alliance. The largest single loan, \$1,185,000,000, went to the United Kingdom soon after the Second World War.

Canada has given nearly \$200,000,000 to the Colombo Plan, besides \$35,000,000 in loans for the purchase of Canadian wheat and flour by India, Pakistan and Ceylon.

---

### **Meany Bases Message On One Subject Only**

The Labour Day message of George Meany, President of the AFL-CIO, was devoted to one subject: education. This was a departure from normal practice.

In his statement Mr. Meany pointed out what he believed to be the needs and shortcomings of American education. He contrasted it with Russian education, and he came to the conclusion that the comparison gave grounds for serious concern.

#### **Main Measures Needed**

The main measures which he described as necessary to meet the situation were a broad program of school construction, the raising of teachers' salaries, and the provision of federal scholarships for higher education.

During the next five years there would be a need for about 222,000 classrooms to accommodate the increased number of students alone, and a year ago there was already a shortage of 142,300 classrooms. In addition, he said, between 14,000 and 20,000 new classrooms would be required each year to replace those which became obsolete, outmoded or "downright dangerous".

Regarding teachers' salaries, the AFL-CIO President said that the average income of teachers in the United States in 1957 was \$4,330 a year. "We are not properly compensating good teachers," he asserted.

Referring to the need to give help to students who were unable to continue their education on account of lack of means, he said, "It has been determined that each year some 60,000 to 100,000 high school graduates from the top 30 per cent of their class do not continue their education into college—just for financial reasons. Federally-financed scholarships for college study would be a long step forward towards a stronger democracy and would show the world that in America opportunities are truly equal. If Russia can find the funds to fully educate all students, so can the United States."

---

### **Men Replace Machines, Unemployed Given Jobs**

The city of Sherbrooke, Que., has stored two street-sweeping machines and replaced them with some 40 unemployed men.

Municipal authorities have stressed that this is neither a retrograde nor a permanent move but rather a method of enabling the city's unemployed to earn some money and, more important, to qualify for unemployment benefits.

Part of the cost of employing the 40 men will be met by savings realized in the public assistance fund, they also point out.

---

### **Presidents of 2 Unions Have Recently Retired**

The Presidents of two international unions have retired in recent months: Woodruff Randolph, President of the International Typographical Union since 1944, and R. O. Hughes, President of the Order of Railway Conductors and Brakemen since 1950.

District 26, United Mine Workers, has elected a new President, William H. Marsh of New Waterford, N.S. He defeated Tom McLachlan. In the same election, Steve Dolhanty was re-elected Vice President and Michael Higgins, Secretary-Treasurer.

## **Wages Unchanged in New UAW-Kelvinator Contract**

A two-year contract that keeps wages at present levels has been signed by American Motors Corporation and the United Automobile Workers covering 1,200 workers at the Kelvinator appliance plant in Grand Rapids, Mich.

The agreement is coupled with American Motors' plan for consolidating its appliance business in Grand Rapids and closing its plants in Detroit and Peoria, Ill. If the company fails to complete the movement within six months, it is reported, the UAW can cancel the new contract and revert to the previous three-year agreement.

## **AFL-CIO Orders Clean-up By Operating Engineers**

The AFL-CIO has ordered the International Union of Operating Engineers to undertake a clean-up or face disciplinary action. Four other affiliates are to be investigated.

They are: the Jewellery Workers International Union, United Brotherhood of Carpenters and Joiners, Hotel and Restaurant Workers Union, and the Amalgamated Meat Cutters and Butcher Workmen of North America.

The order to the Operating Engineers was contained in a report of the Federation's Ethical Practices Committee approved unanimously last month by the AFL-CIO Executive Council.

If the union agrees to comply with the order and report periodically until all clean-up demands have been satisfied, a further inquiry will be held in abeyance. If there is no compliance, the Committee warned it would conduct a formal hearing, the result of which could be expulsion, suspension or some other disciplinary action.

Evidence that the Jewellery Workers International Union "may be dominated, controlled or substantially influenced by corrupt influences" has made necessary a formal investigation of the union by the AFL-CIO, the Committee's report said.

## **Que. Industrial Accidents Cost 230 Lives in 1957**

Industrial accidents in Quebec during 1957 claimed the lives of 230 persons and caused injury to 110,171 others, according to F. Riley Daniels, President of the Quebec Branch of the Industrial Accident Prevention Association.

The loss to industry amounted to more than a million working days and at least 25 per cent of average earnings, he said.

## **Items of Labour Interest in House of Commons**

**Thursday, July 24—Labour Minister Starr** brands as false a statement, attributed to a Provincial Minister of Labour, to the effect that the federal Government attempted to bypass the provinces in seeking a solution to unemployment. "Every opportunity was given for participation in this (National Winter Employment) Conference," he said.

*No change* in the sampling procedures for arriving at Dominion Bureau of Statistics figures on employment in Canada has been made, Trade and Commerce Minister says in answer to a question.

**Friday, July 25—Signing of agreement** for construction of the Saskatchewan River dam announced by the Prime Minister.

*Study will be made* of the possibility of giving student nurses assistance with their studies, says the Minister of Health, replying to question as to whether Government would consider paying student nurses \$1 a day, in order to encourage them to complete their training without financial distress to themselves or their families.

**Saturday, July 26—Everything possible** will be done to give employment to the 122 men who have been retired from service on the canal near Cornwall because navigation in that area has been moved from the Canadian to the United States side of the St. Lawrence River, Transport Minister says in reply to a question.

**Monday, July 28—Increases in pensions** of superannuated civil servants and members of the armed forces and the Royal Canadian Mounted Police will be provided for at this session, Finance Minister announces. The proposed increases would apply also to widows and children of the three groups.

**Tuesday, July 29—Increased pensions** for retired employees of the Canadian National Railways are under consideration but no immediate action is planned, Transport Minister advises questioner.

*Transport Minister* tells questioner that he is not aware of any proposed sale of Canadian ships to Panama, nor that any of his departmental officers were in Panama for discussions of such proposed sale.

**Wednesday, July 30**—*Labour Minister* reports receipt by his department of minority and majority reports of conciliation board in dispute between non-operating railway employees and various Canadian railways (see page 996).

**Friday, August 1**—*No consideration* has been given, Prime Minister says, to proposal that Canadian National (West Indies) Steamships be transferred to the Federation of the West Indies under some lend-lease arrangement.

*1,100 Hungarian refugees* will be coming to Canada this year, Justice Minister advises questioner.

**Saturday, August 2**—*Publication announced* of new manual, *Organization of the Government of Canada*. It contains detailed information on the organization of the federal Government.

**Tuesday, August 5**—*Canadian National Railways* will employ 3,600 extra men in 1958 to strengthen its regular track force in the western region, compared with 1,650 in 1956 and 3,550 in 1957. They will be employed for a period of some 22 weeks, Transport Minister informs questioner.

**Thursday, August 7**—*Conditions of employment* of prevailing rate staffs, unlike those of classified civil servants, are determined by reference to the practice of good private employers. No evidence has been found that these release the equivalent of the public rate employees of the public service from duty before normal closing hours on account of conditions of heat or humidity. The prevailing rate employees' general regulations, which are founded on those general principles, consequently make no provision for leave with pay for prevailing rate staffs when conditions of excessive heat or humidity lead the Civil Service Commission to authorize the release of classified civil servants, Finance Minister informs questioner.

**Tuesday, August 12**—*Canadian National (West Indies) Steamships Limited* will sell eight-ship fleet to Havana shipping firm for \$2,800,000, the Minister of Transport reported. The ships will serve the West Indies and call at **Halifax and Montreal** in Canada. All officers of the ships were offered transfer to marine services of the Department of Transport. Some decided to retire, since they were eligible to do so. Some accepted other employment. The remainder are with the Department of Transport. Pension rights of all concerned have been protected.

**Saturday, August 16**—*Receipt of report* compiled by the Civil Service Commission's

Pay Research Bureau acknowledged by Finance Minister in answer to a question. The Bureau reported that it found, after intensive investigation, that there is no case at present for a general salary increase but that there are certain categories in the Civil Service into which there should be further investigation to determine whether a case for an increase exists.

*It was moved* that the House go into committee at its next sitting to consider the following resolution:

That it is expedient to establish a board of broadcast governors to regulate broadcasting in Canada; to provide that the expenditure of the board shall be paid out of money appropriated by Parliament therefor and also to provide for the continuance of a corporation known as the Canadian Broadcasting Corporation for the purpose of operating a national broadcasting service in Canada; and to provide further for the payment, remuneration, salaries and fees of the officers and employees thereof.

*First reading* given to bill to amend the Customs Act to provide new valuation clauses and introduce cost-of-production basis for valuing dumped goods.

**Monday, August 18**—*Amendments* concerning the railway grade crossing fund were contained in a bill given second reading and referred to the committee on railways, canals and telegraph lines. One of the purposes of the legislation is to increase during a period of three years the maximum contributions that may be made from the fund. The main estimates of the Department of Transport for this fiscal year contain a credit of \$10 million to the fund in addition to the normal annual credit of \$5 million. It is the intention of the Government to provide a similar additional sum of \$10 million next year and the following year. The additional credits are to serve a double purpose: to encourage additional projects to make crossings safer, and to afford a greater measure of financial assistance than is now available to municipalities and other parties that have to bear the cost of such work.

**Thursday, August 21**—*Report being prepared* by Prof. Robert M. Clark on the United States old age pension system will not—in spite of Prof. Clark's hard work—be ready for presentation until October, Prime Minister informs questioner.

*There has been no indication* from the province of Quebec that it will participate in the hospitalization scheme, Minister of National Health and Welfare informs questioner.

**Friday, August 22**—*A bill of rights* will be introduced at the present session of Parliament, Prime Minister announces.

# Defence Against Inflation

While movements of prices and labour costs closely connected, it is not clear whether rising wages or profits can exert an independent influence on prices, says U.S. Committee on Economic Development

Although there is no doubt about the close correspondence between the movements of prices and of labour costs, it is not clear whether rising wage rates or profits per unit of output can exert an independent influence on prices.

This is the opinion expressed in the report of a study, begun in the fall of 1955, that has recently been published in the United States by the Research and Policy Committee of the Committee for Economic Development. The first-mentioned committee is composed of 43 trustees from the 150 business men and educators who comprise the second committee. The report bears the title, *Defence Against Inflation—Policies for Price Stability in a Growing Economy*.

Later in its report, however, the Committee recommended "that the basic laws of the country be reviewed to see whether they permit labour organizations to have a degree of economic power that is not in the public interest".

Enlarging upon the statement about the connection between price movements and labour costs, the report continues:

We have suggested that the tendency of wage rates and prices not to decline when demand falls, and to rise rapidly when demand rises, has increased the amount of inflation we get in given conditions of demand. A more puzzling question is whether wage rates or profit margins tend to rise in our economy at a rate that forces prices up, or prevents them from declining when demand is not strong. This is the heart of the question of the "inevitability" of inflation...

There seems to be no serious doubt in anyone's mind that inflation can be prevented, the report goes on to say. "We know how to prevent inflation if that is the only end in view. Tight restraint on the growth of the supply of money, or actual contraction of the money supply, plus large government surpluses, will bring inflation to an end. The means to do this are available. What is meant, when inflation is said to be inevitable, is that the process of stopping inflation entails certain costs, which the American people may not, and perhaps should not, be willing to pay."

The costs referred to, it is explained, include unemployment, loss of production, and the slowing down of economic growth; and those who regard inflation as "inevitable" believe that only the existence of a

substantial amount of unemployment can keep wages and profits from rising so fast as to force up prices. This amount of unemployment they apparently consider would not, or should not, be tolerated.

The condition under which rising wage rates and profits are supposed to force up prices has come about, on the labour side, "as a result of the combination of strong unions and the national commitment to the maintenance of high employment," the Research Committee says. It gives several reasons why under present-day conditions unions may have strong motives for making large demands, while the considerations which serve to moderate the individual worker's desire to get higher pay for his services when he deals directly with the employer may be largely absent when wages are determined by collective bargaining.

The report also mentions the pressure that spreads to other industries when large wage increases have been obtained in a big unionized industry.

According to the line of argument which regards excessive wage increases as one cause of inflationary pressure, "the consequences of excessive wage increases are transmuted, by high employment policy, from unemployment suffered by the workers making the demands to inflation suffered by all. The fear of inflation does not restrain the wage demands, since no one union can affect the inflation much by its own action. And, when a large number of workers has been granted excessive wage increases, the government is quick to step in to prevent the rise in unemployment that might result from the self-correcting mechanism in the economy which would tend to bring wages and prices in these industries back into line."

Somewhat the same process might occur, according to this view, if business decided to raise prices in order to increase profits per unit of output. In this case the fall in sales that would tend to be the result might be prevented if, in pursuance of a policy of high employment to which it was committed, the government were to step in to stimulate demand by inflationary measures.

However, the Committee elsewhere points out an important difference between the inflationary effects of raising prices in order

to meet excessive wage demands and the effect of raising them in order to increase profits. Referring to the need to search for means to strengthen competition which "would have to be pursued without favour in business markets as well as in labour markets," it says:

But it is only a recognition that we live in the 1950's—not in the 1890's or 1920's—to say that the main problem lies in labour markets. There are several reasons for this. In most industries, except public utilities subject to regulation, there are several—often a great many—firms competing with each other, whereas single unions covering an entire industry or market are common. Moreover, labour costs are much larger than profit margins. The potential contribution of excessive wage increases to inflation is therefore greater. Most important, we have a long-established public policy in favour of competition in business. The laws and machinery to implement this policy have been in effect for a long time, and in our view, have had a great deal to do with the growth of our economy and the improvement in our standards of living. There have been repeated national studies to see how these policies might be made more effective. As a consequence we not only have substantial business competition; we also keep exploring the route by which we can preserve or strengthen it.

But we do not have the beginnings of a public philosophy about the proper limits to the powers of labour organizations in an economy basically organized on the principle of competition. Our laws tend to deny the existence of the problem, as if saying that labour is not a commodity changes the facts that labour is the main economic resource and that wage rates are the main element in costs and therefore in prices. And recent investigations of unions have not focussed on this central issue of their effects on wage rates and inflation.

In connection with the foregoing argument that efforts to raise wages or profits in some circumstances may exert independent inflationary pressure, the report asks two questions:

- "1. Does the situation described actually exist in the United States?
- "2. If it does exist, is the policy choice presented—high employment with a little inflation versus stable prices with a lot of unemployment—the real choice?"

In attempting to answer these questions it begins by saying: "The possibility that we might be unable to have high employment and stable prices in our economy cannot be denied. But the facts are quite unclear."

Further on it says:

We do not definitely know—and we are not trying to prove—that costs and prices do or do not tend to rise in the American economy when demand is just adequate for satisfactorily high employment. Continuing analysis of this question is necessary. Mean-

while policy must be based on the information that is available. We believe a tendency *may* exist for prices to rise under such circumstances. We believe, moreover, that if such a tendency does not already exist, it may come into being in the future.

The report goes on to point out that in some countries where industry is more highly concentrated than in the United States, and where unionization is more comprehensive and the idea of "full employment" is more rigidly interpreted, "there is fairly clear evidence that price stability is incompatible with the unrealistically rigid conditions of full employment society has decreed.

"This foreign experience," the Committee says, "is a warning for the future of America."

In the view of the writers of the report it is not possible to maintain "creeping inflation"—even if such inflation is desirable. They believe that it is not possible to choose between excessive unemployment and creeping inflation; and they give their reasons for thinking that "if the conditions exist that are said to make high employment incompatible with price stability it is hard to see how the creeping inflation could be prevented from developing into a gallop".

The real question before the country, the report says, "is not whether to stop inflation or to tolerate a persistent upward creep of prices. The question is whether to stop the inflation sooner, or to stop it later, after it has done great damage. In our opinion the only responsible course of action is to stop inflation as soon as possible."

The measures that the report contends should be adopted to prevent long-term inflation fall along three main lines:

- "1. We must do everything possible to increase national productivity.
- "2. We must do everything necessary to keep demand from rising faster than production.
- "3. We must adopt and adhere to policies—primarily through the voluntary action of business and labour, but if necessary through governmental action consistent with economic freedom—that keep prices and unit labour costs from rising, on the average, when demand is kept from outstripping production."

As a solution to the inflation problem, the report rejects as unacceptable the direct control of prices and wage rates.

"It would seriously impair the freedom and efficiency of the economy and anyway would not, on past experience, serve for long to restrain inflation," it says.

We must now make a break with the expectations and standards of proper and feasible wage and price movements that were generated in the postwar inflation. We must accept as standards of public and private policy the principles of wage and price behaviour that are consistent with general price level stability.

Wage rates on the average should rise as fast as total (national) output per man-hour, which has been between 2 and 3 per cent a year.

If average wage rates per hour rise at the same rate as output per hour, labour costs—which are the biggest part of total costs—will be stable. If prices are stable on the average this will mean that other incomes—including profits and interest—per unit of output will also be constant on the average.

The proposition that wages should rise in line with productivity does not mean, as it is sometimes interpreted to mean, that the entire increase in output per man-hour should go to wage earners, the report emphasizes. This would leave nothing to pay for the increased amount of capital which contributed to the rise in productivity, it points out.

In conclusion the report says:

"The answer to the problem of long-run inflation calls... for but one sacrifice: the sacrifice of the illusion that we can get more out of the economy than we produce.

"It is important to realize that this illusion is a major source of inflation. Until we have parted with it, it will bemuse us into thinking we can, whenever we like, simply by using more money or using it faster, increase our consumption more than we increase our output, that somehow we can buy what we have not produced."

(A similar view, but one that definitely attributed part of the inflation which has occurred since 1947 to excessive increases in money wages, was taken by Dr. Jules Backman, Professor of Economics, New York University, at the industrial relations conference held as part of the 87th Annual General Meeting in June of the Canadian Manufacturers' Association (L.G., July, p. 733).

(Dr. Backman also referred to "this attempt to ignore elementary arithmetic" which is involved in "expanding the number of dollars paid without relationship to what is being produced" in a futile attempt to raise the standard of living by doing so.)

## Four Factors Make Resumption of Inflation Possible

Four reasons for the widespread apprehension that is being felt that inflation may begin again are given by Edwin L. Dale, Jr., in an article in the *New York Times*. Although none of them taken separately, or all of them put together, make it certain that inflation will be renewed, they do nevertheless make up a fairly impressive case, Mr. Dale says.

One of the reasons he gives is that wages have continued to rise during the recession.

The other reasons are: that prices in general have not fallen during the recession, and that on the contrary consumer prices have continued to creep up; that a large prospective deficit in the federal budget may have inflationary effects; and that the easy money policy pursued by the Federal Reserve Board since last November as an anti-recession measure may be carried too far, thus promoting a resumption of inflation.

It is not unusual for the consumer price index to rise during the first eight or ten months of a recession, the writer says. But

even making allowance for this, "the stickiness" of both consumer and wholesale prices paints a disquieting picture for the future."

As to wages, he says that "the figures here are a bit sketchy, but they all point to the same conclusion: Wages have risen despite the slump." One calculation, made by Prof. Sumner Slichter of Harvard, shows that wages rose by 4.1 per cent between last August and May. Private surveys indicate that wage increases have been averaging from 8 to 10 cents an hour—"not much less than during the boom," says Mr. Dale.

"All of this means higher wage costs for the future. There is more and more backing among economists for the general concept of 'wage inflation,'" he concludes.

The effect of the deficit, which is estimated at \$12,000,000,000 for the fiscal year that began on July 1, and the effect of the Federal Reserve Board's policies are difficult to estimate, the article says. There is a danger, however, that both these factors may turn out to be inflationary.

# The Money Value of Housework

Oxford University economist believes time has come to take value of unpaid housework into account when calculating gross national product. If paid for this work would total nearly one third of nation's income

The time has come to take the value of unpaid housework into account when calculating a country's gross national product, declares a well-known Oxford University economist.

In an article, "The Economics of Housework," in the May issue of the *Bulletin of the Oxford Institute of Statistics*, Prof. Colin Clark estimates that the total value of all housework, very little of which is actually paid for in money, if paid for would amount to nearly a third of a country's total national income.

In calculating their gross national product—widely used as an index of the standard of living—most countries take account of housework only if it is paid. Some countries exclude from the national product all personal services, paid or unpaid, and other countries have tried to set a value, generally low, for unpaid housework.

Prof. Clark's article results from a serious attempt to measure the money value of unpaid housework.

To exclude unpaid housework from the national product is a "practical expedient without theoretical justification," he says. He supports his contention by quoting Prof. Pigou's observation that "if a number of unmarried men, employing paid houseworkers, decided to marry them, then the figures of national product, as we measure it, exclusive of unpaid housework, would be reduced."

Not only has the price of paid housework risen a great deal in recent years but the proportion of all housework done without pay is on the increase. He estimates that at the beginning of the century paid housework represented about  $7\frac{1}{2}$  per cent of the national product in value, while today it has dropped to a little more than 1 per cent.

In Canada, for instance, during the decade 1941 to 1951, when wartime conditions opened up other opportunities for many, the number of paid private household workers fell by more than 50 per cent. Yet, since there are now 10 times as many Canadian women keeping house without pay as the number employed in service occupations, it is clear that they contribute a great deal to the national standard of living.

For the purposes of economic analysis and measurement of the labour force activity of the population, unless a person is paid for his work he is considered a non-worker. About three out of four Canadian women are non-workers, and 85 per cent of the non-working women are keeping house. Most of the others are schoolgirls and retired women.

The term "non-worker" is applied to men too, but because nearly all men of working age are either at work or looking for work, it is the women, especially those with household responsibilities, who make up the bulk of the "non-workers".

Household services are an important element in the standard of living, and most household services are unpaid. This unpaid portion has long worried some people; the article on this page tells of an attempt to place a money value on it.

"Housework, as everyone knows, is an increasingly expensive service to purchase," Prof. Clark points out. Yet, in Canada as elsewhere, there appears to be a perennial demand for domestic workers.

It is difficult to measure the total amount of housework being done, and a further problem to determine its value. Prof. Clark starts with the costs of domestic service in institutions for children and adults and applies them, with qualifications, to the general population by age groups.

One conclusion that he reaches in comparing 1938 with 1956 is that "there has probably been a great improvement in 'productivity', shown not in any great increase in the amount of housework done, which in fact increased only by about 10 per cent, but by the considerably reduced number of women who got it done, many women previously occupied only at home now having obtained paid employment."

It seems probable from his analysis that in the last 20 years there has been an increase in the amount of housework done per woman engaged in it; this is perhaps due to better household equipment. But Prof. Clark does not rule out the possibility that eyes may be closed now to some housework that might have been done in an earlier day.

Families are smaller today than they were in the early days of the century. Prof. Clark suggests that up to 1938 the decline in the relative number of children meant that the woman in the home enjoyed increased leisure. During the last two

decades, however, "most of this released woman-power has been diverted to increasing the size of the paid labour force".

Yet, he says, "it is difficult to avoid the conclusion...that more hours are being devoted to work, and less leisure enjoyed, by many women, including those who now do paid work but have housework to do as well."

Prof. Clark considers it likely that when those who formerly were responsible for the household duties take on paid outside work,

other family members who have always held paid jobs assume responsibility too for some of the household chores. This theory is supported by the findings of a recent Canadian survey of *Married Women Working for Pay in Eight Canadian Cities*.\*

A considerable number of married women do housework for others while members of their own families help to share the load at home. In these circumstances, of course, they are adding to the gross national product.

## Successful Rehabilitation—X

Tenth in a series of articles on success in rehabilitation achieved through the precise matching of the handicapped person to the job

*This is the tenth in a series of articles illustrating that the particular demands of any job—the unique combination of skill, aptitudes and attitude required in the worker—can often be met by a disabled person, not by coincidence but by a precise matching of the person to the job.*

*It was written by J. C. Macneill, Atlantic Regional Public Relations Officer, Unemployment Insurance Commission.*

When Pearcey Lane was 18 months old he was stricken with polio, which badly crippled him. As he grew it was apparent that he would be unable to do any kind of manual labour, and he was untrained.

But Pearcey Lane believed he could earn a living if he could get the right education. Getting his early formal education was a problem that had to be licked early in life because of the difficulty he had in moving around. However, that was accomplished

and the provincial and federal rehabilitation facilities started him on his successful entry into the business world.

Helping hands were the federal-provincial government training scheme, Schedule "R"; M. J. Harrity, Special Placement Officer of the National Employment Office of the Unemployment Insurance Commission, St. John's; Walter Davis, Provincial Co-ordinator of Rehabilitation; and H. W. Squires, Rehabilitation Officer with the Department of Health.

First step in Pearcey Lane's rehabilitation was to find out what his capabilities were and his aptitudes. Medical records and medical authorities furnished the first answers. The vocational aptitude tests at the Vocational Training Institute pointed to the course he should take. In this case, it was bookkeeping. Through schedule "R" he was enrolled in the commercial class for the normal nine months' course.

It was while he was in this training institute that he and Mike Harrity became acquainted. The latter, in his capacity as special placements officer, had been visiting the school regularly giving short addresses on the possibilities of employment and the facilities that the National Employment Service was able to offer. Along with the other students Pearcey Lane registered for employment, to be placed in a job, he hoped, when his course was finished.

Because of his infirmity he was not expected to go to the National Employment Office for his counselling sessions. His re-interviews and counselling were done at the school by Mr. Harrity.

When the National Employment Service was established by the Unemployment Insurance Act of 1940, a Handicapped Section of the Special Placements Division was set up to provide special employment assistance to physically disabled workers. It was created for the express purpose of rehabilitating into employment those disabled persons capable of working but who, because of their physical, mental or emotional handicaps, might otherwise remain on the fringe of the employment market. The Section's special placement officers concentrate their efforts on, in the words of the manual of instructions, persons who, on account of injury or disease of a character which is likely to last more than six months, or on account of congenital conditions, are substantially handicapped in obtaining or keeping employment of a kind generally suited to their age, previous experience and qualifications.

\*Obtainable from the Queen's Printer, Superintendent of Government Publications, Ottawa; price 25 cents.

**Polio victim Pearcey Lane, 23, pictured on his first day on his first job. Others shown (left to right) are: A. G. Barnes, President, A. G. Barnes Construction Company, the employer; M. J. Harrity, National Employment Service Special Placement Officer; and H. W. Squires, Nfld. Department of Health Rehabilitation Officer.**

As the time for the completion of Pearcey's course drew near, Mr. Harrity undertook an extensive program of job solicitation on his behalf. Employers were asked to help out, to notify the NES office if through their business contacts they learned of a vacancy that he might be able to fill.

It was through such a contact that Mr. Harrity learned that there was soon to be an opening at A. G. Barnes, Limited, one of St. John's large contracting firms. Mr. Barnes was agreeable. Not only that, he proposed that Pearcey start with him right away, working mornings to get familiar

with this particular type of work, and spending afternoons at the school until his course was finished.

That was the program decided upon. Pearcey Lane completed his course and went on the job full time. It was another of the more than 45 special placements Mr. Harrity had made in the past six months. Some were older workers who needed special counselling, others were youths just coming into the labour market; but the majority were disabled persons like Pearcey Lane, who had to find the job which made use of his remaining abilities.

## Technical Counselling Helps Handicapped Cope with Housework

The more than 10,000,000 handicapped women in the United States stand to benefit from technical counselling originating from the Institute of Physical Medicine and Rehabilitation in New York, of which Dr. Howard A. Rusk is Director.

A consultant in home-making, Mrs. Julia S. Judson, began the project in 1950. Since then, some 40 other similar centres have come into being in all parts of the United States.

Part of the training that handicapped women get is in work simplification in the kitchen. The kitchen is planned for the sit-down worker—often the handicapped housewife gets around by wheelchair. Counters are lower than average; the sink is low enough for her to wash dishes while she is sitting.

Utensils are stored in open shelves and at lower than usual height, to eliminate the reaching necessary in most kitchens.

# Sheltered Employment in Great Britain

Remploy, British non-profit company set up under Disabled Persons (Employment) Act 1944, now has 90 factories, which employ more than 6,000 persons, sited where the need to provide employment is greatest

The Disabled Persons Employment Corporation (Remploy) was set up in Britain in March 1945 under the Disabled Persons (Employment) Act, 1944 (L.G., 1947, p. 7). Its purpose was to permit disabled persons to secure and retain suitable employment alongside able-bodied workers and to provide sheltered employment on a larger scale than would be possible through local and voluntary efforts alone.

Established as a non-profit company and financed by the central Government, Remploy now has 90 factories, employing more than 6,000 severely disabled workers, located in those places where the need to provide employment for the disabled is greatest.

Since 1948 local authorities have been obliged to provide workshops for the blind under statutory schemes approved by the Government. At present there are about 70 workshops providing training or employment for more than 4,000 blind persons, one-third run directly by local authorities and the remainder by voluntary organizations acting as their agents.

Under the National Assistance Act, 1948, local authorities were empowered, but not obliged, to set up sheltered workshops for the disabled other than the blind. But little use has been made of these powers owing to restrictions on capital expenditure.

At present there are about 40 workshops for sighted disabled (including those in village settlements for the tuberculous), most of them relatively small. The total for whom training or employment is provided is about 800.

As a government-sponsored concern, Remploy has looked to the central Government and to a smaller extent to local authorities and nationalized industries to provide it with some of its work through the placing of suitable contracts.

Arrangements were made in 1950 under which some preference was given by purchasing departments to "priority suppliers", a term which includes other sheltered workshops and prisons as well as Remploy. In 1956-57 the value of government contracts secured was nearly 30 per cent of Remploy's total sales.

Efforts have been made to enter the export market and orders have been obtained from as far afield as New Zealand, Iraq, Canada and the Sudan.

Remploy's factories are sited where the need to provide employment for the disabled is greatest, not where the economic advantage is greatest. For production purposes, however, they have been formed into trade groups regardless of geography.

The purpose of Remploy is to run its factories on commercial lines and reproduce closely the atmosphere of ordinary industry. Except where there are special medical reasons, all employees are expected to work a 44-hour week.

The present wage structure is based on a standard Remploy rate for all trades, which is settled by negotiations with the trade unions concerned, and is roughly 75 per cent of an average of all the different trade rates. Employees have a free hand regarding membership in trade unions and most of them have joined a trade union appropriate to their particular occupation.

Works managers are encouraged to extend to officials of these trade unions the usual facilities for consultation, and there are shop stewards in each factory. Joint consultative committees consisting of representatives of management and employees also exist for the discussion of such matters as production, factory conditions and welfare.

In welfare matters Remploy aims to keep abreast of good industrial practice. It provides a canteen service in every factory, encourages workers to run their own social clubs, and publishes a quarterly news-sheet, *Remploy News*.

---

## New Disabled Persons Act in U.K.

Great Britain's Disabled Persons (Employment) Act, 1958, received Royal Assent on July 7. The Act gives effect to those recommendations made by the Committee of Inquiry on the Rehabilitation, Training and Resettlement of Disabled Persons (L.G., June 1957, p. 702) concerning employment and requiring legislation.

## Canadian Federation of University Women

Triennial Conference, attended by 400 delegates from all provinces, decides to increase value of scholarship awards. Manchester college surveys opportunities for qualified women engineers and technologists

The triennial conference of the Canadian Federation of University Women held in Montreal, August 12-16, 1958, brought together some 400 delegates from all provinces. Although a considerable proportion were teachers there were many housewives, as well as lawyers, librarians, nurses, social workers, musicians, home economists, doctors, financiers and scientists.

One of the primary aims of the Federation is to foster a high standard of scholarship among women; in the past three years it has provided fellowships and special grants for advanced study amounting to \$17,400. Because of the heightened cost of travel and living, the conference decided to increase the value of future awards.

Problems of education had been a widespread subject of study in local clubs during the past three years. These had led to recommendations to educational authorities regarding standards and curriculum, teacher training, scholarships and bursaries, administration and finance. The Federation had also contributed to a study of the access of women to higher education done by the International Federation of University Women for the UNESCO.

The conference reviewed activities directed to the improvement of the status of women, including approaches to governments on issues relating to women's work, succession duties, penal reform and the appointment of women to public office. Groups within the Federation have assisted also in the promotion of public library services and have supported the creative arts in communities all across Canada.

### Women in Engineering

A committee of enquiry appointed during the summer of 1957 under the auspices of the Manchester College of Science and Technology "to find out what opportunities exist for qualified women scientists and technologists in the engineering industry" recently published the report of its findings under the title *Women in Engineering*<sup>1</sup>.

This is a subject that has been receiving a good deal of attention in Britain. The 28th Annual Conference of Representatives

of Unions catering for Women Workers, for example, passed a resolution pressing for equal educational opportunities for girls and boys in scientific and technical fields (L.G., July, p. 740). A number of U.K. publications on the subject have also appeared, one of the most recent being the British Federation of University Women's booklet entitled *Opportunities for Girls and Women in Science and Technology*<sup>2</sup>.

The Manchester survey was confined to engineering firms in the Greater Manchester area. Of 196 firms initially selected, 73 were finally included in the study, and of these, six employed qualified women engineers or technologists. Only four of the firms surveyed stated that they considered their type of work unsuitable for women.

The results of the study show that wherever qualified women have been employed they have proved satisfactory and as competent as men, but it was clear that "where there are sufficient men, the employment of women engineers is, in general, unlikely to be seriously contemplated". There was evidence of some change in attitude, however, even in traditional engineering firms.

Women were more readily accepted and in considerable demand as technicians in drawing offices and laboratories but did not often rise above this level.

The committee concluded that "provided they have the same initial qualifications, women can undertake the same training schemes as men with complete success... There is no insurmountable obstacle put in the way of a woman who has ability and determination."

<sup>2</sup>Published by the British Federation of University Women, Ltd., 17a Kings Road, London, S.W. 3, 59 pp. Price 2s.

The Women's Bureau was established to help bring about a better understanding of the problems of women workers and their jobs and to promote good-labour standards in all fields of women's employment. It studies the particular problems of women workers and publishes the results of such studies, and makes available information regarding occupational opportunities for girls and women.

<sup>1</sup>Published May 1958 under the auspices of the Manchester College of Science and Technology. 20pp. Price 1/6.

## 50 Years Ago This Month

Leading United States authority on labour questions reports on study of Industrial Disputes Investigation Act, declares all employers in agreement with principle of the Act, but Labour's reactions mixed

After visiting Canada in the spring of 1908 in order to study the operation of the Industrial Disputes Investigation Act, 1907, Dr. Victor S. Clark, described as "one of the leading authorities in the United States on labour and sociological questions," in his report expressed the opinion that "so far as can be judged from the experience of a single year, the Act has accomplished the main purpose for which it was enacted, the prevention of strikes and lockouts in public service industries".

Dr. Clark's report, a large part of which was published in full in the *Labour Gazette* for September 1908, said that the mediation of boards set up under the Act seemed to have been less successful in mining disputes than in railway negotiations.

All employers, he said, agreed with the "principle" of the Act, though there was some dissatisfaction among them with the way it had been administered. Some employers, including some of the largest in Canada, were stated to be in favour of compulsory arbitration, and in favour of amending the Act to make board awards binding on both parties.

This favouring of compulsory arbitration by the employers, however, seemed to be connected with a belief that the boards would be likely to lean towards the employers' side in their decisions. "In the New West," the report said, "public sympathy is almost certain to be with the employees against a great corporation. Experience with these conditions makes managers favourable to any method of solving labour disputes that will throw them farther eastward, to more conservative centres."

Leaders of organized labour were inclined to be critical in their attitude towards the Act, Dr. Clark found. "But," he also said, "those who have made a study of the subject are favourable to the law." However, later in his report he stated that "the leading organizations of railway employees opposed the law at the time of its passage, and still regard it with cold favour."

Miners had mixed feelings about the Act, according to the report; but on the whole

opinion among them seemed to be more hostile than favourable.

On the other hand, Dr. Clark quoted the executive officers of the Dominion Trades and Labour Congress as giving "heartily endorsement to the principle of the bill".

Labour opposition to the Act was based on two grounds, Dr. Clark found: a general distrust of government intervention in labour disputes, arising from the feeling "that the intervening authority usually has a class bias against labour"; and a feeling that workers had a chance to "improve their conditions more through negotiations backed by sudden strikes than by negotiations backed by deferred strikes".

Dr. Clark's opinion was that "application of the Act to industries should probably be limited—at least for some time to come—to strictly public service industries as defined by the Canadian statute. Less strain would be placed on the Act now did it not apply to metal mining."

Measures of importance to labour passed at the session of Parliament that ended on July 20, 1908, which were summarized in the *Labour Gazette*, included:

The Government Annuities Act, which authorized the sale to any person living in Canada of an immediate or deferred annuity of not less than \$50 and not more than \$600 a year.

An amendment to the Civil Service Act which brought the "Inside Service"—the staff employed by the Dominion Government at headquarters—under the control of two commissioners; and required admission to the service to be by competitive examination, and promotion to be by merit.

The repeal of Clause 415 of the Railway Act, under which a railway employee who caused injury to person or property through wilful or negligent violation of a rule of the company was liable to prosecution. The Criminal Code still held liable those found guilty of wilful omission or neglect of duty. The repeal of this clause of the Railway Act was stated to be due to the representations that had been made by the associated railway brotherhoods during the session.

# INDUSTRIAL RELATIONS AND CONCILIATION

## Certification and other Proceedings before the Canada Labour Relations Board

The Canada Labour Relations Board met for two days during July. The Board issued seven certificates designating bargaining agents and rejected three applications for certification. During the month the Board received nine applications for certification and allowed the withdrawal of one application for certification.

### Applications for Certification Granted

1. Warehousemen & Miscellaneous Drivers' Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of drivers, helpers, warehousemen and mechanics employed by C. A. Fraser Limited, Toronto, Ont. (L.G., Aug., p. 880).

2. Teamsters, Chauffeurs, Warehousemen and Helpers, Local 880, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of drivers, mechanics and warehousemen employed by Leamington Transport (Western) Limited, operating in and out of the cities of Winnipeg, Man., Windsor and London, Ont., and the town of Leamington, Ont. (L.G., Aug., p. 880).

3. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of a unit of employees employed by the Canadian Pacific Railway Company in its Data Centre at Montreal (L.G., Aug., p. 880).

4. Warehousemen & Miscellaneous Drivers' Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of drivers, warehousemen, and helpers employed by Dew Moving and Warehousing Limited, Toronto, Ont. (L.G., Aug., p. 880).

5. International Longshoremen's Association, Independent, on behalf of a unit of longshoremen employed by the Seaway Forwarding Agencies Limited at the Port of Sarnia, Ont. (L.G., Aug., p. 881).

6. Transport Drivers, Warehousemen and Helpers Union, Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Smith Transport Limited, operating in and out of terminals of the company in Nova Scotia and New Brunswick (L.G., Aug., p. 881).

7. Chalk River Atomic Energy Draftsmen, Local No. 1569 (CLC), on behalf of a unit of draftsmen employed by Atomic Energy of Canada Limited at Chalk River, Ont. (L.G., Aug., p. 881).

### Applications for Certification Rejected

1. Nordair Mechanics' Association, Ind., applicant, Nordair Ltd., Roberval, Que., respondent, and International Association of Machinists, intervener. The application was rejected for the reason that it was not supported by a majority of the employees eligible to cast ballots in the representation vote conducted by the Board, in which only the name of the applicant was on the ballot (L.G., July, p. 753).

2. Warehousemen and Miscellaneous Drivers' Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and MacCosham Storage and Distributing Company Limited, Kingston, Ont., respondent. The application was rejected for the reason that it was not supported by a majority of the employees eligible to cast ballots in the representation vote conducted by the Board (L.G., Aug., p. 880).

3. Oil, Chemical and Atomic Workers International Union, applicant, Eldorado Mining and Refining Limited, Port Hope, Ont., respondent, and District 50, United Mine Workers of America, Local Union

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

13173, intervener. The application was rejected for the reason that the applicant had no members in good standing within the meaning of the provisions of Section 15 of the Board's Rules of Procedure, having regard to the provisions of the constitution of the applicant union (L.G., July, p. 755).

### Applications for Certification Received

1. United Steelworkers of America, on behalf of a unit of production employees of Consolidated Denison Mines Limited, Spragge, Ont. (Investigating Officer: A. B. Whitfield).

2. Canadian Brotherhood of Railway Employees and Other Transport workers, on behalf of a unit of unlicensed personnel employed by Northumberland Ferries Limited, Charlottetown, P.E.I., operating ferries between Wood Islands, P.E.I., and Caribou, N.S. (Investigating Officer: D. T. Cochrane).

3. Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 591, on behalf of a unit of bus operators and garage employees of *Transport Hull Métropolitain Limitée*, Hull, Que. (Investigating Officers: B. H. Hardie and J. C. Baril).

4. Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 591, on behalf of a unit of bus operators and garage employees of Hull City Transport Limited, Hull, Que. (Investigating Officers: B. H. Hardie and J. C. Baril).

5. Elliot Lake-Stanleigh Office Workers' Union, Local 1574 of the Canadian Labour Congress, on behalf of a unit of office employees of Stanleigh Uranium Mining Corporation Limited, Elliot Lake, Ont. (Investigating Officer: A. B. Whitfield).

6. Quirke Lake-Can-Met Office Workers' Union, Local 1575 of the Canadian Labour Congress, on behalf of a unit of office employees of Can-Met Explorations Limited, Spragge, Ont. (Investigating Officer: A. B. Whitfield).

7. Automotive Lodge 1857, International Association of Machinists, on behalf of a unit of garage mechanics employed by Gill Interprovincial Lines Ltd., Vancouver (Investigating Officer: G. R. Currie).

8. Hotel and Restaurant Employees' and Bartenders' International Union, Local 28, on behalf of restaurant employees employed by the Canada Railway News Company Limited at the Great Northern Station, Vancouver (Investigating Officer: D. S. Tysoe).

9. Seafarers' International Union of North America, Canadian District, on behalf of a unit of unlicensed personnel employed by the Northern Transportation Company Limited, Edmonton, aboard vessels operating in the Western Arctic (Investigating Officer: D. S. Tysoe).

### Application for Certification Withdrawn

International Union of Operating Engineers, Local 115, applicant, and Poole Construction Company Limited, Whitehorse, Yukon Territory, respondent (L.G., July, p. 755).

## Conciliation and Other Proceedings before the Minister of Labour

### Conciliation Officers Appointed

During July, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Canadian National Telegraphs (motor messengers) and Commercial Telegraphers' Union, Division 43 (Conciliation Officer: F. J. Ainsborough).

2. Canadian National Telegraphs (micro-wave attendants) and Commercial Telegraphers' Union, Division 43 (Conciliation Officer: F. J. Ainsborough).

3. Minshull Storage and Van Limited, Halifax, and Local 927, International Brotherhood of Teamsters, Chauffeurs,

Warehousemen and Helpers of America (Conciliation Officer: D. T. Cochrane).

4. Canadian Arsenals Limited (Gun Ammunition Division) Lindsay, and International Union of Operating Engineers, Local 796 (Conciliation Officer: F. J. Ainsborough).

5. Lake Shore Lines Limited, Lachine, Que., and Seafarers' International Union of North America, Canadian District (Conciliation Officer: R. Trépanier).

6. Canadian Broadcasting Corporation and National Association of Broadcast Employees and Technicians (Conciliation Officer: F. J. Ainsborough).

7. Canadian Stevedoring Company Limited and International Longshoremen's and Warehousemen's Union, Local 509, Vancouver (Conciliation Officer: G. R. Currie).

### Conciliation Boards Appointed

1. Polymer Corporation Limited, Sarnia, and Oil, Chemical and Atomic Workers International Union, Local 16-14. (L.G., Aug., p. 882).

2. Marine Industries Limited, Montreal; The J. P. Porter Company Limited, Montreal; Canadian Dredge and Dock Co. Limited, Toronto; Russell Construction Limited, Toronto; and McNamara Construction Co. Limited, Toronto, and Seafarers' International Union of North America, Canadian District (L.G., Aug., p. 882).

### Conciliation Board Fully Constituted

The Board of Conciliation and Investigation established in June to deal with a dispute between Canadian Pacific Railway Company (dining, cafe and buffet car employees) and Brotherhood of Railroad Trainmen (L.G., Aug., p. 883) was fully constituted in July with the appointment of Judge J. C. Anderson, Belleville, as Chairman. Judge Anderson was appointed on the joint recommendation of the other two members, J. W. Long, QC, Montreal, and Hon. A. W. Roebuck, QC, Ottawa, who were previously appointed on the nomination of the company and union respectively. (No conciliation officer previously appointed).

### Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch also acts as the administrative arm of the Canada Labour Relations Board, in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and, international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to

the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of two officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; three officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

## Board Reports Received during Month

1. Newfoundland Employers Association Limited, St. John's and Longshoremen's Protective Union (St. John's) (L.G., Aug., p. 883). The text of the report is reproduced below.

2. The Owen Sound Transportation Company Limited, Owen Sound, and Seafarers' International Union of North America, Canadian District (L.G., July, p. 756). The text of the report is reproduced below.

3. Shipping Federation of British Columbia and International Longshoremen's and Warehousemen's Union (Locals 501, 502, 503, 504 and 508) (L.G., July, p. 756). The text of the report is reproduced below.

4. The Packers Steamship Company Limited and the National Association of Marine Engineers of Canada, Inc. (L.G., July, p. 756). The text of the report is reproduced below.

5. Canadian National Railways, Canadian Pacific Railway Company, Toronto, Hamilton and Buffalo Railway Company, Ontario Northland Railway, Algoma Central and Hudson Bay Railway, Midland Railway of Manitoba, Railway Express Agency, Inc. (non-operating employees) and the joint negotiating committee representing a number of railway labour organizations (L.G., April, p. 391). The text of the report is reproduced below.

6. Canadian National Railways (MV *Bluenose*—Yarmouth-Bar Harbour Ferry Service) and Canadian Brotherhood of Railway Employees and Other Transport Workers (L.G., July, p. 756). The text of the report is reproduced below.

7. The Packers Steamship Company Limited, Vancouver, and Seafarers' International Union of North America, Canadian District (L.G., March, p. 271). The text of the report is reproduced below.

## Settlements Following Board Procedure

1. Canadian National Railways (M.V. *Bluenose*—Yarmouth-Bar Harbour Ferry Service) and Canadian Brotherhood of Railway Employees and Other Transport Workers (*see above*).

2. Western Union Telegraph Company, Cable Division, and American Communications Association. No conciliation officer previously appointed. (L.G., Aug., p. 889).

3. Deluxe Transportation Limited and Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (L.G., June, p. 631).

4. Northern Transportation Company Limited, Edmonton, and Yellowknife Transportation Company Limited, Edmonton, and Seafarers' International Union of North America, Canadian District (L.G., May, p. 496).

## Administrator Appointed Following Strike

1. Canadian Pacific Railway Company (British Columbia Coastal Steamship Service) and Canadian National Steamship Company Limited and Seafarers' International Union of North America, Canadian District (L.G., Aug., p. 883). Stoppage of work occurred May 16, 1958. E. G. Taylor appointed Industrial Inquiry Commission, May 27. R. K. Smith, QC appointed administrator July 25; steamship service resumed July 27 pending settlement of dispute.

2. Canadian Pacific Railway Company (British Columbia Coast Steamship Service) and Canadian National Railways (Pacific Coast Service) and National Association of Marine Engineers of Canada, Inc., and Canadian Merchant Service Guild, Inc. (L.G., Aug., p. 883). Stoppage of work occurred June 24, 1958. R. K. Smith, QC, appointed administrator July 25; steamship service resumed July 27 pending settlement of dispute.

## Lithographers Leaving AFL-CIO because Organizing Drive Restricted

The Amalgamated Lithographers of America announced last month that it was leaving the AFL-CIO. It is the first international union to secede voluntarily from the federation since the merger of the country's two central labour bodies in December 1955.

Emergency meetings were scheduled this month and in October to plan the 36,000-member union's future course.

The Lithographers charge they have been restricted by the AFL-CIO from organizing lithographic workers in plants represented by other unions. At its 1957 annual convention the union announced it would begin a drive to organize all lithographers whether or not such a move had the approval of the AFL-CIO, the reasoning being that lithographic departments were going into plants where the employees, represented by other unions, were not getting wages comparable to those paid to its members.

Jurisdictional disputes led the union to leave the former AFL in 1946 after the Federation supported the Pressmen's Union in a dispute. The next year it joined the CIO.

# Report of Board in Dispute between

## Newfoundland Employers' Association Limited and Longshoremen's Protective Union

The Board of Conciliation and Investigation appointed under the provisions of the Industrial Relations and Disputes Investigation Act in the matter of a dispute between the Newfoundland Employers' Association Limited, St. John's, and the Longshoremen's Protective Union, St. John's, was composed of Prof. M. O. Morgan, chairman; Capt. M. G. Dalton, nominee of the employers; Lawrence J. Daly, nominee of the bargaining agent.

Proceedings before the Board began July 2, 1958. At the meetings of the Board the Newfoundland Employers' Association Limited was represented by:

A. H. Crosby, Murray Agencies and Transport Company Limited; J. E. Hickey, Furness Withy and Company Limited; G. Bussey, Harvey and Company Limited; R. Clancy, Blue Peter Steamships Limited; D. C. Hunt, Counsel for the Association.

The Longshoremen's Protective Union was represented by:

W. F. Breen, president; W. F. Atkinson, recording secretary; J. Power, financial secretary; J. Squires, delegate.

Following the preliminary meetings held separately with each party to the dispute, an attempt was made by the Board to effect conciliation between the parties through joint meetings. The employers' association presented two additional alternative proposals which the union executive considered unacceptable to its membership. The Board then heard the enlightening submissions submitted by both parties and made a final attempt to bring the parties to reach an agreement.

The Board regretfully reports that it was unsuccessful in its efforts to bring the two parties to an agreement. It therefore gives an analysis of the situation that surrounds this dispute and submits its recommendations which, in the opinion of the Board, are in the best interests of both parties and of the Port of St. John's. It is considered that these recommendations may after careful consideration by both parties, in the light of all the circumstances, lead to the signing of an agreement.

The sources of the current deadlock between the two parties to the dispute lie deep in the history of waterfront activities in St. John's. The present impasse, as the conciliation officer reported, expresses,

in concentrated form, the years of dissatisfaction in the relationships of the parties. The Longshoremen's Protective Union is one of the oldest labour organizations in Newfoundland. In 1911 it was registered under the Trade Union Act and has remained an independent union without any affiliation whatsoever. The employers' association is an association of the principal importing and exporting firms in St. John's, each of whom is in competition with the others. The main purpose of their associating is to represent and protect the interests of importers and exporters in their dealings with organized longshore labour. The first collective agreement was concluded between the Longshoremen's Protective Union and the Newfoundland Employers' Association Limited on December 29, 1939, after Government intervention and a Government undertaking to set up a committee of investigation to inquire into rates of pay and conditions and rules under which work was performed. This committee was set up and reported in 1940. In 1942 a trade dispute board was established under the defence regulations to settle matters at issue between the two parties. The legally binding terms of the report of this trade dispute board, which with few modifications later agreements have followed, are regarded by the union almost as sacrosanct. The basic issues before the present Board, rates of pay in return for removal of what are considered restrictive

During July, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with the dispute between the Longshoremen's Protective Union (St. John's) and the Newfoundland Employers' Association Limited, St. John's.

The Board was under the chairmanship of Prof. M. O. Morgan, St. John's, who was appointed by the Minister on the joint recommendation of the other two members, Capt. M. G. Dalton and Lawrence J. Daly, both of St. John's, nominees of the company and union respectively.

The majority report, which under the provisions of the Industrial Relations and Disputes Investigation Act constitutes the report of the Board, was submitted by the chairman and Capt. Dalton. The minority report was submitted by Mr. Daly.

The majority and minority reports are reproduced here.

practices, were raised before both the committee of investigation and the trade dispute board. In 1948 a general strike resulted from the employers' refusal to meet the union wage demands. Since 1953 bargaining between the parties has become increasingly difficult and open conflict narrowly averted. In 1956 an agreement signed by the negotiating committee was repudiated by the union membership, resulting in the resignation of a majority of the union executive officers including the president. During the recent negotiations before the conciliation officer, compromise proposals were accepted by the representatives of both parties as a basis of settlement, but they were rejected by the union membership by a secret ballot. The later alternative proposals of each party were unsatisfactory to the other.

The issues in the dispute between the parties before the Board are time and one half the day rate for the early night period and the removal of or decrease in what are regarded as restrictive practices. The union representatives considered that the union members are adamant in their demands for time and one half the day rate for the early night period. The representatives of the association were firm in

their stand that they could not consider an increase in their wage costs unless restrictions on mechanical equipment were removed, the size of the gangs reduced and the sling loads increased. For the immediate award of time and one half the day rate for the night period the employers' association offered alternate proposals.

1. (a) For ships over 500 tons net: a basic gang would be employed of 26 men. The sling load would be 1,500 lbs. Free and unrestricted use of mechanical equipment.

(b) For ships under 500 tons net: a basic gang of 18 men. Sling load would be 1,100 lbs. Free and unrestricted use of mechanical equipment.

OR

2. Rates of pay and conditions of work applying in the port of Halifax, Nova Scotia.

For the progressive receipt by the union of time and one half for night work through a three-year agreement the employers' association offered two alternative proposals.

1. If given free and unrestricted use of mechanical equipment:

Ships over 500 tons net:

|            | Gang | Sling Load | Daily Rate | Night Rate |
|------------|------|------------|------------|------------|
| 1957 ..... | 32   | 1,200      | 1.80       | 2.00       |
| 1958 ..... | 30   | 1,300      | 1.80       | 2.25       |
| 1959 ..... | 28   | 1,400      | 1.80       | 2.50       |
| 1960 ..... | 26   | 1,500      | 1.80       | 2.70       |

Ships under 500 tons net and CNR Coastal Boats:

| 1957 ..... | 21 | 800   | 1.80 | 2.00 |
|------------|----|-------|------|------|
| 1958 ..... | 20 | 900   | 1.80 | 2.25 |
| 1959 ..... | 19 | 1,000 | 1.80 | 2.50 |
| 1960 ..... | 18 | 1,100 | 1.80 | 2.70 |

NOTE: Paper Operations would not be included in above.

2. A three-year agreement embodying the Halifax Agreement in its entirety except for number of men in gangs, sling

loads and wage rate which would be as set out below:

| 1957 ..... | 32 | 1,200 | 1.80      | 2.00      |
|------------|----|-------|-----------|-----------|
| 1958 ..... | 28 | 1,450 | 1.84+.08* | 2.29+.08* |
| 1959 ..... | 25 | 1,700 | 1.88+.16  | 2.58+.16  |
| 1960 ..... | 21 | 2,000 | 1.92+.23  | 2.88+.23  |

\*The \$1.84 daily rate and the \$2.29 night rate would be paid direct to the men, the .08 would be paid into a jointly-controlled welfare fund.

The union executive's proposal in return for time and one half the day rate for handling general cargo between the hours of 7 p.m. and 8 a.m. was:

1. In discharging or loading vessels not in excess of 500 tons net, the weight of the sling load shall not exceed 800 lbs. for a basic gang of 21 men. Free and unrestricted use of mechanical equipment shall be permitted.

2. In discharging or loading vessels in excess of 500 tons net, the weight of the sling load shall not exceed 1,200 lbs. for a basic gang of 30 men. Free and unrestricted use of mechanical equipment shall be permitted.

The union representatives supported their claim by contending that time and one half the day rate for night work is tending to become the prevalent pattern

in industry. In support of the practices which the employers regard as restrictive they emphasized the complicated nature of the work of unloading and loading general cargo in St. John's under existing conditions. These complications stem from the variety and kind of cargo, the wharf facilities, particular local methods, the inherent need for restrictions, condition and layout of sheds and the nature of the shedding operations as compared with shedding operations in other ports. These complications weaken the effect of comparisons between St. John's and other ports where waterfront conditions and problems are dissimilar. Recognizing the difficulty of generalizations when dealing with different employers with different premises, the union representatives contended that the premises in the main are inefficient and contribute to the uneconomic handling of cargo; that mechanical equipment would be unusable in sheds other than the Furness Withy sheds. Even limited use in these other sheds would lead to confusion. Among

the reasons necessitating present size of gangs are conditions of sheds with unavoidable blocking of alley ways, nature of cargo with several types of articles for several consignees often in the sling loads, requiring different places in the shed. The union representatives stressed that they were not opposed to use of mechanical equipment but that the waterfront is not ready for it as planned by the employers.

The employers' association representatives stated their ready willingness to accede to the union request for time and one half the day rate for night work, if suitable changes in limitations on (a) the number of men employed in the discharge of cargo (b) the weight of the sling load and (c) the use of mechanical equipment. They argued that in all their offers except one the changes in limitations requested were less favourable than in the ports of Halifax, Montreal and Corner Brook where the use of mechanical equipment is unrestricted and the size of the gangs and the weight of the sling loads are:

|                         | Total Gang | Hold | Deck | Skids | Shore Gang | Sling Load  |
|-------------------------|------------|------|------|-------|------------|-------------|
| Montreal .....          | 14         | 6    | 3    |       | 4          | 1,500       |
| Halifax .....           | 20         | 8*   | 3    |       | 9          | 2,000       |
| Corner Brook .....      | 20         | 6    | 3    |       | 10         | 1,500-2,200 |
| St. John's—double ..... | 32         | 8    | 4    | 4     | 16         | 1,200       |
| —single .....           | 21         | 6    | 4    | 2     | 9          | 800         |

\*Reduced to 6 in handling 1,200 lbs. of cargo.

The employers' representatives expressed alarm at the evident decreases in tonnage being handled in the port of St. John's as a result of the diversion of imports to other ports in Newfoundland, especially Port aux Basques. They feel the whole future of St. John's as a distributing centre and as a seaport is at stake. They are also alarmed by the high costs of handling cargo in St. John's in view of the competitive summer freight rates of the Canadian National Railways. These high costs, they contended, are a major factor in the decline of tonnage of imports coming into St. John's. They cited the withdrawal from the trade in 1956 of the *Constantine Service* because of the high and uneconomic operating costs, after building up to full cargoes and using British ships. Another company took one ship from the trade and may be forced to withdraw another. In brief, the main contention of the employers' representatives was that the shipping companies face a financial crisis in their operations in St. John's. They maintain that in the interest of all concerned and of the port, mechanical equipment must be freely available for use as considered feasible, so that employers will have incentives to improve the efficiency of their premises;

increase in sling loads is essential and reduction in gangs mandatory.

#### *Time and One Half*

The Board accepts the logic of the union argument that time and one half the day rate for night work is increasingly becoming the pattern in industry. It is paid at Halifax for similar work and at Montreal for deepsea longshoring. But increases in wages are so inextricably tied with conditions and practices of work that they can scarcely be separated. The demand under these conditions cannot be considered in isolation or on any theoretical basis but against the traditional background of working practices. Both parties agreed that these practices are basic bargaining weapons.

#### *Use of Mechanical Equipment*

Free and unrestricted use of mechanical equipment is permitted in the three ports referred to the Board for comparative purposes; Halifax, Montreal and Corner Brook. The union representatives affirmed their agreement in principle with the use of mechanical equipment but queried its applicability in sheds other than the Furness Withy under existing conditions. As its applicability or feasibility is primarily the

responsibility of the employers, the Board is of the opinion that free and unrestricted use should be permitted.

#### *Size of Gangs*

The union regards the existing sizes of gangs and weights of sling loads as fundamental conditions of work based on long experience and existing local conditions and are subject at best only to moderate change. Their basic fear underlying any changes in these working conditions appears to be unemployment of its members.

Traditionally a single gang working a steamer hatch must consist of at least 21 men exclusive of the assorter and the foreman. The number of men working at a hatch cannot be increased without "doubling up", that is, using a double gang of 32 men exclusive of assorter and foreman. The Board shares the view of the committee of investigation of 1940 that "the rigidity of existing rules prevents adjustments in the number of men working at a hatch according to the size of the steamer or the particular job in hand, in the manner possible under union rules in other North Atlantic ports, like Halifax. We are satisfied that work could frequently be done efficiently and safely with fewer men even with existing facilities and that rules regarding the size of gangs are more restrictive here than elsewhere." The Board is convinced that the size of the gangs can and should be reduced especially in the case of the double gang where the extra man on deck, not used in other ports, appears unnecessary and other reductions are feasible. The report of the trade dispute board of 1942 which the Union regards as establishing the charter of working conditions along the St. John's waterfront expressed no view on this point. Since no evidence was produced to indicate the dissatisfaction of employers with existing gangs, it simply followed the current practice.

In expressing this general view, the Board is cognizant of the relationship between the conditions of the premises and the size of gangs required to work the hatch, sort out the cargo and perform the other functions required of the longshoremen. Conditions of premises leading to inefficiency of work attribute to the relatively low productivity of longshore labour in St. John's and the relatively higher labour costs of handling cargo, as well as the size of the gangs. In short, the increased costs of handling cargo in St. John's cannot, in the opinion of the Board, be attributed solely to union practices regarding size of gangs. It is questionable whether in actual practice under existing conditions the size

of the gang, where the double gang is now used, can be reduced at certain premises below 28 without further loss of productivity. But the employers should be able to reduce gangs as conditions warrant and improvements are made.

#### *Weight of Sling Load*

The weight of a sling load for a single gang was increased from 500 to 800 lbs. and for a double gang from 1,000 to 1,200 lbs. in 1942 by the trade dispute board and has been unchanged since that date. That board based its decision on what it considered fair under all circumstances, especially the facilities of the port and, apparently, on the predominant practices of the port of Liverpool. The union objections to changes in weight of sling loads are fear of increased unemployment, fear of men being overworked under pressure and the inadequacy of existing premises which would lead to confusion for which the union would be blamed. The Board, cognizant of the fact that substantial changes in sling loads would necessitate improvements in working conditions and organization at most premises, is of the opinion that the weight of the sling loads could be increased without physical hardship to the men and with increased efficiency and more rapid despatch of ships. The consequences to smooth operations are the responsibility of the employers.

#### *Recommendations*

The Board is very conscious of the relationship between tranquil and efficient longshore operation to the future of St. John's as a distributing centre and a seaport, especially in view of the proposed new harbour development. The issues with their implications and social ramifications are of vital importance to the whole community as well as to the parties involved in the dispute. The Board is convinced that in the relatively near future the port of St. John's must approach the working conditions of the port of Halifax, if it is to maintain its economic importance. The confidential information placed before the Board indicates the financial crisis facing the shipping companies and the need for more economic handling of cargo and quicker despatch of ships. The reduction or elimination of certain working practices will reduce costs and enable employers to be free to embark upon the improvements in facilities and working conditions, which are equally, if not more, essential to reduce costs of unloading and loading. On the other hand it is not reasonable in view of historic and present conditions to expect the union to abandon overnight their

cherished and long-established working principles and habits. Changes must in the opinion of the Board, be phased in.

The logic of the arguments presented to the Board as well as the logic of all the circumstances surrounding this dispute have led the Board to recommend the following:

| Year       | Gang | Sling Load | Daily Rate              | Night Rate             |
|------------|------|------------|-------------------------|------------------------|
| 1958 ..... | 28   | 1,450      | 1.84+.08*<br>or<br>1.92 | 2.76+.08<br>or<br>2.84 |
| 1959 ..... | 25   | 1,700      | 1.88+.16<br>or<br>2.04  | 2.82+.16<br>or<br>2.96 |
| 1960 ..... | 21   | 2,000      | 1.92+.23<br>or<br>2.15  | 2.88+.23<br>or<br>3.11 |

\*NOTE 1. Under the Halifax Agreement the \$1.84 daily rate is paid directly to the men and the .08c is paid into a jointly-controlled welfare fund. As there is no welfare fund at present in St. John's, the Board leaves it open to mutual agreement whether the Halifax practice will be followed or the \$1.92 be paid directly to the men. The same applies to the night rate payments.

†NOTE 2. The current Halifax day rate is \$1.92 plus 23 cents paid into the welfare fund.

The Board is aware of the heavy burden imposed upon the employers by the initiation under existing conditions of the Halifax Agreement but it is a burden which, as they have indicated by their proposals, they are prepared to undertake.

Mr. Daly, nominee of the bargaining agent, though agreeing with the body of the report, feels he cannot support the recommendations providing for a three-year agreement. He proposes to submit a minority report.

(Sgd.) M. O. MORGAN,  
Chairman.  
(Sgd.) M. G. DALTON,  
Member.

MINORITY REPORT

The immediate cause of the dispute was the failure of the employers and the union to negotiate a renewal of the collective agreement which expired on April 30, 1958,

| Year       | Gang   | Slingload  | Day Rate | Night Rate |
|------------|--------|------------|----------|------------|
| 1958 ..... | 28 men | 1,450 lbs. | \$1.92   | \$2.84     |
| 1959 ..... | 25 men | 1,700 lbs. | \$2.04   | \$2.96     |
| 1960 ..... | 21 men | 2,000 lbs. | \$2.15   | \$3.11     |

I would agree with a "phasing in" of reduced gangs if this was to be negotiated between the parties, in the light of all the other circumstances, existing and anticipated. But, in view of changing conditions along the St. John's waterfront and particularly in view of the harbour development project now in the early stages of implementation, I do not think it right that the Board should make recommendations which, if accepted, would bind the

- 1. Free and unrestricted use of mechanical equipment.
- 2. The signing of a three-year agreement embodying the Halifax Agreement in its entirety except for the number of men in gangs, sling loads and wage rates as set out below:

an agreement governing the wages and working conditions of some 900 longshoremen in the port of St. John's.

The basic points at issue are: the union is requesting the payment of time and one-half for early night and late night periods; the Newfoundland Employers' Association Limited is countering with a demand for changes in the gang system, an increase in the slingload, and the free and unrestricted use of mechanical equipment in return for granting the increased wage asked for these night periods.

While agreeing with the body of the report filed in this matter by the majority the Board (the chairman and Capt. Dalton), I find myself unable to accept or agree with their recommendations. In addition to recommending the free and unrestricted use of mechanical equipment (with which I agree), they recommend implementation of the Halifax Agreement, to be "phased in" over a three year period as follows:

employers and the union to a three-year scheme of reorganization at this time. In my opinion, the parties should be free to negotiate yearly while harbour development plans are progressing. As circumstances along the waterfront alter and as new operating patterns become established and defined, both sides will be in a better position to evaluate the effects of these changing conditions and to work out an agreement accordingly. For these reasons,

I do not think it feasible now for the Board to make recommendations of such a nature, with implications extending so far into the future.

As an alternative to the recommendations of my colleagues on the Board, I would submit the following recommendations which I sincerely believe could be used to effect an immediate settlement of the dispute, enabling the parties to conclude a one-year agreement and leaving them free to review the circumstances existing longshore a year hence.

My recommendations are as follows:

1. Free and unrestricted use of mechanical equipment.

2. For ships over 500 tons: a gang of 28 men, a slingload of 1,350 lbs., an hourly rate of pay of \$1.80 for day work and \$2.70 per hour for early and late night work.

3. For ships under 500 tons and all C.N.R. vessels (except *Random* and vessels of her type): a gang of 21 men, a slingload of 950 lbs., an hourly rate of \$1.80 for day work and \$2.70 per hour for early and late night work.

(Sgd.) L. DALEY,  
Member.

## Report of Board in Dispute between Owen Sound Transportation Company, Limited and Seafarers' International Union of North America

The Conciliation Board appointed in the above matter, consisting of His Honour Judge W. S. Lane of Picton, The Honourable Walter E. Harris of Markdale, and Hary Simon of Toronto, has met the parties at the City of Toronto on Friday, June 13, 1958.

The parties were represented as follows:

*For the Employer—*

Ivor Wagner, President,  
W. W. Barnard, Vice-President and  
General Manager.

*For the Union—*

McLaughlin, Representative,  
Alfred Bennett,  
Ray Doucet.

The case on behalf of the union was conducted by Mr. McLaughlin and on behalf of the company by Mr. Wagner.

The issues referred to this Board are as follows: reduction of work week to 40 hours, wage increase, contract setting a basic manning scale for ships, a request for eight

statutory holidays and premium pay for time worked on them, unrestricted vacation pay, request for unbroken meal hour, request for meal and room allowance ashore, loss of personal belongings and a contract for compensation therefor. These issues were thoroughly canvassed by the union in their brief, and were met individually by the company's presentation. All have a cost impact upon the company's operations and, therefore, must be termed as monetary.

The union took the position, basically, that this company was so far behind the position of seamen operating on the Great Lakes in their wages and in their general conditions of work that a comparison was not really possible. They took the position that even to compare them against the present situation of the general lake carriers under Canadian registry before the last negotiations was almost impossible due to the great discrepancy, but if there is any improvement to the employees of the regular lake carriers after the current negotiations, which incidentally now has been reported, the situation would only be that much worse. The union took the position that it was not open to the company at this stage to say that they could not meet prevailing conditions, because there was no responsibility upon the employees to subsidize the operation of this company by accepting low wages and unreasonable working conditions.

The company, of course, took the position that their operation was not at all comparable to the general lake carriers, that the employees of these ships were in no wise competing with the lake carriers and that

During July, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Seafarers' International Union of North America, Canadian District, and the Owen Sound Transportation Company Limited, Owen Sound, Ont.

The Board was under the chairmanship of Judge W. S. Lane, Picton, Ont., who was appointed by the Minister on the joint recommendation of the other two members, the Hon. Walter E. Harris, Q.C., Markdale, Ont., and Harold Simon, Toronto, nominees of the Company and Union respectively.

The text of the report is reproduced here.

any wage increase or cost which would add to the labour cost would undoubtedly force this company to cease its operations. They felt, therefore, that they were in no position now to make any real concession on any of the issues before the Board because of this serious situation. In effect, they state, this company is not able to pay the increases asked or, for that matter, any substantial increases at this time and remain operative.

In the light of this situation, therefore, it becomes necessary for our Board to consider the economic situation as it applies to this company and to its employees. The company filed with the Board its financial statement, and the statement is a matter of substantial interest to us at this time. There is no doubt, in the first place, that this company is not insolvent, but it is also true that there is a substantial bond indebtedness running in excess of half a million dollars which must be met. It is significant that this bond indebtedness is a result of steamship purchases or new building of ships which took place in 1946 and 1950. These ships cost somewhat over a million dollars to construct. In addition, there is an older ship which is carried at a value of some \$78,000.00. Consequently, without going into particulars of the assets of the company, we are dealing here with an operation involving substantially over a million dollars which, according to the financial statement of the company, produces only a net profit of fifteen thousand odd dollars. The breakdown of this statement, which showed the operational position of the three ships as it applied to the various runs, seemed important to us. The ferry ship, which is on the Manitoulin run continuously, showed a profit in its operation according to the operating statement of \$139,563.61, whereas the other two ships which are basically on the Sault Ste. Marie and North Channel run showed operating deficits of \$15,723.82 and \$42,768.73. Added to this, the shed operation which must, of course, be carried in the general operation showed a loss of \$2,847.08, leaving a net position on operations of somewhat better than \$95,000.00. It is important in this connection to remember that this net position includes the subsidy which is paid to have this North Channel run carried on of \$100,000.00, and it is also significant as we have stated that this is only an operating statement and does not carry in its account the general statement of the company which reduces this operating surplus to a net surplus, when all charges necessarily made are considered, of \$15,141.19. Of course, here again we must remember the depreciation claim of \$80,495.51,

which appears to be rather large but which is in that amount by reason of the retirement of the bond issue. In addition, this statement does not reflect the possible impact of the new bridge at Mackinaw which could be very serious. We understand, although this was not a matter of evidence but merely conjecture on the hearing, that business this year is not as good as formerly. It will, therefore, be seen that this company with a substantial fixed liability would have very considerable difficulty in meeting a generally increased wage bill, but by the same token the employees are not responsible to see that the capital replacements of the company are paid at their expense out of operations. If we write off this whole depreciation, it would not be proper, but even if we do not we end up with a profit statement which would be substantially under \$100,000.00 and that certainly is not a particularly healthy position for any company's operation with the investment that is present here. We, therefore, have in assessing the situation to bear in mind this company's difficulties in maintaining this operation, and at the same time we must remember the effect upon its employees if it should be found that the cost involved in the payment of its help should force the operation to come to a stop. I think it is necessary for us to consider, too, the report of another board of conciliation which was dealing with the Lake Carriers' Association to which we have referred above. It's true that a settlement has not been reached on the basis of this report, and to that extent it is not setting out a situation which defines the working conditions, and it may be that as a result of the negotiations had on the basis of this report that something different will evolve than is set out in it. At the same time, we must remember that it is not likely that anything less than this report will be agreed upon.

We think that it is important insofar as the 40 hour week is concerned in particular. The week worked here is on the basis of a 56 hour week as is the case in the other lake carriers. The financial situation of this company and the general lake carriers was completely different. The lake carriers find themselves in prospective difficulty but not immediate difficulty as is the case with this company. After considering this issue, we do not see how it is possible for this company to reduce its scheduled hours. The comparables of the lake carriers' Association have not reduced their hours by agreement as yet and there is no recommendation so far as we know that it be

so reduced, although there has been a recommendation for special monetary provisions to somewhat alleviate the long hours worked. We, therefore, do not feel, in spite of the fact that we recognize that seamen do work extra long hours as compared to industry and that seamen on the Great Lakes work longer than do seamen in some other parts of the world, that we can at this stage make a recommendation reducing the hours as requested. We do not feel that we can add to the costs of operation of this company any sum which would contemplate payment for hours worked over forty, even though that payment be postponed to the end of the navigation season. It still remains a matter of cost which this company can ill afford to pay. This is a majority recommendation of the Chairman and Mr. Harris. Mr. Simon would dissent. He feels that, as set out in the union's brief, seamen in some other British Commonwealth countries are on a five day week as they are in the United States and that it is a must that the work week be reduced to a forty hour, five day week based upon the New Zealand formula. This New Zealand formula contemplates that at the end of the navigation season each employee would be paid in a lump sum the accumulated amount which would be owing to him for hours worked over and above the forty hour week during the term of his employment.

This Board proposes to deal next with the manning scale. The majority of the Board, after hearing the representations of both parties, do not feel that the manning scale case was made out here by the union. This, in our opinion, is a demand which, while it may be justified in the general lake carrier trade, is a demand which does not particularly affect this company. There was no evidence brought before us that these ships were undermanned and we feel that there is no reason for us here to add to the operative costs of setting up a special manning scale for this operation. Mr. Simon dissents and would feel that there should be a manning scale set as requested in the union demands.

The next issue with which we propose to deal is that of personal belongings. The demand was for an artificial amount which it was felt was more than any of the unlicensed personnel would have on board ship at the time of any possible disaster, and while the company was not averse to guaranteeing to the employee his loss, they did not feel that they could make a blanket guarantee which under certain circumstances would be only a premium payment. The Board unanimously have felt that we

should recommend that employees should be required to register their belongings when going on board ship and that the company should guarantee the employee against loss of those articles in case of marine disaster.

The next issue is that of room and meal allowance. The Board here, after hearing the position of the parties, have felt that the meal allowance here was inadequate. The old allowance was 75¢ per meal and \$3.00 per room. We feel that this should be increased to \$1.00 per meal and \$4.00 per room. This should not be a serious item from this company's standpoint because of the particular operation, but we feel that they should be made on this basis in spite of the extra cost involved.

The next issue is vacation pay. The union here asks for unrestricted vacation pay, and the union has asked that any employee who is discharged for cause during the navigation season shall be paid. They have asked for the deletion, in fact, of Section (c) of Clause 8 on Vacation Pay, and the basic reason is that they take the position that anyone who is discharged during the season should be entitled to his vacation pay which he has earned during the part of the year that he has been in the employ of the company. The request here has substantial merit because vacation pay is not something that is given to an employee, it is something which he earns. The Board, therefore, feel that we must recommend to the company that in this instance they should write in a clause which would allow an employee discharged during the season pay for the portion of his vacation pay which he has earned during the term or part of the year that he has worked for the company. To cut him off on the basis of discharge on any ground leads to capricious exercise of authority and even though the situation may justify a particular discharge it does seem unfair that a man loses something by it that he may already have earned. This recommendation, therefore, is unanimous.

The Board after considering the issue of statutory holidays do not feel that we can make a recommendation on this which could be worked out. If we made any recommendation dealing with this matter, it becomes a straight question of pay, and while we recognize that statutory holidays are in principle a guarantee given the employee against an enforced layoff, that cannot take place here because under no circumstances can these ships stop in their scheduled runs to observe the holiday and, therefore, the employee is not laid off. He, therefore, has his opportunity to earn and in fact does earn his regular wage. We

would feel differently about this were it possible for the company to take alternative days off and give the men time, then if they had to work them they should be forced to give extra pay, but that is not a possible solution and if we made a recommendation as requested it would become one of penalty or one of automatic wage increase, which is not too obvious to the employees. The majority of the Board, therefore, feel that we cannot at this stage make a recommendation on this issue. Mr. Simon dissents. He feels that, as in industry, the employees should be paid for their time for those holidays which the men are required to work.

That brings us to the issue of wages. This, as in the case of all conciliations, is the major issue involved here. We must recognize the financial difficulties of the company in making our conclusions here. We must also recognize the justice of the men's position when they find themselves so far short of the other lake carriers in their pay. We must remember that this company has no right to expect the men to subsidize its operation. At the same time, we must remember that to give too large an increase will almost certainly cut off the prospect of employment with this company. It may be that some people will say that if the company can't pay normal wages it should not operate. In many instances, that argument is valid. On the other hand, with a deflated economy such as appears to be the situation now, it would not be a service to the employees themselves for us to make recommendations which would result in the curtailment or stoppage of employment. The men here who seek employment with this company by and large are local people of the district from which these ships operate. The employment to them is valuable because of this situation. The labour pool is not prejudiced, therefore, by wages which to the national standard might appear to be low. To cut off this employment would

have serious repercussions upon the local situation and is not by any means desirable in spite of the fact that all of us must recognize that the wages here are not too satisfactory. In arriving at a conclusion or a recommendation, therefore, we must bring up a recommendation which will allow the company to operate and provide the employment which is desirable and yet contemplate such a wage as will meet the necessities of the persons employed. To this end, therefore, we are prepared to recommend that there be an increase of eleven dollars (\$11.00) per month to the unlicensed personnel. While we recognize that this increase is not too satisfactory, we feel that it is the best that the company can hope to do in the light of its present financial difficulties. In our opinion, if this company be required to do more, it will result in the not too distant future in the folding up of the operation and thereby a withdrawal of the employment from those persons in the Owen Sound district who seek employment with this company. This would be unfortunate both from the standpoint of the operators and from the standpoint of the employees.

#### Dissents

Mr. Simon dissents from this point of view. He does not share the apprehension of the Chairman and Mr. Harris. He feels that this company will be able to operate in spite of the increased costs involved in his recommendation and he, therefore, would in place of the wage recommendation set by the majority of the Board recommend that there be an increase of twenty-four dollars (\$24.00) per month to the unlicensed personnel.

## Agree to Let Health-Welfare Benefits Run 6 Months after Layoff

Health and welfare benefits of wholesale and warehouse workers in New York City will be safeguarded, in the event they lose their jobs, for a period of six months after they become unemployed, under a new labour-management plan. Under the old plan's rules, workers lost their protection after 60 days.

Workers affected by the plan are members of District 65, Retail, Wholesale and Department Store Union.

The joint board of trustees set up to control the employer-financed plan has appropriated \$50,000 from the total reserves of the regular fund of more than \$10,000,000 to guarantee that idle workers and their families would retain their rights to medical care, hospitalization, death and burial benefits for as long as six months after a worker becomes idle.

# Report of Board in Dispute between

## Shipping Federation of British Columbia

and

## International Longshoremen's and Warehousemen's Union

The Board of Conciliation established to deal with the matters in dispute between the above-cited parties was composed of F. E. Harrison, Chairman, George Home, nominee of the union, and George Robson, nominated by the Federation.

The dispute relates to wages and working conditions affecting longshoremen employed at the ports of Vancouver, New Westminster, Victoria, Chemainus and Port Alberni in the Province of British Columbia. It arose over the failure of the parties concerned to reach a mutually satisfactory agreement for renewals of the contracts, five in number (Exhibit 2), which expired on April 30, 1958. Altogether there are approximately sixteen hundred (1600) regular employees and four hundred (400) casuals at the ports mentioned.

Efforts were made to reconcile the differences between the parties through the good offices of the Federal Department of Labour officials. Several of the items under dispute were tentatively accepted by the representatives of the Federation and the Union but for others of the salient requests for changes in the expired agreements no mutually satisfactory solution could be found.

At the first sittings of the Board the interested parties were represented as follows:—

During July, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with the dispute between the International Longshoremen's and Warehousemen's Union (Locals 501, 502, 503, 504, and 508) and Shipping Federation of British Columbia, Vancouver.

The Board was under the Chairmanship of F. E. Harrison, Vancouver, who was appointed by the Minister on the joint recommendation of the other two members, C. G. Robson and George Home, both of Vancouver, nominees of the Federation and Union respectively.

The majority report, which under the provisions of the Industrial Relations and Disputes Investigation Act constitutes the Report of the Board, was submitted by the Chairman and Mr. Robson. The minority report was submitted by Mr. Home.

The majority and minority reports are reproduced here.

### International Longshoremen's and Warehousemen's Union

(Locals 501, 502, 503, 504 and 508):—

W. Henderson, Vancouver, B.C. Chairman; L. Lobinsky, New Westminster, B.C., L. Mackie, Port Alberni, B.C., R. Rae, Chemainus, B.C., R. Smith, Vancouver B.C., C. Richards, Victoria, B.C., V. Woodford, Vancouver, B.C., committee members; E. Bjarnason, Vancouver, B.C., statistician.

*Shipping Federation of British Columbia:*— Captain George E. McKee, Chairman; E. P. Barr, Union Steamship Company of New Zealand Ltd.; E. T. Clendenning, Empire Shipping Co. Ltd.; J. F. Laidlaw, Empire Stevedoring Co. Ltd.; R. M. Mather, Seaboard Shipping Co., Ltd.; J. S. McAndrew, Terminal Dock & Warehouse Co. Ltd.; G. L. Smith, Anglo-Canadian Shipping Co. Ltd.; N. P. Smith, Canadian Blue Star Line Ltd.; R. McRae, Canadian Stevedoring Co. Ltd.; H. Harrison, Furness-Withy & Co. Ltd.

The union representatives submitted a brief (Exhibit 1) which sets forth their demands for changes in the provisions of the expired contracts, numbering fifteen items, while the Shipping Federation in its brief (Exhibit 4) requested approximately twenty-five modifications, many of them of a minor nature.

Following those presentations, the Board suggested that the parties should resume joint conferences in an endeavour to reach a mutually satisfactory agreement of the matters at issue. This proposal was readily accepted by them and, as a result, several items were tentatively agreed upon but only if others left unsettled were finally resolved. Upon some of the important matters, such as wages, pensions and hours of work, no satisfactory basis of settlement could be found.

The Board then proceeded to hold further sittings at which both parties were represented. Additional submissions, both written and oral, were received. Factual briefs and exhibits were presented and each party was afforded full opportunity to answer and comment upon representations put forward by the other.

The recommendations of the Board with respect to the matters at issue are as follows:—

### 1. Common Agreement

That the parties adopt the suggestion that there be one agreement in place of the present five separate contracts; that in order to bring this about the general clauses and working conditions of the present agreements be made uniform insofar as all five Locals are concerned; that provision be made in the one agreement for scheduling, under the heading of each respective Local, any mutually acceptable differences in local practices.

### 2. Vacations With Pay

It is recommended that the present vacation plan for the Deepsea Longshoremen be replaced by the following:—

- (a) for service of less than 2 years, vacation and vacation pay to be set forth in the recently passed but not yet proclaimed Federal Annual Vacations Act, viz. 2%. Provided, however, that no employee of less than two years' service shall receive less than he would have been entitled to under the "Vacations with Pay" provisions of the expired contracts.
- (b) for service of 2 years or more but less than 10 years, vacations and vacation pay to be as set forth in the Act referred to in (a) above, viz. 4%.
- (c) for service of 10 years or more but less than 15 years, vacation pay to be at 5% of annual earnings.
- (d) for service of 15 years or more vacation pay to be at 6% of annual earnings.

### 3. Paid Holidays

So far as the Board is able to ascertain nowhere in the stevedoring industry are employees receiving pay for statutory holidays when no work is performed. Under the circumstances, the Board does not consider that this request of the union should be granted.

We recommend, however, that the clause "Holidays" of Section 6, Schedule "A", as contained in the present Vancouver contract, should be retained in the proposed new agreement.

### 4. Pensions

That the representatives of the employers and the union enter into negotiations without delay on the question of pensions. Failing satisfactory progress being made by March 1, 1959, application may be made by either of the parties concerned to deal with the matter under Section 22, Subsection 2 of the Industrial Relations and Disputes Investigation Act. Any agreement reached by the parties on the matter of pensions or

recommendations made by a Conciliation Board shall not be incorporated as part of the collective agreement between the parties.

### 5. Wages

It is recommended that an increase of ten (10) cents per hour be applied to the various classes of labour mentioned in the expired contracts from the date of this report.

### 6. Other Matters

It is the opinion of the Board that the other matters raised by the respective parties, most of which are highly technical and complementary one with the other, should be adjusted on a mutually satisfactory basis by way of joint conferences between the parties. This procedure has resulted in mutually satisfactory solutions of similar problems in the past and we therefore recommend that it be followed in the present instance.

### 7. Duration

That an agreement be entered into between the Shipping Federation of British Columbia and the International Longshoremen's and Warehousemen's Union (locals 501, 502, 503, 504 and 508) for a period of one year from May 1, 1958, and to expire on April 30, 1959.

The Board is pleased to report that harmonious relations have existed between the parties to this proceeding over a long period of years and that the hearings were conducted in an atmosphere of friendly co-operation, indicating a desire to reach agreement and to understand the problems affecting both parties.

All of which is respectfully submitted.

(Sgd.) F. E. HARRISON,  
*Chairman.*  
(Sgd.) C. G. ROBSON,  
*Member.*

### Minority Report

I recommend the following:

**Wages:** The Union's request was for a 24% increase, equal to 61½¢ per hour. I would recommend an increase of .18¢ per hour, approximately 6.5%, retroactive to 1st May, 1958.

**Hours of Work:** I recommend that Schedule "A", Section 12, sub-sections (a) and (c) be amended by deleting the words "nine hours" and substituting "eight hours". This would make provision for the eight-hour work day.

**Minimum Work Pay:** I recommend that Section 10, Schedule "A" be amended by substituting four hours (4) for the two (2) hours. If the ship does not arrive and the gangs are transferred to another ship the minimum will be two hours. This would make provision for a minimum pay for four hours working time.

*Pensions:* A joint committee has been discussing a contributory pension plan for a period of two years without arriving at mutually acceptable proposals. I would recommend that from the pay period commencing September 1, 1958, a deduction of 4% of total wages be taken from each employee and from subsequent pay periods, as the employees' share of a contributory pension plan—as a start on a plan which contains the following principles:

1. The employers to make contributions at least equal to employees' to such a plan.
2. The plan to be jointly administered.
3. Full information to be available to both groups of contributors.

*Vacations With Pay:* I recommend that vacations with pay be calculated on the following basis:

1. For employees with less than 2 years' service, a vacation pay and period equal to 3% of total earnings.
2. For employees with 2 years' service but less than 10 years: 4% of total earnings.
3. For employees with 10 years' or more service, 6% of total earnings.

*Paid Statutory Holidays:* Clause "Holidays" in Section 6 of Schedule "A" as contained in the present Vancouver contract should be retained in the proposed new agreement. *Common Agreement:* That the parties adopt the suggestion that there be one Agreement in place of the present five separate contracts, and that in order to bring this about the general clauses and working conditions of the present contracts be made uniform insofar as all five Locals are concerned; that provision be made in the one Agreement for scheduling, under the heading of each respective Local, any mutually acceptable differences in local practices.

Where mutual changes cannot be obtained then the present working conditions for these separate Locals will be maintained. *Other Matters:* That other matters raised by the respective parties, most of which which are highly technical and complementary one with the other, should be adjusted on a mutually satisfactory basis by way of joint conferences between the parties. This procedure has resulted in mutually satisfactory solutions of similar problems in the past and we therefore recommend that it be followed in the present instance.

Member.

## Report of Board in Dispute between

The Packers Steamship Company Limited

and

National Association of Marine Engineers of Canada, Inc.

The Board of Conciliation appointed to deal with the above-cited dispute consisted of T. R. Watt, nominee of the employer, E. Hopkins, nominated by the union, and F. E. Harrison, Chairman. Sittings of the Board were held at Vancouver, B.C., commencing on June 6, 1958.

During July, the Minister of Labour received the unanimous report of the Board of Conciliation and Investigation established to deal with the dispute between the National Association of Marine Engineers of Canada Inc. and The Packers Steamship Company Limited, Vancouver.

The Board was under the Chairmanship of F. E. Harrison, Vancouver, who was appointed by the Minister on the joint recommendation of the other two members, T. R. Watt and Elwyn Hopkins, both of Vancouver, nominees of the company and union respectively.

The text of the report is reproduced here.

*National Association of Marine Engineers*

Denis McKeown, Agent  
R. G. Greaves, President  
E. Bjarnason, Statistician

*Packers Steamship Company Limited*

Lorne Hume, Manager of Industrial Relations

Robert McLennan, Assistant Manager of Industrial Relations

Montague Aldous, Manager, Packers Steamship Company Limited

J. A. Horne

The dispute arose over the failure of the company and the union to reach a mutually satisfactory agreement regarding wages and working conditions of a renewal of the previous contract which expired on August 31, 1957. At the first meeting of the Board, with the interested parties, the union presented a brief (Exhibit 1) which contained

its demand for changes in the following clauses:

1. Wages
2. Hours of Work
3. Overtime Rates
4. Union Recognition
5. Check-off
6. Union Hiring

After receiving the various submissions, the Board suggested that representatives of the union and the company should hold further conferences in an effort to reconcile their differences. As a result of those conversations, tentative agreement was reached on all items with the exception of wages, hours of work and overtime rates.

The Board has carefully considered all submissions and representations made on behalf of both parties. Full opportunities were afforded to representatives of the union and the company to present their views and to answer submission in opposition. The presentations were offered to the Board in the form of written briefs, as well as oral discussions, supported by a number of exhibits.

Having regard to the evidence submitted to the Board, it recommends as follows:

1. *Hours of Work (Leave)*

That leave should be granted upon the following basis:

- (a) When two six (6) hour watches are worked per day, leave shall be accumulated at the rate of 1.0 days for each day worked.
- (b) When two four (4) hour watches are worked per day of eight (8) hours in one day, leave shall be accumulated at the rate of 0.4 days for each day worked.

2. *Overtime*

That in payment for mechanical overtime an allowance of ten (10) dollars per month or one hundred and twenty (120) dollars

per annum be paid to all classes of marine engineers employed by the company.

3. *Wages*

That the wage rates now being paid to the various classifications of marine engineers employed on vessels operated by The Packers Steamship Company Limited should be increased forty dollars (\$40.00) per month from July 1, 1958.

That on July 1, 1959, to the scheduled monthly wage rates shall be added any wage increase granted in the towboat industry to marine engineers on vessels of similar power class, in the first year of the then existing towboat contract.

In the event that the towboat industry contract is concluded between the parties concerned for a period of two years, then on July 1, 1960 there shall be added to the monthly rate for marine engineers any wage increase implemented in the second year of the contract consummated between the National Association of Marine Engineers of Canada and the B.C. Towboat Owners' Association. The new agreement between the union and The Packers Steamship Company Limited should then continue in effect without other change in the wage structure for an additional twelve months, namely to June 30, 1961.

4. *Term of Agreement*

That the renewal agreement should be made for a period of two years dating from July 1, 1958 to July 1, 1960 subject to any agreement signed by the National Association of Marine Engineers of Canada, Inc. with the B.C. Towboat Owners' Association, as contemplated in the recommendation on the question of wages.

---

A United States steel company violated its collective agreement with the United Steelworkers when it gave its scrap reclamation work to an outside firm, an impartial arbiter has ruled.

In 1957, after doing scrap reclamation with its own men and equipment for six years, Bethlehem Steel Company gave the work to a scrap reclamation firm. The union lodged a grievance, contending that the Company's action arbitrarily reduced the scope of the bargaining unit. When the Company agreed that the plant's yard department constituted a seniority unit, the union argued, it assumed an obligation not to transfer work out of that unit.

The arbiter recognized two types of issues involved in the case, the charge that the Company had violated obligations implied in the contract and the charge that it had violated express obligations. He agreed with the union that the Company violated an express obligation in the "local working condition" clause in the contract.

# Report of Board in Dispute between

Certain of the Canadian Railways

and

17 Unions of Non-Operating Employees

In the matter of the Industrial Relations and Disputes Investigation Act and of a dispute

*Between:*

Canadian National Railways,  
Canadian Pacific Railway Company,  
Toronto, Hamilton and Buffalo Railway Company,  
Ontario Northland Railway,  
Algoma Central and Hudson Bay Railway,  
Midland Railway of Manitoba, railway Express Agency, Inc., hereinafter referred to as "THE RAILWAYS"

*And:*

The bargaining agents of the non-operating employees of the said employers, viz.,  
Brotherhood of Maintenance of Way Employees,  
Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees,  
Division No. 4, Railway Employees' Department, AF of L,

During July, the Minister of Labour received the Report of the members of the Board of Conciliation and Investigation appointed under the Industrial Relations and Disputes Investigation Act to deal with the dispute affecting the 17 international and national railway labour organizations, representing approximately 128,000 non-operating employees, and the Canadian National Railways, Canadian Pacific Railway Company, Toronto, Hamilton and Buffalo Railway Company, Ontario Northland Railway, Algoma, Central and Hudson Bay Railway, Midland Railway of Manitoba, and Railway Express Agency Inc.

The Board was under the Chairmanship of the Hon. Mr. Justice H. F. Thomson, Regina. The other members of the Board were Philip F. Vineberg, Montreal, the nominee of the companies and David Lewis, Toronto, the nominee of the joint negotiating committee for the unions.

The Report of the chairman and Mr. Lewis, constitutes the report of the Board. The minority report was submitted by Mr. Vineberg and additional observations appended to the majority report were submitted by Mr. Lewis.

The texts of the majority recommendations with appended additional observations are reproduced here below. The minority report will appear in the October issue.

Canadian National Railway System Federation No. 11,

International Association of Machinists, International Brotherhood of Boiler-makers, Iron Ship Builders, Blacksmiths, Forgers and Helpers of America, Brotherhood of Railway Carmen of America,

International Brotherhood of Firemen and Oilers, Steam Plant Employees, Roundhouse and Railway Shop Labourers,

International Brotherhood of Electrical Workers,

Commercial Telegraphers' Union, Brotherhood of Railroad Signalmen of America,

Order of Railroad Telegraphers, Canadian Brotherhood of Railway Employees and Other Transport Workers, Brotherhood of Sleeping Car Porters, Train, Chair Car, Coach Porters and Attendants, hereinafter referred to as "THE UNIONS".

*Before:*

The Hon. Mr. Justice H. F. Thomson, chairman; Philip F. Vineberg, nominee of the employers; David Lewis, nominee of the employees, Members of the Board.

*Appearances:*

F. H. Hall, chairman of the unions' negotiating committee; G. R. Pawson, secretary of the unions' negotiating committee; Dr. J. C. Weldon, economist and consultant for the unions; Dr. D. Neilsen, assistant to Dr. Weldon,

*and*

John A. Nolan, QC, of counsel for the Canadian Pacific Railway Company; J. Brendan O'Conner, of counsel for the Canadian National Railways.

*Union Representatives:*

F. H. Hall, vice president, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; G. R. Pawson, international representative, Commercial Telegraphers' Union; F. P. Donovan, vice president, Brotherhood of Maintenance of Way Employees; S. H. Eighteen, secretary, Joint Protective Board, Canadian Brotherhood of Railway Employees and Other Transport Workers;

G. P. Schollie, general vice president, International Association of Machinists; T. W. Read, president-secretary-treasurer, Railway Employees Department, Division No. 4, AF of L-CIO; Roger Melancon, general vice president, Brotherhood of Railway Carmen of America; J. A. Cussack, vice president, The Order of Railroad Telegraphers; Sam Finlay, vice president, International Brotherhood of Boilermakers, Iron Shipbuilders, Blacksmiths, Forgers and Helpers of America; Joseph Connolly, general organizer, United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada; George P. Patterson, international representative, International Brotherhood of Electrical Workers; John H. Clark, international representative, Sheet-metal Workers' International Association; J. W. Lebeau, vice president, International Brotherhood of Firemen and Oilers, Helpers, Roundhouse and Railway Shop Labourers; H. A. Stockdale, grand lodge representative, Brotherhood of Railroad Signalmen of America; A. R. Blanchette, field organizer, Dominion of Canada, Brotherhood of Sleeping Car Porters, Train, Chair Car, Coach Porters and Attendants; R. Y. Menary, international vice president, International Moulders and Foundry Workers' Union of North America; J. C. Weldon, economist for the unions; D. Neilsen, assistant to Mr. Weldon.

#### *Railroad Representatives:*

W. T. Wilson, vice president personnel, Canadian National Railways; T. A. Johnstone, manager labour relations, Canadian National Railways; E. K. House, assistant to vice president operation, Canadian National Railways; D. I. McNeill, vice president personnel, Canadian Pacific Railway Company; S. M. Gossage, asst. vice president personnel, Canadian Pacific Railway Company; E. Campbell, assistant manager labour relations, Canadian Pacific Railway Company; A. Jardine, general manager, Ontario Northland Railway; A. E. Cook, assistant to general manager, Toronto, Hamilton and Buffalo Railway; P. Leishman, supervisor of personnel, Algoma Central Railway; John Meisten, vice president personnel, Railway Express Agency.

The members of the Board established under the Industrial Relations and Disputes Investigation Act, in respect of the above mentioned dispute, consisting of The Hon. Mr. Justice H. F. Thomson of Regina, chairman; Philip F. Vineberg of Montreal, the nominee of the railways; and David Lewis of Toronto, the nominee of the unions, had their first conference

in the Windsor Hotel in the city of Montreal on February 28, 1958. Later on the same day they met with the representatives of the parties to determine the dates and times of hearings and the nature of such hearings and to settle the procedure to be followed during the hearings.

#### **Hearings and Conferences**

Public hearings were held in the Windsor Hotel. They commenced on Monday, March 3, 1958, and, save for a number of adjournments to suit the convenience of the parties or members of the Board, continued until June 6, 1958. Each of the parties was given the fullest opportunity to submit evidence and argument and took full advantage of the opportunity so presented. The case for each of the parties was ably presented and well argued. Although the issues were of the greatest importance and strenuously contested, the proceedings were throughout marked by a spirit of goodwill, courtesy and mutual respect, which was altogether refreshing and commendable.

On two occasions during the hearings, the Board endeavoured to bring the parties together in an atmosphere which would be conducive to collective bargaining. Small bargaining committees were appointed by the parties, and these committees met with members of the Board in camera. On the first occasion some progress was made and a certain measure of agreement was reached in regard to the question of health and welfare. On the second occasion, the Board endeavoured to get the representatives of the parties to indicate how far they would go to obtain a settlement on the question of wage increases. Both parties, however, were reluctant to concede anything and the Board's efforts at conciliation in respect of that matter were of no avail. At the conclusion of the hearings, a third attempt was made at conciliation. The members of the Board again met with the bargaining committees of the parties in a series of conferences. To facilitate a free and frank discussion of the matters at issue between the parties, it was arranged that the chairman and Mr. Lewis would first confer with the representatives of the unions and that the chairman and Mr. Vineberg would then confer with the representatives of the railways and this was repeated a number of times. While it was obvious that the parties were anxious to arrive at a basis for settlement, it soon became apparent that they were too far apart to make a settlement by agreement possible, and the Board was finally forced to abandon its attempts at conciliation.

## Parties

The five railways involved in this dispute operate approximately 95 per cent of the total railway mileage in Canada. The Canadian National and Canadian Pacific, however, are much larger than the others. Between them they serve all of the ten provinces of Canada, operate 89 per cent of the railway mileage, and do 88 per cent of the freight and passenger business done by railways in Canada. Their rail network consists of approximately 39,000 miles of main and branch line track, and both railways have integrated with their railway operations a nation wide communications and express system. For the sake of convenience, therefore, the case for both parties is based upon the figures for the Canadian National and Canadian Pacific.

To man their railway, communications, and express system, the said railways between them have 192,305 employees. The classifications, the number and the percentage of the employees in the respective classifications are as follows:

### Number of Employees

Canadian National Railways and Canadian Pacific Railway Company<sup>1</sup>  
(Lines in Canada)

| Classification                                  | Number         | Percentage   |
|-------------------------------------------------|----------------|--------------|

Canadian National—Report of employees, service, and compensation, 12 month period, September 1, 1956 to August 31, 1957.

Canadian Pacific—Report of employees and their compensation, 12 month period, September 1, 1956 to August 31, 1957.

## Union Demands

Pursuant to the provisions of their respective agreements with the railways, the unions on November 12, 1957, gave notice of their desire to have the said agreements revised and supplemented to give effect to certain proposals made by them. The railways in turn, on November 27, 1957, proposed that the vacation rule in the said agreement should be amended. Representatives of the parties met for the consideration of these matters but were unable to reach an agreement in respect of any of them and the matters in dispute between the parties have now been referred to the Board.

The following are the proposals made by the unions as set out in their said notice, viz:

- (1) Effective with commencement of the calendar year 1958, all rates of pay shall be increased by 11 per cent, plus 17 cents (seventeen cents) per hour;
- (2) Effective January 1, 1959, the railways and Railway Express Agency Inc. shall contribute an additional \$8.50 (eight dollars and fifty cents) per employee per month for one year for the purpose of improving health and welfare plans in effect as may be mutually agreed;
- (3) Vacations with pay shall be on the following basis:
  - After one year's service, 10 working days;
  - After 10 years' service, 15 working days;
  - After 15 years' service, 20 working days;
 (Nothing herein shall be construed to deprive any employee of such additional vacation days or more favourable practice as he may be entitled to receive under any existing rule, understanding or custom, which additional vacation days or more favourable practice shall be accorded under and in accordance with the terms of such existing rule, understanding or custom.)
- (4) The number of paid statutory holidays shall be increased to eight by the addition of Remembrance Day;
- (5) The principle of severance pay shall be recognized and established. The railways and Railway Express Agency Inc., shall set aside four cents (4c.) per hour per employee for severance pay, to be allocated among employees whose services are being terminated, on a basis of amounts and years of service to be mutually agreed upon;

- (6) Work normally performed by employees herein represented, or similar work which by past practice has been performed by them, shall not be contracted to be performed by other than railway employees;
- (7) (a) Excepting as to (2) hereof, the collective agreements between the railways, Railway Express Agency Inc., and the organizations signatory hereto shall be amended to conform with these proposals effective January 1, 1958, and shall continue in effect until December 31, 1958, and thereafter subject to sixty (60) days' notice in writing from either party to the agreement to revise, amend or terminate it. Such notice may be served at any time subsequent to November 2, 1958;
- (b) The foregoing does not prevent adjustments under normal processes in working rules, rates of pay of individual positions, correction of inequities as between rates for different individual positions, or negotiation of rates for new positions, or positions where the duties or responsibilities have been or are changed;

- (8) Employees shall be paid every second Thursday, or the last regular work day preceding such Thursday.

The following is a copy of the proposal made by the railways for the amendment of the vacation rule above mentioned, viz:

Employees qualified for one week's vacation shall be compensated therefor at 2 per cent of gross earnings in the preceding calendar year. An employee qualified for two weeks' vacation shall be compensated therefor at 4 per cent of his gross earnings in the preceding calendar year. An employee qualified for three weeks' vacation shall be compensated therefor at 6 per cent of his gross earnings in the preceding calendar year.

When these demands were made, the Canadian National and Canadian Pacific made a computation of what it would cost to grant them. The computation showed that for the non-operating employees alone the annual cost would be \$145,765,000. The railways, however, naturally assumed that wage increases and benefits granted to their non-operating employees would have to be extended to all other employees on much the same basis. On that assumption they estimated that the annual cost would be \$192,491,000.

During the course of the hearings, however, the unions' demands as to "health and welfare" and "vacations with pay" were modified to some extent and, in view of that modification, the railways prepared a revised computation. That placed the annual cost of granting the demands, as modified, insofar as the non-operating employees alone were concerned, at \$113,521,000 and the annual cost for all the employees at \$168,751,000. It also showed that the annual cost of an increase of one cent (1c.) per hour in the wage rates of the non-operating employees would be \$2,803,500 and that the annual cost of an increase of 1 per cent in the wage rates of those employees would be \$4,514,500. If like wage increases and benefits were granted to all other employees the annual cost of an increase of one cent (1c.) per hour would then be \$4,138,500 and the annual cost of an increase of 1 per cent would be \$6,895,500. No attempt has been made to estimate the total cost to all of the railways.

#### Wage Rate Demands

It will be convenient to consider the several demands made by the unions in the order in which they are listed in their notice of November 12, 1957. The first and by far the most important is the demand for wage increases, viz:

- (1) "Effective with commencement of the calendar year 1958, all rates of pay shall be increased by 11 per cent, plus 17c. (seventeen cents) per hour."

The position taken by the unions is very simple and easily understood. They contend that in determining wage rates it is absolutely necessary to have some standard of comparison to go by. They claim that ever since 1950 boards of conciliation and arbitration tribunals have accepted the wage rates paid to employees in the durable goods industries as the proper standard to be used in determining what are just and reasonable wage rates for the non-operating employees of Canadian railways. Specifically they assert that the durable goods standard has become the established standard of comparison and that they are now entitled to absolute parity with the employees in the durable goods industries.

Their demands in this connection are summarized in their written submission which was filed as Exhibit U-1 in the following terms, viz:

"To put matters briefly, the foundation of the employees' claims is the necessity for *full and unqualified parity with the established and accepted standard for the*

*determination of their working conditions, that is to say, unmodified parity with the 'durable goods' standard, a chosen standard of the railways themselves and the standard that has now been tested and approved in these hearings by a long succession of Arbitration Tribunals and Boards of Conciliation. The employees are certain, as neutrals also have been, that neither the government nor the people of Canada wish them to accept substandard working conditions to subsidize the railways or the effects of public policy upon the railways."*

The railways do not admit that the durable goods standard has become the "established" standard of comparison and deny that it is the best or most appropriate standard of comparison. Furthermore, they say that if an accurate comparison is made on the basis of the skills possessed and work done by their employees, it will be found that their employees are now receiving wages which are somewhat higher than the wages paid to their counterparts in outside industry. They also allege that their financial position is such that they are unable to pay higher wages and take the position that existing economic conditions are such that this is no time for making any change. They, therefore, contend that the terms and conditions of the existing agreements are fair and reasonable and that the said agreements should be continued in force without change for the further period of one year.

It will be seen from the foregoing that the unions' case for a wage increase is based squarely and almost exclusively on the durable goods standard or, as they call it, the "established standard of comparison". In effect they contend that it is not only the established standard but is the only standard or the sole criterion to be used in determining wage rates for the employees they represent. If that were so, all they would have to do is show that the wage rates of the non-operating employees of the railways are lower than the wage rates in the durable goods industries and automatically the wage rates of the former would have to be increased.

It seems that in 1948 the wages of the non-operating employees of the railways in the United States were out of line with, or in other words lower than, the wages of the employees in certain other industries. It also appeared that they worked longer hours than did their counterparts in outside industry. In October of that year a presidential emergency board granted to the non-operating employees of the railways an increase to bring their wages more

into line with the wages of employees in other American industries, and recommended the establishment of a 40-hour-week with the same take-home pay. In so doing the said Board used the wage rates of the durable goods and another group of industries in the United States as a basis of comparison and that is probably the origin of the so-called "durable goods standard".

It is true that since 1950 various boards of conciliation and arbitration tribunals have, as the unions contend, used the durable goods standard as a basis of comparison in determining wage rates for the non-operating employees of the Canadian railways. It is equally true, however, that they have done so with reservations. Practically all of them have recognized that the railway industry in Canada is unique; that a large proportion of its employees have no counterparts in outside industry; that there are many other points of difference between it and other Canadian industries, and that comparisons are difficult. That was made very clear by Mr. Justice Sloan in his award in 1954 when he said:

"The durable goods industry has been generally used as a yardstick of comparison with railway working conditions. There are areas in which conditions are, to a degree, parallel for comparative use *but there are divergencies which render the yardstick misleading and not an absolute guide.*"

"In the over-all result, it seems to me that the durable goods industry, may, with some reservation, be regarded as a reasonably good guide. *It has at least one virtue; there is no other.*"

(The emphasis is ours.)

It is now generally accepted, however, that if any comparison is to be made, it should be made with those sections of industry in which the nature and variety of employment, the proportion of male and female employees and the territorial distribution of employees are most nearly comparable. On that basis, the employees in the durable goods industries are as nearly comparable to the non-operating employees of the railways as are the employees in any other group of industries in Canada, but that leaves much to be desired because of the many differences which do in fact exist between the railway industry and outside industries. In no case has any of the boards or arbitration tribunals said that the durable goods standard was an absolute guide or that it could be used to the exclusion of all other factors or circumstances which should be taken into account in wage determination.

As indicated by the extracts from his award above quoted, Mr. Justice Sloan was clearly of the opinion that the durable goods standard was not an absolute guide. That was even more clearly and explicitly stated in the reports of the board of conciliation of which Eric G. Taylor was chairman in 1956 as is shown by the following extracts from the report of the said board, viz:

"The first point which this Board would wish to emphasize is that, in its opinion, there cannot be only one criterion governing wage determination. *In every case there are several factors which must be taken into account.* A proper standard of comparison is one factor, a very important one. Another is the pattern of wage increases in the community since the last wage increase was granted the particular group of employees involved. A third is the cost of living reflected by the Consumers' Price Index, which, in the present instance, has remained at the same level since the last wage increase. *Finally, in appropriate circumstances, the ability of an industry to pay may also be of governing relevance. All of these factors must be kept in mind in attempting to arrive at a just and fair settlement of a wage or labour cost dispute.*"

"In view of this, it would be a pity if the established and accepted standard were now upset, unless there were very valid grounds for doing so. The evidence did not disclose any. In the totality of circumstances, we are of the opinion and so recommend that "Durable Goods" should continue to be accepted as the appropriate standard. However, in our opinion, *no standard can be an absolute guide or be applied mathematically or mechanically, regardless of all other circumstances and factors.*"

(The emphasis is ours.)

We respectfully agree that the durable goods standard is not an absolute guide but that does not mean that it can be disregarded. It is one of the factors which must be considered. It is indeed a very important factor but, as stated by the Taylor Board, it cannot be applied mathematically or mechanically without regard to other factors that are also of importance.

Under the settlement made between the parties in 1956, the non-operating employees of the railways were granted a wage increase of 11 per cent of which 3 per cent was effective as of January 1, 1956, 3 per cent as of April 1, 1956, 2 per cent as of November 1, 1956, and 3 per cent as of

June 1, 1957. As a result of that settlement, the average hourly earnings of the employees before this Board on June 1, 1957, were increased to \$1.628. There has been no subsequent increase and the rate is still \$1.628 per hour. The said increases, however, were not sufficient to give them parity with employees in the durable goods industries. According to Table No. 12 in the Canadian Statistical Review issued by the Dominion Bureau of Statistics for the month of April, 1958, the average hourly earnings of employees in the durable goods industries as of November 1, 1957, were \$1.766 per hour so that by that date there was a difference of 13.8 cents per hour.

Since November 1, 1957, the average hourly earnings in durable goods have increased steadily and at a fairly uniform rate of about  $\frac{1}{2}$ -cent per month, with the result that by April 1, 1958, they had risen to \$1.793 per hour. To give the non-operating employees of the railways parity with their counterparts in durable goods, on April 1, 1958, it would be necessary to increase their average wage rate by 16.5 cents per hour.

The unions, however, point out that the increase in the average hourly earnings of durable goods has been continuous despite the recession we are now experiencing, and contend that there is nothing to indicate that the trend will change during the term of the new agreement, which it is suggested should be for two (2) years. Indeed they contend that the rate of increase in the average hourly earnings of the employees of durable goods may even be stepped up to at least  $\frac{7}{10}$ ths of a cent per hour each month after July 1, 1958. They, therefore, ask for such additional increase (over and above the 16.5 cents per hour now required to give parity) as will assure them of parity with the workers in the durable goods industries throughout the full term of the new contract.

In their original demands the unions asked for an increase of 11 per cent plus 17 cents per hour, which is the equivalent of approximately 35 cents per hour. One of their spokesmen frankly admitted that the 35 cents per hour was the "asking price" and had been submitted as a basis for bargaining. The real claim of the unions, however, is for parity with the employees in durable goods, both now and throughout the life of the new contract for which they are negotiating. They estimate that to give parity during the term of a one year contract, an increase of 18.1 cents per hour retroactive to January 1, 1958, would be needed, and that, if the new contract is to be for two years, it would require an

increase of at least 22.2 cents per hour retroactive to January 1, 1958, to assure them of parity throughout the full term of said contract. As an alternative, they suggest an increase of 26.2 cents per hour to be given in two steps, 18.1 cents to be retroactive to January 1, 1958 and 8.1 cents to be effective as of January 1, 1959.

The unions go one step further. As above indicated, the step by step increase of 11 per cent granted to the non-operating employees on the recommendation of the Taylor Board in 1956 did not give them parity with the employees in durable goods. The unions point out that the gap in earnings has been widening rather than narrowing in the interval since the Board made its report. They, therefore, ask for an additional increase of 10.1 cents per hour to compensate the employees for what they term "the substandard earnings" they have been receiving since January 1, 1956.

It is true that the wage rates of employees in durable goods have been going up but it is by no means certain that the rate of advance will be accelerated, as suggested by the unions. The fact is that we have been experiencing a recession and conditions are not as good as they have been for some of the durable goods industries. Indeed it is not impossible that the durable goods industries may find themselves facing a buyers' market rather than the sellers' market which they have enjoyed since the war. Under such circumstances it is quite possible that there may be a slowing up in the rate at which wage rates in those industries increase. Even if we are on the verge of coming out of the recession, as the unions suggest, no one can predict with certainty when recovery will be complete. All these are factors which should not be overlooked.

In supporting their demands for a substantial increase in wage rates, the unions have given evidence to show that since 1939 the percentage of increase in the wages of the employees they represent has not kept pace with the percentage of increase in the wages of employees in durable goods and has fallen short of the percentage of increase in the wages paid to the employees in other manufacturing industries to an even greater extent. The evidence does show that such is the case. However, that does not prove that employees of the railways have been as badly used as the figures might at first glance seem to indicate.

The explanation is relatively simple. In 1939, and for many years before that, the non-operating employees of the railways were fully organized and had reaped the

benefits of capable and aggressive leadership in the form of a relatively high wage scale. It might well be said that in those days manufacturing in Canada was in its infancy. As is generally the case with struggling industries, the wages paid by many of the manufacturing industries to their employees at that time were relatively low, certainly lower than the wages paid to railway employees. Conditions, however, have changed. The industries in the durable goods group, led by those engaged in the manufacture of automobiles and machinery, developed more quickly than most of those in other branches of manufacturing. It was not until the war that many of the other industries reached maturity. Prior to the war, railway workers were in a preferred position, but as the industries in the durable goods developed and prospered and the productivity and skill of their employees increased, they were able to pay better wages. As other industries in the manufacturing field became established, their employees began to ask for better wages and a greater degree of parity with the employees of other industries. Under such circumstances, it was both natural and inevitable that there would be a narrowing of discrepancies between the wages paid to railway employees and the wages paid to employees in established and prosperous industries.

This question of the relative rapidity of wage increases has been dealt with by other boards and arbitrators, and in no case has it been considered to have any decisive effect in wage determination. For instance, the board of conciliation of which Mr. Justice Wilson was chairman in 1950 disposed of a similar contention as follows, viz:

"The desire of a labour organization not to lose what one might call its economic ranking is perfectly understandable. But this Board does not think that the industry of this country is so static that it is possible to select any one year, be it 1939 or another year, and hold that there was established in that year a grading of labour values which must stand forever. It appears to the Board that, in a free society, relative wage standards of labour in different fields must change over periods of time. For instance, the loss in position which rail labour has sustained since 1939 may be due to several factors. A most important one is the increasing organization of labour in other industry which has taken place since 1939. In 1939 and for many years before, rail labour was fully organized and had reaped the benefits of organization and

of capable union management in a relatively high wage scale. This was not true to anything like the same extent of other elements of Canadian Labour. Unionization of employees has since proceeded at a great pace and resulted in the rectification of inequities and the raising of wages."

This same question was again considered by Mr. Justice Kellock as arbitrator in 1950 and by the board of conciliation of which he was chairman in 1952. In each case the result was the same. In the report of the last mentioned Board, the matter was dealt with in the following terms:

"We have considered this statement with respect only to the non-operating railway workers who are the concern of this inquiry. They look back to a time when their earnings were in excess of other industrial groups in the community. The present request is for the restoration of former conditions, but the point of view set forth in the paragraph quoted above does not inquire into the reason for the fact to which attention is drawn, namely, that "other workers in Canada" during the last two decades have received greater wage increases than the railway workers. Insofar as the non-railway groups are called upon to exercise comparable skills and to measure up to responsibilities, *there would not appear to have been or to be any valid reason why the one should ever have had or should now receive more in the way of remuneration than the other.* It surely cannot be a valid reason for now paying greater remuneration to the railway group, simply that its remuneration has been in fact greater than other groups in the past. It seems to us that if the non-operating railway employees receive or should be placed on a basis of comparable remuneration for comparable work vis-a-vis other groups in the community, the case of the railway worker cannot, in justice to the other groups or to the community as a whole, be put on any higher basis."

(The emphasis is ours.)

The history of the durable goods standard, or rather the use of it, is somewhat interesting. In 1918, the scale of wages fixed by the McAdoo award in the United States was by order-in-council made applicable to all railway lines in Canada. That had the effect of putting the non-operating employees of Canadian railways on a basis of parity in the matter of wages with their counterparts in the United States. That condition continued for some years but,

as stated by the unions in their brief, that parity was gradually lost during the years of depression following 1930 and as a result of wartime controls. Eventually, the National War Labour Board on July 1, 1944, decided that it was not permissible or proper to determine wage rates for employees of Canadian industries by comparison of their wage rate with the wage rates of employees in similar industries in the United States.

As above mentioned, the presidential emergency board used the wage rates of the durable goods industries and another group of American industries as a basis of comparison, when it granted a wage increase of 7 cents per hour to the non-operating employees of the United States railways and recommended a 40 hour week with the same take-home pay for said employees.

In 1950, the non-operating employees of the Canadian railways made demands for similar relief. The matter went to conciliation and later to arbitration. Both the board of conciliation and Mr. Justice Kellock, as arbitrator, made comparisons with the wage rates of employees in a wide range of industries. While admitting that comparisons were difficult, both concluded that the wages paid to the employees of the durable goods industries could be used for purposes of comparison.

In 1952, the non-operating employees of the railways made an attempt to regain wage parity with the non-operating employees of the United States railways, and demanded a wage increase of 45 cents per hour as the increase required to establish the desired parity. Naturally, an increase of that magnitude was strenuously opposed by the railways. In doing so, their representatives did advocate the use of the wage rates in durable goods, as a more appropriate standard of comparison than the wage rates of the non-operating employees of railways in the United States and that view prevailed. It is probably fair to say, however, that the railways regarded parity with United States railways as nothing short of disaster and were prepared to accept almost any other standard of comparison in preference to the standard furnished by the wage rates of employees of the United States railways.

In 1954, as above stated, Mr. Justice Sloan indicated very clearly his opinion that the durable goods standard was not an entirely satisfactory standard and that there were divergencies which made comparison between the railway industry and the durable goods industries very difficult. It was primarily because he could find no

other acceptable standard that he, "with some reservation", used it in making his award. He, however, qualified that by stating specifically that it was not "an absolute guide".

Having decided to their own satisfaction, at least, that the durable goods standard was not a satisfactory standard of comparison and was unfair to them, the railways in 1956 tried to establish another standard based on the average earnings of all the workers in the labour force of Canada. Many objections were taken to the use of the proposed standard and, after careful examination, it was rejected by the board of which Eric G. Taylor was chairman in that year.

In May of 1957, a special committee composed of representatives of the Personnel, Research, and Development Departments of the Canadian National and the Personnel, Accounting, and Research Departments of the Canadian Pacific was set up. The purpose of this special committee was to ascertain whether a proper comparison could be made between the wages paid to non-operating employees of the railways and the wages paid to comparable employees in outside industries, and whether this could be done in such a way as to avoid the difficulties which had been encountered in the use of the durable goods standard. The committee realized that any comparison which was to be made would have to reflect the nation-wide distribution of these employees, the variety of their occupations, the levels of their skills and their sex composition.

After careful study, the committee decided that it would be possible by using data supplied by the Department of Labour, the Dominion Bureau of Statistics and other reliable authorities to create a composite labour force which would be the counter-part of the railways' non-operating employees by finding in the ranks of outside industries, workers possessed of equivalent skills, doing the same types of work, and distributed in the same geographic areas. It was felt that when that had been done it would be possible to ascertain from government or other reliable sources the rates of wages which were paid to the said workers in outside industries in the areas in which the non-operating employees of the railways with whom they were to be compared were located. The committee was of the opinion that when these steps had been taken, it would be possible to make a reasonably accurate comparison between the wage rates of the major proportion of the non-operating employees of the railways and the wage rates of their counterparts in outside industries.

It was not difficult for the railways to classify the non-operating workers in its labour force according to their geographic distribution, the variety of their occupations, the levels of their skills, and their sex composition. That was done by officials competent to do it. Having made that classification, the next step was to determine what workers in the ranks of outside industry were possessed of equivalent skills and were doing work which was, as nearly as possible, the same as the work done by the workers in each of the classifications into which the railway workers had been divided. That was a much more difficult task than the classification of railway workers.

The committee found upon inquiry at Ottawa that the only comprehensive public source of wage rates in Canada on an occupational and geographic basis was the survey of wage rates and hours of labour conducted annually as at October 1 of each year by the Economics and Research Branch of the Department of Labour. It also found that the Department of Labour submitted job descriptions as part of the wage reporting schedules to establishments in a wide range of Canadian industries; that the wage data was collected on an occupational basis for industries in geographic areas and that the sex of the employees concerned and both the time and piece rates paid were also reported.

As the committee intended to use the wage rates established by the department on the basis of its annual wage rate surveys it was decided that it would be necessary to use, insofar as they were applicable, the same job descriptions as were used by the department in making its annual surveys. The committee, therefore, obtained from the Department of Labour copies of all reporting schedules and the job descriptions which were used in conducting its surveys.

When examining the said job descriptions it was found that there were approximately 2,900 of them. Some were duplications but the majority of them had reference to workers in outside industry for whom there were no counterparts in the service of the railways. There was also a lack of uniformity in the wording of the job descriptions themselves. There is no doubt, for instance, that an electrician servicing the types of machinery to be found in a small planing mill, or biscuit factory, would probably be possessed of a much lower level of skill than an electrician employed in the manufacture of such complicated machines as diesel locomotives, or an electrician engaged in installing the electric control system of a modern warship. Apparently

in preparing their job descriptions, special wording was used by the department in respect of some industries to suit their own needs or conditions. Possibly it was for that reason that there were often several job descriptions for the same worker. Certainly that was so in the case of such workmen as carpenters, electricians and other tradesmen.

Personnel officers on the railways with long experience in dealing with railway employees and the work done by them, reviewed the job descriptions submitted by the department and discarded all of those which were duplications and all of those which related to workers in outside industry for whom there were no counterparts in the employ of the railways, and by so doing the number of job descriptions used by the committee was reduced to approximately 210.

The railways did everything they could to make certain that the selection of outside job descriptions for purposes of comparison was done fairly and accurately. The officers who did the work were well qualified to do it and took a great deal of time and care in doing it. To avoid any suggestion of bias they were given no indication as to the industries in which the workers to whom the job descriptions related were employed, save such as might, in some cases, appear from the titles or wording of the job description itself. Furthermore they were given no information as to the wages paid to any of the workers to whom the job descriptions referred. Several of these officers gave evidence before the board and said that in no case was he influenced in any way in his decisions by the fact that the title to a job description might have given him some indication as to the industry in which a worker was employed. The representatives of the unions were frank enough to say they were convinced that the officers of the railways had made a bona fide attempt to perform their tasks impartially.

The officers who were asked to select the job descriptions which were descriptive of the work done by employees in their respective departments had a very difficult task. As above indicated, they had nothing to go by except the wording of the job descriptions themselves. They did the best they could, but here the personal element entered into the picture. The selections made by officers in the Canadian National differed greatly from the selections made by officers in the Canadian Pacific. The Board is satisfied that this is no reflection upon the ability or bona fides of any of these officers. When it comes to a simple

matter of judgment or discretion, opinions are bound to differ but differences of this nature can have very important and far reaching results, especially in making a comparison of the kind the railways were attempting to make. This, in fact, is one of the chief criticisms of this new composite standard. Under the system adopted by the committee too much depends on personal judgment or discretion of individual officers.

As it turned out, the officers making the selections from outside industry would probably have made a better selection if they had been informed of the industries from which the job descriptions had been taken. For instance, the officers of both railways decided that the job description for "electrician—rolling stock" which appears on page 8 of exhibit R-72 most nearly described the work done by electrical workers in the railway labour force. It happened, however, that there were only 86 workers in that category in the whole of Canada, but as a result of that selection, the wages paid to 675 electrical workers on the Canadian National and 484 on the Canadian Pacific (or a total of 1,159) were compared with the wages paid to only 86 of the electricians in outside industry.

In another instance 3,346 carmen (freight) on the Canadian National and 555 on the Canadian Pacific were priced against tank car repairmen, of whom there were only 92 in the whole of Canada. It is possible that, if the officers making the selections had known the industries from which the job descriptions were taken, they would have selected job descriptions from industries in which there were larger numbers of workers of the same class. In any event, they would have been able to make some enquiry or investigation to ascertain what skills were possessed and what work was being done by the workers they were selecting. The selection of different groups for comparison can make a great deal of difference because there are wide variations in the wages paid to the same tradesmen in different industries and in different localities. The officers making the selections, however, were required to make them on the basis of the job descriptions alone. Under the circumstances they were working under a very great handicap.

Almost all industries employ some craftsmen such as carpenters, electricians, or machinists. If, for example, a comparison is to be made between the carpenters in the railway labour force and carpenters in outside industries, it should be made with all carpenters of like skills and doing the same kind of work in outside industries

on a nation-wide scale or, at least, with a representative group of them.

This is of special importance because the railways by agreement with their employees have established one uniform rate of pay for their qualified craftsmen wherever they may be located. For instance a railway carpenter in a small shop in some out of the way spot receives exactly the same rate of pay as a carpenter in the largest shop in the most populous centres in Ontario or Quebec. That is not necessarily true of outside industries. As a general rule craftsmen employed by outside industries in the larger cities in Central Canada receive higher rates of pay than those working in small shops in less populous areas in other parts of the country. Especially is that so if they are working in the largest plants in Ontario or Quebec.

Under the system adopted by the railways for the selection of comparable workers by use of job descriptions, the officer making the selections does not know where the workers referred to in the job descriptions he chooses are working. He may, therefore, in the best of good faith make a selection which will result in a large body of railway workers being compared with a small group of poorly paid workers living in a low-wage area. On the other hand if a different officer had made the selection he might very well, in the exercise of his personal judgment, have made a selection which would have resulted in the same group of railway workers being compared with a large group of highly paid craftsmen employed in one of the largest plants in Canada. While it is no doubt true that any selection necessarily involves the exercise of some degree of judgment or discretion on the part of the person making it, nevertheless the Board is of the opinion that this system of making selections from written job descriptions leaves far too much to the element of chance. In any event, on examining the comparisons actually made by this system, it was found that a great many of them were with workmen in one industry only.

After the officers had made their selections these were turned in to the special committee to be processed. That committee then ascertained the wage rates of the non-operating employees of the railway work force for whom counterparts in outside industry had been found and also the wage rates of their counterparts. These were the weighted average wage rates in each case. With this information in hand the committee prepared a summary of

wage comparisons made by it which was filed as Exhibit R-11. This showed that when tested by the new composite standard, the average wage rate of the non-operating employees of the railways, for whom comparisons had been made, on October 1, 1956, was \$1.491 per hour and that the average wage rate of the workers in outside industry with whom they were being compared was \$1.392 per hour. In other words the non-operating employees of the railways were receiving 9.9 cents per hour more than the workers in outside industry. This comparison was made as at October 1, 1956, because that was the last date for which the Department of Labour could furnish certain information required in computing the wage rates.

During the cross-examination of certain of the railway witnesses, however, it was agreed that a number of changes would be made in their selections. This necessitated the preparation of two amended summaries which were filed by the railways as Exhibits R-81 and R-83. R-81 showed that the changes which had been agreed on up to the time it was prepared reduced the margin in favour of railway employees from 9.9 cents per hour to 2.9 cents per hour. R-83, however, increased the margin in favour of the railway employees to 3.3 cents per hour. The fact that these changes were necessary and the further fact that they could produce substantial differences also tend to weaken the precision or accuracy of the new composite standard.

The hearings in these conciliation proceedings have been of unusual duration. Week after week the Board listened to evidence as to the steps taken and methods used to create the new composite standard of comparison, the system used in making selections of job descriptions, and the results obtained when use was made of the standard. Much time was spent in examining the actual comparisons that had been made by the use of the new system and in considering the suitability or accuracy of some of them.

It would serve no useful purpose to review or analyze the evidence or to discuss the suitability of particular selections or comparisons. We have, however, outlined certain objections which we think can properly be taken to the new standard and the system of selection on which it is based. Some of those are serious objections. After weighing all the evidence and carefully considering the able and exhaustive arguments addressed to us by the representatives of the parties we have come to the conclusion that the railways' new composite standard cannot, in the present stage

of its development, be regarded as better or more satisfactory than the durable goods standard.

That does not mean that the new standard has served no useful purpose in these conciliation proceedings. The study of it has thrown into relief the fact that there really are many differences between the railway industry and the durable goods industries. It has also called attention to some of the defects in the durable goods standard and emphasized the necessity for a careful examination and evaluation of other factors which must be considered in determining what are just and reasonable wage rates for the non-operating employees.

It has always been assumed that many of the non-operating employees of the railways have no counterparts in outside industries but no one seemed to know the number for whom no comparison could be made. In trying to find job descriptions to fit the non-operating employees, the officers making the selections found that out of a total of 130,114 employees before this Board they could find comparisons for only 81,749, or 63.5 per cent. This confirms the view expressed by the Wilson Board when it said: "The difficulty arises in part from the fact that certain classes of railway workers are *sui generis*, they have not their counterpart in other industries." The fact that there is such a large percentage (36.5 per cent for whom no comparable occupations could be found in outside industry is a factor to which some consideration should be given.

There are other differences which arise out of the fact that the railways are a service organization while the durable goods industries are engaged in manufacturing. When the demand for their products slackens, industries in the durable goods group think nothing of laying off large numbers of their employees. At the present time that is particularly true and is reflected in much of the unemployment which we have had in Canada for some months past. The railways, however, must give service; their trains must run and their track and equipment must be serviced and maintained. They are not permitted, except with the consent of the Board of Transport Commissioners, to discontinue services which become unprofitable, or abandon trackage which does not pay its way. While naturally there are some lay-offs—mostly seasonal—railway employment by and large gives a large measure of the security afforded by continuity of employment. That is a fact of considerable importance to the employees. If the workers in any industry are faced with the possibility

of lay-offs, it is almost inevitable that they will expect and receive a higher rate of pay than they would expect if they were assured of continuity of employment.

There is another difference which arises out of the fundamental differences between service and manufacturing. If the cost of fringe benefits is included in labour costs, then approximately 60 cents out of every rail revenue dollar goes to meet payroll costs. That is considerably more than twice the amount required by durable goods to take care of their payroll costs. Furthermore, presumably because they can slow down production or lay off employees almost at will, the durable goods industries have demonstrated that they can adjust payroll costs to fluctuations in revenue much more quickly than can the railways with their relatively fixed service obligations. It follows that an increase in the wage rates of their employees has a much greater impact on the railways than is the case with the durable goods industries.

Another factor which makes a great deal of difference is the territorial distribution of employees. The railways maintain 39,000 miles of main and branch line track. Every mile of that must be patrolled and maintained by section gangs stationed every few miles along the entire length of that trackage. At certain seasons thousands of extra gang workers are employed to do extra work on the right-of-way. The railways do business with all the people of Canada, and their employees are widely dispersed throughout the country from coast to coast.

The railways have shown that 73.4 per cent of the employees of the durable goods industries are located in 32 of the principal cities, while only 55.7 of their employees are located in those and two other cities. That means that 44.3 per cent of all railway employees are located in what are called "rural areas". It is a well known fact that in most industries higher wages are paid in the larger centres than are paid in rural areas. Sometimes the difference is substantial. This difference in territorial distribution is, therefore, a matter of real importance.

There is another difference which seems to have come to the fore in these conciliation proceedings and that is the difference in the rates of wages paid in large as compared with small establishments, even when located in the same area. That is shown very strikingly by the following table compiled from information contained in the wage rate comparison filed by the unions as exhibit U-25.

# **AVERAGE WAGE RATES FOR LABOURERS<sup>(1)</sup> IN MANUFACTURING AT OCTOBER 1, 1956, BY REGION AND SIZE OF ESTABLISHMENT**

| Size of Establishment.              | Canada                      | Atlantic<br>Provinces       | Quebec                      | Ontario                     | Prairie<br>Provinces        | British<br>Columbia         |

| 1000 and over.....                  | 1.65                        | 1.58                        | 1.48                        | 1.73                        | (2)                         | 1.70                        |

(1) Firms surveyed with occupational schedule were asked to report rates for Labourers according to the following definition: "General Labourer: performs one or a variety of heavy or light manual duties which can be learned in a short period of time and which require a minimum of independent judgment." Firms surveyed without schedule were asked to report rates for labourers.

(2) Insufficient data for this size class.

The statistics for the Atlantic provinces are most interesting and informative. As shown in the above table the average wage rate on October 1, 1956, for common labourers in those provinces, who worked in establishments in which less than 50 workers were employed, was only 84 cents per hour, while the average wage rate paid to labourers in establishments in which there were more than 1,000 workers was \$1.58. It will also be noted that the All-Canada rates range from a low of \$1.13 to a high of \$1.65.

As above stated the percentage of employees in durable goods who are located in the 32 larger cities in Canada is considerably greater than the percentage of railway non-operating employees located in those centres (73.4 per cent against 55.7 per cent). Those are the areas where large establishments are found and it is a fair assumption that the percentage of the employees in durable goods who work in large establishments is also greater than the percentage of non-operating employees who work in large plants. Other boards of conciliation have repeatedly emphasized the importance of territorial distribution because of the difference in the wage rates paid in large high-wage areas as compared with the lower wage rates paid in rural or low-wage areas. The same principle applies where the wage rates paid in large establishments are substantially higher than the rates paid in small establishments, even when located in the same areas. This, therefore, is another difference which should not be overlooked.

Conditions in industry in this country are never static. Industries which are prosperous today may be anything but prosperous a few years hence. It is not so long ago that coal mining was one of the

leaders in Canadian industry and its workers were among the highest paid in the mining industry in Canada. The impact of competition from other fuels, however, has changed all that. The coal mining industry is now in an unhappy position and its employees, insofar as wage rates are concerned, are no longer in the preferred position they once occupied.

Much the same thing is true of the gold mining industry, although there the difficulty is of a different nature. It has no control over the price at which it must sell its product and it has, therefore, experienced difficulty in meeting rising costs. That difficulty has been reflected in the wages of the workers in the industry which have not been rising as rapidly as in some other branches of mining. The textile industry has been suffering from stiff competition from goods imported from foreign countries and produced by low priced labour, and again that fact has had an adverse effect on the wages paid to its workers.

Indeed the position of the durable goods industries has altered considerably since 1939, but their experience has been much happier. As above indicated, manufacturing in Canada came into its own in the last war. During the war almost all sections of the manufacturing industry was engaged in the production of military equipment, munitions and supplies, required in Canada's war effort. As a result, at the conclusion of the war there was a pent up and unsatisfied demand for durable goods of all kinds, and that demand was intensified by the demands of the men of the armed services who were returning to civil life and endeavouring to establish homes for themselves and their families. These industries by reason of the almost insatiable demand

for their products, have been able to pay high wages and pass on the increased cost to the consumer who seemed to be more concerned about getting their products than he was about the price he was paying.

The automobile industry is one of the durable goods industries. In the arbitration proceedings before Mr. Justice Kellock in 1950, the non-operating employees of the railways advocated the use of a number of particular industries as standards of comparison. The automobile industry or "automobiles and parts", as it was called, was one of those suggested as a suitable standard of comparison. The learned judge, however, refused to accept it as such, and gave the following reasons for his refusal, namely:

"As to automobiles and parts, I do not think this industry furnishes an adequate comparison, if for no other reason than that at the present time at least, and for some time past, the industry, by reason of the almost insatiable demand for its products, has been able to pay high wages and pass on the increases to the consumer, at the same time maintaining what would appear to be a comparatively high level of profit. Further, the automobile industry has a history not only of high wages but of seasonal lay-offs due to changes in models. There are some seasonal lay-offs in the case of the employees in question here, namely, at ports where navigation ceases in the winter months, and in the western provinces after the movement of the grain is finished, but, by and large, railway employment offers the security afforded by continuity of employment."

In fairness it must be said, however, that Mr. Justice Kellock also pointed out that any comparison which was made should be made with those sections of industry in which the nature and variety of employment, the proportion of male and female employees, and the territorial distribution, are really comparable, and finally stated that on that basis a fair comparison was, in his opinion, furnished, "as nearly as may be" by the group of industries falling under the head of "durable goods manufacturing".

In the interval since the last war most of the other industries in the durable goods group have been having much the same experience as the automobile industry had been having at the time Mr. Kellock made his award in 1950. The intervening years have been good to them, and what Mr. Justice Kellock said was true of the automobile industry in 1950 is true to some extent, at least, of nearly all the durable

goods industries in recent years. That fact, therefore, tends to lessen the value of the durable goods industries as a standard of comparison.

In view of the buoyant economic conditions which have existed during most of the post-war period, it is not surprising that the wages of employees in the durable goods industries have throughout that period been rising steadily and at an extraordinary rate. The table on page 99 of the unions' brief (exhibit U-1), as brought up to date in the course of the hearings, shows that the average hourly earnings of employees in the durable goods industries have risen from 74.7 cents per hour on January 1, 1946, to \$1.782 on January 1, 1958. It must always be remembered that each successive percentage wage increase is calculated on a higher base than the one before and these successive increases work on the same principle as compound interest.

Counsel for the railways placed particular emphasis on that fact. In referring to the rapidity with which wage rates had been rising, he called the attention of the Board to the startling consequences which could result in a very few years from a continued rise in wage rates at anything like the accelerated rate suggested by the unions. As above stated, the average hourly earnings of the employees of the durable goods industries rose from 74.7 cents per hour on January 1, 1946, to \$1.782 per hour on January 1, 1958. It had taken a very long time to establish the rate of 74.7 cents per hour by 1946, but the rate more than doubled in the ensuing period of twelve years. If, as the spokesmen for the unions contend, this trend is likely to continue at an accelerated rate, then the result of successive increases, each calculated on a successively higher base, can be nothing short of fantastic. In any event the possibilities are such that it is not surprising to find the heads of government in Canada, Great Britain, and the United States, calling for caution and urging everyone to hold the line on both prices and wages.

In the meantime the Canadian railways have had an altogether different experience. As stated by Mr. Justice Sloan in his award in 1954, the railways, in their rail operations, are in "a sorry contrast". They have had great difficulty in getting authority to increase their freight rates and in getting the expected benefits from freight rate increases when they were granted. They have been forced by public policy or conditions over which they have no control to haul enormous tonnages of freight and to transport millions of passengers at rates which are wholly inadequate. In a period

during which practically all of the durable goods industries have been experiencing unprecedented prosperity the railways have been meeting the stiffest kind of competition. All in all, their lot has not been a happy one, and it is not surprising that by 1956 they were convinced that they could no longer live with the durable goods standard.

There is another factor which is sometimes lost sight of and that is that the employees appearing before this Board do not include the railways' operating employees. The latter are the more highly paid employees and, as a group, have a somewhat higher level of skills than the non-operating employees. There is some basis for the contention of the railways that if comparisons are to be made with outside industries, they should really be made between the entire railway force (not a segment thereof) and the durable goods industries. If the average hourly earnings of the entire railway working force are compared with the average hourly earnings of the entire working force of the industries in the durable goods group, it will be found that the railway workers are quite as well off as the workers in durable goods.

The durable goods group includes industries which employ relatively large numbers of skilled workers. It would seem from information furnished to the Board by the Department of Labour that the over-all level of skill in the durable goods industries is somewhat higher than the level of skill of the non-operating employees before the Board. The department pointed out, however, that the skill table they furnished was based on information taken from the census returns for 1951. Information of that kind leaves something to be desired in the matter of accuracy. The railways pointed out that the information for both the durable goods industries and the non-operating employees came from the same source, and would be as fair for one as for the other. We, however, feel that the evidence is not sufficiently convincing or reliable to justify us in coming to any conclusion in the matter.

As already noted, the industries in the durable goods group were among the first of the manufacturing industries to become established, and almost from the first the wage rates of their employees were higher than the wage rates of workers in the remaining or so called "non-durable" segments of the manufacturing industry. For the reasons we have pointed out the wage rates of the non-durables have shown a tendency to rise more rapidly than the wage rates of durable goods. Notwithstand-

ing that fact, however, the wage rates of the latter are still appreciably higher than the wage rates of employees in the "non-durable" industries.

According to Table No. 1 in the issue of "earnings and hours of work in manufacturing" for 1956, issued by the Dominion Bureau of Statistics, the average hourly earnings of the male workers in durable goods on November 30, 1956, were \$1.70 per hour, while the average hourly earnings of the male employees in non-durables were only \$1.61 per hour. On the same date the average hourly earnings of the male employees in all manufacturing were \$1.66 per hour. The reason we have chosen male workers only for the purposes of comparison is that there is a greater percentage of female workers in "non-durables" whose wages are generally much lower than those paid to the male workers.

It will be seen from the foregoing review that the Board is not being asked to make a comparison with "manufacturing" as a whole but rather with what is only a selected segment thereof. It has already been pointed out that the segment selected happens to be the one which ever since the war has enjoyed almost unprecedented prosperity, and as a result has been able to pay its employees wages which are higher than the wages paid to the employees of the remaining segments of manufacturing. The railways do not suggest that comparisons should be made with any of the depressed industries. On the other hand it may be asked why comparison should be made with the most fortunate and prosperous segment of the manufacturing industries and not with manufacturing as a unit.

#### Ability to Pay

The ability of the railways to pay higher wages has become a much more important factor than was formerly the case. As pointed out by one of the railways' witnesses, no suggestion was advanced by the railways either in the arbitration proceedings in 1950, or in the conciliation proceedings in 1952, that they were unable to pay wages which would be comparable with the earnings in "durable goods", but they did at that time contend that they were unable to give increases based on the scale of wages paid to workers on the railways in the United States. The railways in those years had no doubt of their ability to recover from increased freight rates sufficient revenues to pay wages on a scale which would maintain a parity with "durable goods", and for that reason did not oppose the use of "durable goods" as

a standard of comparison. Since that time, however, certain changes have taken place which alter the situation materially, and the railways are now genuinely concerned about their ability to meet the demands of the unions for increased wages and greater fringe benefits.

In the interval it has become more difficult to obtain leave from the Board of Transport Commissioners to increase freight rates; it has become increasingly difficult to put authorized increases in freight rates into effect, and competition from waterborne, air and motor transport and pipe lines, has been steadily increasing. Today the railways are having real trouble in meeting the mounting cost of labour and materials. Some of the principal reasons for this change were stated by Mr. Justice Sloan in his award in 1954, and there is no need for repeating them. We would, however, call attention to the following extract from the report of the board of conciliation of which Mr. Justice Kellock was chairman in 1953, in which the learned judge said:

"I do not think, however, that the proposition can be maintained that at all times and under all circumstances the economic condition of the railways is to be considered irrelevant. I think it is pertinent to consider that situation for present purposes and shall endeavour to do so as concisely as possible."

"Although, as I have already mentioned, a person requiring the assistance of others to carry on his business, must, as a general rule, expect to pay the going rate, competitive conditions have, from time to time, obliged employees to accept reductions."

"While wages of the non-operating railway employees have been rising for some years, the same has not been true of net railway operating income of Canadian railways, notwithstanding the several freight rate increases which occurred."

The difficulty which the railways are having in meeting rising costs has become a matter of real concern to the Board of Transport Commissioners. That Board has had the means at its command for making a much more extensive and detailed investigation of this matter than this Board has been able to make; hence what it has to say about this matter is of special significance. We, therefore, quote hereunder the following extract from the Board's judgment of February 15, 1954, which will speak for itself, viz:

"As a result of these recent rail traffic trends, we are now more strongly than ever of the opinion that the long suc-

cession of general freight rate increases, mainly due to added costs of labour which is the largest single factor and to increased costs of materials, has brought about a loss of traffic by the railways to competing modes of transport, not only of traffic which the railways formerly regarded as vulnerable because it was highly competitive, but a loss as well of traffic which was formerly non-competitive but which has now become subject to competition by reason of the aforementioned long succession of rate increases. *Thus the law of diminishing returns is now, in the inexorable economic sense, beginning to assert itself. We are convinced therefore that, unless the several underlying conditions adversely affecting the railway industry in general changes markedly for the better, means other than general rate increases imposed on the basis of the past will have to be found in the future if the railways of Canada are to be maintained in a healthy operating position.*"

—and—

"Canadians at large have a vital stake in our railways. *They, we think, reasonably could expect both railway management and labour in their own mutual long term self-interest, as well as in the interest of the public, to collaborate in taking a new and economically realistic view of the deterioration which has taken place in the traffic position of Canadian railways since the Board's Judgment in March last.* This is so, particularly since such deterioration cannot be accounted for by any contraction for the year 1953 in Canadian production generally but is, we believe, attributable mainly to the increasing pervasiveness of competing modes of transport."

(The emphasis is ours.)

#### **Recommendation as to Wage Demands**

The unions in their formal submission U-1 state that "neither the Government nor the people of Canada wish them to accept substandard working conditions to subsidize the railways or the effect of public policy upon the railways". As we understand it, however, the railways do not contend, nor have they ever contended that their employees should accept substandard working conditions or that they should subsidize the railways in any way. Their representatives frankly say that if higher wages are deserved they must be paid, and the public must pay the cost. How that cost is to be paid is primarily the concern of the Government and the railways, although railway workers are by no means uninterested parties.

What the railways do say is that the wages paid should be adequate when tested by a reasonable standard of comparison and that any excess of wages over such basic standard must be limited by the industry's ability to pay. They contend that the wage rates of their non-operating employers compare favourably with those of their counterparts in outside industries and, therefore, ask that the existing agreements should be extended without change for another year.

In 1956 the chairman of the Taylor Board expressly stated that weight had to be given to the railways' claim of "inability to pay". What is really more significant is that the Board did not attempt to give the non-operating employees parity in wage rates with the employees of durable goods. In fact, the Board stated that the recommendations it was making would fall short of parity with the "durable goods" standard, and in a later passage pointed out that the adjustment it was proposing would "remove part, but not all of the disparity between the earnings of non-operating railway employees and employees in "durable goods".

The fact is that the non-operating employees of Canadian railways have not had parity with the employees of durable goods at any time since 1952. Incidentally the non-operating employees of United States railways have had much the same experience. They have been unable to maintain absolute parity with the employees of durable goods in that country. Except for a brief period following the increased grant to them in 1948, they have never had absolute parity at any time since 1944.

When the Taylor Board made its report in 1956, Canada was enjoying an exceptionally high level of prosperity. In making its recommendations the Board spoke of "the anticipated buoyancy of the Canadian economy" and obviously anticipated a continuation of the prosperous conditions then existing. The Board was somewhat too optimistic. In the interval the economy has lost its buoyancy and for the past few months Canada has been experiencing a recession which has seriously affected railway earnings. 1957 turned out to be a very disappointing year for the railways. The year 1958 promises to be no better and, unless there is an early and substantial improvement, it may be much worse. Railway revenues have been dropping and none of the railways are now as well able to meet the cost of wage increases

as they were in 1956. Under the circumstances we are of the opinion that moderation is called for.

The Board, however, does not agree with the railways that no wage increase should be granted at this time. There has been no increase in the wages of non-operating employees since June 1, 1957 when the last of the step by step increases recommended by the Taylor Board went into effect. In the interval the wages of employees in outside industries have been going up steadily. The cost of living also has been rising. The consumer price index has gone up from 121.6 in June 1957 to 125.2 in April 1958. It did, however, drop back to 125.1 in May and it may be that its advance has slackened off for the time being.

There is little to indicate that the trend in wage increases had changed. The fact is that increases have been fairly general notwithstanding the depression we have been experiencing. Even if the rise in the cost of living has been arrested, there is no assurance it will not rise again. In any event the general tendency over the years has been for it to go up, and it is reasonable to assume that it will follow the usual pattern. These are matters which must be considered especially if, as we would recommend, the new contract is to be for the term of two years.

The parties have both been vigorous and resourceful in the presentation of their claims and every issue has been strenuously contested. That is as it should be but the time has now come when settlement is of primary importance. To get the desired result there must be a little "give and take" on both sides. In this connection we think that heed might be given by both parties to the following extract from the report of the Wilson Board in 1950, viz:

"The Board agrees with the unions that railworkers must not be required to accept substandard wages or onerous working hours in order to underwrite railway deficits. If higher wages are deserved they must be paid, and the public must pay the cost. This does not, however, imply that enlightened labour should proceed to exact what it can in the way of wage increases without regard to the condition of the business which employs it. Under certain conditions a union may be well advised to accept a lesser wage, with continuity of employment, rather than to insist on a higher wage, which may threaten that continuity. The competitive position of the railways viz à viz truck and water competition must always be kept in mind

by union leaders as well as by railway managers, with a view to insuring that rail transportation does not price itself out of the market."

It will have been seen from the above analysis that in our opinion the durable goods standard leaves much to be desired. In spite of that, however, it still remains one of the most important factors to be taken into account in determining what is a just and reasonable wage rate for the non-operating employees of the railways. As stated by the Taylor Board, however, it is not an absolute guide and cannot be applied mathematically or mechanically regardless of all other circumstances. It follows, therefore, that each of the differences which exists between "durable goods" and the railways and each of the other factors and special circumstances we have attempted to review must also be carefully considered and each must be given its proper weight in determining what increase in wage rates should be recommended.

Acting upon the principles above enunciated, we have earnestly endeavoured to give due consideration and proper weight, not only to the durable goods standard, but also to each of the various factors, differences and other matters hereinbefore mentioned or reviewed. On the assumption that the parties will be able to negotiate a new contract for the term of two years, we recommend the following increases in the wage rates of the employees before this Board, namely:

- (1) An increase of four (4) cents per hour in the wage rates of all the non-operating employees of the railways, to be retroactive to the 1st day of January, 1958;
- (2) A further increase of three per cent (3 per cent) to be effective on September 1, 1958, and to be calculated on the wage ratio which were in force at December 31, 1957; and
- (3) A further increase of three per cent (3 per cent) to be effective on April 1, 1959, and to be calculated on the wage rates which were in force at December 31, 1957.

We also recommend that the new collective agreement should be for the term of two years to be computed from January 1, 1958, to December 31, 1959.

At this point it should be said that the signatories to this report have had some difficulty in arriving at increases in wage rates which both considered reasonable in the circumstances. The chairman throughout was concerned about the condition of the economy as a whole and the

need for moderation in wage demands, while Mr. Lewis was concerned about agreeing to a figure which was substantially below the level of earnings of the employees in durable goods. The result has been a compromise which each thinks is reasonable, and they, therefore, join in expressing the hope that, in the interest of industrial peace, the parties will accept their recommendation as the basis for adjusting and settling their differences as to the rate of wages to be paid during the life of the new agreement.

In making the foregoing recommendation as to wage increases, we have not overlooked the demand made by the unions for a special wage increase of 10.1 cents per hour to compensate the non-operating employees for what is termed the "sub-standard earnings" they have been receiving since January 1, 1956. When the parties settled their wage disputes in 1956 the employees agreed to accept a wage increase of 11 per cent to become effective in four steps. A formal agreement embodying a term to that effect was made and entered into and that fixed the rates of wages to which the employees were entitled from January 1, 1955 to December 31, 1957. Having agreed to settle on that basis the matter is closed and neither party can now ask to have the matter opened up. Incidentally a similar demand was made in 1956 for what was then called "the lag behind the 'durable goods' standard". In rejecting the demand the Taylor Board gave another reason for so doing with which we respectfully agree, viz:

"Secondly, it is surely impossible to justify rectifying a lag by increasing rates, since such rate increases would continue after the period when they merely compensated for the lag."

### Health and Welfare

The second of the demands made by the unions is the "health and welfare" demand, viz:

- "(2) Effective January 1, 1959, the railways and Railway Express Agency Inc., shall contribute an additional \$8.50 (eight dollars and fifty cents) per employee per month, for one year, for the purpose of improving health and welfare plans in effect as may be mutually agreed."

This is one issue in respect of which considerable progress was made when the Board met the small bargaining committees of the parties in its first attempt at conciliation. As a result of the discussions which took place at that time it was decided that the Board need not concern

itself further with the health and welfare issue and the Board, therefore, has taken no further action in the matter.

### Vacations With Pay

The third of the demands made by the unions is for a revision of the schedule of paid vacations. In its original form the demand was:

"(3) Vacations with pay shall be on the following basis;

After one year's service, ten working days

After ten years' service, fifteen working days

After fifteen years' service, twenty working days.

(Nothing herein shall be construed to deprive any employee of such additional vacation days or more favourable practice as he may be entitled to receive under any existing rule, understanding or custom, which additional vacation days or more favourable practice shall be accorded under and in accordance with the terms of such existing rule, understanding or custom.)"

During the hearings this demand was modified. The unions now ask that the schedule be amended to give 10 days (two weeks) paid vacation after one year of service and 20 days (four weeks) paid vacation after 25 years of service. Under the present agreements two weeks vacation with pay are given to office workers after one year of service and to non-office workers after three years of service. This follows the predominant pattern in outside industry and gives effect to the recommendations made by Mr. Justice Sloan in 1954.

Parliament recently considered and dealt with this question of vacations with pay when it passed the act known as "The Annual Vacations Act". That act is to come into force on a day to be fixed by proclamation of the governor-in-council. It has not been proclaimed as yet but it is understood that it will be brought into force at an early date. Under The Annual Vacations Act, when it is proclaimed, all railway workers will be entitled to the equivalent of two weeks vacation with pay after two years of service. As above mentioned, the office workers are now entitled to two weeks after one year of service and that will not be changed. Under the statute the position of the non-office workers will be improved because they will be entitled to two weeks after two years of service instead of three years as it is now under the present agreements. We are of

the opinion that, in view of this improvement, we would not be justified in recommending any further change at this time insofar as employees in this category are concerned.

We are of the opinion, however, that consideration should be given to the claim for more extended vacations for senior employees. Vacations with pay for more than three weeks duration are granted to a comparatively small percentage of workers in outside industry, but the percentage is growing and is likely to grow during the term of the new contract. The change suggested presents more difficulty for the railway than it would for most other industries. Mr. Justice Kellock in 1954 pointed out that the average length of service among railway employees is comparatively high, a condition which he concluded had arisen out of the application of the seniority rules and the relative stability of railway employment.

There is evidence that approximately 21 per cent of all railway employees have 25 years of service, or more. The cost, therefore, of extending the base for paid vacations among employees of long service would bear more heavily on the railways than it would on industry generally. It would seem from a study of the pension tables of the railways that, if 4 weeks vacation with pay were granted to employees with 35 years of service, there would still be an exceptionally large percentage of employees entitled to such extended vacation. Under the circumstances we recommend that the schedule of paid vacations be amended to give 20 days (4 weeks) paid vacations to all the railway employees after 35 years of service.

The Board assumes that any agreement the parties may enter into will contain suitable provisions to protect the interests of employees who are entitled under existing agreements to rights or privileges more extensive or advantageous to them than those to which they may become entitled under The Annual Vacations Act when it is brought into force. In this connection the attention of the parties is called to the provisions of Section 3(2) of that Act, which reads as follows:

"3. (2) This Act does not apply to employment under a collective agreement entered into after the coming into force of this Act and containing provisions, approved by the Minister, for the granting of an annual vacation with pay."

### Statutory Holidays

The fourth of the demands made by the unions is the demand for an eighth paid statutory holiday, viz:

"(4) The number of paid statutory holidays shall be increased to eight by the addition of Remembrance Day."

Similar demands were considered by Mr. Justice Sloan in 1954 and again by the Taylor Board in 1956. Mr. Justice Sloan recommended that the number of holidays for the hourly-rated employees should be increased to five. The Taylor Board recommended the addition of one paid statutory holiday, namely Thanksgiving Day, during 1956, and another, namely Victoria Day, in 1957. With those additions all railway workers became entitled to seven paid statutory holidays each year. Neither Mr. Justice Sloan nor the Taylor Board, however, saw fit to recommend Remembrance Day as an eighth holiday.

This new application for the addition of Remembrance Day was strenuously opposed by the railways. They filed as exhibit R-41 a table showing that, as of April 1, 1957, the average number of unworked paid statutory holidays in all the manufacturing industries in Canada was 7.22 as against the eight the unions are asking for. They stress the fact that they are service organizations and that, if an extra holiday is to be granted, the choice of an appropriate day is a matter of very great importance to them and contend that Remembrance Day would be a most unfortunate choice.

The evidence indicates that Remembrance Day is fairly well observed in western Canada and, possibly, in some other parts of Canada, but there is very little observance of it in the central provinces where the bulk of the traffic on the railways is handled. It was disclosed that in a survey made by the Central Ontario Industrial Relations Institute in 1955 covering the City of Toronto and areas tributary thereto, Remembrance Day was not recognized or observed as a holiday by any of the firms participating in the survey. Another survey was made in October, 1957, by the Quebec Industrial Relations Institute covering 65 companies in the Montreal area with 70,834 hourly-rated employees. It was found that none of the companies recognized Remembrance Day for their hourly-rated employees. In a survey for salaried employees it was found that only two out of 69 companies recognized it as a holiday for their salaried employees.

It is obvious that a railway would have trouble if it is required to give its employees a holiday on a day which is not generally recognized as a holiday. The

public would want to do business with the railways and would expect trains to run and freight and passengers to be transported as on any ordinary business day. If forced to observe Remembrance Day, the railways would be compelled to refuse service to the public or, if they decided to keep their facilities open, ask large numbers of their employees to work on the holiday and pay the extra costs involved in so doing. Either alternative would be unfortunate for the railways. Under the circumstances we are not prepared to recommend the granting of this demand for Remembrance Day as an extra statutory holiday.

Representatives of the unions, however, suggested that, if the Board was of the opinion that Remembrance Day was unsuitable, consideration might be given to the choice of some other alternative day or even to the possibility of granting different holidays in different parts of the country. In either case the choice would have to fall on a day which is not nationally observed as a holiday at this time and under the circumstances the Board is not prepared to recommend the granting of an eighth holiday.

### Severance Pay

The fifth of the demands made by the Unions has to do with the question of severance pay. The following is a copy of the demand as made in their notice of November 12, 1957, viz:

"(5) The principle of severance pay shall be recognized and established. The Railways and Railway Express Agency Inc., shall set aside four cents (4c.) per hour per employee for severance pay, to be allocated among employees whose services are being terminated, on a basis of amounts and years of service to be mutually agreed upon."

In the 1930's there was a movement in Canada to compel a greater degree of co-operation between the railways with a view to the pooling of services and the abandonment of unnecessary trackage where one of two competing lines could adequately serve the needs of the communities through which they ran. This led to the enactment of the Canadian National-Canadian Pacific Act which commanded and empowered these railways to co-operate and take such measures as would make their co-operation effective.

The suggestion that co-operation of this kind was necessary provoked public concern about the fate of railway employees who might be displaced as a result of such co-operative efforts. To take care of such

employees a special provision was made for the payment to them of compensation for the loss of their jobs. The present demand of the unions is based, in part, on this legislation and, in part, on what is called the Washington Job Protection Agreement which a number of American railways entered into with their employees on May 21, 1936 to provide compensation for employees who were deprived of their employment under like circumstances.

The present demand is for "severance pay" which may be something much different. The Board has not been furnished with any specific or comprehensive statement as to what "severance pay" is, what employees would be entitled thereto, the circumstances under which it would be paid, the manner in which the amount to be paid is to be computed, or any estimate as to the probable cost involved in the operation of this scheme other than the prescribed limits, originally 4c. From some of the statements made in argument it would appear that the scheme was intended to include, not only those who had forever been deprived of their jobs, but also those who might be laid off but who would, nevertheless, remain on the payroll and be subject to call. That would be a far-reaching provision with so many implications that nothing should be done about it without the fullest investigation. Without this essential information and in the absence of any comprehensive explanation of the manner in which it would work out, it is difficult to make any recommendation. It is generally agreed that severance pay is relatively unusual in Canadian industry. There is no generally prevailing pattern which would justify its introduction at the present time. Under the circumstances the Board is unable to make any recommendation in respect of this demand for severance pay.

### Contracting Out

The sixth of the demands made by the unions has to do with what is called "contracting out". The following is a copy thereof, viz:

"(6) Work normally performed by employees herein represented, or similar work which by past practice has been performed by them, shall not be contracted to be performed by other than railway employees."

This demand is altogether too wide. If effect were given to it, the rights of management would be unreasonably curtailed and the literal enforcement of any such rule would have results which the representatives of the unions admit they never contem-

plated when this demand was made. As an extreme example, it might be pointed out that there are gangs on the railways who are at times engaged in building stations, bridges and many other types of buildings or other structures. If a rule such as contemplated by this demand were made, the Canadian National would never have been able to build the Queen Elizabeth Hotel in Montreal through an outside contractor. Obviously in order to build any such structure, it is necessary to have an enormous organization with the most expensive equipment and a staff of expert engineers and technicians. Neither of the railways could afford any such organization or equipment to build any one building. After it was built the organization would have to be disbanded and the equipment disposed of.

The foregoing may be an extreme example, but it was only one of many given by the railway witnesses to show how seriously any such rule would curtail the rights of management and hamper the efficient and economical operation of the railways. It may be, as the unions contend, that in certain specific instances the right of contracting out has been asserted under circumstances which gave rise to some justifiable resentment. The investigation of those incidents before this Board, however, should have a salutary effect, and we are reasonably hopeful that the officials concerned will use more discretion and consideration in the future.

We don't think that it is necessary to review in detail all of the evidence tendered by the railways in support of their objections to this demand. It is sufficient to say that the Board has carefully considered all of the evidence given by the unions and by the railways, and that it is satisfied that this demand of the unions cannot be granted and it so recommends.

### Special Terms

The seventh demand of the unions has to do with certain terms they wish to have incorporated in the new agreement. The following is a copy of the demand as set out in their notice of November 12, 1957, viz:

"(7) (a) Excepting as to (2) hereof, the collective agreements between the railways, Railway Express Agency Inc., and the organizations' signatory hereto shall be amended to conform with these proposals effective January 1, 1958, and shall continue in effect until December 31, 1958, and thereafter subject to sixty days' notice in writing from either party to

the agreement to revise, amend or terminate it. Such notice may be served at any time subsequent to November 2, 1958;

- (b) The foregoing does not prevent adjustments under normal processes in working rules, rates of pay of individual positions, correction of inequities as between rates for different individual positions, or negotiation of rates for new positions or positions where the duties or responsibilities have been or are changed."

In principle we see nothing wrong with the suggestion contained in clause (a) above set out. As to the term of the new agreement, we are of the opinion that it should be for two years. In this connection we find ourselves in complete agreement with the Taylor Board, which in 1956 recommended a term of two years, and respectfully concur in the reasons given by that Board for their recommendation.

We are not, however, prepared to recommend the inclusion in the new agreement of the provision contemplated by clause (b) of this demand or any provision of like effect. The intent of the Industrial Relations and Dispute Investigation Act is that, when once a collective agreement is made and entered into, it shall bind the parties and each of them for the full term of the agreement. To permit either party to open it up and compel the other party to start bargaining all over again, could be contrary to the spirit of the Act. There is, of course, nothing to prevent the parties by mutual consent or agreement entering into an agreement to amend or supplement the new agreement if they so desire. That, however, is subject to one qualification—The amendment must not transgress the provisions of sections 19 and 20, or any other of the provisions, of The Industrial Relations and Disputes Investigation Act.

#### Time of Payment

The eighth demand made by the unions has to do with the procedure to be followed in paying the wages of employees, viz:

- "(8) Employees shall be paid every second Thursday, or the last regular work day preceding such Thursday."

This demand was considered by the Board along with the proposal of the railways that holiday pay should be computed on a percentage basis as set out in The Annual Vacations Act. When these matters were brought up it was found that there were no serious differences between the parties. It was agreed that any differ-

ences there may be could be straightened out by mutual agreement and the unions withdrew their demand. Under the circumstances we make no recommendation as to either the demand itself, or the proposal made by the railways as to computation of holiday pay, save to say that in our opinion the methods of computation and payment should be uniform with regard to all employees in order to avoid interference with office efficiency which would result if the procedure were not uniform.

Philip F. Vineberg, the member of our Board appointed as nominee of the railways, has informed us that he is unable to concur in the recommendation of this report. David Lewis, appointed to the Board as the nominee of the unions, has agreed to sign this report subject to some additional observations by him, which are appended hereto. The Board wishes formally and warmly to thank the parties, their counsel and spokesmen for their help and assistance throughout.

(Sgd.) HAROLD F. THOMSON,  
*Chairman.*

(Sgd.) DAVID LEWIS,  
*Member.*

#### Additional Observations

I am pleased to be able to concur with the recommendations of The Hon. Mr. Justice Thomson, the chairman of this Board. I do so in the hope that the recommendations may form a basis for a peaceful settlement of the issues between the parties, since that objective is of paramount importance to Canada, particularly at this time. In doing so, however, I wish also to make some additional comments on some of the matters involved, particularly those on which my conclusions carry a somewhat different emphasis from that contained in the exhaustive analysis of the chairman.

As is clear from the chairman's report, most of the considerable time spent in hearing the parties was occupied in evidence and argument on what constitutes a fair and reasonable standard of comparison for the hearings of non-operating railway employees. In his analysis of this matter the chairman fully sets out the major factors in issue. On all the evidence before us, I am still firmly of the opinion expressed in the report of the Taylor Board in 1956, to which I was a signatory, namely, "that, with the necessary reservations arising from the fact that the railway industry is unique and that it has some occupations which cannot be found elsewhere, the durable goods group of manufacturing industries

remains the most nearly comparable and forms an appropriate standard as a guide to the settlement of disputes between the non-operating employees and the railways."

In my view, there is some misapprehension as to the nature of the durable goods standard. It should be remembered that this standard was first proposed by the railways as long ago as 1950 and was at that time and again in 1952 opposed by the unions. It is not my understanding that previous boards of conciliation and previous arbitrators chose and accepted this standard because of an exact parallel in respect of skills, sex composition, geographical distribution and other factors. It is not my understanding that the railways or the unions ever argued that there was such an exact parallel. The standard has in the past been accepted because it appeared to be, as it appears to me now, the most nearly comparable one. Although it was not until 1956 that the railways levelled a detailed attack on the durable goods standard, it is evident from the reports and awards which preceded that year that members of previous conciliation boards and that previous arbitrators were generally aware of the major differences, qualitatively if not quantitatively.

It is apparently agreed between the parties that a standard of comparison is extremely important to their dispute. Both the unions and the railways emphasized the importance of such a standard and directed their evidence and arguments mainly to that point. In fact, in their case, filed as Exhibit R1, the railways stated the issue in the following language:—

"The fundamental issue in these proceedings is what level of wages in the railway industry can be justified as fair and reasonable in the light of all the relevant facts.

"Two basic tests are necessary in the determination of the proper level of railway wages:

- "a) the wages paid should be adequate when tested by a reasonable standard of comparison;
- "b) any excess of wages over such basic standard must be limited by the industry's ability to pay."

Although the unions did not state the matter in the same language, it is my impression from their argument that they did not quarrel with the general proposition set out by the railways in the passage quoted above. The issue between the parties was this year, as it has been on previous occasions, the question of what constitutes "a reasonable standard of comparison". In all wage disputes standards of comparison

are of importance; in the case of the railways, they are of even greater importance.

There are two factors relevant to a consideration of railway wage disputes which give this added importance to the value of a standard of comparison. The first is that, even more than in all other industries, peaceful labour relations on the railways are an urgent necessity to the entire country. For this reason it has always been doubtful whether governments would be prepared to permit a serious interruption of railway services. This is, no doubt, the reason why arbitration was imposed by the then government after some days of strike in 1950. It is obvious that, although the right to strike has not been legally withdrawn from railway unions, it is difficult for the unions to exercise it both because of their responsibility to the community and because of likely intervention by governments. It is evident to me that in such a situation an appropriate yardstick which can guide the parties themselves as well as boards of conciliation to a fair and reasonable settlement of a wage dispute on the railways is of paramount, indeed, overwhelming importance.

The second reason why this is so derives from the fact, as was fully disclosed in the evidence before this Board as well as before previous boards, that railway income is subject to regulation and statutory control to an extent not experienced by the rest of Canadian industry. This regulation and statutory control results in the railways being required to perform uneconomical services for the benefit of the Canadian economy and the Canadian people as a whole. Inevitably, their net earnings are adversely affected. To put it briefly and in a rather over-simplified way, public policy is largely responsible for the alleged low level of railway earnings about which the railways complained to this Board as they have done to other tribunals. Because public policy plays this role in the railway situation, it is again important to have an objective standard of comparison for railway wages. Only on this basis is it possible to arrive at a level of wages for railway non-operating employees which would be fair both to them and to the people of Canada. It is my firm conviction that the only level of wages which is fair and reasonable is one which results neither in the employees of the railways subsidizing the people of Canada by a disparity between their earnings and those of comparable groups of Canadian workers, nor in the people of Canada subsidizing railway employees in permitting them to earn a wage above that enjoyed by comparable groups

of Canadian workers. This desirable result can be achieved only, in my opinion, if there is an accepted objective standard of comparison by which the parties and boards are guided in the resolution of railway disputes.

The durable goods standard was, in my reading of previous reports and awards, accepted because it appeared to be the most nearly comparable industrial composite. It was accepted and, indeed, originally urged by the railways, on the ground also that it represented, on the average, a group of higher paid Canadian workers. In my respectful submission, it is right that this should be so. When one remembers the tremendous size of the railway industry and its indispensable position of prominence in the Canadian economy as well as the many decades of labour organization on the railways, it is surely appropriate that earnings of railway employees be compared with those of workers in other basic industries and particularly those which pay relatively better wages. It would, in my view, be anomalous and unjust if it were attempted to depress the wages of railway non-operating employees to the levels of industries which are less important to the Canadian economy or to those which are on the decline. As the evidence showed, far from being on the decline, Canada's major railways are in the process of an impressive programme of expansion and modernization.

I do not ignore the evidence of the differences between the railways and durable goods industries, so fully and properly set out and commented upon by the chairman in his report. It is, however, none the less my conclusion that those differences do not outweigh the points of comparison and similarity and do not by any means invalidate the durable goods standard as being a fair and reasonable one with which to compare the earnings of non-operating railway employees.

In view of the history concerning the question of an appropriate standard of comparison, it would be highly regrettable if the unions were asked or forced to abandon the durable goods standard. The chairman in his report sets out the broad outlines of that history. The point I wish to emphasize is simply the following. Originally the unions laboured hard to retain parity with American wages as a proper standard. When they could not hold the position, they sought to establish the earnings in selected Canadian industries as the standard. They were forced to abandon both, in my opinion, for proper and valid reasons. Finally, from 1954 on, the unions

declared themselves ready to accept the standard originally promoted by the railways and established by several successive boards and arbitrators. In each case it was a retreat by the unions from a higher to a lower level of earnings, so that, for the reasons discussed by the chairman, they have ceased to be among the highest paid Canadian workers as they once were. I have no hesitation in concluding that, with the advance of the Canadian economy and Canadian wages as a whole, there did not remain any justifiable reason why non-operating employees of the railways should be ahead of comparable employees in the country. However, equally there is not, in my opinion, any justifiable reason for a standard which would bring non-operating railway employees below the levels of earnings in other basic industries or place them in the bracket of the lower paid rather than in the bracket of the better paid industrial composites in Canada. After all, they are employees of the most important basic industry in Canada.

I respectfully submit that this is a particularly reasonable conclusion when one remembers that more than 50 per cent of Canada's railway workers are employed directly by the people of Canada through the Canadian National Railways and that the actual earnings of the CPR in its railway operations are geared to the needs of public policy and the requirements of the Canadian economy as a whole. It is unthinkable to me that the Canadian people would wish their employees on their own railway and those of the privately-owned railway thus regulated and controlled, to earn less than a representative composite of Canadian workers in a group of basic industries.

The above are some of the reasons which impel me to continue to emphasize the appropriateness and reasonableness of the durable goods standard in spite of the differences outlined by the railways and commented upon by the chairman.

The second major matter on which I would like to make brief comment is the question of the relevance or otherwise of the railways' ability-to-pay argument. The report of the 1956 Taylor Board indicates that I was of the opinion at that time that the question of the railways' ability to pay, even if one accepted their statement of the position, should not be taken into consideration in a railway wage dispute. I still hold that view and wish to refer to a few of the reasons for it.

The question of the role of ability to pay in labour-management relations has been the subject of a great many comments

by experts in the field. Whatever may be the situation in respect of other industries, I respectfully urge that so-called ability to pay cannot be a factor in the determination of a wage dispute on the railways.

The major reason has already been alluded to. The award of Chief Justice Sloan in 1954 and the report of the Taylor Board in 1956 dealt exhaustively with the fact that the two main railway systems in Canada are obliged to lose tens of millions of dollars annually in uneconomic services arising out of the statutory grain rates and out of the needs of the Canadian people for passenger service regardless of cost. In other words, to the extent that the railways' plea of inability to pay is valid, it is directly the result of the policies of the Canadian Parliament, presumably pursued because of the needs of the Canadian economy and the Canadian people as a whole. This is not the place to make any comment on the merits of the policies except to say that, as a Canadian citizen, I fully appreciate and approve of the reasons which have led to the policies referred to. However, having created the causes for the resulting financial position of the Canadian railways, it is surely impossible for the Canadian people to use it as a reason for withholding from railway employees the level of earnings which, in my opinion, they are entitled to. And I venture to suggest that the Canadian people would share this view, if they had all the facts before them.

However, it must be emphasized, in fairness to the railways, that they did not plead inability to pay wages which meet the test of "a reasonable standard of comparison". It was their view that any excess over such a standard must be governed by the industry's ability to pay. This, therefore, takes us back to the question of what is a proper standard.

In any case, I am not at all convinced that the general approach of the railways to the financial position as part of a wage dispute is one which should in all respects commend itself to a board of conciliation. It is no doubt true that the railways have not shared in the general earning prosperity of Canadian industry in the postwar period. It is equally true that the rate of return on investment is much smaller for the railways than it is for the more prosperous sectors of Canadian industry. However, this surely to argue in circles. If one remembers that the railway industry is, by statute of the Canadian Parliament, regulated and controlled as to its rates and potential income, it necessarily follows that the net earnings of the Canadian Pacific Railway must be regulated and controlled,

both directly and indirectly. Perhaps it is in the nature of the railway industry that its earnings cannot be as high as those of unregulated industries serving only a sector of the Canadian economy instead of the entire economy. It may well be that because of the nature of railway operations and the needs of the Canadian economy and people, a rate of return of about, or even under, 3 per cent on investment is not socially and economically wrong.

There is one other point that cannot be overlooked. I fully agree that in relation to railway costs, only the rail operations of the CPR should be taken into account. However, when railway spokesmen allude to the condition of the Canadian Pacific Railway company on the capital market, as they did, surely it is no longer proper to limit consideration to factors relevant to the earnings of rail operations alone. The company goes on the capital market as one whole company, including its other operations and other income. In this connection, it is worthy of note that although both the net earnings from rail operations of the CPR and its other income were lower in 1957 than in 1956, the CPR did have a total of about 23½ million dollars as income from other than rail sources, as well as a little over 38 million dollars in net earnings from rail operations. The total income of the company, before fixed charges, was 61.7 millions of dollars in 1957. While this is not a large income related to the company's tremendous investment, particularly in rail operations, it does not, in my view, show a situation which should create concern or worry about the health of this very large Canadian enterprise.

Having said this, I would emphasize that the matter of railway income is, and should be, the concern of Canada's policy-makers, rather than that of a board of conciliation attempting to settle or to recommend upon a labour dispute. The Government, Parliament and the agencies which they have created are the ones which should deal with and pronounce upon the financial problems of the railways. For the reasons given, it is, in my view, not a matter to which a board of conciliation can give the necessary detailed attention.

However, the general state of the economy is an entirely different matter. It would, it seems to me, not be responsible for a board of conciliation to ignore the conditions of the economy as a whole at the time when it is considering a wage dispute placed in its hands. One cannot escape the fact that for many months Canada has been in the midst of an economic recession and that, although forecasters differ, it is

clear that we are not yet out of the economic difficulties and it is impossible to foretell with any precision as to when the climb upward will start or be completed. I cannot but agree with the chairman that, in view of the recession, moderation in wage settlements is perhaps unavoidable.

This is the major consideration which leads me to concur in the chairman's recommendation on the wages issue. It is true that, in the result, the earnings of non-operating railway employees will remain substantially below the level of those in durable goods. In the light of economic conditions, however, this seems to me unavoidable in the present circumstances.

I also have pleasure in concurring in the other recommendations of the chairman.

(Sgd.) DAVID LEWIS,  
Member.

### Minority Report

Philip Vineberg of Montreal, company nominee, submitted a minority report advocating that there be no wage increases granted at the present time. The unions asked for a combination increase of 11 per cent plus 17 cents an hour. Space does not permit publication of the complete report in this issue.

The full text of the minority report will appear in the October issue.

## Report of Board in Dispute between

Canadian National Railways (MV Bluenose)

and

Canadian Brotherhood of Railway Employees and Other  
Transport Workers

The Board of Conciliation and Investigation appointed under the provisions of the Industrial Relations and Disputes Investigation Act in this matter herewith presents its report.

The Board was composed of:

H. Carl Goldenberg, Esq., QC, Chairman,  
Professor Arthur J. Meagher, QC, nominee  
of the Employer,

Clifford Scotton, Esq., nominee of the  
Bargaining Agent.

Proceedings before the Board opened in Montreal on May 22, 1958, and were continued on the following day. Each party presented its case and was afforded an opportunity for rebuttal.

The Board finds that the original demands of the bargaining agent (hereinafter called the "union") numbered nine, but that the matters which remain in dispute have been reduced as a result of understandings reached between the parties or on suggestion of the Board. More particularly, union demands No. 5 (severance pay), No. 6 (contract work), and No. 8 (pay days) have been dropped, and No. 9 (proposed changes in rules) will be negotiated directly between the parties.

On the matters which remain in dispute, the Board, having heard and examined the submission of the parties, finds and recommends as is hereinafter set out.

### 1. Wages

The union demands that all rates of pay be increased by 11 per cent plus 17 cents per hour retroactive to the commencement of the calendar year 1958. The company submits that this demand is the same as that which has been submitted by the non-operating railway employees who are engaged in entirely different and wholly unrelated operations on the railway system. While the company further submitted that

During July, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Canadian Brotherhood of Railway Employees and Other Transport Workers and Canadian National Railways (MV *Bluenose*—Yarmouth-Bar Harbour Ferry Service) Yarmouth, N.S.

The Board was under the Chairmanship of H. Carl Goldenberg, QC, Montreal, who was appointed by the Minister in the absence of a joint recommendation from the other two members, Prof. Arthur J. Meagher, Halifax, and Clifford A. Scotton, Montreal, nominees of the company and union respectively.

The Majority Report, which under the provisions of the Industrial Relations and Disputes Investigation Act constitutes the report of the Board, was submitted by the Chairman and Mr. Scotton. The minority report was submitted by Prof. Meagher.

The text of the majority and minority reports is reproduced here.

the increase demanded is undue and not warranted, it reiterated the offer which it had made during negotiations of a general increase of 4 per cent effective March 1, 1958, and a further 4 per cent on current wages on January 1, 1959, making in all an increase of 8 per cent in basic rates, the whole contingent upon a two-year contract commencing January 1, 1958.

Having considered the submissions of the parties and having examined the existing wage schedules and earnings, changes in the consumer price index since January 1956, and wages in comparable marine services, the Board recommends a two-year contract commencing January 1, 1958, with a general increase in current basic wage rates of 10 per cent, of which 5 per cent shall be retroactive to March 1, 1958, and the remaining 5 per cent shall become effective on January 1, 1959.

The Board recommends retroactivity only to March 1, 1958, because it finds that the union was in fact not bargaining prior to that date.

## 2. Health and Welfare

The union demands that the present allowance of 20 cents for each day worked as a payment in lieu of a health and welfare plan be discontinued and that in place thereof the employees should be included in the non-operating railway employees' health and welfare plan (hereinafter called "the non-ops plan"). The company submits that this is another instance of duplication by the union of demands made on the railways by the "non-ops" group of unions. The company further submits that the current payment of 20 cents per day conforms with the general practice in the marine industry of Eastern Canada and that, having regard to this fact and to the free benefits provided under the Canada Shipping Act, the demand of the union should be denied.

The Board has given careful consideration to the submissions of both parties on this issue. It notes that Article 29 of the present agreement reads as follows:

### Health and Welfare

Effective January 1, 1957, unlicensed personnel will be allowed 20 cents for each day worked, as a payment in lieu of a health and welfare plan. It is understood that this allowance will be discontinued if and when a health and welfare plan is established.

The union submits that the health and welfare plan referred to in the last sentence of Article 29 was the "non-ops" plan which

is now in effect. The company denies this but does not explain what plan was contemplated by the parties.

It is clear to the Board that the contemplated plan could not have been one confined to the personnel of the MV *Bluenose* alone. The Board also finds that the "non-ops" plan which is now in effect is not confined to non-operating employees of the railways in that it covers or is about to cover, among others, employees of the B.C. coast ferries of the CPR and the employees of both CNR and CPR hotels. The Board understands that coverage under this plan was recently extended to employees of the Nova Scotian Hotel in Halifax, a hotel owned by the company.

Having regard to the extension of coverage under the "non-ops" plan to employees who are not considered non-operating railway employees, to the fact that coverage under the plan does not of itself constitute such employees non-operating railway employees, and to the further fact that the extension of coverage under the "non-ops" plan to the personnel of the MV *Bluenose* will not in effect increase costs to the company, the Board finds that it cannot reasonably maintain the objection of the company to the union's demand.

Accordingly, the Board recommends that the company support the application of the union for coverage under the "non-ops" health and welfare plan of the unlicensed personnel of the MV *Bluenose* as from January 1, 1959, subject to appropriate arrangements to avoid duplicate coverage having regard to the provisions of Part V of the Canada Shipping Act dealing with sick mariners and marine hospitals, and to the provisions of the Hospital Insurance Act of Nova Scotia.

## 3. Vacations with Pay

The union demands three weeks vacation with pay after 10 years of service in lieu of the present provision of 15 days holidays after 15 years, and a maximum of four weeks vacation after 15 years. The company submits that the provisions of the existing agreement are more liberal than in comparable marine services and asks that the union's demand be rejected.

The Board recommends that the vacation provisions of the existing agreement be retained.

## 4. Statutory Holidays

The union demands that an additional statutory paid holiday be added to the seven statutory holidays already recognized. The company submits that the employees already enjoy a preferred position in regard to paid statutory holidays.

The Board recommends that the provisions of the existing agreement with respect to statutory holidays be sustained.

(Sgd.) H. CARL GOLDENBERG,  
Chairman.

(Sgd.) CLIFFORD SCOTTON,  
Member.

### MINORITY REPORT

H. Carl Goldenberg, OBE, QC, chairman of the Board appointed to conciliate the above dispute, has informed me by long distance telephone of his recommendations regarding the items in dispute. I understand that these will be concurred in by Clifford Scotton, nominee of the union.

With regret, I must disagree with the recommendations respecting the union's demands for increased wages and for the adoption of the railway's health and welfare plan.

### The Wage Demand

The union represents the ninety-two members of the unlicensed personnel of the Motor Vessel *Bluenose*, of 6,419 gross tons, which carries passengers and road vehicles between Yarmouth, Nova Scotia and Bar Harbour, Maine. It is a local operation which is in no way connected with the railway operations of the Canadian National Railway Company, for the vessel carries no railway freight and there is no rail connection at Bar Harbour. The MV *Bluenose* was purchased by the joint contributions of the Province of Nova Scotia and the Government of Canada. It is registered in the name of the latter and its management and operation is entrusted to the Canadian National Railway Company by the federal Government. The service has been a great assistance to the tourist and trucking industries of the province of Nova Scotia, but financially it has been a substantial drain on the public purse. The operating deficit for the service was \$304,351 in 1956, and \$278,093 in 1957. If amortisation of construction costs and depreciation charges are added, the deficits amounted to \$897,655 for the year 1956

and \$882,554 for the year 1957. The company is not in a position to raise its tariffs for passengers and vehicle traffic utilizing the service.

When the MV *Bluenose* was first placed in operation in the spring of 1956, the unlicensed personnel of the ship were hired on at the same wage rates as those paid on the SS *Princess Helene*, which is operated by the Canadian Pacific Railway on a comparable service between St. John, New Brunswick and Digby, Nova Scotia. In June, 1956, the unlicensed personnel of the SS *Princess Helene* received a four-step wage increase of 3 per cent, 3 per cent, 2 per cent and 3 per cent spread over a two year period. At the same time, the union representing the unlicensed personnel of the MV *Bluenose* accepted a wage increase of 8 per cent retroactive to January 1, 1956 in lieu of the *Princess Helene* rates. As a result, the *Bluenose* personnel enjoyed a higher wage rate during most of the two years of the contract, but at the end of the term their rate was 3 per cent lower than that enjoyed by the *Princess Helene* crew.

In addition, the unlicensed personnel of the MV *Bluenose* received certain other fringe benefits over and above those enjoyed by the crew of the *Princess Helene*, such as a higher overtime rate, more statutory holidays, continued employment while the ship is in drydock, and other contract items. The result is that the average of the 19 seamen of the *Bluenose* for the year 1957 was \$3,080 each as compared with \$2,898 for those on board the *Princess Helene*. The 18 assistant stewards of the *Bluenose* received an average of \$2,790 during the same period as compared with \$2,654 for those on board the *Princess Helene*.

The hourly rates for the various crew members of the MV *Bluenose* are generally higher than those paid to their counterparts on the MV *William Carson*, or on the "Dosco" ships which operate on the Atlantic seaboard, as well as on the Great Lakes ships. The following are the comparable rates:

|                             | MV <i>Bluenose</i><br>40 hr. week | Great Lakes<br>56 hr. week | Dosco<br>48 hr. week     | MV <i>William Carson</i><br>45 hr. week |
|-----------------------------|-----------------------------------|----------------------------|--------------------------|-----------------------------------------|
| Seaman/deckhand .....       | \$1.241                           | \$1.166                    | \$1.17 A.B.<br>1.03 O.S. | \$1.113                                 |
| Asst. Steward/messman ..... | \$1.210                           | \$1.166                    | 1.07½                    | 1.082                                   |
| Wiper/trimmer .....         | 1.210                             | 1.166                      | 1.11½                    | 1.060                                   |

| Second Cook .....           | 1.490                             | 1.220                      | 1.17                     | 1.295                                   |
| Second Steward—             |                                   |                            |                          |                                         |
| Sen. ....                   | 1.614                             | N.C.                       | 1.17                     | N.C.                                    |
| Jun. ....                   | 1.460                             |                            |                          |                                         |
| Quartermaster .....         | 1.303                             | 1.408                      | N.C.                     | 1.148                                   |
| Bosun .....                 | 1.334                             | 1.49                       | 1.27                     | 1.207                                   |

(When carried)

The present wage rates of the unlicensed personnel of the MV *Bluenose* also compare favourably with average weekly earnings in the city of Halifax and in the province of Nova Scotia. On January 1 of 1957 and 1958, the average weekly wage of the *Bluenose* crew was \$54.63 for each period, while the average for the same periods for employees in Halifax was \$50.66 and \$54.02, and for employees in Nova Scotia of \$52.71 and \$55.48. The above *Bluenose* figures do not include the value of the free board and lodging supplied to the men when they are aboard the ship. Free meals received during five of the seven days which each man works would be worth five dollars or more a week.

Apart from the 3 per cent differential now existing between the *Bluenose* and *Princess Helene* rates, the present wage rates of the unlicensed personnel of the MV *Bluenose* are the highest paid on the Canadian Atlantic seaboard. They are considerably higher than those paid by most private operators of coastal shipping. In addition, the personnel have a forty hour week, pensions, and free railway pass privileges, permanent employment and other benefits. An indication of the attractiveness of their employment is the fact that during the past year, the company had over four hundred applications for positions on the *Bluenose*.

During the negotiation held prior to the appointment of the Board, the company offered the union a two year contract with a 4 per cent increase effective March 1, 1958, which was to be increased to 8 per cent on January 1, 1959. The union countered with an increase of 10 per cent in two steps of 6 per cent and 4 per cent.

In view of the top wage rates enjoyed by the unlicensed personnel of the MV *Bluenose* in relation to the rates paid by the shipping industry on the Atlantic coast and on the Great Lakes, as well as that paid by industry in general in the province of Nova Scotia; the fact that the *Bluenose* has been operated at a substantial deficit in the past which may be increased this year because of the effect of the recession and the operation of a competitive service between the ports of Yarmouth and Boston; that the company's 8 per cent offer would place the wage rates of the *Bluenose* personnel, not only 5 per cent higher than the *Princess Helene* rates, but apparently the highest of any ship operating out of Canadian ports on the Atlantic coast or on the Great Lakes; and that the increase is in line with increases presently being granted by industry, I am of the opinion that the 4 per cent and 8 per cent increase offered

by the company are reasonable under the circumstances and should be recommended for acceptance.

### Health and Welfare Demand

I am of the opinion that the health and welfare demand of the union should not be recommended on the following grounds:

(a) With the exception of the unlicensed personnel of the MV *Abegweit*, apparently no crew members of any other Canadian ship operating on the Atlantic coast or on the Great Lakes has the health and welfare plan requested by the union. This plan was set up for the non-operating employees of the railways whose conditions of employment are quite different from marine workers.

Marine employees have always enjoyed the medical and hospitalization benefits provided for by the provisions of the Canada Shipping Act. In later years, these benefits were supplemented by the payment of twenty cents per day to the crews of many of the ships. This plan exists on the MV *Bluenose*, the SS *Princess Helene*, the 16 ships engaged in the railway's Newfoundland services, as well as on the ships of the "Dosco" fleet. With the exception of the unlicensed personnel on the *Abegweit*, no crew members enjoy a better health and welfare plan than that possessed by the personnel of the *Bluenose*, and the union has presented no arguments why a precedent should be made in this case. In fact, most employees in the province of Nova Scotia pay the full cost of Maritime Medical and Blue Cross Care, and only enjoy the privilege of having their employer deduct the cost thereof from their wages.

An exception has existed in the case of the unlicensed personnel of the MV *Abegweit*, which has enjoyed the "non-ops" health and welfare plan since about the time of its inception. This ship carries the railway cars between the provinces of New Brunswick and Prince Edward Island, which is an entirely different type of operation from that carried on by the *Bluenose*. Even on the *Abegweit*, the deck and engineering officers have the twenty cents per day plan.

(b) As already mentioned, it is clear that the *Bluenose* operation is a separate service which is not related to the railway service. Unlike the *Abegweit*, the *Bluenose* is not a connecting link for the railway.

It is self-evident that the crew of the *Bluenose* are not railway, but marine employees. Their working conditions are quite different and are governed by the provisions of the Canada Shipping Act. Complications could arise in the future if the *Bluenose* working agreement was tied in with any plan applicable only to railway employees, for it is quite possible at a later date that the operation and management of the *Bluenose* may be entrusted to another department of the federal Government or to a department of the province of Nova Scotia.

(c) The present position of the crew members of the *Bluenose* with respect to health and welfare protection is far superior to that enjoyed by most employees in Nova Scotia, whether marine or otherwise. The position of the men on the *Bluenose* is as follows:

1. Under section 318 of the Canada Shipping Act, any sick mariner is entitled to receive gratuitously such medical, surgical or other treatment as his case requires. The Act also provides for free hospitalization and medical treatment aboard the ship.

2. Under Article 16 of the existing collective agreement, any employee of the *Bluenose* who has to be signed off in a foreign port because of illness or injury, is entitled for a period of twelve weeks to two thirds of his basic pay until he is returned to his home port or recovers.

3. On January 1, 1959, every resident of Nova Scotia will be entitled to free hospitalization under the provisions of the Hospital Insurance Act, which has recently enacted by the Province of Nova Scotia. The cost of the scheme will be defrayed by the imposition of a 3 per cent sales tax on goods sold within the Province.

4. In this province, most people are covered by the Maritime Medical Care, a scheme set up by the medical profession to provide medical care to its group sub-

scribers. The scheme provides for a nearly complete medical coverage, with the possible exception that a few of the specialists charge an additional fee for their services. The group rates of the service on a monthly basis are as follows:

|                                 |        |
|---------------------------------|--------|
| Single person .....             | \$2.80 |
| Married couple .....            | \$5.30 |
| Married couple with family .... | \$7.30 |

5. The usual Blue Cross Hospitalization scheme exists in the province, but it is anticipated that this will be supplanted by the province hospital scheme on January 1 next.

At the present time, the crew of the *Bluenose* would appear to have a complete medical and hospital coverage on themselves. If the 20 cents per day payment is applied to Maritime Medical (with a small supplementary contribution by the crew member), the employees of the *Bluenose* and their families will enjoy adequate medical and hospital coverage after January 1 next. Their present coverage is certainly far superior to that enjoyed by most employees in Nova Scotia.

It should be noted that the adoption of the "non-ops" plan would result in a duplicate medical and hospital coverage.

(d) The granting of the requested additional fringe benefit is a precedent which will affect not only the crew members of the *Bluenose* at the present time, but could have far reaching application in the future. No substantial reason has been adduced by the union in this case for the granting of such a far-reaching fringe benefit.

I wish to join with the other members of the Board in their thanks to the representatives of both parties for the courtesies and co-operation extended to the Board during the hearings. I also wish to similarly express my appreciation to the other members of the Board.

(Sgd.) A. J. MEAGHER,  
Member.

## Britain, U.S. Move to Stimulate Scientific Training

Both Britain and the United States are stimulating the education of scientists.

In Britain, school laboratories are being sponsored and equipped by large industries, according to exchange teachers from the United Kingdom on their arrival in the U.S. "There's such an outcry for technically trained workers from large industries that science rooms are being built in all schools," one teacher said.

Science classes are becoming popular with girls, it was reported.

In the U.S. a bill to improve scientific training was passed last month. The bill will speed schooling in science by federal, college and university scholarships, student loans, fellowships, improved teaching equipment and stipends for summer institutes to teacher preparation.

# Report of Board in Dispute between

The Packers Steamship Company Limited  
and

Seafarers' International Union of North America

The Board of Conciliation established to deal with the above dispute is composed of T. R. Watt, nominee of the employer, Owen E. Mason, nominated by the employees, and F. E. Harrison, Chairman.

At the first sitting of the Board held at Vancouver on February 6, the following representatives of the interested parties were in attendance:—

*Seafarers' International Union of North America*

Norman Cunningham, Agent  
E. C. Thompson, Committee  
Earl Macdonald, Committee  
I. Gibeault, Committee.

*The Packers Steamship Company Limited*

Lorne C. Hume, Manager, Industrial Relations

Robert McLennan

M. F. Aldous, Manager, Packers Steamship Company Limited.

At the sitting referred to, the union representatives presented a copy of a proposed agreement (Exhibit 1) relating to wages and working conditions affecting unlicensed personnel employed on motor vessels and barges operated by the company, to which they requested acceptance. The document contains sixty-one (61) clauses, many of them being of a non-controversial nature.

The previous agreement that was in effect between Packers Steamship Company Limited and the Seafarers' International Union was effective from November 4, 1956 and expired on October 31, 1957 (Exhibit 2).

During July, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Seafarers' International Union of North America, Canadian District, and The Packers Steamship Company Limited, Vancouver.

The Board was under the Chairmanship of F. E. Harrison, Vancouver, who was appointed by the Minister in the absence of a joint recommendation from the other two members, T. R. Watt and Owen E. Mason, both of Vancouver, nominees of the company and union respectively.

The Majority Report, which under the provisions of the Industrial Relations and Disputes Investigation Act constitutes the report of the Board, was submitted by the Chairman and Mr. Mason. The Minority Report was submitted by Mr. Watt.

The text of the majority and minority reports is reproduced here.

On behalf of the company, and in reply to the requests of the union, Lorne Hume, Manager Industrial Relations, presented a brief (Exhibit 3) setting forth the conduct of negotiations between the parties concerned covering a period from the date of the expired contract until February of the current year. He also submitted a list of clauses which were tentatively agreed upon and that were still in dispute (Exhibit 5).

At a subsequent meeting the members of the Board recommended that the parties concerned should hold further conversations in an effort to reconcile their differences. As a result the Board was informed that a mutually satisfactory understanding had been concluded upon all but the following items:

1. Union Security.
2. Welfare Plan.
3. Sailing Shorthanded.
4. Hours of Work.
5. Cargo Work.
6. Overtime Hours.
7. Manning Scale.
8. Wages.

During the sitting of the Board informative and interesting briefs were read and filed by the union and the company, as well as oral and written rebuttals. Every opportunity was afforded to representatives of the parties to present their respective sides regarding the matters at issue. After due deliberation and consideration of the evidence submitted, the Board recommends as follows:

## 1. Union Security

That the present clause relating to union security and checkoff be retained as provided for in the expired contract.

## 2. Welfare Plan

That the company should contribute an amount equivalent to twenty (20c) cents per man day worked to the welfare plan of the Seafarers' International Union, such sums to be remitted to the union.

## 3. Sailing Shorthanded

### *Division of Wages of Absent Members:*

When a vessel sails short of the full complement of unlicensed personnel, the basic wages and leave of any missing crew member shall be divided among those upon whom the extra duties fall, but no overtime shall be paid except under circumstances in

which overtime would normally have been paid had the full complement been carried. The division of the basic wages and leave of any absent crew member shall be made only among the other crew members who, in addition to their regular duties, perform work which would normally have been performed by the absent crew member.

#### 4. *Hours of Work*

That the clause relating to hours of work contained in the expired agreement should be retained in its present form.

#### 5. *Cargo Work*

That the present clause of the former contract should be retained in its present form.

#### 6. *Overtime Hours*

That the second paragraph of Section Nine, Article III, of the expired contract should be deleted, and the following clause substituted therefor:

That overtime shall be calculated as follows: Any member called upon to work off watch or day workers called on to work outside the schedule set forth in the agreement, except for cargo work, shall be paid overtime at the rate of time and one-quarter per hour. Overtime shall be calculated in half ( $\frac{1}{2}$ ) hour periods.

#### 7. *Manning Scale*

That the representatives of the company and the union confer with a view to concluding a mutually acceptable solution of that problem.

#### 8. *Wages*

That the wage rates for unlicensed personnel be increased by sixteen (16) per cent effective from July 1, 1958, and that an additional increase of eight (8) per cent be made effective from July 1, 1959.

#### *Term of Agreement*

That a mutually satisfactory agreement be entered into between the Packers Steamship Company Limited and Seafarers' International Union of North America, Canadian District, for a period of two (2) years from July 1, 1958, and to expire on June 30, 1959.

(Sgd.) F. E. HARRISON,  
*Chairman.*

(Sgd.) OWEN E. MASON,  
*Member.*

## MINORITY REPORT

After giving careful consideration to the submission made by both parties to this dispute I beg to submit this minority report.

I wish, first, to report that I am in accord with the recommendations made by the majority of the Conciliation Board except for the following:

#### 1. *Manning Scale*

The number of men required to man these vessels is solely a matter for company determination and decision. The costs of operating these vessels has become excessive and as a result previous practices must be reviewed. It is my recommendation that the company make such a review and adjust the number of employees accordingly.

#### 2. *Wages*

In view of the economic conditions facing shipping on the West Coast and particularly the problems of Packers Steamship Company Limited, my recommendation on wages is as follows:—

(a) In the event that the company is able to reduce the costs of operation as a result of the review recommended in (1) above, then the present wage rates be increased by 16 per cent effective July 1, 1958, and a further 8 per cent effective July 1, 1959.

(b) In the event that such a review does not allow a cost reduction in the operation, it would then be my recommendation that wages not be increased at this time.

#### 3. *Cargo Work*

It is my recommendation that the rates to be paid for cargo work, effective July 1, 1958, be as follows:—

(a) On watch ..... \$1.10 per hour  
(b) Off watch ..... \$1.48 $\frac{1}{2}$  " "

(Sgd.) T. R. WATT,  
*Member.*

## Fair Employment Practices Acts in Effect in 13 U.S. States

Action towards establishment of fair employment practices legislation was recorded in several American states in 1957.

Colorado and Wisconsin amended their existing anti-discrimination laws to put them on a compulsory basis, so that if a party in a discrimination case refuses to comply with the decision of the agency administering the law, the state courts may enforce a settlement.

Compulsory fair employment practices laws are now in effect in 13 states and Alaska, while voluntary measures, not enforceable in courts, exist in Indiana and Kansas.

Oregon and Washington amended their anti-discrimination legislation while California introduced such a measure in the Legislature.

# LABOUR LAW

## Changes in Provincial Apprenticeship and Tradesmen's Qualification Laws in 1958

Three provinces, Saskatchewan, Nova Scotia and New Brunswick, make changes in laws dealing with apprenticeship, tradesmen's qualification

At the 1958 sessions of the Legislatures, changes were made in the legislation dealing with apprenticeship and tradesmen's qualification in Saskatchewan, Nova Scotia and New Brunswick.

### Saskatchewan

In Saskatchewan, a provision of the Apprenticeship and Tradesmen's Qualification Act restricting the compulsory certification of tradesmen to the cities and the two largest towns of the province was deleted, with the result that the requirement that a tradesman in any designated trade must hold a certificate of status in order to work at his trade may now be applied anywhere in the province.

The Act now lays down a general prohibition that no person "who is required by the regulations" to hold a certificate of his status as an apprentice or tradesman in a designated trade may work at the trade without the required certificate. The policy of the Department of Labour is gradually to extend the certificate-holding requirement throughout the province in each trade in which it is desired and practicable.

Under trade regulations now in effect, every tradesman engaged in the trades of motor vehicle mechanics repair, barbering or beauty culture anywhere in the province must hold a certificate of status. Similarly, every tradesman engaged in the carpentry, plumbing, sheet metal or motor vehicle body repair trades in any of the cities of Saskatchewan or in the town of Melville (including the area within a five-mile radius of such centres) is required to hold a certificate. Employers in these trades in the places indicated are prohibited from hiring a tradesman unless he holds a certificate indicating his qualifications in the trade. Tradesmen in the carpentry, plumbing, sheet metal or motor vehicle body repair trades in areas other than the cities or the town of Melville and those engaged in the remaining designated trades are not required to hold certificates of status but may obtain them on a voluntary basis.

A certificate of status can be obtained only by qualifying in an examination. An applicant must also show proof that he has had the necessary trade experience to qualify for journeyman status. The length of time that must be spent at a trade in order to obtain a certificate of qualification is specified in the appropriate trade regulations.

Other amendments to the Act enable the Minister of Labour to suspend, cancel, or require the return of a certificate of status for cause, and make it an offence, punishable on summary conviction by a maximum fine of \$100, for a person to assist a candidate taking a trade test or examination for a certificate of status by disclosing to him the contents of the examination or for a candidate to acquire such information before taking the examination.

### Nova Scotia

In Nova Scotia, the Apprenticeship Act and the Tradesmen's Qualification Act were consolidated in one statute, the appropriate changes being made. The resulting Act, cited as the Apprenticeship and Tradesmen's Qualifications Act, combines, as does the legislation of Newfoundland, Ontario and Saskatchewan, provisions regulating the training of apprentices with provisions for both voluntary and compulsory certification of tradesmen.

Up to the present, the authority given to the Lieutenant-Governor in Council under the Tradesmen's Qualification Act (which was enacted in 1945 and proclaimed in force in 1946) to make the certification of tradesmen in a designated trade mandatory has not been exercised. Certificates of qualification have for some years been issued, on a voluntary basis, to tradesmen in the

This section, prepared by the Legislation Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

motor vehicle repair, plumbing, steamfitting and electrical construction trades under the Apprenticeship Act. In the new consolidation, as in the former Tradesmen's Qualification Act, provision is made for exemptions, where regulations require the holding of a certificate, in cases where it is not practicable to secure the services of a certificated person or where a person is employed to do emergency work.

### **New Brunswick**

In New Brunswick, an amendment to the Trades Examination Act, which provides for the examination and certification of tradesmen in certain trades on a voluntary basis, added the motor vehicle repair (mechanical) trade to the trades covered by the Act. Certificates of qualification are now issued under the Act in the electrical, electric and gas welding, plumbing and pipefitting trades.

### **Certification of Journeymen**

Provision is made for the certification of journeymen in certain designated trades in most of the provinces as an integral part of the provincial training programme. With certain exceptions, noted below, certification

is voluntary, that is, a tradesman who wishes to obtain journeyman status may make application to the Department of Labour and, if he is found competent on examination and can prove that he has had the length of practical experience required for journeyman status in the trade, may be issued a certificate of qualification.

In the provinces of Alberta, Saskatchewan, Ontario and Quebec, however, it is compulsory for certain classes of tradesmen to hold certificates of competency in order to work at their trade. In Alberta in the 11 trades designated under the Tradesmen's Qualification Act, in Saskatchewan in seven trades (some when carried on in urban centres, others when carried on anywhere in the province), and in Ontario in the motor vehicle repair trade, a certificate of qualification is required. In Quebec, certificates of competency must be held by journeymen in some of the trades covered by decrees under the Collective Agreement Act. In Newfoundland, and, as already noted, in Nova Scotia, the Act authorizes the adoption of a system of compulsory certification with respect to a designated trade but no action has been taken under this authority.

## **Legal Decisions Affecting Labour**

**Decision ordering syndicate to pay damages confirmed in Quebec appeal court. Two interim injunctions against picketing continued in Ontario**

In connection with a strike at Canadian Vickers in Montreal in 1952, the *Union Nationale des Employés de Vickers* lost its appeal against a decision requiring it to pay damages to the company for losses suffered by the company because non-striking employees were prevented from working. The appeal court reduced the amount of the damages.

The Ontario High Court of Justice issued two orders continuing interim injunctions against picketing until trial of the action, one in the case of the Great Lakes Pilot Association at Kingston and the other applicable to building trades unions in Toronto.

### **Ontario High Court of Justice . . .**

**. . . confirms injunction on ground that object of picket line not solely to communicate information**

On May 12, 1958, the Ontario High Court of Justice confirmed an injunction order, granted by Judge Strange of the County

Court at Kingston, restraining the members of the Great Lakes Pilot Association from picketing.

The circumstances of the dispute were as follows.

The Canada Shipping Act sets up certain pilotage districts. The pilotage districts for Montreal and Quebec are set up under the statute; the St. Lawrence, Kingston, and Ottawa district by order-in-council. There is no pilotage district above Kingston, but ships may carry sailing masters who perform certain pilotage duties.

In April 1957, a shipping federation of which Canadian Overseas Shipping Ltd. (the plaintiffs in the case at bar) is a member informed the Great Lakes Pilot Association that it would require sailing masters only from Port Weller to Sarnia. The Association insisted that sailing masters should be carried at all times above Kingston. Failing agreement, the Association picketed the dock at Kingston with the result that many pilots for the Kingston-Montreal run refused to cross the picket line and the outbound ships had to proceed without pilots or tie up.

An injunction restraining the Association from picketing was granted by a local Judge at Kingston and later the company applied to the Court to have the injunction continued until trial.

Chief Justice McRuer in his ruling stated that the dispute in the case at bar narrowed down to the issue that the federation had decided that it wanted sailing masters only from Port Weller to Sarnia while the Association had decided that the ships must carry them and pay for them whether they wanted to or not.

He was not convinced that the sole object of the picket line was to inform sailing masters of the dispute between the Association and the federation. It was quite clear that the picket line was set up in order to enforce the Association's decision by preventing outbound ships from obtaining pilots for the run down the river, thus inducing the pilots to violate their statutory duties.

In the opinion of the Court the Association was trying to obtain a legislative result that all foreign ships plying the Great Lakes must carry sailing masters, while in the absence of properly enacted legislation the ships were entitled to refuse to carry them. The matter of safety was for the legislature and the Association's argument based on the requirement of sailing masters on grounds of safety was for Parliament to decide.

Further Mr. Justice McRuer added that it was a tortious act to deprive anyone of his contractual rights. The Association was not entitled so to act as to deprive the federation of its rights under the Canada Shipping Act to have pilots for the outbound run. That was a matter for legislative action and could not be sanctioned by judicial decision. As that was the purpose also of the picket line, the Association ought to be enjoined from placing pickets so as to interfere with the pilots performing their full duty under the Act.

He held that the injunction as granted by the local judge was too broad. It should restrain picketing on or in the vicinity of wharves or premises where pilots board ships plying in the St. Lawrence, Kingston and Ottawa pilotage district or in any way interfering with pilots who wished or were under a duty to board ships at Kingston. *Canadian Overseas Shipping Ltd. v. Kake*, (1958) O.W.N. No. 25, p. 300.

#### Ontario High Court of Justice . . .

. . . confirms injunction restraining picketing on ground of interference with contractual rights

On May 12, 1958, Chief Justice McRuer of the Ontario High Court of Justice ruled that an interim injunction restraining build-

ing trades unions from picketing certain buildings under construction in Toronto should continue.

The plaintiffs, Wilson Court Apts. Ltd. and Diamond and Mogil, Builders, were building apartment buildings on adjoining lands. Diamond had a collective agreement with the Building and Construction Trades Council but the building of housing projects was excluded from its application. Wilson had no collective agreement. Both plaintiffs sub-contracted with Tobarrio Contractors Ltd., which employed non-union labour.

The Council objected to Diamond against the contract with Tobarrio, and one of the executives of the Council threatened that if Diamond would not compel Tobarrio to comply with union demands the buildings would be picketed with the effect that supplies of material would be cut off and the construction stopped until the Tobarrio contract was broken, or Tobarrio toed the line. When Tobarrio refused to comply with Council's demands, the picketing started and work was stopped.

An interim injunction was granted restraining the picketing and the plaintiff companies applied for the interim injunction to continue until trial.

Chief Justice McRuer in his ruling on the application noted that counsel for the Council contended that the arbitration provisions of section 32 of the Ontario Labour Relations Act were to be read into the contract. The Council, however, made no attempt to take the dispute to arbitration and would agree to take it to arbitration only on condition that work was stopped in the meantime. This, in the opinion of the Court, supported the contention that the picketing was intended to interfere with the plaintiffs' contractual rights. Section 32 was intended to prevent a work stoppage pending arbitration. It would strain section 32 to hold that a party who contended that the collective agreement applied to the work in question had a right to have the work stopped pending arbitration.

Also the Court was of the opinion that this section of the Labour Relations Act was never intended to tie the hands of the Court so that it could not inquire as to whether this was a building project. The collective agreement ought to be construed in its ordinary meaning. In the opinion of the Court the project under construction was to supply housing, but that, of course, was the question the trial judge would have to decide.

Chief Justice McRuer also noted that there was a much broader and more important question to be considered in this case, namely, the line between lawful strikes and picketing and conspiracy to injure in order to obtain benefits for a particular person or class.

The Court made an order continuing the interim injunction until trial.

*Wilson Court Apts. Ltd. v. Genovese*, (1958) O.W.N. No. 25, p. 302.

### Quebec Court of Queen's Bench . . .

... rules union liable for damages when picketing organized by union carried out in illegal manner

On July 17, 1957, the Quebec Court of Queen's Bench (in appeal) by a majority decision modified a judgment of the Superior Court by reducing the amount of damages granted by the trial judge against a union. The Court confirmed the decision of the Superior Court that the picketing of the employer's plant, as organized and directed by the union's representatives, was carried out in an illegal manner and the employer suffered damages by reason of the fact that picketing employees legally on strike prevented a substantial number of non-striking employees from working.

The dissenting judge would accept the union's appeal in full on the ground that the stoppage of work was not due to the fact of picketing as such but to the gathering of workers due to the strike, which fact excluded the bond of causality between the union's activity and the damages suffered by the employer.

The circumstances of the dispute, as related in the reasons for judgment, were:

The Canadian Vickers Company Limited has shipyards in Montreal and works connected with ship-building and employs several thousand workers. The *Union Nationale des Employés de Vickers*, affiliated with the Canadian and Catholic Confederation of Labour, was a bargaining agent for a certain category of workers employed by the company, those employed in the marine department.

As a result of differences when negotiating a collective agreement, the members of the defendant union voted on August 1, 1952 in favour of a strike. When the conciliator failed to achieve agreement, the officers of the union ordered the strike, which started on August 19, 1952. At the same time the union decided to establish a picket line.

The company argued that illegal picketing organized by the union prevented the

workmen who were not on strike from working and the company brought an action against the union claiming \$10,000 damages.

The findings of the trial judge were as follows: The employees of the company as represented by the union were legally on strike, but there was a substantial number of other employees who were not legally on strike; the union organized the picketing of the company's plant which prevented the majority of those of the company's employees who were not legally on strike from working on August 19, 1952; the picketing as organized by the representatives of the defendant union was carried out in an illegal manner; the company had suffered damages to the extent of \$2,000 as the result of the said illegal picketing, being the loss sustained by the payment of salary to employees who were prevented from working on that day.

The judgment was rendered on April 29, 1955 by Mr. Justice Brossard of the Superior Court and was appealed by the union.

The Court of Queen's Bench (in appeal) found, with one judge dissenting, that the evidence supported the findings of the trial judge that the employees of the plaintiff company were prevented from working on the day in question by the illegal activities of persons who were picketing the plant and that the picketing was organized and directed by representatives of the defendant union. However, the Court found that there was no proof connecting the union with many of the illegal acts of which the company complained. Also it would appear from the evidence that many of the employees of the company who were not legally on strike refrained from working rather because of the fact of the strike than because of illegal acts ordered or condoned by the union. Further, the Court found that the evidence did not establish that the damages suffered by the company as the direct result of the illegal acts for which the union was responsible amounted to \$2,000, but such damages amounted to not less than \$500.

The Court maintained the appeal in part and set aside the judgment condemning the union to pay the sum of \$2,000, and ordered the union to pay the company the sum of \$500 with interest from April 29, 1955, and costs.

(Mr. Justice Bissonnette, dissenting, would have maintained the appeal in full and would have dismissed the company's action with costs.)

Mr. Justice Montgomery in his reasons for judgment stated that the union and its members were engaged in a legal strike.

They had the right to picket the company's plant for the purpose of obtaining or communicating information regarding the strike within the limits of subsection 2 of section 366 of the Criminal Code.

The issue of the case depended on whether the company had established that the picketing was carried out in an illegal manner, that any such illegalities were ordered or sanctioned by the union, and that the company suffered damages as the result of such illegalities beyond the damages that it might have suffered had the picketing been carried out in a strictly legal manner.

The evidence had shown that the picketing was on the whole peaceful and most of those who made a serious effort to enter the main plant were able to do so, though sometimes with difficulty. The fact remained, however, that the principal entrance to the plant and also the entrance to the plate or boiler shop were blocked by solid masses of workmen. This certainly went beyond what was necessary for obtaining or conveying information, and, in Mr. Justice Montgomery's opinion, numerous illegal acts were committed.

He also found a large measure of justification in the union's contention that, if illegal acts were committed, they were acts of individuals for whom the union was not responsible. The union could not be held responsible for the acts of every individual who was in the vicinity of the plant that day, and many of the illegal acts complained of were committed by persons who were not members of the defendant union. However, it was sufficiently established that the picketing was organized by officers and representatives of the union. While these representatives may have made an effort to avoid violence, they also appear to have made a concerted and deliberate effort to see that no hourly-paid employees, whether legally on strike or not, entered the plant that day.

Mr. Justice Hyde was in agreement with Mr. Justice Montgomery as to the disposition of this appeal. In his opinion, the evidence showed that the picket line went considerably beyond the "watching and besetting" permitted by the Criminal Code, and beyond what is reasonably permissible in matters of this sort. Actually the picket line established by the union actively prevented, not by example but by positive act, non-striking employees from entering the plant and the act of so doing is actionable. Whether that act was deliberate or not on the part of the union was not established, but it was done by persons under its control.

Mr. Justice Bissonnette in his dissenting opinion noted that the union pleaded that it did not commit any illegal act and that there was no causality bond between the picketing which the union had authorized and the damage claimed by the company.

He noted that the trial judge in rejecting the union's contention had stated that the picketing of which the members of the union availed themselves was illegal and outside the boundaries of the picketing implicitly permitted by the Criminal Code, and constituted a wrongful act having for its object and effect the violation of somebody else's right; and further that the trial judge had stated that the evidence proved that the picketing in question was ordered by the officers of the union and organized by some of them.

In rejecting the stand taken by the trial judge, Mr. Justice Bissonnette noted that the defendant is a syndicate affiliated with the Canadian and Catholic Confederation of Labour. The syndicate has a corporate entity, and, independently of the CCCL, it is subject to rights; consequently in evaluating the facts a distinction should be made between the conduct of certain officers of the CCCL and those of the syndicate in question. The syndicate could be held responsible only if it was proved that its officers, acting in their official capacity, wanted and organized illegal picketing or allowed or tolerated the violation of law by the instructions they issued. Mr. Justice Bissonnette thought that the evidence in this respect was lacking.

It could not be denied that there was a vast gathering of people, that it was the syndicate's decision to establish a picket line and that free access to the buildings was obstructed, an action which was accompanied by intimidation or false information. Also it appeared to Mr. Justice Bissonnette that the members of the syndicate committed an illegal act in contravening the freedom to work, thus being subject to the penalties provided by section 366 of the Criminal Code. However, in his opinion this was not the decisive point of this action. It was not a question of deciding whether an unlawful gathering of the people engages the responsibility of the union, but if the picketing, so far as it could be considered illegal, was the direct and immediate cause of the cessation of work.

It appeared to him that the picketing was only a distant and indirect cause of the stoppage of work and that the real cause was the fact of the strike itself. In theory, every worker, not being informed about the strike which was declared during the night, does not contravene section 366 of

the Criminal Code when he goes to his employer and finds that the work was suspended by his syndicate. This is the exception provided by the spirit if not by the letter of section 366 of the Criminal Code. In order to put the fault and responsibility on the syndicate, the evidence should prove that this was all intended and arranged by the officers of the union in question, or that those officers were on the spot and could, by taking effective measures, allow the work of the day shift to proceed.

According to Mr. Justice Bissonnette the company did not establish any fault or

any reprehensible act that could be imputed to the union in question. The responsibility of the union could not be maintained unless it was established that the legal act of picketing became illegal by the will of or the tolerance shown by the union and that the officers of the union were instrumental in bringing this change about. Nothing of this kind was proved. This was enough to reject the company's action.

For these reasons he would accept the union's appeal. *Union Nationale des Employés de Vickers v. Canadian Vickers Limited* (1958) B.R. No. 6, p. 470.

## Recent Regulations under Provincial Legislation

**Trade of heavy duty mechanic declared apprenticeable trade in Alberta;  
Saskatchewan issues regulations setting standards for plumbing work**

The trade of heavy duty mechanics was declared a trade under the Alberta Apprenticeship Act.

In Saskatchewan, regulations were issued setting standards for plumbing work and equipment and laying down minimum requirements for plumbing permits.

### Alberta Apprenticeship Act

The trade of heavy duty mechanics was added to the list of trades designated under the Alberta Apprenticeship Act by Alta. Reg. 133/58, gazetted June 14. This means that no person eligible for apprenticeship may now engage in the trade for more than three months unless he has entered into an apprenticeship contract or has received permission from the Apprenticeship Board.

### Alberta Labour Act

The special hours of work and minimum wage order for field employees in the land surveying industry, Order No. 24 (1956) (L. G., 1957, p. 348), was amended by Alta. Reg. 164/58, gazetted on June 14, to make it clear that employees covered by this order are to be paid overtime for all hours worked in excess of 208 hours in a working month and also for time worked on a rest-day.

### British Columbia Civil Defence Act

On June 23, a proclamation was issued in British Columbia declaring that an emergency existed in those areas of the province served by Black Ball Ferries Ltd., and a second proclamation brought into operation sections of the Civil Defence Act that give the provincial Government wide powers to deal with an emergency. The proclamations were gazetted on June 26.

### British Columbia Railway Act

Two amendments to the regulations under the British Columbia Railway Act governing locomotives made by the Minister of Railways were approved by the Lieutenant Governor in Council on July 23 and gazetted on July 31.

One provides that internal combustion locomotives used in passenger service must have at least two members of the engine crew in the cab, one of whom must be a certified locomotive engineer. For the purpose of this rule, rail cars or "Budd" cars will not be deemed to constitute a locomotive.

A second provision states that internal combustion locomotives operating in mixed service or freight service must have at least one member of either an engine crew or a train crew in the cab in addition to a certified locomotive engineer. However, in switching service within yard limits, terminals and industrial spurs, only a certified locomotive engineer need be in the cab while the locomotive is in operation.

### Saskatchewan Public Health Act

Regulations under the Saskatchewan Public Health Act setting out standards for plumbing work and requirements for permits were approved by O.C. 1214/58 on July 15 and gazetted on August 1.

Among the general rules is a provision stating that all plumbing installations, including alterations and additions, are subject to the regulations and to inspection and testing.

# UNEMPLOYMENT INSURANCE

## Annual Report of Unemployment Insurance Advisory Committee

Reduction in the balance at credit of the Unemployment Insurance Fund during twelve-month period preceding March 31, 1958 is shown

A reduction in the balance at the credit of the Unemployment Insurance Fund of \$134,241,341.68 during the twelve-month period preceding March 31, 1958 is shown by the report of the Unemployment Insurance Advisory Committee for the year ending on that date.

The report was tabled in the House of Commons on August 21.

This decrease, which compares with an increase of \$18,970,908.62 in the fiscal year 1956-57, is attributed to a "staggering increase" in benefit payments, due mainly to a large increase in the number of unemployed workers during the period, and to the extension of the period during which seasonal benefits were available.

It was estimated that by the end of May 1958 the total reduction in the Fund would exceed \$200,000,000. The Committee emphasizes the seriousness of this situation, in that it "reduces the reserve below the standard accepted by authorities as safe". It also points out that this depletion of the Fund causes a reduction of \$6,700,000 a year in the interest earned by the securities in which the Fund is invested.

"There is agreement on the need for additional revenue for the Fund," the report states. As a means towards this end the Committee recommends an increase in the Government's contribution to the Fund to make it equal to one half of the combined contributions from employers and employees.

The Committee also refers to an estimate "that an increase of 20 per cent in the contribution rates would probably maintain the Fund at the present level."

Other recommendations made in the report include the following:

Reiteration of a previous recommendation that the loss to the Fund caused by extending benefits to fishermen should be paid from "sources other than regular contributions".

That the Government "take action to replace the drain on the Fund by reason of extension of the seasonal benefit period by a grant."

That "serious consideration be given to the inclusion of all civil servants to provide protection."

"That the (Unemployment Insurance) Commission be given the services of sufficient staff to adequately carry out the work."

### REPORT OF THE UNEMPLOYMENT INSURANCE ADVISORY COMMITTEE

*For the Year Ending March 31, 1958*

To His Excellency

The Governor General in Council:

Section 89(1) of the Unemployment Insurance Act requires the Unemployment Insurance Advisory Committee to report not later than July 31 each year on the financial condition of the Unemployment Insurance Fund as at the preceding March 31.

The Committee met on July 3 and 4, 1958, and received from the Unemployment Insurance Commission financial and statistical statements for the year ending March 31, 1958. These reports were supplemented by further information and explanations, by a report from the Assistant Superintendent of Insurance, Department of Insurance, and by statistical data from the Dominion Bureau of Statistics.

The balance at the credit of the Unemployment Insurance Fund at March 31, 1958, was \$744,200,124.87, a decrease of \$134,241,341.68 in the twelve-month period. This compares with an increase of \$18,970,908.62 in the fiscal year 1956-57, an increase of \$13,186,624.99 in the fiscal year 1955-56, and a decrease in the fiscal year 1954-55 of \$41,245,135.50.

The whole fund, except for immediate cash requirements, is invested in obligations of or guaranteed by the Government of Canada. These investments are carried on the balance sheet at cost (less amortization of premium and discount), which is \$19,352,267.76 more than the market value at March 31. The average investment yield is 3.35 per cent compared with a 3.2 per cent for the previous year.

The revenue for the fiscal year 1957-58 totalled \$250,836,812.32, an increase of \$569,333.70 over that of the previous year. This amount was made up as follows:

|                                                     |                   |
|-----------------------------------------------------|-------------------|
| Employer and Employee Contributions .....           | \$ 188,714,337.93 |
| Department of Veterans Affairs Regular Forces ..... | 464,689.28        |
| Government Contribution ...                         | 37,835,805.44     |
| Income from Investments,                            |                   |
| Penalties and Fines .....                           | 23,821,979.67     |
|                                                     | <hr/>             |
|                                                     | \$ 250,836,812.32 |

Benefit payments in the year 1957-58 totalled \$385,078,154 of which an estimated \$327,840,826 was expended in regular benefit and \$57,237,328 in seasonal benefit. This represents an increase from the previous year of \$153,781,584 in total benefit.

The operations for the year resulted in an excess of expenditure over revenue of \$134,241,341.68.

It should be mentioned that there was a revenue from investment of the fund of nearly \$24,000,000. This item will be approximately seven million less next year.

The *staggering increase* in benefit payments is mainly due to the large number of unemployed workers during the period, and to the extension of the period during which seasonal benefits were available.

There have been no criticisms of the plan reported, either officially to the Committee, or to the individual members.

On the contrary, numerous statements have reached the members of the Committee to the effect that the benefit payments of over \$385,000,000 have been of great assistance in overcoming a good portion of the hardships workers suffer from unemployment.

The Committee asserts that these statements are true, not only in the fiscal year under review but in every one of the seventeen years of the life of the act. In the seventeen years, over one and three-quarter billion dollars have been paid in benefit payments.

The Committee asserts, further, that great credit is due to the commission and to the several thousand men and women in the offices across Canada who have carried through a most outstanding performance during the year. They have worked long hours, under extreme tension, and demanding conditions. A gratifying feature is that there have been no complaints or virtually none.

Your Committee respectfully urges that the commission be given the services of sufficient staff to adequately carry out the work. There is the danger that the importance of enforcement of the terms; auditing; research, and inspection may be overlooked, when immediate demands to process benefit claims are heavy. There is also the fear of impairment of important employment placement activity.

The Unemployment Insurance Commission gave the Committee seven statements, giving a wealth of information, and detail, on the year's operation.

The Committee calls attention to the serious drain on the fund created by the heavy load of payments during the year.

Special mention is made of the very heavy expenditures which have been required to meet the seasonal benefit payments.

There was, unquestionably, a need for the special provisions to meet the emergent situation last winter. The Committee is

gratified to find that the benefit payments could be made so satisfactorily through the commission offices.

It is a fact, however, that the burden of this expense, in the opinion of the Committee, should not be imposed on the Unemployment Insurance Fund, unless the loss to the fund is made good.

We trust that the Government will take action to replace the drain on the fund, by reason of extension of the seasonal benefit period by a grant.

In this connection, attention is called to the drain on the fund by the enactment of provisions for payment of benefits to fishermen. In the fiscal year the drain on the fund is reported as four and one-half million dollars. In a full year the drain will be ten million dollars.

Repeating previous recommendation we submit that the loss to the fund by extending benefits to fishermen should be paid from sources other than regular contributions.

The fund has been reduced by \$134,241,000 up to the end of March, 1958. By the end of May, the total reduction will exceed \$200,000,000.

The seriousness of this, of course, is that it reduces the reserve below the standard accepted by authorities as safe. There is also the fact that a reduction of over \$200,000,000 reduces the annual interest paid into the fund by \$6,700,000 each year.

The evidence is that assuming a pattern of employment in the next five years the same as the last five, the Fund will be reduced by an average of \$53,000,000 per year.

You will observe that an increase of 20 per cent in the contribution rates would probably maintain the fund at the present level. The estimate is based on the assumption that a pattern of employment during the next five years, may be expected, similar to that of the last five.

#### *Recommendations—Commission Proposals*

The Committee recommend for your favourable consideration the following proposals of the Unemployment Insurance Commission:

- (1) revise existing schedules of contribution and benefit rates by the addition of two new classes at the top of the earnings range; readjust and consolidate some of the lower classes and revise rates of allowable earnings;
- (2) provide for elimination of wage ceiling of \$4,800 in present Act and substitute authority for the commission to fix a higher wage ceiling to suit conditions.

#### *Recommendations to Stabilize Fund*

There is agreement on the need for additional revenue for the fund. Under the provisions of the Act it is the Committee's duty to so inform you.

Recognizing that the original unemployment insurance plan has been extended over the years:

- (1) To provide benefits for workers, in the winter months, whose periods of contribution are intermittent and limited;
- (2) To extend coverage to many classes recognized as poor risks; provisions for whom would otherwise have fallen on Government, at some level,—

The Committee respectfully recommends that the division of responsibility for revenue to the fund as between employers, employees and Government be adjusted so

that the contribution from each be made equal; in other words, that the contribution from the Government be made equal to one-half that of the combined contributions from employers and employees.

In amplification of the reasons for the recommendation that the Government contribution be increased, attention is called to the following, as some of the expenditures, with which the fund has been burdened and for which provision for sufficient balancing revenue has not been made,—

1. Benefits for fishermen, which in a full year will create a drain of ten million dollars.
2. Extension of seasonal benefits, which have created expenditures double those contemplated.
3. Inclusion of lumbering and logging industry.
4. More generous regulations permitting seasonal workers to obtain benefits more readily.
5. When coverage has been broadened it has had the effect of bringing in groups which created a drain on the fund, for example fresh-water sailors and stevedores.

#### *Consideration, Coverage Civil Servants*

The Committee, on request of Member Norman Hesler, discussed coverage of all civil servants. Mr. Hesler proposed recommending broader coverage to include all

civil servants. The existing situation is that some are included, but most are exempt.

The Committee decided to recommend that serious consideration be given to the inclusion of all civil servants to provide protection. The activities of many Government departments rise and fall, as a result of economic conditions and men and women risk loss of employment and should be protected.

#### *Other Possible Revisions*

There were a number of other matters reviewed, amongst which were:

- Revision of benefit formula,
- Payment of benefit for unemployment caused by illness, and
- Payment of benefit for short-time claimants.

The Committee, and the commission require more time for research and study of these matters. The revision of the benefit formula involved the elimination of seasonal benefits, which the Committee believed would develop serious difficulties.

## Monthly Report on Operation of the Unemployment Insurance Act

Number of initial and renewal claims for benefit in June—155,800—  
was 6 per cent less than May figure: 165,100. Number of claimants in  
“live” file declined by 105,600 to total of 445,500, statistics\* show

The number of initial and renewal claims for unemployment insurance benefit in June was 155,800, about 6 per cent less than the May figure of 165,100. During June 1957 initial and renewal claims filed numbered 86,419.

The drop in the number of claims during June was slight compared with the decrease of 24 per cent during May. One of the factors tending to maintain this relatively

high level of claims is administrative, i.e., the category of initial claims includes those cases in which benefit is extended under the seasonal benefit terms, the claimant having exhausted his regular benefit. This factor was probably more important for June than for May.

The decline in claims occurred mainly among the males, who numbered 314,900 on June 30 as against 409,100 on May 31. This represents a reduction rate of close to 25 per cent, whereas for females it was less than 10 per cent.

The number of persons having a claim in the “live” file declined by 105,600 to a total of 445,500 on June 30 from 551,100 on May 31. The June 1957 total of 204,500 claimants did not include seasonal benefit claimants and therefore is not comparable.

\*See Tables E-1 to E-4 at back of book.

In a comparison of current employment statistics with those for a previous period, consideration should be given to relevant factors other than numbers such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation.

Seasonal benefit claimants (included in the above mentioned totals) numbered 132,000 on June 30 as against 183,000 on May 31. Claimants for seasonal benefit thus showed a decline of 22 per cent during June, whereas the number of persons claiming regular benefit was down on June 30 by 15 per cent. It should be pointed out that as June 28 marked the end of the period during which seasonal benefit was payable, the June 30 figure of seasonal claimants represents the number of seasonal claims outstanding on that date.

The proportion of claimants who were postal fell to 34.4 per cent on June 30, compared with 39 per cent on May 31. Seasonal benefit claimants were 45 per cent postal, whereas only 30 per cent of regular claimants were thus classified.

Thirty-five per cent of the claimants registered on June 30 had been on claim at least 20 weeks, a slight increase over May 31, when about 34 per cent were in this category. On the other hand, the proportion of claimants with relatively short duration on claim (4 weeks or less) rose from 22 per cent on May 31 to 27 per cent on June 30.

Some 7,000 initial claims, constituting 7 per cent of the initial claims adjudicated during June, were found unable to fulfil the contribution requirements for either regular or seasonal benefit.

Benefit payments declined substantially during June, when \$37,000,000 was paid out as against \$52,000,000 during May. Payments in June 1957 were in respect of regular benefit only and totalled \$14,000,000. The larger relative decline in payments (28 per cent) during June in comparison with the rate of decline for persons having a claim in the live file (19 per cent) is associated partly with the increase in the relative importance of the claimant group whose duration on claim was 4 weeks or less and partly with the sizeable decline in the number of males, who characteristically draw at higher rates than females.

The average weekly payment was \$20.72 for June, \$21.10 for May, and \$20.24 for June 1957.

### Insurance Registration

Reports received from local offices of the Unemployment Insurance Commission for June show that insurance books or contribution cards have been issued to 3,876,389 employees who have made contributions to the Unemployment Insurance Fund since April 1, 1958.

At June 30, employers registered numbered 305,148, an increase of 3,662 since May 31.

### Enforcement Statistics

During June 1958, 5,945 investigations were conducted by enforcement officers across Canada. Of these, 4,019 were spot checks of postal and counter claims to verify the fulfilment of statutory conditions, and 128 were miscellaneous investigations. The remaining 1,798 were investigations in connection with claimants suspected of making false statements to obtain benefit.

Prosecutions were begun in 137 cases, 40 against employers and 97 against claimants.\* Punitive disqualifications as a result of claimants' making false statements or misrepresentations numbered 1,241.\*

### Unemployment Insurance Fund

Revenue received in June totalled \$19,427,334.68 compared with \$20,579,908.18 in May and \$20,240,554.22 in June 1957. Benefits paid in June totalled \$36,962,856.91 compared with \$51,626,650.72 in May and \$14,330,727.76 in June 1957. The balance in the fund on June 30 was \$644,520,634.54; on May 31 it was \$662,056,156.77 and on June 30, 1957, \$852,729,261.78.

\*These do not necessarily relate to the investigations conducted during this period.

---

## Employment Averaged 65 Million in U.S. in 1957

Employment in the United States averaged 65,000,000 during 1957, up 300,000 from the previous year, the Census Bureau's annual report on the labour force shows. Unemployment averaged 2,900,000, or 4.3 per cent of the civilian labour force.

The average number of long-term jobless, those seeking work for 15 weeks or more, was 560,000, the same as in 1956.

The 1957 average of hours worked in non-farm industries was 40.5, compared with 40.9 in 1956.

Hours worked began decreasing in 1957, long before unemployment rose, mainly because of a cutback in overtime.

# Decision of the Umpire under the Unemployment Insurance Act

## Decision CUB-1532 (Excerpts)

**Summary of the Main Facts:** The claimants represented in these cases were employed by building contractors and sub-contractors on construction projects at the premises of pulp and paper companies at Port Alberni, Elk Falls, Port Alice and Powell River, B.C., and in general their employment ceased on December 3, 1957, in the following circumstances:

On July 4, 1955, a standard labour contract was entered into between the Pulp and Paper Relations Bureau, Vancouver, (comprised of six companies, four of which were located at the aforementioned places) and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers, and the United Paper Makers and Paper Workers. The agreement was to remain in effect until June 30, 1957, and thereafter from year to year subject to certain conditions of the agreement.

In May 1957, negotiations began between the unions and the employers' association for an increase in the basic wage rate. As no settlement was reached, the matter in dispute was referred to a provincial conciliation officer and then to a provincial conciliation board. The board's recommendation was accepted by the employers' association but rejected by the unions. After taking a supervised strike vote which favoured strike action, the unions called a strike on November 14, 1957, at the premises of the six companies comprising the employers' association and set up picket lines at all the plants of the companies both on Vancouver Island and the British Columbia mainland. A complete stoppage ensued of the normal operations of the said companies.

According to the submissions, a qualified agreement was reached on November 10, 1957, between the building trades' council and the striking unions, whereby tradesmen on the construction projects were to be in no way hindered from crossing the picket lines and continuing with the construction work then in progress. The striking unions, however, reserved the right to apply "more stringent" measures later if they saw fit but agreed to notify the building trades' unions in advance of taking such measures. This appears more fully in the record by a letter dated November 10, 1957, signed by an international representative of the

striking unions and addressed to officers of the Vancouver, New Westminster and District Building Trades Council and the Victoria and District Building Trades Council. According to one union representative, he learned beforehand by way of "the grapevine" that the striking unions intended to strengthen the picket lines about December 3; the members of his union were advised not to cross the augmented line if there was fear of violence. Another union representative claimed that his union was taken by surprise when the picket lines were greatly strengthened on December 3 and thereupon counselled its members to make up their own mind whether they wished to cross the lines or not.

From December 3, the construction workers employed on the construction projects on these premises no longer crossed the picket lines of the striking unions. A complete stoppage of all normal construction work in progress at the said premises ensued.

At Port Alberni, at the 34-foot gate through which about 100 construction workers had to enter the premises, there were, on December 3, approximately 80 pickets compared with six or seven before and after that date. There was no incident on the picket line; certain construction workers were able to work intermittently unloading and winterizing equipment on the premises of the employer without interference by the strikers. Police protection was also available. The employer stated that there was work for the construction workers.

At Elk Falls, the construction workers, approximately 50 per cent of whom were living in camps behind the picket line, crossed the strengthened picket line (number of pickets, which varied from three to five, was increased substantially, one report being that there were 30 whereas another report indicated 64) at 8.00 a.m. on December 3, but were told "we are giving you until ten o'clock to get your tools out". At approximately 8.15 a.m., a foreman ordered the construction workers to return the company's larger tools to the tool crib for safe-keeping (as the company had lost about \$100,000 worth of tools on a past similar occasion) and they received no orders for further work then. At 9.15 a.m., one of the chief officials of the company

called a meeting of the shop stewards of the construction workers' unions at which he was unable to get any satisfactory answer when asked what authority they had to cease work. One of the stewards stated he had been told by his union in Victoria that they were to continue to work unless they were threatened with violence and a claimant stated the union had informed its members that they would receive unemployment insurance benefit if they did not cross the picket line. The company's officer then requested the shop stewards to call a general meeting and inform the men that the work would be resumed at 12:30 p.m. and lunch served as usual.

Following the shop stewards' meeting, they reported that they had decided to cease work. It took the carpenters and the labourers about four days to remove all tools and equipment and they crossed the numerically reduced picket line unmolested as the pickets had agreed to permit the company to remove the tools and equipment from the job's site. The project was nearing completion and all construction workers would have been laid off in any event within a period of three weeks.

The aforementioned officer of the company declared that they were at all times ready as a company to protect their men and at no time had the company been asked by any employee or by any union to provide protection to the men.

At Port Alice, a company town, there were on December 3 approximately 86 pickets compared with from three to five before and after that date. Most of the 100 construction workers left for their homes elsewhere as they were "unaware" the picket line would be decreased on the next and subsequent days. On December 6, the company's manager was jostled on the picket line and the employer secured an injunction prohibiting the strikers from preventing the construction workers from crossing the picket line. Some of the workers reported that they had on that date made an attempt to report for work but were again stopped at the gate, not by force, but were told that while the pickets could no longer legally restrain them from entering the mill, they must obtain a pass each time they entered and that they (the pickets) were still opposed to the construction work being performed. However, the employer later came to an arrangement with the strikers' unions, following which the injunction was dissolved, the suit for damage was withdrawn and the construction workers returned to their work unmolested on January 7 and thereafter.

At Powell River, there were only six construction workers still employed at the premises on December 3, the day on which the picket line was increased from an undetermined number to approximately 200, as the mill was completely closed down, except for the steam plant, and the men had been gradually laid off at the end of each week. The only claimant to file an application for benefit reported that he was going to be laid off the week before December 3, but was kept on for an additional week. He did not cross the picket line because of his fear of violence and left Powell River on December 7.

There is evidence that on December 3, although there was not a single case of violence being applied to construction workers, there were isolated instances where the pickets at the struck plants uttered some harsh and threatening words to them.

The claimants filed applications for benefit and were disqualified by the insurance officer under section 63 of the Act because, in his opinion, they had become participants in the labour dispute by not having crossed the picket lines of the striking unions.

The claimants appealed to the board of referees. The representatives of the interested unions attended the hearing and based their case chiefly on the contention that, in view of the principle they believed established by the Umpire in decision CUB-1386, the claimants could not be said to have become participants in the dispute. In their opinion, any attempt by the construction workers to force their way through the picket lines would have created a violent reaction. The board of referees agreed with this contention in some of the cases, but not in others, and as a consequence some appeals were made to the Umpire by the insurance officer and some by the interested unions.

**Considerations and Conclusions:** The task of deciding which of the sections of the Unemployment Insurance Act under the title of disqualifications should be made to apply in the present instance has not been a simple matter. As Counsel for the Commission observed, there is no precedent wherein a claimant in order to justify receipt of unemployment insurance benefit relied solely and entirely on the existence of an illegal picket line under circumstances comparable to the unusual ones that exist in the present appeal. After careful consideration of the applicability of sections 59, 60 (1) and 63, I have with some hesitancy come to the conclusion that the insurance officer in this particular case has not discharged, as required by section 63,

the onus of proving that a labour dispute existed at the premises at which the construction workers were employed. At the same time I have reached the conclusion that the present cases should be dealt with under section 60.

Nobody will deny that there existed a labour dispute between the pulp and paper concerns and their employees at the premises where the latter were employed. On the other hand, the construction workers had no dispute with their own respective employers, much less with the employers of the pulp and paper workers to whom they were strangers. In his attempt to establish that there was a labour dispute at the premises at which the construction workers were employed, the insurance officer developed an argument, with which I am unable to agree, to the effect that the claimants' failure to cross the picket lines under the circumstances had extended the pulp and paper labour dispute to the construction workers' own separate places of employment.

It is worth noting that subsection (3) of section 63 should, I think, be read to mean that in cases where in the same enterprise several branches of work exist, then a labour dispute which arises in one branch is not presumed to exist or extend to any other branch.

This meaning must apply with greater force in cases like the present ones, wherein distinct employers are each carrying on in admittedly separate premises autonomous undertakings which are unrelated to each other. In order for the argument of extension to apply in the present cases, stronger evidence is required than is disclosed in the record.

Neither do the decisions cited by the insurance officer lend weight to his contention, since facts and factors existed in those cases which are lacking in the present ones. CUB-1035 deals primarily with a collective refusal to handle "hot" material or, in other words, with a sympathetic strike. In CUB-1142, the two groups of workers involved were employees of the same employer and the workers of both groups were directly interested in the labour dispute. CUB-1201 also deals with two groups of employees of the same employer, but the group which at the start of the stoppage was in no way involved in the other group's dispute joined the workers of this group on the picket line later on during the stoppage.

Counsel for the Commission stated that he wished to withdraw a contention set out in the insurance officer's appeal that a labour dispute existed between the pulp

and paper workers and the construction workers. I think he was wise in not pressing such contention, because it was based on a British precedent which I find is of very little value in deciding this question inasmuch as such precedent deals with the right to benefit of a claimant who, apart from being an employee of the struck employer, was also directly interested in the labour dispute between his own employer and his fellow employees and belonged to the same grade or class as the latter.

In connection with the applicability of section 60, it appears that, on December 3, 1957, the construction workers were faced with the responsibility of having to make a decision as to whether continuing to work was worth the risk of attempting to cross unusually large picket lines at the expense of likely impairment to inter-fraternal union solidarity.

Their leadership having left them to exercise their own choice as to respecting or crossing the picket lines, the non-striking workers decided to quit their jobs and, with few exceptions, did not return on the next or subsequent days. This withdrawal constituted a voluntary separation from employment as contemplated in section 60 of the Act and the question is now whether the construction workers have shown "just cause" for voluntarily leaving their employment.

There are no hard and fast rules which can be laid down in determining when there exists justification for a genuine fear of violence. Such determination depends in part on the temperament of those concerned and on a multitude of circumstances, the importance of which must be weighed in the light of the characteristics of each case.

Taking into account the threatening attitude of the letter dated November 10, 1957, the more or less sudden increase in the number of pickets and a seemingly unnecessary display of picket strength on the morning of December 3, the fact that the construction workers were left to exercise individual discretion as to crossing the picket line and, lastly, the scattered instances of threatening words, I consider that the claimants had reasonable cause for fear and were justified in pausing and taking precautions before venturing across the picket line. I also consider that they were entitled to a day's delay to consider the situation and the most appropriate means which they could take to resume their employment. *Inter alia*, I think they should have returned to work the next day, particularly as the evidence shows that normal picket lines had been restored on

and subsequent to December 4. Their decision to quit their work, therefore, was reached with undue haste and, in the absence of any definite prospect of other work elsewhere (CUBs 259, 422, 429, 498, 698, 816, 847, 885, 946, 1001, 1030, 1086, 1100 and 1255) amounted to voluntarily leaving without just cause (CUBs 201, 422, 429, 698, 727, 755 and 964).

Moreover, even in assuming that the picket line had not been reduced on December 4 and thereafter and that it would continue to be such as to create a genuine fear of violence, it is a fact that the claimants did nothing effective to remedy the situation before deciding to leave their employment, thereby failing to comply with one of the best established principles of jurisprudence to the effect that, in order to show just cause, a claimant before voluntarily leaving his employment should exhaust every reasonable means of remedying any objectionable conditions pertaining to his work (CUBs 74, 124, 146, 201, 231, 263, 436, 649, 785, 816, 964, 1029, 1086, 1090, 1100 1150 1188 and 1490).

Though no worker can be compelled to cross a picket line, peaceful or otherwise, against his wishes, on the other hand it is erroneous to think, as was done in this case, that a worker who wishes to qualify for benefit, can, on being confronted with an illegal picket line, simply return home and figuratively fold his arms and refrain from taking any remedial action. Under section 60, according to the established jurisprudence, he must discharge the burden of proving that he has, without undue delay, taken available and reasonable means of removing the cause which prevents him from continuing to work. Moreover, illegal picketing must be considered day by day, it may be illegal on one day and peaceful the next. To be entitled to unemployment insurance benefit, a claimant must, where necessary, take remedial action as often as the circumstances require. He should at least, for example, as stated in many of the decisions mentioned at the end of the preceding paragraph, have recourse to his union to urge effective remedial measures and if necessary to his employer and, as stated in CUB-1109 and CUB-457, ultimate recourse, as has sometimes been had, to police protection and legal proceedings.

It could hardly be expected, however, that an individual worker would consider injunction proceedings without first seeking the aid of his employer. There is evidence to show that such assistance, if requested, would have been forthcoming. For instance, at Elk Falls a company official stated "We are at all times ready as a company to

protect our men and at no time was the company ever asked by any employee or by any union to provide protection to the men".

Again at Port Alice, the efficacy of injunction proceedings was shown. An official of the company was interfered with on the picket line enabling an injunction order to be secured by the company early in December, which had the effect of removing any fear of violence on the picket line; nevertheless, when he requested claimants to cross the picket line, and resume work, they refrained from doing so until January 7, 1958. In the meantime, the company and the striking union came to an arrangement whereby the picket line was completely dispensed with, the suit for damages withdrawn and the injunction order, no longer being necessary, was dissolved.

It was advanced as an excuse on their behalf that any of the claimants who would have crossed the picket line under the circumstances ran the danger of being looked upon with contempt, called a "scab" and treated as such, but I consider that this type of threat is too remote and inadequate to support an allegation of fear of violence.

For all the above reasons, I find that the construction workers have failed to show just cause for voluntarily leaving their employment under the circumstances and are, therefore, subject to disqualification by virtue of section 60(1) of the Act. Such disqualification will be, however, limited to a period equivalent to that during which the work reckoned according to trades would have probably endured but for the general cessation of employment and shall in no case exceed six weeks.

I have always considered that the same principles as apply in cases taken under section 60 regarding the means which claimants should take to facilitate their return to their work are equally applicable to cases which properly fall under section 63 and that those who seek to apply them cannot be reproached with having initiated a new dispute. Taking reasonable means to exercise a legal right to work without obstruction from illegal picketing does not in my opinion constitute a labour dispute as defined in section 2 (j).

From their pleadings it can be seen that the unions' representatives, in resting their case on CUB-1386, relied on a decision which was based not only on facts which are far removed from those of the present case, but which also could not afford the present claimants any relief from disqualification under section 63.

In the first place, in CUB-1386, unlike in the present cases, the employees were working for the same employer at the same premises. Furthermore, the striking union and the non-striking union whose members were excluded from the common plant by the strikers' picket line had been for a long time jurisdictional rivals in seeking to be the bargaining agent for the same plant. Their quarrel over plant jurisdiction had previously occasioned a violent behaviour on the picket line, two incidents of serious violence had already occurred and there was abundant proof of specific threats of violence made by specifically named persons to equally specific members of the non-striking union.

Finally, the non-striking union took effective measures to resume their employment. At the time the strike began, the non-striking union was a relatively small

unaffiliated union. Its executive promptly proceeded to arrange for affiliation with a large respected international federation embracing their trades, which federation then made fully available all its facilities and assistance to make impressive representations to the local municipal council and to the struck employer as a result of which injunctions were secured which brought the illegal picketing to an end. This permitted the members of the non-striking union to return to work. The remedial action taken was the best proof of non-participation and of the genuine desire of the non-striking workers to resume work. Indeed at that hearing I went so far as to commend the representatives of the claimants for "the unquestionable determination and ingenuity" they had shown in bringing to an end the violent picketing of the radical union.

---

## Shortage of Teachers Is World-Wide

A report indicating the existence of a world-wide shortage of school teachers and giving reasons for the shortage was presented to delegates attending the World Confederation of Organizations of the Teaching Profession at Rome last month.

Main reasons for the shortage are poor salaries and lack of prestige for persons engaged in the teaching profession, the report said.

The report indicated that educators in the mathematical and scientific fields are in greatest demand, while the supply in the classics, music and history seems to be nearly satisfactory.

It was estimated that 50 per cent more teachers are necessary if class sizes in most schools are reduced sufficiently to provide each child attending with an adequate education.

Among other items that were listed as hampering the teaching profession were: poor buildings, a lack of good texts and materials, too much take-home work, too many extra-curricular activities, long hours, and incompetent superiors.

---

## Recent Regulations *(Continued from page 1035)*

Another provides that a plumbing inspector must be appointed by the council of every urban municipality with a public sewerage system in use or under construction. In a health region established under any Health Services Act, the municipal council may arrange with the medical health officer for inspection services.

Except for minor repairs, no person may construct, reconstruct, replace or extend a plumbing system without a permit from the appropriate municipal authority or, if there is no such authority, the Minister of Health.

Every application for a permit must be accompanied by a specification or abstract of the proposed work, further particulars being required if the installation consists of five fixtures or more.

In cities, a plumbing permit will be issued only to a person holding a certificate of qualification as a journeyman plumber issued by the Department of Labour or a firm employing at least one qualified journeyman.

In other urban communities with a sewerage system in operation or under construction, the minimum qualification for a permit is a second-class plumber's status certificate.

In rural areas, a plumbing permit may be issued to a person whose qualifications are acceptable to the medical health officer or the Minister.

In areas where a public sewerage system is not in operation, a householder may be issued a special permit to do plumbing on his own premises.

# LABOUR CONDITIONS IN FEDERAL GOVERNMENT CONTRACTS

## Wage Schedules Prepared and Contracts Awarded during July

### Works of Construction, Remodelling, Repair or Demolition

During July the Department of Labour prepared 296 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition. In the same period, a total of 221 contracts in these categories was awarded. Particulars of these contracts appear below.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practice;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week.

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

### Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in July for the manufacture of supplies and equipment were as follows:

| Department                                | No. of Contracts | Aggregate Amount |
|-------------------------------------------|------------------|------------------|
| Defence Construction (1951) Limited ..... | 1                | \$ 16,774.50     |
| Defence Production .....                  | 70               | 443,093.00       |
| Post Office .....                         | 15               | 259,046.69       |
| R.C.M.P. ....                             | 7                | 9,174.93         |

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour, showing the applicable wage rate for each classification of workmen deemed to be required in the execution of the work. These

wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classifications to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is, however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be had upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no event shall the wages paid be less than those established by the laws of the province in which the work is being performed;

(b) the working hours shall be those fixed by the custom of the trade in the district or if there be no such custom, then fair and reasonable hours;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

## Wage Claims Received and Payments Made during July

During July the sum of \$2,676.63 was collected from 4 contractors for wage arrears due their employees arising out of the failure of the contractors, or their sub-contractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contracts. This amount has been or will be distributed to the 97 workers concerned.

## Contracts Containing Fair Wage Schedules Awarded during July

(The labour conditions of the contracts marked (\*) contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of eight per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.)

### Central Mortgage and Housing Corporation

*Greenwood N S:* Swinamer's Building Services, construction of stage 1 school & services, DND 8/58; *Eastern Woodworkers*, construction of housing units & ground services, DND 7/58. *Dryden Ont:* Oswald Decorating Co, \*exterior painting of housing units. *Fort Frances Ont:* Oswald Decorating Co, \*exterior painting of housing units. *Petawawa Ont:* M Sullivan & Son Ltd, construction of stage IV school extension, DND 12/57. *Prescott Ont:* Florida Landscaping Co, site improvement & planting for housing units, FP 3/56. *Winnipeg Man:* Oswald Decorating Co, exterior painting of housing units. *Selkirk Man:* Oswald Decorating Co, exterior painting of housing units. *Weyburn Sask:* May & Son Nurseries Ltd, site improvement & planting, FP 1/56. *Cold Lake Alta:* May & Son Nurseries Ltd, site improvement & planting, DND 6/55. *Vancouver B C:* R H Neven Co Ltd, \*painting of office bldg. *Vernon B C:* Mackie & Hooper Construction Co, \*repairs to houses.

## Employment of Handicapped "Good Business," N.Y. Governor Says

Employment of handicapped persons is "good business," Governor Harriman of New York said in an address at the opening of a watchmaking school—a tuition-free institution established for the training of disabled persons.

The economic values of rehabilitation are illustrated, he said, in the functions of the Vocational Rehabilitation Division of the State Education Department, which, in each of the last two years, placed 4,400 persons in jobs. This group had earned less than \$2,000,000 before rehabilitation and more than \$11,000,000 afterwards.

The value of the rehabilitated worker is emphasized when it is realized that during the working lives of these employees they will have returned approximately \$10 to the Government as income tax for every \$1 expended on their rehabilitation.

The number of handicapped persons placed in full-time employment last year by the Employment Division of the State Department of Labour exceeded 35,000 for the first time. These disabled workers equal the production of the average employee; they have fewer accidents, less absenteeism and change their jobs less frequently, Governor Harriman said.

The 74,320 disabled persons rehabilitated during the year ended June 30 was a record, according to the U.S. Office of Vocational Rehabilitation, being an increase of 3,380 above last year's record.

In addition, 18,584 handicapped persons—also a record—were rehabilitated to the point where they were ready for work but had not found employment.

## Plumbers Union Conducting Program to Upgrade Members' Skills

An intensified training program intended to familiarize its 200,000 members with the technique necessary to operate properly in the atomic age is being conducted in co-operation with contractors throughout the United States by the United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry.

Labour-management schools are teaching the elements of trigonometry and thermodynamics to plumbing craftsmen. The aim is to give them the knowledge required for

working in atomic power plants and with complex chemical and air-conditioning installations.

The U.S. Atomic Energy Commission has expressed strong support for the plan.

Contractors operating under the plan contribute 2½ cents an hour for each worker they employ to create a national fund that will pay for the education of the plumbers. The fund is supervised by trustees from the union and the National Constructors Association.

# WAGES, HOURS, WORKING CONDITIONS

## Working Conditions in Manufacturing

Movement towards 40-hour week in Canadian manufacturing industry is continuing, latest survey reveals. Service requirements for longer vacations are shortening, number of paid statutory holidays rising

According to the annual working conditions survey conducted by the Economics and Research Branch of the Department of Labour, the year ending April 1, 1958 saw a continuation of the movement towards the 40 hour work week in Canadian Manufacturing. Similarly, there was a shortening of the service requirements for longer vacations and an increase in the number of paid statutory holidays available. The survey also indicates slight increases in the coverage of group hospital-medical plans, pensions plans, group life and wage loss insurance.

The proportion of plant workers on a five-day week remained steady over the year, while those in plants working a 40 hour week continued the trend revealed by previous surveys to increase to just over 70 per cent of the plant workers surveyed. In 1954 only about half the workers covered were on a 40 hour week.

Although the proportion of plant employees with a two-week paid vacation remained steady at about 95 per cent, there was a significant reduction in the service qualifications. For example the proportion of employees qualifying for a two-week vacation after one year or less service rose from almost 18 per cent in 1957 to about 23 per cent in April 1958. This was accompanied by a reduction in number of employees qualifying only after 3 or more years' service.

The survey also reveals a similar trend regarding three-week vacations: that is, towards a steady increase in the total number of workers in plants providing a three-week vacation, together with a reduction in service requirements. Although 15 years is still the usual service requirement, the three-week vacation was extended to about 73 per cent of the plant workers in 1958 compared with some 68 per cent in 1957. Those qualifying after less than 10 years' service rose from one per cent in 1957 to almost 4 per cent by April 1958.

Similarly, provision of a four-week paid vacation also increased, from about 12 per cent in 1957 to almost 16 per cent in 1958. The predominant service requirement is still 25 years.

The survey indicates a quite noticeable increase in the provision of paid statutory holidays. For example, the proportion of workers in plants providing eight or more statutory holidays was almost 70 per cent in 1958, compared with 67 per cent in the previous year and just over 52 per cent in 1954.

In line with previous years, the April 1958 survey also indicates that there has been slight increases in the proportionate coverage of the various group hospital-medical, pension plans, group life and wage loss insurance plans.

## Working Conditions of Office Employees

The most significant developments concerning office workers revealed by the April 1958 working conditions survey, are the continued tendency towards a standard work week of less than 37½ hours, and an increase in both three and four week paid vacations provisions with reduced service requirements.

According to the survey the proportion of office employees with a standard work week of less than 37½ hours increased to almost 26 per cent compared with 23 per cent and 21 per cent in 1957 and 1954 respectively. At the same time the extent of the five-day work week increased slightly.

At first sight the proportion of employees qualifying for a two-week paid vacation after one year or less service would appear to have declined. However, it should be borne in mind that slight changes in proportions from year to year may be due to small changes in survey coverage and should, therefore, be interpreted in the light of developments or trends appearing over a number of years together.

The proportion of those office workers in establishments reporting a three-week paid vacation increased markedly from about 76 per cent in 1957 to some 82 per cent by 1958. This was also accompanied by a significant rise in the number qualifying for

such vacations after less than 15 years' service: that is, from 17 per cent in 1957 to 25 per cent in 1958.

Similarly, there has been an increase in the extent of a four-week paid vacation to over 20 per cent of the office workers surveyed, as against 16 per cent the previous year. As with plant employees, the predominant service requirement for a four-week vacation is 25 years.

The number of paid statutory holidays granted to office workers continued to increase. Employees in plants granting nine or more statutory holidays in 1958 increased to 27 per cent over 25 per cent in 1957.

The coverage under the various pension, insurance and group medical plans remained practically unchanged.

**TABLE 1—SUMMARY OF WORKING CONDITIONS OF PLANT EMPLOYEES IN CANADIAN MANUFACTURING**

NOTE: Percentages denote the proportions which plant employees of establishments reporting specific items bear to the number in all establishments covered by the survey; these are not necessarily the proportions covered by the various items.

|                                        | Percentage of Plant Employees |             |             |             |             |
|----------------------------------------|-------------------------------|-------------|-------------|-------------|-------------|
|                                        | 1953                          | 1957        | 1956        | 1955        | 1954        |

**Average Pension Paid to Retiring Autoworkers Is \$60**

The average member of the United Auto Workers of America (AFL-CIO-CLC) who retires at the present time has 25 years service to his credit and draws a pension from his employer of \$60 monthly.

More than 90,000 UAW members have received benefits from pension plans negotiated by the union.

When the union negotiated its first pension plan with the Ford Motor Company in 1949, the average worker who retired voluntarily, or involuntarily because of age, received \$39 a month in social security payments.

In the past, retirement because of disability often meant retirement without income for many UAW members.

In addition to the \$60 monthly that the average UAW member receives from his employer, the U.S. worker receives \$108 each month in social security benefits. If his wife is living and over 65 years of age, there is an additional social security benefit of \$54.30 monthly.

# STRIKES AND LOCKOUTS

## July 1958

During July, approximately 6,000 workers in Canada were involved in a total of 46 work stoppages amounting to 84,000 man-days. Although there were more work stoppages in July than in any other month since the beginning of the year, the number of workers reported on strike or locked out was below earlier totals, and the time loss in man-days was down from the previous month.\*

Of the 46 work stoppages reported during July, 14 involved 100 or more workers. Seven of these larger work stoppages had started before July, and four of the seven were still in progress at the end of the month. Four of the seven larger work stoppages which began in July also continued into August.

Among Canada's provinces, Ontario had the largest number of work stoppages, but the time loss in Ontario was not nearly as

high as British Columbia's total of 41,000 man-days. Most of the time loss in British Columbia resulted from the continuing dispute between approximately 1,000 plumbers and pipefitters and some 100 heating contractors, and the strike of seamen and other personnel of the B.C. Coastal Steamship Service of the Canadian Pacific Railway. The Coastal Steamship Service, however, resumed operations toward the end of July under a government administrator appointed under special legislation for the period pending the settlement of differences between the company and the unions representing the employees of the coastal ships.

Work stoppages, mostly small, were reported also from nearly all other provinces. In one of the few larger disputes outside Ontario and British Columbia, the Windsor, N.S. plants of the Canadian Gypsum Company remained strike-bound for the ninth consecutive month.

**TABLE 1—NUMBER OF STRIKES, WORKERS AND TIME LOSS INVOLVED, BY INDUSTRY, JULY 1958**

\*Table G-1 at the back of this issue compares, on a monthly basis, the number of strikes and lockouts in existence during 1958 and 1957. The approximate number of workers involved and the time loss resulting are also compared on a monthly basis and the number of strikes and lockouts beginning during each month is indicated.

Table G-2 deals more specifically with the stoppages involving 100 or more workers in existence

during July 1958. The approximate time loss, together with the number of workers involved, is indicated for each stoppage. The major issues and the major terms of settlement, if the stoppage has ended, are also mentioned. Other details include such information as the dates on which the stoppages began and ended and the industries in which they occurred.

# PRICES AND THE COST OF LIVING

## Consumer Price Index, August 1958

The consumer price index (1949=100) advanced 0.4 per cent from 124.7 to 125.2 between July and August 1958\*. The rise was largely due to a 1-per-cent increase in the food index from 121.4 to 122.6, which approximated the usual July-August seasonal increase.

The shelter and other commodities and services indexes also contributed to the over-all increase, while clothing and household operation eased slightly.

Fresh tomato prices, which normally drop quite sharply between the first weeks of July and August, were unusually strong and increased in the period under review, although most other fresh vegetables experienced seasonal declines. Apple prices reflected initial marketings of the new crop, while imported bananas and oranges were up. Beef prices continued to moderate slightly, and pork prices edged up. Eggs eased 4 cents a dozen.

The shelter index rose from 138.4 to 139.1, reflecting increases in rents, mortgage interest rates and property taxes.

A fractional increase in the other commodities and services index from 130.4 to 130.6 resulted from small price increases in a variety of commodities: pharmaceuticals, personal care items, gasoline, taxi fares and film.

The clothing index declined from 109.9 to 109.6 as the result of summer sales, particularly in women's and children's wear.

A fractional drop in the household operation index from 120.6 to 120.5 reflected sale prices for furniture, floor coverings and some textiles, which were partially offset by slight increases in household supplies and coal.

The index one year earlier (August 1957) was 122.6. Group indexes on that date were: food 120.2, shelter 135.3, clothing 108.2, household operation 119.7, and other commodities and services 126.9.

## City Consumer Price Indexes, July 1958

Consumer price indexes (1949=100) were lower in seven of the ten regional cities between June and July; decreases ranged from 0.2 per cent in Saint John, Montreal and Saskatoon-Regina to 0.6 per cent in

Winnipeg. The Ottawa index was unchanged while those for St. John's and Halifax rose 0.4 per cent and 0.3 per cent respectively\*.

Food indexes declined in all regional cities except St. John's and Halifax, with decreases in the four western cities larger than those that occurred in eastern regional cities. Price declines were general for a number of fresh vegetables, fats, coffee, sugar, beef and some pork cuts. Egg prices rose in all regional cities except Vancouver while bread prices were up in St. John's. Flour prices increased slightly in a number of cities.

Shelter indexes were unchanged in the three Atlantic regional cities and Winnipeg, but were up in the other six cities. Clothing indexes increased in six regional cities largely as a result of upward movement in men's wear indexes. Mixed movements were evident in the household operation group with most changes quite moderate. Electricity rates increased in Halifax, coal prices were down in Toronto but up in Vancouver while fuel oil prices declined in Saskatoon. New models in appliances were up somewhat in a number of cities. Declines in other commodities and services indexes reflected some price decreases for new passenger cars. Gasoline prices were up slightly in Montreal but down sharply in Winnipeg, where No. 2 gasoline was retailing widely at 28.9 cents per gallon at the beginning of July. Newspaper prices increased in Saskatoon.

Regional consumer price index point changes between June and July were as follows: Winnipeg -0.7 to 122.6; Edmonton-Calgary -0.6 to 121.3; Vancouver -0.5 to 124.6; Toronto -0.4 to 128.4; Saskatoon-Regina -0.3 to 121.9; Saint John -0.2 to 124.7; Montreal -0.2 to 125.0; St. John's +0.4 to 112.7†; Halifax +0.4 to 122.8. Ottawa remained unchanged at 125.4.

## Wholesale Prices, July 1958

The general wholesale price index (1935-39=100) decreased 0.2 per cent between June and July, moving from 227.4 to 227.0, which is 0.5 per cent lower than July of last year. Four of the major groups receded and only one group, vegetable products,

\*See Table F-2 at back of book.

†On base June 1951=100.

\*See Table F-1 at back of book.

# CONSUMER PRICE INDEX

Index 1949=100

Index 1949=100

registered an upward movement. The remaining three showed no change.

Animal products showed a decrease of 1.9 per cent, down from 257.2 to 252.3; non-ferrous metals declined 0.6 per cent from 163.7 to 162.8, the seventh consecutive decrease from December 1957, when the index stood at 169.3; non-metallic minerals dropped 0.1 per cent from 187.0 to 186.8 and chemical products 0.1 per cent from 182.9 to 182.7.

Vegetable products increased 1.2 per cent from 196.5 to 198.8. This also represents an increase of 1.8 per cent over the same period last year. Higher prices for potatoes, fresh fruits, western hay, livestock and poultry feeds, and vegetable oils and products largely contributed to this increase.

Indexes for textile products, wood products and iron products were unchanged at 228.4, 295.8 and 251.6 respectively.

The residential building material price index (1949=100) rose fractionally from 126.6 in June to 126.8 for July. The non-residential building material series (1949=100) also moved up from 129.0 to 129.1.

## U.S. Consumer Price Index, July 1958

The United States consumer price index (1947-49=100) rose to an all-time high during July, to 123.9 from 123.7 in mid-June. The increase was attributed to higher transportation costs and medical services.

## U.K. Index of Retail Prices, June 1958

The United Kingdom index of retail prices (Jan. 17, 1956=100) also rose to an all-time high of 110.2 at mid-June after having dropped to 109.2 at mid-May. A year earlier the index stood at 105.7.

Labour income received by Canadians in the first half of 1958 rose 2.8 per cent to \$7,622,000,000 from \$7,417,000,000 a year ago. Three of the five major industrial groups recorded gains in June and the half-year. Two recorded losses.

Labour income in June was estimated at \$1,350,000,000, up 2.1 per cent from June 1957.

Half-year totals were: agriculture, forestry, fishing, trapping and mining, \$476,000,000; manufacturing, \$2,321,000,000; construction \$543,000,000; utilities, transportation, communication, storage and trade, \$2,019,000,000; finance and services (including government) \$2,002,000,000; supplementary labour income, \$261,000,000.

# Publications Recently Received in Department of Labour Library

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institutions. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE. List No. 121.

## Accident Prevention

1. INTERNATIONAL LABOUR OFFICE. *Occupational Safety and Health in Forestry Operations*. Geneva, 1957. Pp. 184.

Partial Contents: Statistics. Legislation. Inspection. Standards and Codes for Equipment and Methods of Work. Education, Training, Propaganda. Research. Safety Organisation in Undertakings. Medical Aid. Housing Accommodation.

2. INTERNATIONAL LABOUR OFFICE. *Safety and Health in Dock Work*. Geneva, 1958. Pp. 125.

Contents: General Provisions. Wharves and Quays. Means of Access to Ships. Transport to Dockworkers by Water. Protection of Hatchways. Access to Holds. Decks. Loading and Unloading Machinery and Gear. Loading and Unloading Operations. Transport Equipment and Operations. Lifting. Carrying and Piling Material. Warehouses and Storeplaces. Dangerous Substances and Environments. Personal Protective Equipment. Medical Aid and Rescue. Personnel Facilities. Selection and Training of Dockworkers. Safety and Health Organization. Miscellaneous Provisions.

3. RUTGERS UNIVERSITY, NEW BRUNSWICK, N.J. INSTITUTE OF MANAGEMENT AND LABOR RELATIONS. *Union-Management Cooperation for Safety; the Joint Safety Program of the Forstmann Woolen Company and Local 656, Textile Workers Union of America, AFL-CIO, 1948-1956*, by Richard H. Wood and Jack Chernick. New Brunswick, 1957. Pp. 25.

This report concludes that the Forstmann Joint Safety Program has resulted in a continued good safety record. Employee representation has helped to enforce safety regulations.

## Annual Reports

4. BRITISH COLUMBIA. DEPARTMENT OF INDUSTRIAL DEVELOPMENT, TRADE, AND COMMERCE. *Report for the Year ended December 31st, 1957*. Victoria, Queen's Printer, 1958. Pp. 52.

5. CANADA. BUREAU OF STATISTICS. *Estimates of Families in Canada, 1957*. Ottawa, Printer, 1958. Pp. 10.

6. CANADA. DEPARTMENT OF CITIZENSHIP AND IMMIGRATION. STATISTICS SECTION. *Immigration Statistics, 1957*. Ottawa, 1958. Pp. 21.

7. GREAT BRITAIN. CENTRAL STATISTICAL OFFICE. *National Income and Expenditure, 1957*. London, H.M.S.O., 1957. Pp. 74.

8. GREAT BRITAIN. CHANCELLOR OF THE EXCHEQUER. *Economic Survey, 1958*. London, H.M.S.O., 1958. Pp. 59.

9. MANITOBA. DEPARTMENT OF INDUSTRY AND COMMERCE. *Annual Report for Period ending March 31st, 1957*. Winnipeg, 1958. Pp. 27.

10. NEW YORK (STATE). DEPARTMENT OF LABOR. *Report of the Industrial Commissioner, 1957*. New York, 1958. Pp. 64.

11. ONTARIO. WORKMEN'S COMPENSATION BOARD. *Annual Report, 1957*. Toronto, Queen's Printer, 1958. Pp. 40.

12. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. *A Decade of Co-operation, Achievements and Perspectives; 9th Report of the O.E.E.C.* Paris, 1958. Pp. 187.

13. SINGAPORE. LABOUR DEPARTMENT. *Annual Report, 1956*. Singapore, Government Printer, 1958. Pp. 101.

14. U.S. GOVERNMENT CONTRACT COMMITTEE. *Fourth Annual Report on Equal Job Opportunity, 1956-1957*. Washington, G.P.O., 1957. Pp. 20.

15. U.S. NATIONAL SCIENCE FOUNDATION. *Seventh Annual Report for the Fiscal Year ended June 30, 1957*. Washington, G.P.O., 1958. Pp. 279.

## Atomic Power

16. EUROPEAN PRODUCTIVITY AGENCY. *The Industrial Challenge of Nuclear Energy*. Paris, 1957. Pp. 288.

Papers given during the First Information Conference on Nuclear Energy for Management, Paris, April 1957.

Contents: Pt. 1. The Technical Aspects of Nuclear Energy. Pt. 2. The Economic Aspects of Nuclear Energy. Pt. 3. Industrial Uses of Radioisotopes. Pt. 4. The Industrial Aspects of Nuclear Energy. Pt. 5. Development of Nuclear Energy.

17. NATIONAL INDUSTRIAL CONFERENCE BOARD. *Industrial Uses of Radio-isotopes*, by John J. McMahon and Arnold Berman. New York, c1958. Pp. 86.

Briefly explains what radioisotopes are, how they are used in industry. Provides information about the Canadian and British programs.

## Automation

18. CONFERENCE ON MANUFACTURING AUTOMATION, PURDUE UNIVERSITY. 1st, 1956. *First Conference on Manufacturing Automation, Purdue University, October 22, 23, and 24, 1956.* Cleveland, Penton Publishing Company, c1956. Pp. 96.

Co-sponsored by Purdue University School of Mechanical Engineering and Dept. of Industrial Engineering, and Automation; the magazine of automatic operations.

Partial Contents: Developing Small Scale Automation. Developing Large Scale Automation. Economic Study for Automation. The Automated Plant. Designing Products for Automation.

19. POLLOCK, FREDERICK. *The Economic and Social Consequences of Automation.* Translated by W. O. Henderson and W. H. Chaloner. Oxford, Basil Blackwell, 1957. Pp. 276.

This study, based mainly on American experience, contains a historical survey of automation, a discussion of some of the problems caused by automation, and developments in the theory and practice of automation in 1955.

20. U.S. CONGRESS. JOINT ECONOMIC COMMITTEE. *Automation and Recent Trends. Hearings before the Subcommittee on Economic Stabilization of the Joint Economic Committee, Congress of the United States, Eighty-Fifth Congress, First Session, pursuant to Sec. 5(a) of Public Law 304, 79th Congress.* November 14 and 15, 1957. Washington, G.P.O., 1957. Pp. 100.

Examines current trends and the outlook for automation in banks and retail trade and from the point of view of a research scientist.

21. VAN AUKEN, KENNETH G. *Automation and its Implications. (Speech) before the New York State Council for the Social Studies, Buffalo, New York, February 22, 1958.* Washington, 1958. Pp. 15.

The speaker discusses the growth of automation, its implications for the country, social sciences, Bureau of Labor Statistics case studies, immediate effects of automation on individuals, job content changes, retraining, and future implications.

## Civil Service

22. U.S. BUREAU OF EMPLOYEES' COMPENSATION. *What Every Federal Employee should know about the Federal Employees' Compensation Act.* Rev. ed. Washington, G.P.O., 1958. Pp. 7.

23. U.S. CONGRESS. HOUSE. COMMITTEE ON POST OFFICE AND CIVIL SERVICE. *Manpower Utilization and Personnel Management in the Federal Government. Hearings*

*before the Subcommittee on Management Utilization and Departmental Personnel Management of the Committee on Post Office and Civil Service, House of Representatives, Eighty-Fourth Congress, Second Session...* Washington, G.P.O., 1957. Pp. 289.

Hearings held, Dec. 10-14, 1956.

The hearings were held to determine whether American federal government departments and agencies are doing anything to bring about a reduction in manpower and to use scientific and technical manpower more effectively.

## Disabled - Rehabilitation

24. AITKEN, ALEXANDER P. *The Rehabilitation and Re-employment of Workers disabled by Low Back Injuries; Statement presented... at the 43rd Annual Convention of the I.A.I.A.B.C., September 23, 1957, St. Paul, Minnesota.* Washington, U.S. Bureau of Labor Standards, 1957. Pp. 8.

25. U.S. CONGRESS HOUSE. COMMITTEE ON EDUCATION AND LABOR. *To amend the Vocational Rehabilitation Act. Hearing before a Subcommittee of the Committee on Education and Labor, House of Representatives, Eighty-Fifth Congress, First session of H.R. 5759, superseded by H.R. 8429, a Bill to extend for the Fiscal Year ending June 30, 1958, Grants under the Vocational Rehabilitation Act for the Planning, Preparing for, and Initiating a Substantial Nationwide Expansion of Vocational Rehabilitation Programs in the States.* Hearing held in Washington, D.C., June 10, 1957. Washington, G.P.O., 1957. Pp. 38.

## Economic Conditions

26. BURNS, ARTHUR FRANK. *Prosperity without Inflation.* New York, Fordham University Press, c1957. Pp. 88.

Consists of four lectures given at Fordham University in October, 1957. Contents: The Recent Inflation in Perspective. Dealing with Recession and Inflation. The New Environment of Monetary Policy. Public Policies for coping with Inflation.

27. U.S. LIBRARY OF CONGRESS. LEGISLATIVE REFERENCE SERVICE. *Soviet Economic Growth; a Comparison with the United States; a Study prepared for the Subcommittee on Foreign Economic Policy of the Joint Economic Committee.* Washington, G.P.O., 1957. Pp. 149.

The comparison of the economy of Russia with that of the U.S. considers the following: (1) the volume of current production in various economic sectors; (2) the rate at which this production has been growing; (3) the relative emphasis placed on consumption, investment, and other uses; and (4) the likely rates and patterns of development of the two economies in the future.

## Education

28. AMERICAN LABOR EDUCATION SERVICE, INC., NEW YORK. *The History of an Idea, 1927-1957*. New York, 1958. Pp. 47.

Journal of the American Labor Education Service, 30th anniversary issue. A history of the American Labor Education Service.

29. CANADA. BUREAU OF STATISTICS. *Statistical Review of Canadian Education, Census 1951*. Ottawa, Queen's Printer, 1958. Pp. 112.

Partial Contents: School Attendance and Years of Schooling. School Enrolment in the Canadian Provinces, 1951. Years of Schooling for the Population at School and Out of School, 1951. Number and Per Cent of the Population with 13 or More Years at School. Racial Extraction and Schooling. Education Attainment and Vocation.

## Employment Management

30. COLLINGRIDGE, J. M. *Personnel Management in the Small Firm*, by J. M. Collingridge and M. Ritchie. London, Institute of Personnel Management, 1957. Pp. 55.

The authors examine the characteristics of the small firm and describe the functions of the personnel manager. Examples are given showing how small firms have handled personnel problems. Three case studies are included.

31. DARTNELL CORPORATION. *Working Conditions in 165 Offices; Information of Value to Office Managers as a Check List on Present Conditions*. Chicago, 1957. 1 Volume. (various pagings).

Some of the topics discussed are: working hours, attendance controls, lunch periods, rest periods, vacation policies, hospital and surgical benefits, sick leave practices, merit rating, job evaluation, grievance handling, individual and/or group counselling, legal advice, athletic programs, and, automation.

## Fringe Benefits

32. ASSOCIATED INDUSTRIES OF CLEVELAND. *Employee Benefit Survey*. Cleveland, 1957. Pp. 12.

33. BORTZ, NELSON MARKLEY. *Measuring Fringe Benefit Expenditures*. (Speech) before Collective Bargaining Conference, American Management Association... Chicago, May 15, 1956. Washington, U.S. Bureau of Labor Statistics, 1956. Pp. 18.

34. U.S. MARITIME ADMINISTRATION. *Seafaring Fringe Benefits; Welfare, Pension, Employment Security, Vacations*, as of January 1, 1957. Washington, G.P.O., 1958. Pp. 2.

## Industrial Relations

35. ILLINOIS. UNIVERSITY. INSTITUTE OF LABOR AND INDUSTRIAL RELATIONS. *Industrial Relations in the New Japan*, by Solomon B. Levine. Urbana, 1957. Pp. 209-220.

A review of the trade union movement in Japan since World War II with a discussion of collective bargaining and labor disputes.

36. MONTREAL. BOARD OF TRADE. EMPLOYEE RELATIONS SECTION. *The Criminal Law and the Civil Code in Day-to-Day Employee Relations; a Panel Discussion, Thursday, October 24th, 1957*, Montreal. *Transcript of Proceedings*. Montreal, 1958. Pp. 25.

The three speakers, all lawyers, discussed the termination of employee services, the question of searching an employee, the question of mischief, that is, the destruction of property, picketing, etc. The speakers answered questions from the audience.

37. MONTREAL. BOARD OF TRADE. EMPLOYEE RELATIONS SECTION. *Management Rights; a Panel Discussion, Thursday, December 5th, 1957*, Montreal. *Transcript of proceedings*. Montreal, 1958. Pp. 26.

There were four speakers on the panel. The first speaker defined management rights. The other three speakers discussed the negotiating of management rights from the point of view of the union, management, and of an arbitrator.

38. NATIONAL ACADEMY OF ARBITRATORS. *Arbitration Today; Proceedings of the 8th Annual Meeting, Boston, Mass., Jan. 27 and 28, 1955*. Washington, Bureau of National Affairs, 1955. Pp. 211.

Partial Contents: The Factor of Ability in Labor Relations, by James J. Healy. Problems in the Arbitration of Wage Incentives, by William W. Waite. The Arbitration of Alleged Security Risks, by Benjamin C. Roberts. Arbitration by the National Railroad Adjustment Board, by Carroll R. Daugherty. Seniority Concepts, by George W. Taylor. Arbitration of Jurisdictional Disputes. The American System of Industrial Relations, by Sumner H. Slichter.

## Industry

39. CANADA. BUREAU OF STATISTICS. *General Review of the Manufacturing Industries of Canada, 1955*. Ottawa, Queen's Printer, 1958. Pp. 198.

40. EUROPEAN PRODUCTIVITY AGENCY. *Water Economy in Iron and Steel Works*. Project No. 298. Paris, O.E.E.C., 1958. Pp. 71.

Deals with water supply for the iron and steel industry in West Germany, Austria, France and Italy and legislation and regulations regarding water in these four countries.

41. NATIONAL INDUSTRIAL CONFERENCE BOARD. *Inventory Management in Industry*, by Carl G. Baumes. New York, c1958. Pp. 102.

Partial Contents: Common Inventory Objectives. How Inventory Objectives are set. Organization for Inventory Management. Establishing Standards of Performance. Trends in Inventory Administration. Measuring and evaluating Performance. Typical Inventory Reports. Seven Case Studies.

42. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. *OEEC Statistical Bulletins: Definitions and Methods. I. Indices of Industrial Production.* 3rd ed. Paris, 1958. Pp. 109.

43. U.S. BUREAU OF EMPLOYMENT SECURITY. *Blast Furnaces, Steel Works and Rolling Mills.* Washington, 1958. Pp. 9.

A survey of 157 establishments with a total employment of 517,900.

### Labour Organization

44. BRITISH COLUMBIA FEDERATION OF LABOR (CLC). *Proceedings, Second Convention, October 24th, 25th, 26th and 27th, 1957.* Vancouver, B.C. Vancouver, 1957. 1 Volume (various pagings).

45. CANADIAN LABOUR CONGRESS. RESEARCH DEPARTMENT. *The Extent of Union Organization in Canada.* Submitted to the 1st General Board meeting; Canadian Labour Congress, Montreal, May 1, 2, 3, 1957. Ottawa, 1957. Pp. 34.

46. CONFEDERATION INTERNATIONALE DES SYNDICATS CHRETIENS. *Le plein emploi; trois années d'activité internationale. 12ème Congrès, Anvers, 12-14 Décembre 1955.* Utrecht, 1956? Pp. 528.

47. NATIONAL ASSOCIATION OF MANUFACTURERS OF THE UNITED STATES OF AMERICA. INDUSTRIAL RELATIONS DIVISION. *Spotlight on Union Activities—Their Impact on Individuals, the Economy and the Public; Excerpts from Proceedings at 62nd Congress of American Industry, December 4-6, 1957.* New York, 1958. Pp. 18.

Contents: Can Labor clean its Own House, by Sylvester Petro. The Right to work, by John E. Coogan. Is the Public protected by Present Labor Laws? By Carl T. Curtis. Symposium: Individual Rights or Organized Wrongs.

48. NORTH ATLANTIC TREATY ORGANIZATION. INFORMATION DIVISION. *The Trade Unions and NATO; with a Preface by Donald MacDonald, Secretary-Treasurer of the Canadian Labour Congress.* Paris, 1957. Pp. 39.

The purpose of this pamphlet "is to examine the significance of the Atlantic Alliance from the point of view of organized labour; to assess the support which the trade unions have given to NATO; to bring out some of the problems of common concern to them and to NATO; and, finally, to urge upon trade unionists the reasons for studying the future development of the Atlantic Community."

49. NEW ZEALAND FEDERATION OF LABOUR. *Twenty-First Annual Report... for Period ending January cv, vTER.* Wellington, 1958. Pp. 15.

50. UNITED STEELWORKERS OF AMERICA. *Here's How USWA Dues Work for You.* Pittsburgh, n.d., 1958? Pp. 22.

51. WORLD FEDERATION OF TRADE UNIONS. *Report of Activity, November 1953-June 1957, presented at the 4th World Trade Union Congress, Leipzig, October 4-15, 1957.* Paris? 1958? Pp. 423.

### Occupations

52. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Machinist and Machine Operators (Metal).* Rev. ed. Ottawa, Queen's Printer, 1958. Pp. 24.

53. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Mining Occupations.* Rev. ed. Ottawa, Queen's Printer, 1957. Pp. 44.

Provides information on types of mine, mining processes and occupations, qualifications, training, earnings and hours of work, advantages and disadvantages, organizations and trends.

54. GREAT BRITAIN. CENTRAL YOUTH EMPLOYMENT EXECUTIVE. *Engineering Work for Girls.* London, H.M.S.O., 1958. Pp. 20.

Describes jobs for women in sheet metal work, plastic moulding, machine shops, assembling clocks or television sets, laboratory work, mechanical drawing, etc.

55. GREAT BRITAIN. CENTRAL YOUTH EMPLOYMENT EXECUTIVE. *Farm and Horticultural Workers.* London, H.M.S.O., 1958. Pp. 40.

Describes training, opportunities, wages and conditions of farm and horticultural workers and lists agricultural and horticultural institutes in England, Scotland and Wales.

56. GREAT BRITAIN. CENTRAL YOUTH EMPLOYMENT EXECUTIVE. *Journalism and Press Photography.* London, H.M.S.O., 1958. Pp. 47.

Describes the work of the journalist and indicates the necessary personal qualities and abilities. Provides information about educational qualifications and training and prospects.

57. GREAT BRITAIN. CENTRAL YOUTH EMPLOYMENT EXECUTIVE. *Nursing and Midwifery.* London, H.M.S.O., 1958. Pp. 40.

Contents: The Development of the Profession. Nursing in Hospital. Nursing outside the Hospital. Personal Qualities. Training. Midwifery. Conditions of Service, Openings and Prospects.

58. U.S. WOMEN'S BUREAU. *Memo to: Communities Re: The Nurse Shortage, Ideas, Studies, Programs.* Washington, G.P.O., 1958. Pp. 5.

59. U.S. WOMEN'S BUREAU. *Nurses and Other Hospital Personnel; Their Earnings and Employment Conditions.* Washington, G.P.O., 1958. Pp. 27.

## Open and Closed Shop

60. EDITORIAL RESEARCH REPORTS. *Right-to-work Laws*, by William R. McIntyre. Washington, 1957. Pp. 841-856.

A right-to-work law which prohibits compulsory union membership is in force in 18 states.

61. UNITED STEELWORKERS OF AMERICA. *Work for Rights; the Right to Union Security*. Pittsburgh, n.d., 1958? Pp. 108.

A criticism of "right-to-work" laws. Contains material in favor of union security.

## Professional Workers

62. CANADA. DEPARTMENT OF LABOUR. *Wanted... More Experts! How can We increase Our Professional and Technical Manpower Resources to fill Growing Future Demands? Eleven Leading Canadians discuss the Problems*. Ottawa, Queen's Printer, 1958. Pp. 54.

These eleven talks comprise a series of broadcasts on the "Canada at Work" radio program which is produced by the Information Branch of the Federal Department of Labour.

63. WORLD CONFEDERATION OF ORGANIZATIONS OF THE TEACHING PROFESSION. *Teacher Shortage—Causes and Remedies*. Washington, 1957. Pp. 60.

## Social Security

64. INTERNATIONAL LABOUR OFFICE. *Social Security; a Workers' Educational Manual*. Geneva, 1958. Pp. 132.

Discusses such forms of social security as family allowances, sickness and maternity insurance, pensions, workmen's compensation, unemployment insurance, medical benefits, etc.

65. UNITED NATIONS. DEPARTMENT OF SOCIAL AFFAIRS. *Economic Measures in Favour of the Family; a Survey of Laws and Administrative Regulations providing for Economic Measures in Favour of the Family in Various Countries*. New York, 1952. Pp. 175.

This survey covers legislative and administrative texts in force in 24 countries on a selected date, June 30, 1949. There are three types of measures discussed:

1. measures relating to the maintenance of the family's level of income;
2. measures relating to the maintenance of the family's pattern of consumption and expenditure; and,
3. measures relating to the maintenance of family means of subsistence.

## Unemployment

66. ILLINOIS. UNIVERSITY. INSTITUTE OF LABOR AND INDUSTRIAL RELATIONS. *Employment Effects of a Plant Shutdown in a Depressed Area*, by Richard C. Wilcock. Urbana, 1957. Pp. 1047-1052.

Summarizes some of the findings of a study of the effects of a major plant shutdown on a small southern Illinois city which already had a high level of unemployment.

67. NATIONAL PLANNING ASSOCIATION. *Depressed Industrial Areas—a National Problem; a Policy Statement by the NPA Special Committee on Depressed Areas and a report by William H. Miernyk*. Washington, 1957. Pp. 67.

"One of the criteria traditionally employed in defining depressed areas has been the percentage of the local labor force unemployed." Partial Contents: Chronic Localized Depression—Why and Where. Persistent Unemployment and Its Effects. Case Studies of Local and Area Redevelopment Activities. Redevelopment Activities at the State Level. Federal Government and Depressed Areas. The Over-All Problem of Depressed Industrial Areas.

68. WERMEL, MICHAEL THEODORE. *Supplemental Unemployment Benefit Plans; Their Economic and Industrial Implications*, by Michael T. Wermel and Geraldine M. Beideman. Pasadena, Industrial Relations Section, California Institute of Technology, 1957. Pp. 51.

Explains the types of supplemental unemployment benefit plans; discusses problems arising from these plans; and, suggests future developments.

## Wages

69. AMERICA FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS. *Severance Pay in Key Manufacturing Agreements*. Washington, 1958. Pp. 8, 10.

A comparative analysis of the major features of union-negotiated severance pay plans in manufacturing industries with 5,000 or more employees.

70. U.S. DEPARTMENT OF AGRICULTURE. *Area Variations in the Wages of Agricultural Labor in the United States*, by Sheridan T. Maitland and Dorothy Anne Fisher. Washington, G.P.O., 1958. Pp. 54.

Shows that farm wage rates cannot compete with industrial wage rates and that farm workers are attracted away from farm jobs and fewer people are likely to seek farm employment.

71. U.S. WOMEN'S BUREAU. *Digest of State Equal-Pay Laws*. Revised as of December 1, 1957. Washington, 1958? Pp. 20.

## Miscellaneous

72. CANADA, DEPARTMENT OF CITIZENSHIP AND IMMIGRATION. CANADIAN CITIZENSHIP BRANCH. *Our System of Government*. Ottawa, Queen's Printer, 1957. Pp. 47.

73. CLAGUE, EWAN. *Older Worker Placement. (Speech) before the Employers' Institute, Philadelphia, Pennsylvania, December 5, 1957*. Washington, U.S. Department of Labor, 1958. Pp. 7.

74. CLAGUE, EWAN. *Postwar Trends in Productivity; Total Private Economy and Major Sectors*. Material submitted to Joint Economic Committee for Hearings on January 1958 Economic Report of the President January 28, 1958. Washington, U.S. Bureau of Labor Statistics, 1958. Pp. 39.

75. COMMUNITY COUNCIL OF GREATER NEW YORK. BUDGET STANDARD SERVICE. *A Family Budget Standard, for the Use of Social and Health Agencies in New York City*. New York, Community Council of Greater New York, Research Dept., 1955. Pp. 62.

The Family Budget Standard has these purposes:

1. To provide current reference materials on family living costs, typical requirements, retail prices, and related data.
2. To provide a basis for establishing equitable fee scales consistent with ability to pay for services rendered by public or voluntary welfare and health agencies, and to determine eligibility for free services.
3. To facilitate counselling on problems of family financial management.
4. To provide budget material for in-service training programs."

76. LIKERT, RENSIS, ed. *Some Applications of Behavioural Research*. Edited by Rensis Likert and Samuel P. Hayes, Jr. Paris, UNESCO, 1957. Pp. 333.

Contents: Behavioural Research: a Guide for Effective Action, by Rensis Likert. Administrative Leadership and Organizational Effectiveness, by Stanley E. Seashore. The Training of Leaders for Effective Human Relations, by Stanley E. Seashore. Human Factors in Research Administration, by Hollis W. Peter. Training Foreign Nationals in the United States, by Simon O. Lesser and Hollis W. Peter. Group Influence in Marketing and Public Relations, by Francis S. Bourne. Psychological Surveys in Business Forecasting, by Irving Morrissett. Relating Behavioural Research to the Problems of Organizations, by Samuel P. Hayes.

77. MONA, JAMAICA. UNIVERSITY COLLEGE OF THE WEST INDIES. INSTITUTE OF SOCIAL AND ECONOMIC RESEARCH. *Caribbean Studies: a Symposium*. Edited by Vera Rubin. Mona, 1957. Pp. 124.

Partial Contents: Contemporary Social-Rural Types in the Caribbean Region, by Elena Padilla. Race Relations in Caribbean Society, by Eric Williams. The Present Status of the Social Sciences in the British Caribbean, by Lloyd Braithwaite. Cultural Perspectives in Caribbean Research, by Vera Rubin.

78. NADLER, GERALD. *Work Simplification*. New York, McGraw-Hill, 1957. Pp. 292.

"Work simplification is the systematic analysis of any type of work to 1. Eliminate unnecessary work. 2. Arrange remaining work in the best order possible. 3. Make certain that the right method is used." The book tells how to increase productivity, reduce fatigue, cut down on accidents, and save materials.

79. ORGANIZATION FOR EUROPEAN CO-OPERATION. *The Search for and Exploitation of Crude Oil and Natural Gas in the OEEC Area*. Paris, 1957. Pp. 79.

"The aim of the present study is to make known... the exact position at the end of 1956, in the Member countries and in Spain and Yugoslavia, with regard to the following points:

- (1) mining law and fiscal regulations with regard to hydrocarbons;
- (2) oil geology;
- (3) discoveries of oil and gas classified geographically and geologically;
- (4) estimated classification of the various regions in the O.E.E.C. area having regard to their oil prospects;
- (5) statistics for past years and up to the end of 1956 for the various aspects of prospecting and exploitation."

80. TORONTO. UNIVERSITY. COMMERCE CLUB. *The Commerce Journal, 1958*. Toronto, 1958. Pp. 74.

Partial Contents: United States Investment in Canada, by C. D. Howe. Public Review Board, of the U.A.W., by Lewis Carliner. Management and Electronic Data Processing, by J. E. Tapsell. The Teamsters Union, by Andrea Brewin.

Two important studies, one on labour legislation and one on trade unionism, appeared in the July issue of *Industrial Relations*, published by Laval University.

One of these articles, "Labour Legislation, Freedom, Fear and Conflict," by Roger Chartier, Professor of Industrial Relations at Laval, deals with the conflicting influence on labour legislation of two forces, freedom and fear. The writer believes that in Quebec, legislation, inspired by fear, has taken the direction of prevention and restriction. He traces the sources of this fear, and tries to lay the intellectual groundwork of a more enlightened view which should pave the way for legislation inspired rather by respect for the freedom of the parties involved.

The second article, "British Unions: A Cultural Analysis," by Prof. W. Campbell Balfour of the University of South Wales, describes the development of the labour movement in England and its influence on English society, by contact with which it has itself been modified.

Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage-earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners of the co-operative firms.

## D—National Employment Service Statistics

Tables D-1 to D-5 are based on regular statistical reports from local offices of the National Employment Service. These statistics are compiled from two different reporting forms, UIC 751: statistical report on employment operations by industry, and UIC 757: inventory of registrations and vacancies by occupation. The data on applicants and vacancies in these two reporting forms are not identical.
